ASSEMBLED CHEMICAL WEAPONS ASSESSMENT

Blue Grass Army Depot Technology Decision

A Partnership for Safe Chemical Weapons Destruction

ACWA Information Line
(888) 482-4312

The Department of Defense's agency-preferred alternative is neutralization followed by supercritical water oxidation.

Other technologies under consideration include:

- Electrochemical oxidation
- Neutralization followed by transpiring wall supercritical water oxidation and gas phase chemical reduction
- Baseline incineration

Program Activities:

- Final Site Specific Environmental Impact Statement for Blue Grass was completed and distributed in December 2002
- Environmental Impact Statement public record will close in late January
- Record of Decision is expected in early 2003
- Request for Proposal will be released after the Record of Decision is signed
