Mike,

Thanks for the note. We had been scheduled with David K last Friday, but his plane had a mechanical and he had to cancel. I understand it is now rescheduled for next week.

We don't quite understand the deal and are looking forward to learning more. Our primary concerns are the effects on our RSA license and IP issues. I'll keep you posted as our thinking develops.

Dan

Dan -

Thanks for the heads up. We are moving ahead with the STT eval, Barb Fox just emailed me to set up the next technical meeting. What's up on the Terisa deal ? Just curious what you are thinking since I haven't heard since we last talked.

Mike
