You can specify different security settings for different "zones" of web content.
Zone:
Internet zone
Internet zone
This site contains all Web sites you haven't placed in other zones.
Set the security level for this zone:
High (most secure)
Exclude content that could damage your computer
Medium (more secure)
Warn before running potentially damaging content.
Low (least secure)
Do not warn before running potentially damaging content.
Custom (for expert users)
Base security on settings you choose:
Cancel
OK
