5. For the purposes of subheading 7018.10.20, the term "imitation precious or semiprecious stones" means glass made into shapes suitable for use in jewelry or for other ornamental purposes in a manner similar to natural gemstones, whether or not in imitation thereof, but does not include natural gemstones, synthetic gemstones, reconstructed natural gemstones or imitation pearls.

Statistical Note

1. For the purposes of headings 7003 and 7004, in determining the surface area of cast or rolled glass having irregular surfaces (such as corrugated glass), superficial area shall be used.

SECTION XIV

NATURAL OR CULTURED PEARLS, PRECIOUS OR SEMIPRECIOUS STONES, PRECIOUS METALS, METALS CLAD WITH PRECIOUS METAL, AND ARTICLES THEREOF; IMITATION JEWELRY; COIN

CHAPTER 71

NATURAL OR CULTURED PEARLS, PRECIOUS OR SEMIPRECIOUS STONES, PRECIOUS METALS, METALS CLAD WITH PRECIOUS METAL, AND ARTICLES THEREOF; IMITATION JEWELRY; COIN

Notes

1. Subject to note 1(a) to section VI and except as provided below, all articles consisting wholly or partly:

   (a) Of natural or cultured pearls or of precious or semiprecious stones (natural, synthetic or reconstructed), or

   (b) Of precious metal or of metal clad with precious metal, are to be classified in this chapter.

2. (a) Headings 7113, 7114 and 7115 do not cover articles in which precious metal or metal clad with precious metal is present as minor constituents only, such as minor fittings or minor ornamentation (for example, monograms, ferrules and rims), and paragraph (b) of the foregoing note does not apply to such articles.

   (b) Heading 7116 does not cover articles containing precious metal or metal clad with precious metal (other than as minor constituents).

3. This chapter does not cover:

   (a) Amalgams of precious metal or colloidal precious metal (heading 2843);

   (b) Sterile surgical suture materials, dental fillings or other goods of chapter 30;

   (c) Goods of chapter 32 (for example, lustres);

   (d) Supported catalysts (heading 3815);

   (e) Articles of heading 4202 or 4203 referred to in note 2(B) to chapter 42;

   (f) Articles of heading 4303 or 4304;

   (g) Goods of section XI (textiles and textile articles);

   (h) Footwear, headgear or other articles of chapter 64 or 65;

   (ij) Umbrellas, walking-sticks or other articles of chapter 66;

   (k) Abrasive goods of heading 6804 or 6805 or chapter 82, containing dust or powder of precious or semiprecious stones (natural or synthetic); articles of chapter 82 with a working part of precious or semiprecious stones (natural, synthetic or reconstructed); machinery, mechanical appliances or electrical goods, or parts thereof, of section XVI. However, articles and parts thereof, wholly of precious or semiprecious stones (natural, synthetic or reconstructed) remain classified in this chapter, except unmounted worked sapphires and diamonds for styli (heading 8522);

   (l) Articles of chapter 90, 91 or 92 (scientific instruments, clocks and watches, musical instruments);

   (m) Arms or parts thereof (chapter 93);

   (n) Articles covered by note 2 to chapter 95;

   (o) Articles classified in chapter 96 by virtue of note 4 to that chapter; or

   (p) Original sculptures or statuary (heading 9703), collectors' pieces (heading 9705) or antiques of an age exceeding one hundred years (heading 9706), other than natural or cultured pearls or precious or semiprecious stones.

4. (a) The expression "precious metal" means silver, gold and platinum.

   (b) The expression "platinum" means platinum, iridium, osmium, palladium, rhodium and ruthenium.

   (c) The expression "precious or semiprecious stones" does not include any of the substances specified in note 2(b) to chapter 96.

5. For the purposes of this chapter, any alloy (including a sintered mixture and an inter-metallic compound) containing precious metal is to be treated as an alloy of precious metal if any one precious metal constitutes as much as 2 percent, by weight, of the alloy. Alloys of precious metal are to be classified according to the following rules:

   (a) An alloy containing 2 percent or more, by weight, of platinum is to be treated as an alloy of platinum;

   (b) An alloy containing 2 percent or more, by weight, of gold but no platinum, or less than 2 percent, by weight, of platinum, is to be treated as an alloy of gold;

   (c) Other alloys containing 2 percent or more, by weight, of silver are to be treated as alloys of silver.

6. Except where the context otherwise requires, any reference in the tariff schedule to precious metal or to any particular precious metal includes a reference to alloys treated as alloys of precious metal or of the particular metal in accordance with the rules in note 5 above, but not to metal clad with precious metal or to base metal or non-metals plated with precious metal.

7. Throughout the tariff schedule the expression "metal clad with precious metal" means material made with a base of metal upon one or more surfaces of which there is affixed by soldering, brazing, welding, hot-rolling or similar mechanical means a covering of precious metal. Except where the context otherwise requires, the expression also covers base metal inlaid with precious metal.

8. Subject to note 1(a) to section VI, goods answering to a description in heading 7112 are to be classified in that heading and in no other heading of the tariff schedule.

9. For the purposes of heading 7113, the expression "articles of jewelry" means:

   (a) Any small objects of personal adornment (gem-set or not) (for example, rings, bracelets, necklaces, brooches, earrings, watch chains, fobs, pendants, tie pins, cuff links, dress studs, religious or other medals and insignia); and

   (b) Articles of personal use of a kind normally carried in the pocket, in the handbag or on the person (such as cigarette cases, powder boxes, chain purses or pill boxes).

10. For the purposes of heading 7114, the expression "articles of goldsmiths' or silversmiths' wares" includes such articles as ornaments, tableware, toilet-ware, smokers' articles and other articles of household, office or religious use.

11. For the purposes of heading 7117, the expression "imitation jewelry" means articles of jewelry within the meaning of paragraph (a) of note 9 above (but not including buttons or other articles of heading 9606, or dress combs, hair slides or the like, or hairpins, of heading 9615), not incorporating natural or cultured pearls, precious or semiprecious stones (natural, synthetic or reconstructed) nor (except as plating or as minor constituents) precious metal or metal clad with precious metal.

Subheading Notes

1. For the purposes of subheadings 7106.10, 7108.11, 7110.11, 7110.21, 7110.31 and 7110.41, the expressions "powder" and "in powder form" mean products of which 90 percent or more by weight passes through a sieve having a mesh aperture of 0.5 mm.

2. Notwithstanding the provisions of note 4(b), for the purposes of subheadings 7110.11 and 7110.19, the expression "platinum" does not include iridium, osmium, palladium, rhodium or ruthenium.

3. For the classification of alloys in the subheadings of heading 7110, each alloy is to be classified with that metal, platinum, palladium, rhodium, iridium, osmium or ruthenium, which predominates by weight over each other of these metals.

Additional U.S. Notes

1. For the purposes of subchapter II, unless the context otherwise requires:

   (a) The term "unwrought" refers to metals, whether or not refined, in the form of ingots, blocks, lumps, billets, cakes, slabs, pigs, cathodes, anodes, briquettes, cubes, sticks, grains, sponge, pellets, shot and similar manufactured primary forms, but does not cover rolled, forged, drawn or extruded products, tubular products or cast or sintered forms which have been machined or processed otherwise than by simple trimming, scalping or descaling;

   (b) The term "semimanufactured" refers to wrought metal products in the form of bars, rods, sections, plates, sheets, strips, wire, tubes, pipes and hollow bars, and to powder (other than primary metals in powder form);

   (c) The term "waste and scrap" refers to materials and articles of metals which are second-hand or waste or refuse, or are obsolete, defective or damaged, and which are fit only for the recovery of the metal content or for use in the manufacture of chemicals, and does not include metals in unwrought form or metal-bearing materials provided for in heading 2616.

2. Coin provided for in heading 7118 which is currently in circulation in any country and is imported for monetary purposes shall be admitted without formal customs consumption entry or the payment of duty. This does not affect any requirements under other provisions of law to the effect that transfers of coin into or through the United States, in an amount exceeding $10,000 on any one occasion, shall be reported as described therein.

3. (a) Notwithstanding any provision in additional U.S. note 5 to chapter 91, any article of jewelry provided for in heading 7113 which is the product of the Virgin Islands, Guam, or American Samoa (including any such article which contains any foreign component) shall be eligible for the benefits provided in paragraph (h) of additional U.S. note 5 to chapter 91, subject to the provisions and limitations of that note and of paragraphs (b), (c), and (d) of this note.

   (b) Nothing in this note shall result in an increase or a decrease in the aggregate amount referred to in paragraph (h)(iii) of, or the quantitative limitation otherwise established pursuant to the requirements of, additional U.S. note 5 to chapter 91.

   (c) Nothing in this note shall be construed to permit a reduction in the amount available to watch producers under paragraph (h)(iv) of additional U.S. note 5 to chapter 91.

   (d) The Secretary of Commerce and the Secretary of the Interior shall issue such regulations, not inconsistent with the provisions of this note and additional U.S. note 5 to chapter 91, as the Secretaries determine necessary to carry out their respective duties under this note. Such regulations shall not be inconsistent with substantial transformation requirements but may define the circumstances under which articles of jewelry shall be deemed to be ‘units’ for purposes of the benefits, provisions, and limitations of additional U.S. note 5 to chapter 91.

   (e) Notwithstanding any other provision of law, during the 2-year period beginning 45 days after the date of the enactment of this note, any article of jewelry provided for in heading 7113 that is assembled in the Virgin Islands, Guam, or American Samoa shall be treated as a product of the Virgin Islands, Guam, or American Samoa for purposes of this note and General Note 3(a)(iv) of this Schedule.

SECTION XV

BASE METALS AND ARTICLES OF BASE METAL

Notes

1. This section does not cover:

   (a) Prepared paints, inks or other products with a basis of metallic flakes or powder (headings 3207 to 3210, 3212, 3213 or 3215);

   (b) Ferrocerium or other pyrophoric alloys (heading 3606);

   (c) Headgear or parts thereof of heading 6506 or 6507;

   (d) Umbrella frames or other articles of heading 6603;

   (e) Goods of chapter 71 (for example, precious metal alloys, base metal clad with precious metal, imitation jewelry);

   (f) Articles of section XVI (machinery, mechanical appliances and electrical goods);

   (g) Assembled railway or tramway track (heading 8608) or other articles of section XVII (vehicles, ships and boats, aircraft);

   (h) Instruments or apparatus of section XVIII, including clock or watch springs;

   (ij) Lead shot prepared for ammunition (heading 9306) or other articles of section XIX (arms and ammunition);

   (k) Articles of chapter 94 (for example, furniture, mattress supports, lamps and lighting fittings, illuminated signs, prefabricated buildings);

   (l) Articles of chapter 95 (for example, toys, games, sports equipment);

   (m) Hand sieves, buttons, pens, pencil-holders, pen nibs or other articles of chapter 96 (miscellaneous manufactured articles); or

   (n) Articles of chapter 97 (for example, works of art).

2. Throughout the tariff schedule, the expression "parts of general use" means:

   (a) Articles of heading 7307, 7312, 7315, 7317 or 7318 and similar articles of other base metals;

   (b) Springs and leaves for springs, of base metal, other than clock or watch springs (heading 9114); and

   (c) Articles of heading 8301, 8302, 8308 or 8310 and frames and mirrors, of base metal, of heading 8306.

   In chapters 73 to 76 and 78 to 82 (but not in heading 7315) references to parts of goods do not include references to parts of general use as defined above.

   Subject to the preceding paragraph and to note 1 to chapter 83, the articles of chapter 82 or 83 are excluded from chapters 72 to 76 and 78 to 81.

3. Throughout the schedule, the expression "base metals" means: iron and steel, copper, nickel, aluminum, lead, zinc, tin, tungsten (wolfram), molybdenum, tantalum, magnesium, cobalt, bismuth, cadmium, titanium, zirconium, antimony, manganese, beryllium, chromium, germanium, vanadium, gallium, hafnium, indium, niobium (columbium), rhenium and thallium.

4. Throughout the schedule, the term "cermets" means products containing a microscopic heterogeneous combination of a metallic component and a ceramic component. The term "cermets" includes sintered metal carbides (metal carbides sintered with a metal).

5. Classification of alloys (other than ferroalloys and master alloys as defined in chapters 72 and 74):

   (a) An alloy of base metals is to be classified as an alloy of the metal which predominates by weight over each of the other metals.

   (b) An alloy composed of base metals of this section and of elements not falling within this section is to be treated as an alloy of base metals of this section if the total weight of such metals equals or exceeds the total weight of the other elements present.

   (c) In this section the term "alloys" includes sintered mixtures of metal powders, heterogeneous intimate mixtures obtained by melting (other than cermets) and intermetallic compounds.

6. Unless the context otherwise requires, any reference in the tariff schedule to a base metal includes a reference to alloys which, by virtue of note 5 above, are to be classified as alloys of that metal.

7. Classification of composite articles:

   Except where the headings otherwise require, articles of base metal (including articles of mixed materials treated as articles of base metal under the General Rules of Interpretation) containing two or more base metals are to be treated as articles of the base metal predominating by weight over each of the other metals. For this purpose:

   (a) Iron and steel, or different kinds of iron or steel, are regarded as one and the same metal;

   (b) An alloy is regarded as being entirely composed of that metal as an alloy of which, by virtue of note 5, it is classified; and

   (c) A cermet of heading 8113 is regarded as a single base metal.

8. In this section, the following expressions have the meanings hereby assigned to them:

   (a) Waste and scrap

   Metal waste and scrap from the manufacture or mechanical working of metals, and metal goods definitely not usable as such because of breakage, cutting-up, wear or other reasons.

   (b) Powders

   Products of which 90 percent or more by weight passes through a sieve having a mesh aperture of 1 mm.

Additional U.S. Note

1. For the purposes of this section, the term "unwrought" refers to metal, whether or not refined, in the form of ingots, blocks, lumps, billets, cakes, slabs, pigs, cathodes, anodes, briquettes, cubes, sticks, grains, sponge, pellets, flattened pellets, rounds, rondelles, shot and similar manufactured primary forms, but does not cover rolled, forged, drawn or extruded products, tubular products or cast or sintered forms which have been machined or processed otherwise than by simple trimming, scalping or descaling.

(ij) Semifinished products

Continuous cast products of solid section, whether or not subjected to primary hot-rolling; and

Other products of solid section, which have not been further worked than subjected to primary hot-rolling or roughly shaped by forging, including blanks for angles, shapes or sections.

These products are not presented in coils.

(k) Flat-rolled products

Rolled products of solid rectangular (other than square) cross section, which do not conform to the definition at (ij) above in the form of:

- coils of successively superimposed layers, or

- straight lengths, which if of a thickness less than 4.75 mm are of a width measuring at least 10 times the thickness or if of a thickness of 4.75 mm or more are of a width which exceeds 150 mm and measures at least twice the thickness.

Flat-rolled products include those with patterns in relief derived directly from rolling (for example, grooves, ribs, checkers, tears, buttons, lozenges) and those which have been perforated, corrugated or polished, provided that they do not thereby assume the character of articles or products of other headings.

Flat-rolled products of a shape other than rectangular or square, of any size, are to be classified as products of a width of 600 mm or more, provided that they do not assume the character of articles or products of other headings.

Hot-rolled products in irregularly wound coils, which have a solid cross section in the shape of circles, segments of circles, ovals, rectangles (including squares), triangles or other convex polygons (including "flattened circles" and "modified rectangles", of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). These products may have indentations, ribs, grooves or other deformations produced during the rolling process (reinforcing bars and rods).

(m) Other bars and rods

Products which do not conform to any of the definitions at (ij), (k) or (l) above or to the definition of wire, which have a uniform solid cross section along their whole length in the shape of circles, segments of circles, ovals, rectangles (including squares), triangles or other convex polygons (including "flattened circles" and "modified rectangles", of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). These products may:

- have indentations, ribs, grooves or other deformations produced during the rolling process (reinforcing bars and rods);

- be twisted after rolling.

(n) Angles, shapes and sections

Products having a uniform solid cross section along their whole length which do not conform to any of the definitions at (ij), (k), (l) or (m) above or to the definition of wire.

Chapter 72 does not include products of heading 7301 or 7302.

(p) Hollow drill bars and rods

Hollow bars and rods of any cross section, suitable for drills, of which the greatest external dimension of the cross section exceeds 15 mm but does not exceed 52 mm, and of which the greatest internal dimension does not exceed one half of the greatest external dimension. Hollow bars and rods of iron or steel not conforming to this definition are to be classified in heading 7304.

2. Ferrous metals clad with another ferrous metal are to be classified as products of the ferrous metal predominating by weight.

3. Iron or steel products obtained by electrolytic deposition, by pressure casting or by sintering are to be classified according to their form, their composition and their appearance, in the headings of this chapter appropriate to similar hot-rolled products.

2. For the classification of ferroalloys in the subheadings of heading 7202 the following rule should be observed:

   A ferroalloy is considered as binary and classified under the relevant subheading (if it exists) if only one of the alloy elements exceeds the minimum percentage laid down in chapter note 1(c); by analogy, it is considered respectively as ternary or quaternary if two or three alloy elements exceed the minimum percentage.

CHAPTER 73

ARTICLES OF IRON OR STEEL

Notes

1. In this chapter the expression "cast iron" applies to products obtained by casting in which iron predominates by weight over each of the other elements and which do not comply with the chemical composition of steel as defined in Note 1(d) to chapter 72.

2. In this chapter the word "wire" means hot- or cold-formed products of any cross-sectional shape, of which no cross-sectional dimension exceeds 16 mm.

Additional U.S. Notes

1. For the purposes of heading 7304 or 7306, the rate of duty "Free (C)" appearing in the "Special" subcolumn applies only to tubes and pipes with attached fittings, suitable for conducting gases or liquids.

2. For the purposes of subheading 7307.19.30, the expression "ductile fittings" refers to fittings which contain over 2.5 percent carbon and over 0.02 percent of magnesium or of magnesium and cerium, by weight.

CHAPTER 74

COPPER AND ARTICLES THEREOF

Note

1. In this chapter the following expressions have the meanings hereby assigned to them:

(a) Refined copper

Metal containing at least 99.85 percent by weight of copper; or

Metal containing at least 97.5 percent by weight of copper, provided that the content by weight of any other element does not exceed the limit specified in the following table:

TABLE - Other elements

Element		Limiting content percent by weight
Ag	Silver	0.25
As	Arsenic	0.5
Cd	Cadmium	1.3
Cr	Chromium	1.4
Mg	Magnesium	0.8
Pb	Lead	1.5
S	Sulfur	0.7
Sn	Tin	0.8
Te	Tellurium	0.8
Zn	Zinc	1
Zr	Zirconium	0.3
Other elements*, each		0.3

* Other elements are, for example, Al, Be, Co, Fe, Mn, Ni, Si.

(b) Copper alloys

Metallic substances other than unrefined copper in which copper predominates by weight over each of the other elements, provided that:

(i) The content by weight of at least one of the other elements is greater than the limit specified in the foregoing table; or

(ii) The total content by weight of such other elements exceeds 2.5 percent.

(c) Master alloys

Alloys containing with other elements more than 10 percent by weight of copper, not usefully malleable and commonly used as an additive in the manufacture of other alloys or as deoxidants, desulfurizing agents or for similar uses in the metallurgy of nonferrous metals. However, copper phosphide (phosphor copper) containing more than 15 percent by weight of phosphorus falls in heading 2848.

(d) Bars and rods

Rolled, extruded, drawn or forged products, not in coils, which have a uniform solid cross section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including "flattened circles" and "modified rectangles", of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross section may have corners rounded along their whole length. The thickness of such products which have a rectangular (including "modified rectangular") cross section exceeds one-tenth of the width. The expression also covers cast or sintered products, of the same forms and dimensions, which have been subsequently worked after production (otherwise than by simple trimming or descaling), provided that they have not thereby assumed the character of articles or products of other headings.

Wire bars and billets with their ends tapered or otherwise worked simply to facilitate their entry into machines for converting them into, for example, drawing stock (wire rod) or tubes, are, however, to be taken to be unwrought copper of heading 7403.

(e) Profiles

Rolled, extruded, drawn, forged or formed products, coiled or not, of a uniform cross section along their whole length, which do not conform to any of the definitions of bars, rods, wire, plates, sheets, strip,foil, tubes or pipes. The expression also covers cast or sintered products, of the same forms, which have been subsequently worked after production (otherwise than by simple trimming or descaling), provided that they have not thereby assumed the character of articles or products of other headings.

(f) Wire

Rolled, extruded or drawn products, in coils, which have a uniform solid cross section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including "flattened circles" and "modified rectangles", of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross section may have corners rounded along their whole length. The thickness of such products which have a rectangular (including "modified rectangular") cross section exceeds one-tenth of the width.

In the case of heading 7414, however, the term "wire" applies only to products, whether or not in coils, of any cross-sectional shape, of which no cross-sectional dimension exceeds 6 mm.

(g) Plates, sheets, strip and foil

Flat-surfaced products (other than the unwrought products of heading 7403), coiled or not, of solid rectangular (other than square) cross section with or without rounded corners (including "modified rectangles" of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel) of a uniform thickness, which are:

- of rectangular (including square) shape with a thickness not exceeding one-tenth of the width,

- of a shape other than rectangular or square, of any size, provided that they do not assume the character of articles or products of other headings.

Headings 7409 and 7410 apply, inter alia, to plates, sheets, strip and foil with patterns (for example,grooves, ribs, checkers, tears, buttons, lozenges) and to such products which have been perforated, corrugated, polished or coated, provided that they do not thereby assume the character of articles or products of other headings.

(h) Tubes and pipes

Hollow products, coiled or not, which have a uniform cross section with only one enclosed void along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons, and which have a uniform wall thickness. Products with a rectangular (including square), equilateral triangular or regular convex polygonal cross section, which may have corners rounded along their whole length, are also to be taken to be tubes and pipes provided the inner and outer cross sections are concentric and have the same form and orientation. Tubes and pipes of the foregoing cross sections may be polished, coated, bent, threaded, drilled, waisted, expanded, cone-shaped or fitted with flanges, collars or rings.

Subheading Note

1. In this chapter the following expressions have the meanings hereby assigned to them:

   (a) Copper-zinc base alloys (brasses)

   Alloys of copper and zinc, with or without other elements. When other elements are present:

   - zinc predominates by weight over each of such other elements;

   - any nickel content by weight is less than 5 percent (see copper-nickel-zinc alloys (nickel silvers)); and

   - any tin content by weight is less than 3 percent (see copper-tin alloys (bronzes)).

   (b) Copper-tin base alloys (bronzes)

   Alloys of copper and tin, with or without other elements. When other elements are present, tin predominates by weight over each of such other elements, except that when the tin content is 3 percent or more the zinc content by weight may exceed that of tin but must be less than 10 percent.

   (c) Copper-nickel-zinc base alloys (nickel silvers)

   Alloys of copper, nickel and zinc, with or without other elements. The nickel content is 5 percent or more by weight (see copper-zinc alloys (brasses)).

   (d) Copper-nickel base alloys

   Alloys of copper and nickel, with or without other elements but in any case containing by weight not more than 1 percent of zinc. When other elements are present, nickel predominates by weight over each of such other elements.

Additional U.S. Note

1. The deduction provided for in additional U.S. note 1 to chapter 26 shall apply to cement copper and copper precipitates of subheading 7401.20.

Statistical Note

I. For the purposes of this chapter, the term "beryllium copper master alloy" refers to master alloys which contain by weight at least 3 percent but not more than 10 percent beryllium.

CHAPTER 75

NICKEL AND ARTICLES THEREOF

Note

1. In this chapter the following expressions have the meanings hereby assigned to them:

(a) Bars and rods

Rolled, extruded, drawn or forged products, not in coils, which have a uniform solid cross section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including "flattened circles" and "modified rectangles", of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross section may have corners rounded along their whole length. The thickness of such products which have a rectangular (including "modified rectangular") cross section exceeds one-tenth of the width. The expression also covers cast or sintered products, of the same forms and dimensions, which have been subsequently worked after production (otherwise than by simple trimming or descaling), provided that they have not thereby assumed the character of articles or products of other headings.

(b) Profiles

Rolled, extruded, drawn, forged or formed products, coiled or not, of a uniform cross section along their whole length, which do not conform to any of the definitions of bars, rods, wire, plates, sheets, strip, foil, tubes or pipes. The expression also covers cast or sintered products, of the same forms, which have been subsequently worked after production (otherwise than by simple trimming or descaling), provided that they have not thereby assumed the character of articles or products of other headings.

(c) Wire

Rolled, extruded or drawn products, in coils, which have a uniform solid cross section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including "flattened circles" and "modified rectangles", of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross section may have corners rounded along their whole length. The thickness of such products which have a rectangular (including "modified rectangular") cross section exceeds one-tenth of the width.

(d) Plates, sheets, strip and foil

Flat-surfaced products (other than the unwrought products of heading 7502), coiled or not, of solid rectangular (other than square) cross section with or without rounded corners (including "modified rectangles" of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel) of a uniform thickness, which are:

- of rectangular (including square) shape with a thickness not exceeding one-tenth of the width,

- of a shape other than rectangular or square, of any size, provided that they do not assume the character of articles or of products of other headings.

Heading 7506 applies, inter alia, to plates, sheets, strip and foil with patterns (for example, grooves, ribs, checkers, tears, buttons, lozenges) and to such products which have been perforated, corrugated, polished or coated, provided that they do not thereby assume the character of articles or of products of other headings.

(e) Tubes and pipes

Hollow products, coiled or not, which have a uniform cross section with only one enclosed void along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons, and which have a uniform wall thickness. Products with a rectangular (including square), equilateral triangular or regular convex polygonal cross section, which may have corners rounded along their whole length, are also to be taken to be tubes and pipes provided the inner and outer cross sections are concentric and have the same form and orientation. Tubes and pipes of the foregoing cross sections may be polished, coated, bent, threaded, drilled, waisted, expanded, cone-shaped or fitted with flanges, collars or rings.

CHAPTER 76

ALUMINUM AND ARTICLES THEREOF

Note

1. In this chapter the following expressions have the meanings hereby assigned to them:

(a) Bars and rods

Rolled, extruded, drawn or forged products, not in coils, which have a uniform solid cross section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including "flattened circles" and "modified rectangles", of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross section may have corners rounded along their whole length. The thickness of such products which have a rectangular (including "modified rectangular") cross section exceeds one-tenth of the width. The expression also covers cast or sintered products, of the same forms and dimensions, which have been subsequently worked after production (otherwise than by simple trimming or descaling), provided that they have not thereby assumed the character of articles or products of other headings.

(b) Profiles

Rolled, extruded, drawn, forged or formed products, coiled or not, of a uniform cross section along their whole length, which do not conform to any of the definitions of bars, rods, wire, plates, sheets, strip, foil, tubes or pipes. The expression also covers cast or sintered products, of the same forms, which have been subsequently worked after production (otherwise than by simple trimming or descaling), provided that they have not thereby assumed the character of articles or products of other headings.

(c) Wire

Rolled, extruded or drawn products, in coils, which have a uniform solid cross section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including "flattened circles" and "modified rectangles", of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross section may have corners rounded along their whole length. The thickness of such products which have a rectangular (including "modified rectangular") cross section exceeds one-tenth of the width.

(d) Plates, sheets, strip and foil

Flat-surfaced products (other than the unwrought products of heading 7601), coiled or not, of solid rectangular (other than square) cross section with or without rounded corners (including "modified rectangles" of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel) of a uniformthickness, which are:

- of rectangular (including square) shape with a thickness not exceeding one-tenth of the width,

- of a shape other than rectangular or square, of any size, provided that they do not assume the character of articles or products of other headings.

Headings 7606 and 7607 apply, inter alia, to plates, sheets, strip and foil with patterns (for example, grooves, ribs, checkers, tears, buttons, lozenges) and to such products which have been perforated, corrugated, polished or coated, provided that they do not thereby assume the character of articles or products of other headings.

(e) Tubes and pipes

Hollow products, coiled or not, which have a uniform cross section with only one enclosed void along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons, and which have a uniform wall thickness. Products with a rectangular (including square), equilateral triangular or regular convex polygonal cross section, which may have corners rounded along their whole length, are also to be considered as tubes and pipes provided the inner and outer cross sections are concentric and have the same form and orientation. Tubes and pipes of the foregoing cross sections may be polished, coated, bent, threaded, drilled, waisted, expanded, cone-shaped or fitted with flanges, collars or rings.

Subheading Notes

1. In this chapter the following expressions have the meanings hereby assigned to them:

   (a) Aluminum, not alloyed

   Metal containing by weight at least 99 percent of aluminum, provided that the content by weight of any other element does not exceed the limit specified in the following table:

TABLE - Other elements

Element	Limiting content percent by weight
Fe + Si (iron plus silicon)	1
Other elements[(1)], each	0.1[(2)]

[(1)] Other elements are, for example, Cr, Cu, Mg, Mn, Ni, Zn.

[(2)] Copper is permitted in a proportion greater than 0.1 percent but not more than 0.2 percent, provided that neither the chromium nor manganese content exceeds 0.05 percent.

   (b) Aluminum alloys

   Metallic substances in which aluminum predominates by weight over each of the other elements, provided that:

   (i) The content by weight of at least one of the other elements or of iron plus silicon taken together is greater than the limit specified in the foregoing table; or

   (ii) The total content by weight of such other elements exceeds 1 percent.

2. Notwithstanding the provisions of chapter note 1(c), for the purposes of subheading 7616.91 the term "wire" applies only to products, whether or not in coils, of any cross-sectional shape, of which no cross-sectional dimension exceeds 6 mm.

Additional U.S. Note

1. For the purposes of heading 7608, the rate of duty "Free (C)" appearing in the "Special" subcolumn applies only to tubes and pipes with attached fittings, suitable for conducting gases or liquids.

Statistical Notes

I. For the purposes of this chapter, the term "aluminum vanadium master alloy" refers to aluminum alloys which contain by weight 20 percent or more of vanadium.

2. For the purposes of this chapter, the term "aluminum can stock" refers to sheets and strip in coils, of alloys of aluminum in which either manganese or magnesium is the predominant alloying element, not painted, over 0.175 mm but not over 0.432 mm in thickness, and over 254 mm in width, comprising "body stock and "lid stock" as specified below:

   (a) The term "body stock" refers to aluminum can stock having manganese as the predominant alloying element and having a minimum tensile strength of 262 MPa; and

   (b) The term "lid stock" refers to aluminum can stock having magnesium as the predominant alloying element and having a minimum tensile strength of 345 MPa.

CHAPTER 78

LEAD AND ARTICLES THEREOF

Note

1. In this chapter the following expressions have the meanings hereby assigned to them:

(a) Bar and rods

Rolled, extruded, drawn or forged products, not in coils, which have a uniform solid cross section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including "flattened circles" and "modified rectangles", of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross section may have corners rounded along their whole length. The thickness of such products which have a rectangular (including "modified rectangular") cross section exceeds one-tenth of the width. The expression also covers cast or sintered products, of the same forms and dimensions, which have been subsequently worked after production (otherwise than by simple trimming or descaling), provided that they have not thereby assumed the character of articles or products of other headings.

(b) Profiles

Rolled, extruded, drawn, forged or formed products, coiled or not, of a uniform cross section along their whole length, which do not conform to any of the definitions of bars, rods, wire, plates, sheets, strip, foil, tubes or pipes. The expression also covers cast or sintered products, of the same forms, which have been subsequently worked after production (otherwise than by simple trimming or descaling), provided that they have not thereby assumed the character of articles or products of other headings.

(c) Wire

Rolled, extruded or drawn products, in coils, which have a uniform solid cross section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including "flattened circles" and "modified rectangles", of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross section may have corners rounded along their whole length. The thickness of such products which have a rectangular (including "modified rectangular") cross section exceeds one-tenth of the width.

(d) Plates, sheets, strip and foil

Flat-surfaced products (other than the unwrought products of heading 7801), coiled or not, of solid rectangular (other than square) cross section with or without rounded corners (including "modified rectangles" of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel) of a uniform thickness, which are:

- of rectangular (including square) shape with a thickness not exceeding one-tenth of the width,

- of a shape other than rectangular or square, of any size, provided that they do not assume the character of articles or products of other headings.

Heading 7804 applies, inter alia, to plates, sheets, strip and foil with patterns (for example, grooves, ribs, checkers, tears, buttons, lozenges) and to such products which have been perforated, corrugated, polished or coated, provided that they do not thereby assume the character of articles or products of other headings.

(e) Tubes and pipes

Hollow products, coiled or not, which have a uniform cross section with only one enclosed void along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons, and which have a uniform wall thickness. Products with a rectangular (including square), equilateral triangular or regular convex polygonal cross section, which may have corners rounded along their whole length, are also to be considered as tubes and pipes provided the inner and outer cross sections are concentric and have the same form and orientation. Tubes and pipes of the foregoing cross sections may be polished, coated, bent, threaded, drilled, waisted, expanded, cone-shaped or fitted with flanges, collars or rings.

CHAPTER 82

TOOLS, IMPLEMENTS, CUTLERY, SPOONS AND FORKS, OF BASE METAL; PARTS THEREOF OF BASE METAL

Notes

1. Apart from blow torches and similar self-contained torches, portable forges, grinding wheels with frameworks, manicure or pedicure sets, and goods of heading 8209, this chapter covers only articles with a blade, working edge, working surface or other working part of:

   (a) Base metal;

   (b) Metal carbides or cermets;

   (c) Precious or semiprecious stones (natural, synthetic or reconstructed) on a support of base metal, metal carbide or cermet; or

   (d) Abrasive materials on a support of base metal, provided that the articles have cutting teeth, flutes, grooves or the like, of base metal, which retain their identity and function after the application of the abrasive.

2. Parts of base metal of the articles of this chapter are to be classified with the articles of which they are parts, except parts separately specified as such and toolholders for handtools (heading 8466). However, parts of general use as defined in note 2 to section XV are in all cases excluded from this chapter.

   Heads, blades and cutting plates for electric shavers and electric hair clippers are to be classified in heading 8510.

3. Sets consisting of one or more knives of heading 8211 and at least an equal number of articles of heading 8215 are to be classified in heading 8215.

Additional U.S. Notes

1. The provisions in this chapter which specifically refer to kitchen or tableware include articles of types which are used outdoors as well as those which are used indoors.

2. In determining the length of files and rasps (heading 8203), the tang (if any) should not be included.

3. For the purposes of determining the rate of duty applicable to sets provided for in heading 8205, 8211 or 8215, a specific rate of duty or a compound rate of duty for any article in the set shall be converted to its ad valorem equivalent rate, i.e., the ad valorem rate which, when applied to the full value of the article determined in accordance with section 402 of the Tariff Act of 1930, as amended, would provide the same amount of duties as the specific or compound rate.

Statistical Notes

1. For the purposes of statistical reporting of sets in heading 8205, 8206, 8211 or 8215, the number of pieces reported shall be the total number of separate pieces in the set(s).

2. For the purposes of subheading 8211.92, the term "sheath-type knives" refers to fixed-blade knives contained in a substantial holster, i.e., "sheath" and of a kind used in hunting and fishing.

Notes

1. For the purposes of this chapter, parts of base metal are to be classified with their parent articles. However, articles of iron or steel of heading 7312, 7315, 7317, 7318, or 7320, or similar articles of other base metal (chapters 74 to 76 and 78 to 81) are not to be taken as parts of articles of this chapter.

2. For the purposes of heading 8302, the word "castors" means those having a diameter (including, where appropriate, tires) not exceeding 75 mm, or those having a diameter (including, where appropriate, tires) exceeding 75 mm, provided that the width of the wheel or tire fitted thereto is less than 30 mm.

Additional U.S. Note

1. The dutiable weight of hooks, eyes and eyelets in subheading 8308.10 includes the weight of cards, cartons and immediate wrappings and labels.

2. Subject to note 1 to this section, note 1 to chapter 84 and to note 1 to chapter 85, parts of machines (not being parts of the articles of heading 8484, 8544, 8545, 8546 or 8547) are to be classified according to the following rules:

   (a) Parts which are goods included in any of the headings of chapters 84 and 85 (other than headings 8409, 8431, 8448, 8466, 8473, 8485, 8503, 8522, 8529, 8538 and 8548) are in all cases to be classified in their respective headings;

   (b) Other parts, if suitable for use solely or principally with a particular kind of machine, or with a number of machines of the same heading (including a machine of heading 8479 or 8543) are to be classified with the machines of that kind or in heading 8409, 8431, 8448, 8466, 8473, 8503, 8522, 8529 or 8538 as appropriate. However, parts which are equally suitable for use principally with the goods of headings 8517 and 8525 to 8528 are to be classified in heading 8517;

   (c) All other parts are to be classified in heading 8409, 8431, 8448, 8466, 8473, 8503, 8522, 8529 or 8538 as appropriate or, failing that, in heading 8485 or 8548.

3. Unless the context otherwise requires, composite machines consisting of two or more machines fitted together to form a whole and other machines adapted for the purpose of performing two or more complementary or alternative functions are to be classified as if consisting only of that component or as being that machine which performs the principal function.

Notes (con.)

4. Where a machine (including a combination of machines) consists of individual components (whether separate or interconnected by piping, by transmission devices, by electric cables or by other devices) intended to contribute together to a clearly defined function covered by one of the headings in chapter 84 or chapter 85, then the whole falls to be classified in the heading appropriate to that function.

5. For the purposes of these notes, the expression "machine" means any machine, machinery, plant, equipment, apparatus or appliance cited in the headings of chapter 84 or 85.

Additional U.S. Note

1. For the purposes of this section, the term "printed circuit assembly" means goods consisting of one or more printed circuits of heading 8534 with one or more active elements assembled thereon, with or without passive elements. For the purposes of this note, "active elements" means diodes, transistors and similar semiconductor devices, whether or not photosensitive, of heading 8541, and integrated circuits and microassemblies of heading 8542.

Statistical Note

1. Provisions for semiconductor manufacturing and testing machines and apparatus cover products for the growth and processing of semiconductor materials, such as silicon and gallium arsenide, the processing of such materials into semiconductor devices and the testing of such devices (in general the testing equipment, as well as some of the processing equipment, is classified in chapter 90). More specifically the goods include the following:

   (a) Wafer manufacturing equipment:

      (i) Crystal growers & pullers. - used to produce extremely pure monocrystalline semiconductor boules from which wafers can be sliced. Most common methods employed in these crystal growers and pullers are the Czochralski and float zone methods.

      (ii) Wafer preparation equipment:

         (A) Crystal grinders - used to grind the crystal boule to precise diameter required for wafers and to grind the flats on the boule to indicate the conductivity type and resistivity of the crystal.

         (B) Wafer slicing saws - used to slice wafers from a boule of monocrystalline semiconductor material.

         (C) Wafer grinders, lappers and polishers - used to prepare the semiconductor wafer for the fabrication process. This involves bringing the wafer within dimensional tolerances. Especially critical is the flatness of its surface.

   (b) Mask fabrication and repair equipment -

      (i) Fabrication equipment - used to transfer design patterns to a mask or reticle, this equipment generally utilizes optical, electron beam or X-rays to write circuit patterns on photoresist coated substrates. After development, these substrates become the mask or reticle for wafer fabrication.

      (ii) Repair equipment - this equipment generally utilizes focused ion beams or laser beams. They are used directly on the mask or reticle to remove chrome.

   (c) Wafer fabrication equipment:

      (i) Film formation equipment - used to apply or produce various films on the surface of the wafer during the fabrication process. These films serve as conductors, insulators and semiconductors on the finished device. They may include oxides and nitrides of the substrate surface, metals, and epitaxial layers. The processes and equipments listed below are not necessarily limited to the generation of a particular type of film.

         (A) Oxidation furnaces - used to form a "film" of oxide on the wafer. The oxide is formed by the chemical reaction of the top molecular layers of the wafer with the applied oxygen or steam under heat.

         (B) Chemical Vapor Deposition (CVD) equipment - used to deposit various types of films which are obtained by combining the appropriate gases in a reactant chamber at elevated temperatures. This constitutes a thermochemical vapor-phase reaction. Operations may take place at atmospheric or low pressure (LPCVD) and may use plasma enhancement (PECVD).

Statistical Note (con.)

(C) Physical Vapor Deposition (PVD) equipment - used to deposit various types of films which are obtained by vaporizing a solid.

(1) Evaporation equipment - in which the film is generated by heating the source material.

(2) Sputtering equipment - in which the film is generated by bombarding the source material (target) with ions.

(D) Molecular Beam Epitaxy (MBE) equipment - used to grow epitaxial layers on a heated monocrystalline substrate in an ultrahigh vacuum using beams of molecules. The process is similar to PVD.

(ii) Doping equipment - which is used to introduce dopants into the wafer surface in order to modify the conductivity or other characteristics of a semiconductor layer:

(A) Thermal diffusion equipment - in which the dopants introduced into the surface of the wafer by the application of gases under high temperatures.

(B) Ion Implantation - in which the dopants are "driven" into the crystal lattice structure of the surface of the wafer in the form a beam of accelerated ions.

(C) Annealing furnaces - which are used to repair the crystal lattice structures of the wafer damaged by ion implantation.

(iii) Etching and stripping equipment - used for etching or cleaning surfaces of the wafers.

(A) Wet etching equipment - in which chemical etching materials are applied by spraying or immersion. Spray etchers provide more uniform results than bath etchers, since they perform the operation on one wafer at a time.

(B) Dry plasma etching - in which etching materials are presented as gases within a plasma energy field, providing an anisotropic etch profile.

(C) Ion beam milling equipment - in which ionized gas atoms are accelerated toward the wafer surface. The impact results in the top layer being physically removed from the surface.

(D) Strippers or ashers - using techniques similar to etching this apparatus removes the spent photoresist from the surface of the wafer after it has served its purpose as a "stencil". This equipment is also used for removal of nitrides, oxides, and polysilicon, with an isotropic etch profile.

(iv) Lithography equipment - used to transfer the circuit designs to the photoresist coated surface of the semiconductor wafer.

(A) Equipment for coating wafers with photoresist - these include the photoresist spinners which are used to apply liquid photoresist evenly over the surface of the wafer.

(B) Equipment for exposing the photoresist coated wafer with the circuit design (or a part thereof):

(1) Using a mask or reticle and exposing the photoresist to light (generally ultraviolet) or, in some instances, X-rays:

(a) Contact printers - where the mask or reticle is in contact with the wafer during exposure.

(b) Proximity aligners - similar to contact aligners except actual contact doesn't take place between the mask or reticle and the wafer.

(c) Scanning aligners - which use projection techniques to expose a continuously moving slit across the mask and wafer.

(d) Step and repeat aligners - which use projection techniques to expose the wafer a portion at a time. Exposure can be by reduction from the mask to the wafer or 1:1. Enhancements include the use of an excimer laser.

(2) Direct write on wafer equipment - these apparatus operate with no mask or reticle. They use a computer controlled "writing beam" (such as, an electron beam (E-beam), ion beam or laser) to "draw" the circuit design directly on the photoresist coated wafer.

(C) Equipment for developing exposed wafers - these include chemical baths similar to those used in photographic laboratory applications

Statistical Note (con.)

(d) Assembly equipment

(i) Dicing equipment - these include sawing machines and scribing machines (including laser scribers) and dicing accessories such as wafer breaking equipment.

(ii) Die bonding equipment - which installs the die to the package by soldering or gluing

(iii) Wire bonding equipment - used for attaching thin wires or tapes (usually of gold, aluminum or copper) from the die bonding pads to the corresponding pads on the package.

(iv) Packaging equipment - which are used to encapsulate or package a semiconductor device. They include sealing furnaces, lid welders, plastic encapsulation presses, lead trim and form equipment, package deflashers, and tin dip and solder plate equipment.

(e) Testing and inspection equipment

(i) Optical inspection equipment - These include equipment that "examines" portions of the wafer surface and compares them either to a standard pattern or to other portions of the wafer surface.

(ii) Electrical testing equipment - These include computer controlled systems that test the functions and electrical specifications of semiconductor devices through the application and detection of electrical signals or patterns. Testing is performed on both unencapsulated dice and packaged integrated circuits.

Notes

1. This chapter does not cover:

   (a) Electrically warmed blankets, bed pads, foot-muffs or the like; electrically warmed clothing, footwear or ear pads or other electrically warmed articles worn on or about the person;

   (b) Articles of glass of heading 7011; or

   (c) Electrically heated furniture of chapter 94.

2. Headings 8501 to 8504 do not apply to goods described in heading 8511, 8512, 8540, 8541 or 8542.

   However, metal tank mercury arc rectifiers remain classified in heading 8504.

3. Heading 8509 covers only the following electromechanical machines of the kind commonly used for domestic purposes:

   (a) Vacuum cleaners, floor polishers, food grinders, processors or mixers, and fruit or vegetable juice extractors, of any weight;

   (b) Other machines provided the weight of such machines does not exceed 20 kg, exclusive of extra interchangeable parts or detachable auxiliary devices.

   The heading does not, however, apply to fans or ventilating or recycling hoods incorporating a fan, whether or not fitted with filters (heading 8414), centrifugal clothes dryers (heading 8421), dishwashing machines (heading 8422), household washing machines (heading 8450), roller or other ironing machines (heading 8420 or 8451), sewing machines (heading 8452), electric scissors (heading 8508) or to electrothermic appliances (heading 8516).

4. For the purposes of heading 8534 "printed circuits" are circuits obtained by forming on an insulating base, by any printing process (for example, embossing, plating-up, etching) or by the "film circuit" technique, conductor elements, contacts or other printed components (for example, inductances, resistors, capacitors) alone or interconnected according to a pre-established pattern, other than elements which can produce, rectify, modulate or amplify an electrical signal (for example, semiconductor elements).

   The term "printed circuits" does not cover circuits combined with elements other than those obtained during the printing process, nor does it cover individual, discrete resistors, capacitors or inductances. Printed circuits may, however, be fitted with non-printed connecting elements.

   Thin- or thick-film circuits comprising passive and active elements obtained during the same technological process are to be classified in heading 8542.

5. For the purposes of headings 8541 and 8542:

   (a) "Diodes, transistors and similar semiconductor devices" are semiconductor devices the operation of which depends on variations in resistivity on the application of an electric field;

   (b) "Electronic integrated circuits and microassemblies" are:

      (i) Monolithic integrated circuits in which the circuit elements (diodes, transistors, resistors, capacitors, interconnections, etc.) are created in the mass (essentially) and on the surface of a semiconductor material (doped silicon, for example) and are inseparably associated;

      (ii) Hybrid integrated circuits in which passive elements (resistors, capacitors, interconnections, etc.) obtained by thin- or thick-film technology and active elements (diodes, transistors, monolithic integrated circuits, etc.) obtained by semiconductor technology, are combined to all intents and purposes indivisibly, on a single insulating substrate (glass, ceramic, etc.). These circuits may also include discrete components;

      (iii) Microassemblies of the molded module, micromodule or similar types, consisting of discrete, active or both active and passive, components which are combined and interconnected.

   For the classification of the articles defined in this note, headings 8541 and 8542 shall take precedence over any other heading in the tariff schedule which might cover them by reference to, in particular, their function.

Notes (con.)

6. Records, tapes and other media of heading 8523 or 8524 remain classified in those headings, whether or not they are entered with the apparatus for which they are intended.

7. For the purposes of heading 8548, "spent primary cells, spent primary batteries and spent electric storage batteries" are those which are neither usable as such because of breakage, cutting up, wear or other reasons, nor capable of being recharged.

Subheading Note

1. Subheadings 8519.92 and 8527.12 cover only cassette players with built-in amplifier, without built-in loudspeaker, capable of operating without an external source of electric power and the dimensions of which do not exceed 170 mm x 100 mm x 45 mm.

Statistical Notes

1. For the purposes of this chapter the terms "AM" and "FM" refer to the entertainment broadcast bands of 550-1650 kHz and 88-108 MHz, respectively.

2. For statistical reporting purposes under subheading 8539.10, the size of a sealed beam lamp unit is determined by measuring the largest diagonal dimension across the faceplate.

3. For statistical reporting purposes under subheading 8544.70, the unit of quantity "fiber m", as it pertains to optical fiber cables, is determined by multiplying the number of individual fibers contained therein by the length in meters.

4. For statistical reporting purposes under subheadings 8525.10.70, 8525.10.90, 8525.20.30 and 8527.90.95, the lowest operating frequency will determine the classification.

5. For statistical reporting purposes in heading 8542 the following definitions will apply:

   (a) The term "static read-write random access (SRAM)" refers to integrated circuit memory devices in which the memory cells may be addressed in any sequence, randomly, for the storage or retrieval of data and in which in which the stored information is retained without further intervention as long as electric power is supplied to the device.

   (b) The term "volatile memory" refers to integrated circuit memory devices which lose all stored information in the absence of electric power.

   (c) The term "dynamic read-write random access (DRAM)" refers to integrated circuit memory devices in which the memory cells may be addressed in any sequence, randomly, for the storage or retrieval of data and in which the stored information must continually be refreshed in order to hold the information in memory.

   (d) The term "electrically erasable programmable read-only memory (EEPROM)" refers to user programmable integrated circuit memory devices which retain the stored information in the absence of electric power and in which the stored information may be altered electrically.

   (e) The term "erasable (except electrically) programmable read-only memory (EPROM)" refers to user programmable integrated circuit memory devices which retain the stored information in the absence of electric power and from which the stored information may be removed (except electrically). Such devices are usually erased by exposure to ultraviolet light after which they may be rewritten with new information.

   (f) The term "microprocessor" refers to a central processing unit (CPU) fabricated as a monolithic integrated circuit.

6. For statistical reporting purposes under subheading 8532.22, the diameter of aluminum electrolytic capacitors not having a circular cross-section shall be the maximum dimension measured through the center.

SECTION XVII

VEHICLES, AIRCRAFT, VESSELS AND ASSOCIATED TRANSPORT EQUIPMENT

Notes

1. This section does not cover articles of heading 9501, 9503 or 9508, or sleds, bobsleds, toboggans or the like of heading 9506.

2. The expressions "parts" and "parts and accessories" do not apply to the following articles, whether or not they are identifiable as for the goods of this section:

   (a) Joints, washers or the like of any material (classified according to their constituent material or in heading 8484) or other articles of vulcanized rubber other than hard rubber (heading 4016);

   (b) Parts of general use, as defined in note 2 to section XV, of base metal (section XV) or similar goods of plastics (chapter 39);

   (c) Articles of chapter 82 (tools);

   (d) Articles of heading 8306;

   (e) Machines or apparatus of headings 8401 to 8479, or parts thereof; articles of heading 8481 or 8482 or, provided they constitute integral parts of engines or motors, articles of heading 8483;

   (f) Electrical machinery or equipment (chapter 85);

   (g) Articles of chapter 90;

   (h) Articles of chapter 91;

   (ij) Arms (chapter 93);

   (k) Lamps or lighting fittings of heading 9405; or

   (l) Brushes of a kind used as parts of vehicles (heading 9603).

3. References in chapters 86 to 88 to "parts" or "accessories" do not apply to parts or accessories which are not suitable for use solely or principally with the articles of those chapters. A part or accessory which answers to a description in two or more of the headings of those chapters is to be classified under that heading which corresponds to the principal use of that part or accessory.

4. For the purposes of this section:

   (a) Vehicles specially constructed to travel on both road and rail are classified under the appropriate heading of chapter 87;

   (b) Amphibious motor vehicles are classified under the appropriate heading of chapter 87;

   (c) Aircraft specially constructed so that they can also be used as road vehicles are classified under the appropriate heading of chapter 88.

5. Air-cushion vehicles are to be classified within this section with the vehicles to which they are most akin as follows:

   (a) In chapter 86 if designed to travel on a guide-track (hovertrains);

   (b) In chapter 87 if designed to travel over land or over both land and water;

   (c) In chapter 89 if designed to travel over water, whether or not able to land on beaches or landing-stages or also able to travel over ice.

   Parts and acessories of air-cushion vehicles are to be classified in the same way as those of vehicles of the heading in which the air-cushion vehicles are classified under the above provisions.

   Hovertrain track fixtures and fittings are to be classified as railway track fixtures and fittings, and signalling, safety or traffic control equipment for hovertrain transport systems as signalling, safety or traffic control equipment for railways.

   (a) Assembled track, turntables, platform buffers, loading gauges;

   (b) Semaphores, mechanical signal discs, level crossing control gear, signal and point controls, and other mechanical (including electro-mechanical) signaling, safety or traffic control equipment, whether or not fitted for electric lighting, for railways, tramways, roads, inland waterways, parking facilities, port installations or airfields.

Additional U.S. Note

1. Railway locomotives (provided for in headings 8601 and 8602) and railway freight cars (provided for in heading 8606) on which no duty is owed are not subject to the entry or release requirements for imported merchandise set forth in Sections 448 and 484 of the Tariff Act of 1930. The Secretary of the Treasury may by regulation establish appropriate reporting requirements, including the requirement that a bond be posted to ensure compliance.

CHAPTER 87

VEHICLES OTHER THAN RAILWAY OR TRAMWAY ROLLING-STOCK, AND PARTS AND ACCESSORIES THEREOF

Notes

1. This chapter does not cover railway or tramway rolling-stock designed solely for running on rails.

2. For the purposes of this chapter, "tractors" means vehicles constructed essentially for hauling or pushing another vehicle, appliance or load, whether or not they contain subsidiary provision for the transport, in connection with the main use of the tractor, of tools, seeds, fertilizers or other goods.

   Machines and working tools designed for fitting to tractors of heading 8701 as interchangeable equipment remain classified in their respective headings even if presented with the tractor, and whether or not mounted on it.

3. Motor chassis fitted with cabs fall in headings 8702 to 8704, and not in heading 8706.

4. Heading 8712 includes all children's bicycles. Other children's cycles fall in heading 9501.

Additional U.S. Notes

1. Road tractors, trailers and semi-trailers remain separately classified in headings 8701 and 8716, respectively, even when entered together.

2. For the purposes of classifying bicycles under the provisions therefore in heading 8712, the diameter of each wheel is the diameter measured to the outer circumference of the tire which is mounted thereon or, if none is mounted thereon, of the usual tire for such wheel.

CHAPTER 90

OPTICAL, PHOTOGRAPHIC, CINEMATOGRAPHIC, MEASURING, CHECKING, PRECISION, MEDICAL OR SURGICAL INSTRUMENTS AND APPARATUS; PARTS AND ACCESSORIES THEREOF

Notes

1. This chapter does not cover:

   (a) Articles of a kind used in machines, appliances or for other technical uses, of vulcanized rubber other than hard rubber (heading 4016), of leather or of composition leather (heading 4204) or of textile material (heading 5911);

   (b) Supporting belts or other support articles of textile material, whose intended effect on the organ to be supported or held derives solely from their elasticity (for example, maternity belts, thoracic support bandages, abdominal support bandages, supports for joints or muscles) (section XI);

   © Refractory goods of heading 6903; ceramic wares for laboratory, chemical or other technical uses, of heading 6909;

   (d) Glass mirrors, not optically worked, of heading 7009, or mirrors of base metal or of precious metal, not being optical elements (heading 8306 or chapter 71);

   (e) Goods of heading 7007, 7008, 7011, 7014, 7015 or 7017;

   (f) Parts of general use, as defined in note 2 to section XV, of base metal (section XV) or similar goods of plastics (chapter 39);

   (g) Pumps incorporating measuring devices, of heading 8413; weight-operated counting or checking machinery, or separately entered weights for balances (heading 8423); lifting or handling machinery (headings 8425 to 8428); paper or paperboard cutting machines of all kinds (heading 8441); fittings for adjusting work or tools on machine tools, of heading 8466, including fittings with optical devices for reading the scale (for example, "optical" dividing heads) but not those which are in themselves essentially optical instruments (for example, alignment telescopes); calculating machines (heading 8470); valves or other appliances of heading 8481;

   (h) Searchlights or spotlights of a kind used for cycles or motor vehicles (heading 8512); portable electric lamps of heading 8513; cinematographic sound recording, reproducing or re-recording apparatus (heading 8519 or 8520); sound-heads (heading 8522); still image video cameras and other video camera recorders (heading 8525); radar apparatus, radio navigational aid apparatus and radio remote control apparatus (heading 8526); sealed beam lamp units of heading 8539; optical fiber cables of heading 8544;

   (ij) Searchlights or spotlights of heading 9405;

   (k) Articles of chapter 95;

   (l) Capacity measures, which are to be classified according to their constituent material; or

   (m) Spools, reels or similar supports (which are to be classified according to their constituent material, for example, in heading 3923 or section XV).

2. Subject to note 1 above, parts and accessories for machines, apparatus, instruments or articles of this chapter are to be classified according to the following rules:

   (a) Parts and accessories which are goods included in any of the headings of this chapter or of chapter 84, 85 or 91 (other than heading 8485, 8548 or 9033) are in all cases to be classified in their respective headings;

   (b) Other parts and accessories, if suitable for use solely or principally with a particular kind of machine, instrument or apparatus, or with a number of machines, instruments or apparatus of the same heading (including a machine, instrument or apparatus of heading 9010, 9013 or 9031) are to be classified with the machines, instruments or apparatus of that kind;

   © All other parts and accessories are to be classified in heading 9033.

3. The provisions of note 4 to section XVI apply also to this chapter.

4. Heading 9005 does not apply to telescopic sights for fitting to arms, periscopic telescopes for fitting to submarines or tanks, or to telescopes for machines, appliances, instruments or apparatus of this chapter or section XVI; such telescopic sights and telescopes are to be classified in heading 9013.

5. Measuring or checking optical instruments, appliances or machines which, but for this note, could be classified both in heading 9013 and in heading 9031 are to be classified in heading 9031.

Notes (con.)

6. Heading 9032 applies only to:

   (a) Instruments and apparatus for automatically controlling the flow, level, pressure or other variables of liquids or gases, or for automatically controlling temperature, whether or not their operation depends on an electrical phenomenon which varies according to the factor to be automatically controlled; and

   (b) Automatic regulators of electrical quantities, and instruments or apparatus for automatically controlling non-electrical quantities the operation of which depends on an electrical phenomenon varying according to the factor to be controlled.

Additional U.S. Notes

1. For the purposes of headings 9001 and 9002, the term "optically worked" refers to glass the surface of which has been ground or polished in order to produce the required optical properties.

2. For the purposes of this chapter, the term "electrical" when used in reference to instruments, appliances, apparatus and machines, refers to those articles the operation of which depends on an electrical phenomenon which varies according to the factor to be ascertained.

3. For the purposes of this chapter, the terms "optical appliances" and "optical instruments" refer only to those appliances and instruments which incorporate one or more optical elements, but do not include any appliances or instruments in which the incorporated optical element or elements are solely for viewing a scale or for some other subsidiary purpose.

4. For the purposes of this chapter, the term "printed circuit assembly" means goods consisting of one or more printed circuits of heading 8534 with one or more active elements assembled thereon, with or without passive elements. For the purposes of this note, "active elements" means diodes, transistors and similar semiconductor devices, whether or not photosensitive, of heading 8541, and integrated circuits and microassemblies of heading 8542.

5. Subheadings 9009.90.10 and 9009.90.30 cover the following parts of photocopying apparatus of subheading 9009.12:

   (e) Paper handling assemblies, incorporating more than one of the following: paper transport belt, roller, print bar, carriage, gripper roller, paper storage unit, exit tray; or

   (f) Combinations of the above specified assemblies.

Statistical Notes

1. For statistical reporting purposes under subheading 9001.10, the unit of quantity "fiber m", as it pertains to optical fiber bundles and cables, is determined by multiplying the number of individual fibers contained therein by the length in meters.

CHAPTER 91

CLOCKS AND WATCHES AND PARTS THEREOF

Notes

1. This chapter does not cover:

   (a) Clock or watch glasses or weights (classified according to their constituent material);

   (b) Watch chains (heading 7113 or 7117, as the case may be);

   (c) Parts of general use defined in note 2 to section XV, of base metal (section XV), or similar goods of plastics (chapter 39) or of precious metal or metal clad with precious metal (generally heading 7115); clock or watch springs are, however, to be classified as clock or watch parts (heading 9114);

   (d) Bearing balls (heading 7326 or 8482, as the case may be);

   (e) Articles of heading 8412 constructed to work without an escapement;

   (f) Ball bearings (heading 8482); or

   (g) Articles of chapter 85, not yet assembled together or with other components into watch or clock movements or into articles suitable for use solely or principally as parts of such movements (chapter 85).

2. Heading 9101 covers only watches with case wholly of precious metal or of metal clad with precious metal, or of the same materials combined with natural or cultured pearls, or precious or semiprecious stones (natural, synthetic or reconstructed) of headings 7101 to 7104. Watches with case of base metal inlaid with precious metal fall in heading 9102.

3. For the purposes of this chapter, the expression "watch movements" means devices regulated by a balance wheel and hairspring, quartz crystal or any other system capable of determining intervals of time, with a display or a system to which a mechanical display can be incorporated. Such watch movements shall not exceed 12 mm in thickness and 50 mm in width, length or diameter.

4. Except as provided in note 1, movements and other parts suitable for use both in clocks or watches and in other articles (for example, precision instruments) are to be classified in this chapter.

Additional U.S. Notes

1. For the purposes of this chapter:

   (a) The term "watches" embraces timepieces (including timepieces having special features, such as chronographs, calendar watches and watches designed for use in skin diving) of a kind for wearing or carrying on the person whether or not the movement contained therein conforms to the definition of "watch movements" in note 3, above. Timepieces incorporating a stand, however simple, are not classifiable as watches.

   (b) The term "cases" embraces inner and outer cases, containers and housings for movements, together with parts or pieces, such as, but not limited to, rings, feet, posts, bases and outer frames, and any auxiliary or incidental features, which (with appropriate movements) serve to complete the watches, clocks, time switches and other apparatus provided for in this chapter.

   (c) The term "jewels" includes substitutes for jewels.

   (d) The term "clock movements" means devices regulated by a balance wheel and hairspring, quartz crystal or any other system capable of determining intervals of time, with a display or a system to which a mechanical display can be incorporated. Such clock movements shall either exceed 12 mm in thickness or 50 mm in width, length or diameter, or both.

   (e) The term "complete watch or clock movements, unassembled or partly assembled (movement sets)" refers to sets which consist of all parts necessary to assemble a watch or clock movement, except that for movements having mechanical displays the set may or may not include the dial and hands.

Additional U.S. Notes (con.)

(f) The term "incomplete watch or clock movements, assembled" refers to:

(I) Mechanical movements which are mounted but lack certain parts other than the dial, hands or winding spindle (e.g., the escapement or the barrel bridge);

(ii) Battery powered movements with mechanical displays which are mounted but lack certain parts other than the dial, hands, setting spindle or battery (e.g., the motor); or

(iii) Other movements intended to operate with opto-electronic displays which are mounted but lack certain parts other than the battery (e.g., the display).

(g) The term "rough watch or clock movements" refers to sets of unassembled parts for the assembly of watch or clock movements of a kind constructed to work with an escapement. These sets do not include escapement, balance wheel and hairspring or other regulating device, mainspring, dial or hands; they therefore consist mainly of the base plate (and any additional plates), bridges, train, motion work, winding and setting mechanism and any additional mechanisms such as automatic winding device, calendar mechanisms, chronograph, alarm, etc. These sets may be entered with or without a barrel. Each element, intended for use as it is, may itself consist of one simple piece or of several parts fitted inseparably together, but such elements may not themselves be assembled to each other.

2. Watch straps, watch bands and watch bracelets entered with wrist watches and of a kind normally sold therewith, whether or not attached, are classified with the watch in heading 9101 or 9102. Otherwise, watch straps, watch bands and watch bracelets shall be classified in heading 9113.

3. Batteries entered with battery powered watches or clocks, or with the complete, assembled movements thereof, and intended for use therewith, are classifiable under the provision for the watch, clock or movement. Similarly, batteries entered with a complete watch or clock movement, unassembled or partly assembled (movement set) or with an incomplete watch or clock movement, assembled, and intended for use therewith, are classifiable under the provision for such movement. Batteries are otherwise classifiable in heading 8506 or 8507, whether or not suitable for use with watches or clocks.

4. Special Marking Requirements: With the following exceptions, any movement or case provided for in this chapter, whether imported separately or attached to an article provided for in this chapter, shall not be permitted to be entered unless conspicuously and indelibly marked by cutting, die-sinking, engraving, stamping (including by means of indelible ink), or mold-marking (either indented or raised), as specified below. Movements with opto-electronic display only and cases designed for use therewith, whether entered as separate articles or as components of assembled watches or clocks, are excepted from the marking requirements set forth in this note. The special marking requirements are as follows:

(a) Watch movements shall be marked on one or more of the bridges or top plates to show:

(I) the name of the country of manufacture;

(ii) the name of the manufacturer or purchaser; and

(iii) in words, the number of jewels, if any, serving a mechanical purpose as frictional bearings.

(b) Clock movements shall be marked on the most visible part of the front or back plate to show:

(I) the name of the country of manufacture;

(ii) the name of the manufacturer or purchaser; and

(iii) the number of jewels, if any.

© Watch cases shall be marked on the inside or outside of the back to show:

(I) the name of the country of manufacture; and

(ii) the name of the manufacturer or purchaser.

(d) Clock cases provided for in this chapter shall be marked on the most visible part of the outside of the back to show the name of the country of manufacture.

Additional U.S. Notes (con.)

5. Products of Insular Possessions

(a) Except as provided in paragraphs (b) through (ij) of this note, any article provided for in this chapter which is the product of the Virgin Islands, Guam and American Samoa (hereinafter referred to as the "insular possessions") and which contains any foreign component shall be subject to duty:

(I) At the rates set forth in column 1, if the countries of origin of more than 50 percent in value of the foreign components are countries to products of which column 1 rates apply; and

(ii) At the rates set forth in column 2, if the countries of origin of 50 percent or more in value of the foreign components are countries to products of which column 2 rates apply.

(b) Watch movements and watches (including watch straps, watch bands, and watch bracelets assembled onto watches) that are produced or manufactured in a United States insular possession which contain any foreign component may be admitted free of duty without regard to the value of the foreign materials such watches contain if they conform with the provisions of this note, but the total quantity of such articles entered free of duty shall not exceed the amounts established by or pursuant to paragraph (d) of this note.

© Notwithstanding the provisions of paragraph (b) of this note, the provisions of this note and the benefits thereunder shall not apply to any article containing any material which is the product of any country with respect to which column 2 rates of duty apply.

(d) (I) In calendar year 1983 the total quantity of such articles which may be entered free of duty shall not exceed 4,800,000 units.

(ii) In subsequent calendar years, the Secretary of Commerce and the Secretary of the Interior (hereinafter referred to as the "Secretaries"), acting jointly, shall establish a limit on the quantity which may be entered free of duty during the calendar year, and shall consider whether such limit is in the best interest of the insular possessions and not inconsistent with domestic or international trade policy considerations. The quantity the Secretaries establish in any calendar year under this paragraph shall not--

(A) exceed 10,000,000 units or one-ninth of apparent domestic consumption (as determined by the International Trade Commission pursuant to paragraph (e) of this note), whichever is greater;

(B) be decreased by more than 10 percent of the quantity established for the immediately preceding calendar year; and

© be increased to more than 7,000,000 units or by more than 20 percent of the quantity established for the immediately preceding calendar year, whichever is greater.

(e) On or before April 1 of each calendar year (beginning with the first year in which watch imports from the United States insular possessions exceed 9,000,000 units), the International Trade Commission shall determine the apparent United States consumption of watches and watch movements during the preceding calendar year, shall report such determination to the Secretaries, and shall publish such determination in the Federal Register.

(f) (I) In calendar year 1983, not more than 3,000,000 units of the total quantity of articles described in paragraph (d) which may be entered free of duty shall be the product of the Virgin Islands, not more than 1,200,000 units shall be the product of Guam, and not more than 600,000 units shall be the product of American Samoa.

(ii) For calendar year 1984 and thereafter, the Secretaries may establish new territorial shares of the total amount which may be entered free of duty, taking into account the capacity of each territory to produce and ship its assigned amounts. A territory's share in any year shall not be reduced:

(A) by more than 200,000 units in calendar year 1984 or 1985; and

(B) by more than 500,000 units in calendar year 1986 or thereafter, except that no territorial share shall be established at less than 500,000 units.

(g) The Secretaries, acting jointly, shall allocate the calendar year duty exemptions provided by paragraphs (b), (d) and (f) of this note on a fair and equitable basis among producers located in the insular possessions, and shall issue appropriate licenses thereof. Allocations made by the Secretaries shall be final. In making the allocations, the Secretaries shall consider the potential impact of territorial production on domestic production of like articles and shall establish allocation criteria (including minimum assembly requirements) that will reasonably maximize the net amount of direct economic benefits to the insular possessions.

Additional U.S. Notes (con.)

(h) (I) In the case of each calendar year beginning after December 31, 1982, and before January 1, 2007, the Secretaries, acting jointly, shall:

(A) verify the wages paid by each producer to permanent residents of the insular possessions during the preceding calendar year; and

(B) issue to each producer (not later than March 1 of such year) a certificate for the applicable amount.

(ii) For purposes of subparagraph (I), except as provided in subparagraphs (iii) and (iv), the term "applicable amount" means an amount equal to the sum of:

(A) 90 percent of the producer's creditable wages on the assembly during the preceding calendar year of the first 300,000 units; plus

(B) the applicable graduated declining percentage (determined each year by the Secretaries) of the producer's creditable wages on the assembly during the preceding calendar year of units in excess of 300,000 but not in excess of 750,000.

(iii) The aggregate amount of all certificates which are issued during any calendar year shall not exceed an amount which bears the same ratio to $5,000,000 as:

(A) the gross national product of the United States (as determined by the Secretary of Commerce) for the preceding calendar year, bears to:

(B) the gross national product of the United States (as so determined) for 1982.

(iv) (A) Subject to the provision of clause (B), if the amount of the certificates issued under subparagraph (I) would exceed the limit under subparagraph (iii), the applicable amount of each producer's certificate shall be reduced proportionately by the amount of such excess.

(B) The applicable amount of any producer's certificate shall not be reduced below the amount determined under subparagraph (ii)(A), except that if the application of this clause would result in the aggregate amount of the certificates exceeding the limit under subparagraph (iii), the applicable amount of each producer's certificate shall again be reduced proportionately by the amount of the excess determined after application of this clause.

(v) Any certificate issued under subparagraph (I) shall entitle the certificate holder to secure the refund of duties equal to the face value of the certificate on watches, watch movements and, with the exception of discrete cases, parts therefor imported into the customs territory of the United States by the certificate holder. Such refunds shall be made under regulations issued by the Treasury Department. Not more than 5 percent of such refunds may be retained as a reimbursement to the Customs Service for the administrative costs of making the refunds.

(vi) Any certificate issued under subparagraph (I), or any portion thereof, shall be negotiable.

(vii) Any certificate issued under subparagraph (I) shall expire 1 year from the date of issuance and may be applied against duties on imports of watches and watch movements the entry of which were made within 2 years prior to the date of issuance of the certificate.

(viii) For purposes of determining the applicable amount of any producer's certificate to be issued during calendar year 1983, the greater of:

(A) the producer's creditable wages for calendar year 1982; or

(B) 60 percent of the producer's creditable wages for calendar year 1981 shall be considered the creditable wages for calendar year 1982.

(ij) the Secretaries are authorized to issue such regulations, not inconsistent with the provisions of this note, as they determine necessary to carry out their respective duties under this note. Such regulations shall include minimum assembly requirements. Any duty-free entry determined not to have been made in accordance with applicable regulations shall be subject to the applicable civil remedies and criminal sanctions, and, in addition, the Secretaries may cancel or restrict the license or certificate of any manufacturer found in willful violation of the regulations.

Statistical Notes

1. The calculation of duties on various watches, clocks, watch movements and clock movements requires that these articles be constructively separated into their component parts and each component separately valued. The individual components shall be separately reported under the statistical suffixes show below. In each instance the sum of the values of the individual components shall be equal to the total value of the article. In those instances where the components of an article are to be separately reported under the following reporting scheme, the entry should include all the individually named components even if not included in the shipment. In such instance the entered quantity and value would be zero. For example, entry of a battery powered watch, imported without a battery, classifiable under subheading 9101.11.40 would include a line for the statistical reporting number for the battery (9101.11.4040) with the quantity and value shown as zero. To determine the proper statistical reporting number(s) for the subheadings enumerated below, the importer shall combine the applicable 8-digit subheading number with the applicable statistical suffix found below.

The individual components shall be separately reported under the appropriate statistical suffixes. In each instance, the sum of the values of the individual components shall be equal to the total value of the article.

4. Articles of this chapter, other than those of headings 9601 to 9606 or 9615, remain classified in the chapter whether or not composed wholly or partly of precious metal or metal clad with precious metal, of natural or cultured pearls, or precious or semiprecious stones (natural, synthetic or reconstructed). However, headings 9601 to 9606 and 9615 include articles in which natural or cultured pearls, precious or semiprecious stones (natural, synthetic or reconstructed), precious metal or metal clad with precious metal constitute only minor constituents.

CHAPTER 97

WORKS OF ART, COLLECTORS' PIECES AND ANTIQUES

Notes

1. This chapter does not cover:

   (a) Unused postage or revenue stamps, postal stationery (stamped paper) or the like, of current or new issue in the country to which they are destined (chapter 49);

   (b) Theatrical scenery, studio backdrops or the like, of painted canvas (heading 5907) except if they may be classified in heading 9706; or

   (c) Pearls, natural or cultured, or precious or semiprecious stones (headings 7101 to 7103).

2. For the purposes of heading 9702, the expression "original engravings, prints and lithographs" means impressions produced directly, in black and white or in color, of one or of several plates wholly executed by hand by the artist, irrespective of the process or of the material employed by him, but not including any mechanical or photomechanical process.

3. Heading 9703 does not apply to mass-produced reproductions or works of conventional craftsmanship of a commercial character, even if these articles are designed or created by artists.

4. (a) Subject to notes 1 through 3 above, articles of this chapter are to be classified in this chapter and not in any other chapter of the tariff schedule.

   (b) Heading 9706 does not apply to articles of the preceding headings of this chapter.

5. Frames around paintings, drawings, pastels, collages or similar decorative plaques, engravings, prints or lithographs are to be classified with those articles, provided they are of a kind and of a value normal to those articles. Frames which are not of a kind or of a value normal to the articles referred to in this note are to be classified separately.

Additional U.S. Notes

1. Heading 9703 covers not only original sculpture made by the sculptor, but also the first 12 castings, replicas or reproductions made from a sculptor's original work or model, by the sculptor himself or by another artist, with or without a change in scale and whether or not the sculptor is alive at the time the castings, replicas or reproductions are completed.

2. Whenever an article is entered for sale under heading 9706, and thereafter determined to be not over 100 years of age, a duty of 6.6 percent ad valorem for articles subject to column 1-general treatment, free of duty for goods originating in the territory of Canada or a duty of 25 percent ad valorem for articles subject to column 2 treatment shall be assessed thereon in addition to any other duty or penalty imposed on such article under the tariff schedule.

SPECIAL CLASSIFICATION PROVISIONS; TEMPORARY LEGISLATION; TEMPORARY MODIFICATIONS ESTABLISHED PURSUANT TO TRADE LEGISLATION; ADDITIONAL IMPORT RESTRICTIONS ESTABLISHED PURSUANT TO SECTION 22 OF THE AGRICULTURAL ADJUSTMENT ACT, AS AMENDED

CHAPTER 98

SPECIAL CLASSIFICATION PROVISIONS

U.S. Notes

1. The provisions of this chapter are not subject to the rule of relative specificity in general rule of interpretation 3(a). Any article which is described in any provision in this chapter is classifiable in said provision if the conditions and requirements thereof and of any applicable regulations are met.

2. In the absence of a specific provision to the contrary, the tariff status of an article is not affected by the fact that it was previously imported into the customs territory of the United States and cleared through customs whether or not duty was paid upon such previous importation.

3. Any article exempted under subchapters IV through VII, inclusive, or subchapter IX from the payment of duty shall be exempt also from the payment of any internal-revenue tax imposed upon or by reason of importation.

Statistical Notes

1. Statistical data are not to be furnished with respect to articles classified in those headings of this chapter for which no statistical suffix is shown.

2. For articles provided for in this chapter, the rate of duty for which is derived from a provision elsewhere in the tariff schedule, the citation to be used in statistical reporting shall be the 10-digit statistical reporting number provided in this chapter followed by the reporting number of the provision from which such rate is derived. The unit of quantity reported hereunder for such articles shall be the same as the unit of quantity for the provision from which the rate was derived. For example, 10 new fully automatic arc welding machines exported for repairs or alterations pursuant to a warranty and returned to the United States the statistical reporting number shall be 9802.00.4040-8515.31.0000, with the quantity being shown as 10 and the value as dutiable value.

NOTICE TO EXPORTERS

The statistical reporting numbers contained in this chapter apply only to imports and may not be reported on Shipper's Export Declarations. See Notice to Exporters preceding chapter 1.

SUBCHAPTER I

ARTICLES EXPORTED AND RETURNED, NOT ADVANCED OR
IMPROVED IN CONDITION; ANIMALS EXPORTED AND RETURNED

U.S. Notes

1. The provisions in this subchapter (except subheadings 9801.00.70 and 9801.00.80) shall not apply to any article:

   (a) Exported with benefit of drawback;

   (b) Of a kind with respect to the importation of which an internal-revenue tax is imposed at the time such article is entered, unless such article was subject to an internal-revenue tax imposed upon production or importation at the time of its exportation from the United States and it shall be proved that such tax was paid before exportation and was not refunded; or

   (c) Manufactured or produced in the United States in a customs bonded warehouse or under heading 9813.00.05 and exported under any provision of law.

2. For the purposes of subheadings 9801.00.70 and 9801.00.80:

   (a) When because of the destruction of customs records or for other cause it is impracticable to establish whether drawback was allowed, or the amount allowed, on a returned article, there shall be assessed thereon an amount of duty equal to the estimated drawback and internal-revenue tax which would be allowable or refundable if the imported merchandise used in the manufacture or production of the returned article were dutiable or taxable at the rate applicable to such merchandise on the date of entry, but in no case more than the duty and tax that would apply if the article were wholly of foreign origin;

   (b) Tobacco products and cigarette papers and tubes classifiable under such subheading may be released from customs custody, without payment of that part of duty attributable to the internal-revenue tax, for return to internal-revenue bond as provided by section 5704(d) of the Internal Revenue Code of 1954; and

   (c) In order to facilitate the ascertainment and collection of the duty provided for, the Secretary of the Treasury is authorized to ascertain and specify the amounts of duty equal to drawback or internal-revenue tax which shall be applied to articles or classes or kinds of articles, and to exempt from the assessment of duty articles or classes or kinds of articles with respect to which the collection of such duty involves expense and inconvenience to the Government which is disproportionate to the probable amount of such duty.

SUBCHAPTER II

ARTICLES EXPORTED AND RETURNED, ADVANCED OR IMPROVED ABROAD

U.S. Notes

1. Except for goods subject to NAFTA drawback, this subchapter shall not apply to any article exported:

   (a) From continuous customs custody with remission, abatement or refund of duty;

   (b) With benefit of drawback;

   (c) To comply with any law of the United States or regulation of any Federal agency requiring exportation; or

   (d) After manufacture or production in the United States under heading 9813.00.05.

2. (a) Except as provided in paragraph (b), any product of the United States which is returned after having been advanced in value or improved in condition abroad by any process of manufacture or other means, or any imported article which has been assembled abroad in whole or in part of products of the United States, shall be treated for the purposes of this Act as a foreign article, and, if subject to a duty which is wholly or partly ad valorem, shall be dutiable, except as otherwise prescribed in this part, on its full value determined in accordance with section 402 of the Tariff Act of 1930, as amended. If such product or such article is dutiable at a rate dependent upon its value, the value for the purpose of determining the rate shall be its full value under the said section 402.

   (b) No article (except a textile article, apparel article, or petroleum, or any product derived from petroleum, provided for in heading 2709 or 2710) may be treated as a foreign article, or as subject to duty, if--

      (I) the article is--

         (A) assembled or processed in whole of fabricated components that are a product of the United States, or

         (B) processed in whole of ingredients (other than water) that are a product of the United States,

         in a beneficiary country; and

      (ii) neither the fabricated components, materials or ingredients, after exportation from the United States, nor the article itself, before importation into the United States, enters the commerce of any foreign country other than a beneficiary country.

      As used in this paragraph, the term "beneficiary country" means a country listed in general note 7(a).

3. Articles repaired, altered, processed or otherwise changed in condition abroad.--The following provisions apply only to subheadings 9802.00.40 through 9802.00.60, inclusive:

   (a) The value of repairs, alterations, processing or other change in condition outside the United States shall be:

      (I) The cost to the importer of such change; or

      (ii) If no charge is made, the value of such change,

      as set out in the invoice and entry papers; except that, if the appraiser concludes that the amount so set out does not represent a reasonable cost or value, then the value of the change shall be determined in accordance with section 402 of the Tariff Act of 1930, as amended.

   (b) No appraisement of the imported article in its changed condition shall be required unless necessary to a determination of the rate or rates of duty applicable to such article.

   (c) The duty, if any, upon the value of the change in condition shall be at the rate which would apply to the article itself, as an entirety without constructive separation of its components, in its condition as imported if it were not within the purview of this subchapter. If the article, as returned to the United States, is subject to a specific or compound rate of duty, such rate shall be converted to the ad valorem rate which when applied to the full value of such article determined in accordance with said section 402 would provide the same amount of duties as the specific or compound rate. In order to compute the duties due, the ad valorem rate so obtained shall be applied to the value of the change in condition made outside the United States.

   (d) For the purposes of subheadings 9802.00.40 and 9802.00.50, the rates of duty in the "Special" subcolumn of column 1 followed by the symbol "CA" or "MX" in parentheses shall apply to any goods which are returned to the United States after having been repaired or altered in Canada or in Mexico, respectively, whether or not such goods are goods of Canada or goods of Mexico under the terms of general note 12 to the tariff schedule.

U.S. Notes (con.)

(e) For purposes of subheading 9802.00.60, the term "metal" covers (1) the base metals enumerated in note 3 to section XV; (2) arsenic, barium, boron, calcium, mercury, selenium, silicon, strontium, tellurium, thorium, uranium and the rare-earth elements; and (3) alloys of any of the foregoing.

4. Articles assembled abroad with components produced in the United States.--The following provisions apply only to headings 9802.00.80 and 9802.00.90:

(a) The value of the products of the United States assembled into the imported article shall be:

(I) The cost of such products at the time of the last purchase; or

(ii) If no charge is made, the value of such products at the time of the shipment for exportation,

as set out in the invoice and entry papers; except that, if the appraiser concludes that the amount so set out does not represent a reasonable cost or value, then the value of such products shall be determined in accordance with section 402 of the Tariff Act of 1930, as amended.

(b) The duty, if any, on the imported article shall be at the rate which would apply to the imported article itself, as an entirety without constructive separation of its components, in its condition as imported if it were not within the purview of this subchapter. If the imported article is subject to a specific or compound rate of duty, the total duties shall be reduced in such proportion as the cost or value of such products of the United States bears to the full value of the imported article.

5. No imported article shall be accorded partial exemption from duty under more than one provision in this subchapter.

6. Notwithstanding the partial exemption from ordinary customs duties on the value of the metal product exported from the United States provided under subheading 9802.00.60, articles imported under subheading 9802.00.60 are subject to all other duties, and any other restrictions or limitations, imposed pursuant to title VII of the Tariff Act of 1930 (19 U.S.C. 1671 et seq.), or chapter 1 of title II or chapter 1 of title III of the Trade Act of 1974 (19 U.S.C. 2251 et seq., 19 U.S.C. 2411 et seq.).

7. [(a) RESERVED]]

(b) For purposes of heading 9802.00.80, duty-free treatment shall be accorded to the following articles imported directly from a beneficiary United States-Caribbean Basin Trade Partnership Act (CBTPA) country previously designated by the President in a proclamation issued pursuant to such Act and enumerated in general note 17(a) to the tariff schedule--

(i) apparel articles assembled in one or more such beneficiary countries from fabrics wholly formed and cut in the United States, from yarns wholly formed in the United States (including fabrics not formed from yarns, if such fabrics are classifiable under heading 5602 or 5603 of chapter 56 and are wholly formed and cut in the United States); or

(ii) textile luggage assembled in a designated beneficiary country from fabric wholly formed and cut in the United States, from yarns wholly formed in the United States.

Articles otherwise eligible to enter under this heading, and which satisfy the conditions set forth in U.S. note 3 to subchapter XX of this chapter, shall not be ineligible to enter under this heading. Articles covered by the terms of this note shall be admitted into the customs territory of the United States free of quantitative limitations. but the term does not include materials or supplies, nor does it include ordinary equipment for use in building construction or maintenance or for use in supporting activities of the institution such as its administrative offices or its eating or religious facilities. The term "instruments and apparatus" under subheading 9810.00.60 includes separable components of an instrument or apparatus listed in this subdivision that are imported for assembly in the United States in such instrument or apparatus where the instrument or apparatus, due to its size, cannot be feasibly imported in its assembled state.

(b) An institution desiring to enter an article under subheading 9810.00.60 shall make application therefor to the Secretary of the Treasury including therein (in addition to such other information as may be prescribed by regulation) a description of the article, the purposes for which the instrument or apparatus is intended to be used, the basis for the institution's belief that no instrument or apparatus of equivalent scientific value for such purposes is being manufactured in the United States, and a statement that either the institution has already placed a bona fide order for the instrument or apparatus or has a firm intention, in the event of favorable action on its application, to place such an order on or before the final day specified in paragraph (d) of this U.S. note for the placing of an order. If the application is made in accordance with the applicable regulations, the Secretary of the Treasury shall promptly forward copies thereof to the Secretary of Commerce and to the Secretary of Health and Human Services. If, at any time while its application is under consideration by the Secretary of Commerce or by the Court of Appeals for the Federal Circuit on appeal from a finding by him, an institution cancels an order for the instrument or apparatus to which its application relates or ceases to have a firm intention to order such instrument or apparatus, it shall promptly so notify the Secretary of Commerce or such Court, as the case may be.

(c) Upon receipt of the application, the Secretary of Commerce shall, by publication in the Federal Register, afford interested persons and other Government agencies reasonable opportunity to present their views with respect to the question whether an instrument or apparatus of equivalent scientific value for the purposes for which the article is intended to be used is being manufactured in the United States. After considering any views presented pursuant to this paragraph, including any written advice from the Secretary of Health and Human Services, the Secretary of Commerce shall determine whether an instrument or apparatus of equivalent scientific value to such article, for the purposes for which the instrument or apparatus is intended to be used, is being manufactured in the United States. Each finding by the Secretary of Commerce under this paragraph shall be promptly reported to the Secretary of the Treasury and to the applicant institution. Each such finding shall be published in the Federal Register, with a statement of the reasons therefor, on or before the ninetieth day following the date on which the application was made to the Secretary of the Treasury in accordance with applicable regulations.

(d) (I) If the Secretary of Commerce determines under this U.S. note that an instrument or apparatus is being manufactured in the United States that is of equivalent scientific value to a foreign-origin instrument or apparatus for which application is made (but which, due to its size, cannot be feasibly imported in its assembled state), the Secretary shall report the findings to the Secretary of the Treasury and to the applicant institution, and all components of such foreign-origin instrument or apparatus shall remain dutiable.

(ii) If the Secretary of Commerce determines that the instrument or apparatus for which application is made is not being manufactured in the United States, the Secretary is authorized to determine further whether any component of such instrument or apparatus of a type that may be purchased, obtained, or imported separately is being manufactured in the United States and shall report the findings to the Secretary of the Treasury and to the applicant institution, and any component found to be domestically available shall remain dutiable.

(iii) Any decision by the Secretary of the Treasury which allows for duty-free entry of a component of an instrument or apparatus which, due to its size cannot be feasibly imported in its assembled state, shall be effective for a specified maximum period, to be determined in consultation with the Secretary of Commerce, taking into account both the scientific needs of the importing institution and the potential for development of comparable domestic manufacturing capacity.

(e) Subheading 9810.00.60 shall not apply with respect to any instrument or apparatus unless a bona fide order therefor has been placed, by the institution making the application under this U.S. note, on or before the sixtieth day following the day on which a finding of the Secretary of Commerce favorable to the institution has become final and conclusive.

U.S. Notes (con.)

(f) Within 20 days after the publication in the Federal Register of a finding by the Secretary of Commerce under paragraph (c) of this U.S. note, an appeal may be taken from said finding only upon a question or questions of law and only to the United States Court of Appeals for the Federal Circuit:

(I) by the institution which made the application under paragraph (b) of this U.S. note;

(ii) by a person who, in the proceeding which led to such finding, represented to the Secretary of Commerce in writing that he manufactures in the United States an instrument or apparatus of equivalent scientific value for the purposes for which the article to which the application relates is intended to be used,

(iii) by the importer thereof, if the article to which the application relates has been entered at the time the appeal is taken, or

(iv) by an agent of any of the foregoing.

Any appeal under this paragraph shall receive a preference over all other matters before the Court and shall be heard and determined as expeditiously as the Court considers to be practicable. The judgement of the Court shall be final.

(g) The Secretary of the Treasury and the Secretary of Commerce may prescribe joint regulations to carry out their functions under this note.

SUBCHAPTER III

TEMPORARY MODIFICATIONS ESTABLISHED PURSUANT TO TRADE LEGISLATION

U.S. Notes

1. This subchapter contains the temporary modifications of the provisions in the tariff schedule established pursuant to trade legislation. Unless otherwise stated, the modified provisions are effective until suspended or terminated. Unless the context requires otherwise, any article described in the provisions of this subchapter, for which rates of duty are herein provided, if entered during the period specified, is subject to duty at the rate set forth herein in lieu of the rate provided therefor in chapters 1 to 98.

[U.S. note 2 deleted]

3. For the purposes of subheadings 9903.41.05 and 9903.41.10, the duties provided for in this subchapter are cumulative duties which apply in addition to the duties otherwise imposed on the articles involved.

[U.S. note 4 deleted]

5. The following provisions have been suspended pursuant to executive action: subheadings 9903.04.05 and 9903.04.10, headings 9903.04.15 through 9903.04.55, inclusive, subheading 9903.41.25, and subheadings 9903.41.35 through 9903.41.45, inclusive.

6. Import quotas for upland cotton.--The provisions of this note apply beginning August 1, 1991, to imports of upland cotton as provided in subheadings 9903.52.00 through 9903.52.26.

   (a) Special Upland Cotton Import Quota Based on Northern Europe Prices.--

      (i) Whenever the Secretary of Agriculture determines and announces that for any consecutive 10-week period, the Friday through Thursday average price quotation for the lowest-priced United States growth, as quoted for Middling one and three-thirty-seconds inch cotton, delivered C.I.F. Northern Europe, adjusted for the value of any certificates issued under section 103B(a)(5)(E) of the Agricultural Act of 1949, as amended, exceeds the Friday through Thursday average price of the five lowest-priced growths of upland cotton, as quoted for Middling one and three-thirty-seconds inch cotton, delivered C.I.F. Northern Europe (Northern Europe price) by more than 1.25 cents per pound, there shall be in effect, as of the effective date of such announcement, a special import quota equal to 1 week's consumption of upland cotton by domestic mills at the seasonally adjusted average rate of the most recent 3 months for which data are available. During the period when both a price quotation for cotton for shipment no later that August/September of the current calendar year (current shipment price) and a price quotation for cotton for shipment no earlier that October/November of the current calendar year (forward shipment price) are available for such growths, the current shipment price shall be used. An announcement under this clause shall be known as a Special Cotton Import Quota Announcement.

      (ii) Application.--The quota shall apply to upland cotton purchased not later than 90 days after the effective date of the Secretary's announcement under clause (i) and entered into the United States not later than 180 days after such date.

      (iii) Overlap.--A quota period may be established that overlaps any existing quota period if required by clause (i), except that a quota period may not be established under this paragraph if a quota period has been established under paragraph (b) of this note.

      (iv) The Secretary of Agriculture shall inform the Secretary of the Treasury of the establishment of any special import quota under this paragraph and shall file a notice of such quota with the Federal Register.

   (b) Upland Cotton Import Quota Based on Spot Market Prices.--

      (i) Whenever the Secretary of Agriculture determines and announces that the average price of the base quality of upland cotton, as determined by the Secretary, in the designated spot markets for a month exceeded 130 percent of the average price of such quality of cotton in such markets for the preceding 36 months, there shall immediately be in effect a limited global import quota equal to 21 days of domestic mill consumption of upland cotton at the seasonally adjusted average rate of the most recent 3 months for which data are available. An announcement under this clause shall be known as a Limited Global Cotton Import Quota Announcement.

      (ii) Quantity if prior quota.--If a quota has been established under this paragraph during the preceding 12 months, the quantity of the quota next established under this paragraph shall be the smaller of 21 days of domestic mill consumption, calculated as set forth in clause (i), or the quantity required to increase the supply to 130 percent of the demand.

U.S. Notes (con.)

(iii) Definitions.--As used in clause (ii):

(A) Supply.--The term "supply" means, using the latest official data of the Bureau of the Census, the Department of Agriculture, and the Department of the Treasury--

(I) the carry-over of upland cotton at the beginning of the marketing year (adjusted to 480-pound bales) in which the special quota is established; plus

(II) production of the current crop; plus

(III) imports to the latest date available during the marketing year.

(B) Demand.--The term "demand" means--

(I) the average seasonally adjusted annual rate of domestic mill consumption in the most recent 3 months for which data are available; plus

(II) the larger of--

(aa) average exports of upland cotton during the preceding 6 marketing years; or

(bb) cumulative exports of upland cotton plus outstanding export sales for the marketing year in which the special quota is established.

(iv) Quota entry period.--When a quota is established under this paragraph, cotton may be entered under the quota during the 90-day period beginning on the effective date of the Secretary of Agriculture's announcement of such quota.

(v) No overlap.--Notwithstanding clauses (i) through (iv), a quota period may not be established under this paragraph that overlaps an existing quota period established under this paragraph or a quota period established under paragraph (a) of this note.

(vi) The Secretary of Agriculture shall inform the Secretary of the Treasury of the establishment of any import quota under this paragraph and shall file a notice of such quota with the Federal Register.

7. For purposes of subheadings 9903.11.05, 9903.11.06, and 9903.11.07, the term "European Community" means Austria, Belgium, Denmark, Finland, France, the Federal Republic of Germany, Greece, Ireland, Italy, Luxembourg, the Netherlands, Portugal, Spain, Sweden, and the United Kingdom.

Whenever a quantity is allocated to a country, to "other countries" or to the European Community under such subheadings, and the quota quantity specified for such country or countries or for the European Community has been entered for the specified restraint period, any shipments of wheat gluten the product of such country or countries or of the European Community entered in excess of such allocated quota quantity shall be charged to the allocation for such country or countries or for the European Community for the subsequent restraint period. If the allocated quantity for a country or countries or for the European Community under subheading 9903.11.07, including any quantity carried over from the restraint periods provided for in subheadings 9903.11.05 and 9903.11.06 and charged against the appropriate allocation under subheading 9903.11.07, has been entered, any imports in excess of the allocated quota quantity for a country or countries or for the European Community shall be entered into bonded warehouse or shall be exported, and shall not be entered into the customs territory of the United States until 12:00 a.m. e.d.t. June 1, 2001. The Secretary of the Treasury is authorized to take any necessary action in order to ensure that no shipments in excess of the allocation for a country or countries or for the European Community for the period from June 1, 2000 through June 1, 2001, inclusive, is entered into the customs territory of the United States.

Note.-- At the close of June 1, 2002, U.S. note 7 shall be deleted from the HTS, as provided for in Presidential Proclamation 7103.

10. For purposes of subheadings 9903.72.20 through 9903.72.25, inclusive, except as provided in this note, the term "line pipe" shall include (notwithstanding the provisions of other legal notes to the tariff schedule) welded "carbon quality" line pipe of circular cross section, of a kind used for oil and gas pipelines, whether or not stencilled, except as provided below. The term "carbon quality" applies to products in which (i) iron predominates, by weight, over each of the other contained elements, (ii) the carbon content is 2 percent or less, by weight, and (iii) none of the elements listed below exceeds the quantity by weight, respectively indicated:

    – 1.80 percent or more of manganese, or

    – 2.25 percent of silicon, or

    – 1.00 percent of copper, or

    – 0.50 percent or less of aluminum, or

    – 1.25 percent of chromium, or

    – 0.30 percent of cobalt, or

    – 0.40 percent of lead, or

    – 1.25 percent of nickel, or

    – 0.30 percent of tungsten, or

    – 0.10 percent of molybdenum, or

    – 0.10 percent of niobium, or

    – 0.15 percent of vanadium, or

    – 0.15 percent of zirconium.

    The term "line pipe" does not include goods commonly described in commercial usage as arctic grade line pipe and defined as welded line pipe that--

    (a) has an outside diameter of 114.3 mm or more and a wall thickness equal to or less than 19.05 mm;

    (b) when subjected to a Charpy V-notch test performed at minus 45.6 degrees Celsius or below applied to three specimens taken from the weld area, has a joules rating of no less than 23.05 joules for each sample, with an average for all three at no less than 25.76 joules;

    (c) using at least three samples, has a minimum average shear area of 85 percent in the base metal and 50 percent in the weld; and

    (d) when subjected to a hydrogen induced cracking test to be performed as provided by National Association of Corrosion Engineers (NACE) TM0284 test with solution A, has a crack length ratio that does not exceed 15 percent, a crack sensibility ratio that does not exceed 2 percent, and a crack thickness ratio that does not exceed 5 percent.

SUBCHAPTER IV

SAFEGUARD MEASURES PURSUANT TO THE AGREEMENT
ON AGRICULTURE AND ADDITIONAL IMPORT RESTRICTIONS
ESTABLISHED PURSUANT TO SECTION 22 OF THE
AGRICULTURAL ADJUSTMENT ACT, AS AMENDED

U.S. Notes

1. This subchapter contains safeguard measures established pursuant to Article 5 of the Agreement on Agriculture (as approved by section 101 of the Uruguay Round Agreements Act), which allows the imposition of additional duties based upon either the value or the quantity of goods imported into the United States for certain agricultural products. In addition, the subchapter contains provisions which may be proclaimed pursuant to section 22 of the Agricultural Adjustment Act, as amended (7 U.S.C. 624). All of the duties provided for in this subchapter are cumulative duties which apply in addition to the duties, if any, otherwise imposed in the tariff schedule on the goods described herein. Unless otherwise stated, the duties or limitations provided for in this subchapter apply until suspended or terminated. Goods of Canada or Mexico imported into the United States shall not be subject to any of the provisions, duties or limitations of this subchapter.

2. The provisions imposing safeguard duties based upon value set forth in this subchapter shall apply to all goods described herein (other than sheep meat, which is not subject to safeguard duties based upon value) except during periods announced in the Federal Register by the Secretary of Agriculture in consultation with the United States Trade Representative as the effective periods of the provisions imposing safeguard duties based upon quantity with respect to such goods, during which period the safeguard duties based upon value shall be deemed suspended and only the safeguard duties based upon quantity shall apply to such goods. Unless the Secretary of Agriculture invokes safeguard duties based upon quantity for specified goods and so announces in the Federal Register (as provided in the first sentence of this note), the tariff provisions providing for such duties shall be deemed suspended and shall not apply to the goods described herein. No safeguard duties based upon quantity shall apply to goods en route on the basis of a contract settled before the effective date of such measures specified in a notice issued by the Secretary of Agriculture.

3. For the purposes of this subchapter, imports of peanuts in the shell shall be charged against the quantities in this note on the basis of 75 kilograms for each 100 kilograms of peanuts in the shell.

[SUBCHAPTER V deleted]

SUBCHAPTER VI

TEMPORARY MODIFICATIONS ESTABLISHED PURSUANT TO THE
NORTH AMERICAN FREE TRADE AGREEMENT

U.S. Notes

1. This subchapter contains temporary modifications of the provisions of the tariff schedule established pursuant to the North American Free Trade Agreement. Goods of Mexico, entered under the terms of general note 12 to the tariff schedule, and described in the provisions of this subchapter, for which a rate of duty followed by the symbol "(MX)" is herein provided, are subject to duty at the rate set forth in this subchapter in lieu of the rate provided therefor in chapters 1 through 97. Notwithstanding quota provisions provided for elsewhere in the tariff schedule, originating goods of Mexico shall be permitted to enter the United States to the extent allowable in the provisions of this subchapter. Furthermore, any quota quantity provided for Mexico on goods described in this subchapter (except brooms, other than whiskbrooms, wholly or in part of broomcorn) shall not be counted toward any quota or tariff-rate quota provided for such good elsewhere in the tariff schedule. No other preferential tariff treatment provided for under general notes 4 through 11, inclusive, to the tariff schedule shall be afforded to goods described in the provisions of this subchapter. Whenever the pertinent special rate or rates in provisions of chapters 1 through 97, inclusive, of the tariff schedule, shall be reduced to "free" for all of the goods described in a provision of this subchapter and entered from Mexico under the terms of general note 12 to the tariff schedule, such provision shall be deleted from this subchapter, and the appropriate subheading for the good in chapters 1 through 97 shall be modified by deleting from the Rates of Duty 1 Special subcolumn the symbol "MX" in parentheses and the phrase preceding such symbol and by inserting in a "Free" rate of duty in such subcolumn the symbol "MX", alphabetical order. Unless otherwise provided, the provisions and notes of this subchapter are effective as to such goods of Mexico entered, under general note 12 to the tariff schedule, through the close of December 31, 2008, at the close of which date this subchapter shall be deleted from the tariff schedule and shall cease to apply to any goods entered after that date.

2. For purposes of this subchapter, the rate of duty followed by the symbol "(MX)" provided for in subheadings 9906.04.01 through 9906.22.05, inclusive, in subheadings 9906.23.01, 9906.23.02, and 9906.23.03 and in subheadings 9906.52.01 through 9906.52.07, inclusive, shall apply only to qualifying goods of Mexico.

3. Whenever goods are classifiable under a provision for which the temporary modification of the applicable North American Free Trade Agreement rate of duty is provided for in a subheading in this subchapter, the reporting number, in the absence of specific instructions to the contrary, shall be the appropriate statistical reporting number for the basic provision (the appropriate provision for classification purposes in chapters 1 through 97) preceded by the subheading number of this subchapter. For statistical purposes, both the basic provision statistical reporting number and the applicable subheading number of this subchapter shall be collected by the United States Bureau of Census.

SUBCHAPTER VIII

TEMPORARY MODIFICATIONS ESTABLISHED PURSUANT TO

OF TRADE IN AGRICULTURAL PRODUCTS

U.S. Notes

1. This subchapter contains temporary modifications of the provisions of the tariff schedule established pursuant to the United States' agreement with Israel concerning certain aspects of trade in agricultural products, dated November 4, 1996. Products of Israel eligible for benefits of the agreement when imported into the customs territory, and described in the provisions of this subchapter for which quantitative limits are prescribed along with rates of duty followed by the symbol "(IL)" are herein provided, are subject to duty under the provisions and at the rates set forth in this subchapter in lieu of the rates provided therefor in chapters 1 through 97 in rates of duty column 1 when entered in quantities that are within the limits provided in this subchapter. Notwithstanding quota provisions elsewhere in the tariff schedule, eligible products of Israel shall be permitted to enter the United States to the extent and at the duty rates herein provided. No goods entered under the quantitative limits set forth in this subchapter shall be counted toward any quota or tariff-rate quota provided for such goods elsewhere in the tariff schedule. No other preferential tariff treatment provided for elsewhere in the tariff schedule shall be afforded to goods described in the provisions of this subchapter. Unless otherwise provided, the provisions and notes in this subchapter are effective as to such products of Israel that are entered, or withdrawn from warehouse for consumption, on or after December 4, 1996, and through the close of December 31, 2001, after which date this subchapter shall cease to apply to any goods entered after that date.

2. Wherever goods are described by a provision of this subchapter and accorded a temporary modification of the otherwise applicable duty or quota treatment from chapters 1 through 97 of this schedule, the reporting number, in the absence of specific instructions providing otherwise, shall be the appropriate statistical reporting number for the basic provision (the appropriate provision for classification purposes in chapters 1 through 97) preceded by the appropriate subheading number from this subchapter. For statistical purposes, both the basic provision statistical reporting number and the applicable subheading number from this subchapter shall be collected by the United States Bureau of Census.

ANNEX A

Schedule C - Classification of Country and Territory Designations for U.S. Foreign Trade Statistics

Schedule C contains the country and territory designations for use in compiling the U.S. export and import statistics. These designations should be shown in all cases where statistical information is required. The first part of this schedule contains the country designations arranged in numeric order by continent and listed in sequence within each continent generally from north to south and west to east. Abbreviated country designations, which are used in lieu of complete country names in some foreign trade reports, are also shown. The second part contains a listing in alphabetical arrangement of the countries, territories, etc., with their numeric codes. The names of the entities listed are generally the conventional spellings as approved by the U.S. Board on Geographic Names.

Revisions to Schedule C will be announced in the form of "special notices" to data users, as Public Bulletins to Schedule B, Statistical Classification of Domestic and Foreign Commodities Exported from the United States, and as supplements to the Harmonized Tariff Schedule of the United States Annotated for statistical purposes (HTS). HTS also includes a list of International Standard (ISO) Country Codes to be used by importers to report country of origin.

ANNEX C

Schedule D - Classification of U.S. Customs Districts and Ports for U.S. Foreign Trade Statistics

Schedule D provides a list of U.S. Customs districts, the ports included under each district, and the corresponding numeric codes used in compiling the U.S. foreign trade statistics. The Schedule contains a code for each official U.S. Customs district and port, with some additional codes provided to meet specific compiling requirements of the foreign trade statistics program. The headquarters port for each district is underlined. Some Customs ports show two codes. Exporters and importers may report either code. The first part of this schedule contains the Customs districts and ports arranged in numeric order by code, while the second part lists the ports in alphabetic order.

Revisions to Schedule D will be announced in the form of "special notices" to data users, as Public Bulletins to Schedule B, Statistical Classification of Domestic and Foreign CommoditiesExported from the United States, and as supplements to the Harmonized Tariff Schedule of the United States Annotated for Statistical Purposes.

Title 3—

The President

Proclamation 7273 of February 16, 2000

To Facilitate Positive Adjustment to Competition From Imports of Certain Steel Wire Rod

By the President of the United States of America

A Proclamation

1. On July 12, 1999, the United States International Trade Commission (USITC) transmitted to the President a report on its investigation under section 202 of the Trade Act of 1974, as amended (the ''Trade Act'') (19 U.S.C. 2252), with respect to imports of certain steel wire rod provided for in subheadings 7213.91, 7213.99, 7227.20 and 7227.90.60 of the Harmonized Tariff Schedule of the United States (HTS). The USITC commissioners were equally divided with respect to the determination required under section 202(b) of the Trade Act (19 U.S.C. 2252(b)) regarding whether such steel wire rod is being imported into the United States in such increased quantities as to be a substantial cause of serious injury, or threat of serious injury, to the domestic industry producing a like or directly competitive article.

2. Section 330(d)(1) of the Tariff Act of 1930, as amended (the ''Tariff Act'') (19 U.S.C. 1330(d)(1)) provides that when the USITC is required to determine under section 202(b) of the Trade Act whether increased imports of an article are a substantial cause of serious injury, or the threat thereof, and the commissioners voting are equally divided with respect to such determination, then the determination agreed upon by either group of commissioners may be considered by the President as the determination of the USITC. Having reviewed the determinations of both groups of commissioners, I have decided to consider the determination of the group of commissioners voting in the affirmative to be the determination of the USITC.

3. Pursuant to section 311(a) of the North American Free Trade Agreement Implementation Act (the ''NAFTA Implementation Act'') (19 U.S.C. 3371(a)), the USITC made negative findings with respect to imports of steel wire rod from Mexico and Canada. The USITC commissioners voting in the affirmative also transmitted to the President their recommendations made pursuant to section 202(e) of the Trade Act (19 U.S.C. 2252(e)) with respect to the action that would address the serious injury or threat thereof to the domestic industry and be most effective in facilitating the efforts of the domestic industry to make a positive adjustment to import competition.

4. Pursuant to section 203 of the Trade Act (19 U.S.C. 2253), and after taking into account the considerations specified in section 203(a)(2) of the Trade Act, I have determined to implement action of a type described in section 203(a)(3) and to provide exclusions for enumerated steel wire rod products (''excluded products''). Pursuant to section 312(a) of the NAFTA Implementation Act (19 U.S.C. 3372(a)), I have determined that imports of steel wire rod from Mexico, considered individually, do not account for a substantial share of total imports and do not contribute importantly to the serious injury, or threat of serious injury, found by the USITC, and that imports from Canada, considered individually, do not contribute importantly to such injury or threat. Accordingly, pursuant to section 312(b) of the NAFTA Implementation Act (19 U.S.C. 3372(b)), I have excluded steel wire rod the product of Mexico or Canada from the action I am taking under section 203 of the Trade Act.

5. Such action shall take the form of a tariff-rate quota on imports of steel wire rod (other than excluded products), provided for in HTS subheadings 7213.91, 7213.99, 7227.20 and 7227.90.60, imposed for a period of 3 years plus 1 day, with annual increases in the within-quota quantities and annual reductions in the rate of duty applicable to goods entered in excess of those quantities in the second and third years, as provided for in the Annex to this proclamation.

6. Except for products of Mexico and of Canada, which shall all be excluded from this restriction, such tariff-rate quota shall apply to imports of steel wire rod from all countries. Pursuant to section 203(a)(1)(A) of the Trade Act (19 U.S.C. 2253(a)(1)(A)), I have further determined that this action will facilitate efforts by the domestic industry to make a positive adjustment to import competition and provide greater economic and social benefits than costs.

7. Section 604 of the Trade Act, as amended (19 U.S.C. 2483), authorizes the President to embody in the HTS the substance of the relevant provisions of that Act, and of other acts affecting import treatment, and actions thereunder, including the removal, modification, continuance, or imposition of any rate of duty or other import restriction.

NOW, THEREFORE, I, WILLIAM J. CLINTON, President of the United States of America, acting under the authority vested in me by the Constitution and the laws of the United States of America, including but not limited to sections 203 and 604 of the Trade Act, do proclaim that:

(1) In order to establish a tariff-rate quota on imports of steel wire rod (other than excluded products), classified in HTS subheadings 7213.91, 7213.99, 7227.20 and 7227.90.60, subchapter III of chapter 99 of the HTS is modified as provided in the Annex to this proclamation.

(2) Such imported steel wire rod that is the product of Mexico or of Canada shall be excluded from the tariff-rate quota established by this proclamation, and such imports shall not be counted toward the tariff-rate quota limits that trigger the over-quota rates of duty.

(3) I hereby suspend, pursuant to section 503(c)(1) of the Trade Act (19 U.S.C. 2463(c)(1)), duty-free treatment for steel wire rod the product of beneficiary countries under the Generalized System of Preferences (GSP) (Title V of the Trade Act, as amended (19 U.S.C. 2461–2467)); pursuant to section 213(e)(1) of the Caribbean Basin Economic Recovery Act, as amended (CBERA) (19 U.S.C. 2703(e)(1)), duty-free treatment for steel wire rod the product of beneficiary countries under that Act (19 U.S.C. 2701–2707); pursuant to section 204(d)(1) of the Andean Trade Preference Act, as amended (ATPA)(19 U.S.C. 3203(d)(1)), duty-free treatment for steel wire rod the product of beneficiary countries under that Act (19 U.S.C. 3201–3206); and pursuant to section 403(a) of the Trade and Tariff Act of 1984 (19 U.S.C. 2112 note), duty-free treatment for steel wire rod the product of Israel under the United States-Israel Free Trade Area Implementation Act of 1985 (the ''IFTA Act'') (19 U.S.C. 2112 note), to the extent necessary to apply the tariff-rate quota to those products, as specified in the Annex to this proclamation.

(4) During each of the first three quarters of a quota year, any articles subject to the tariff-rate quota that are entered, or withdrawn from warehouse for consumption, in excess of one-third of the annual within-quota quantity for that quota year (as specified in the Annex to this proclamation) shall be subject to the over-quota rate of duty then in effect. During the fourth quarter of a quota year, any articles subject to the tariff-rate quota that are entered, or withdrawn from warehouse for consumption, in excess of the remaining quantity of the annual within-quota quantity for that quota year shall be subject to the over-quota rate of duty then in effect. The remaining quantity shall be determined by subtracting the total quantity of goods entered at the in-quota rate during the first three quarters of the quota year from the annual within-quota quantity for that quota year.

(5) Effective at the close of March 1, 2003, or at the close of the date which may earlier be proclaimed by the President as the termination of the import relief set forth in the Annex to this proclamation, the suspension of duty-free treatment under the GSP, the CBERA, the ATPA and the IFTA Act shall terminate, unless otherwise provided in such later proclamation, and qualifying goods the product of beneficiary countries or of Israel entered under such programs shall again be eligible for duty-free treatment.

(6) Effective at the close of March 1, 2004, or such other date that is one year from the close of this relief, the U.S. note and tariff provisions established in the Annex to this proclamation shall be deleted from the HTS.

(7) Any provisions of previous proclamations and Executive orders that are inconsistent with the actions taken in this proclamation are superseded to the extent of such inconsistency.

(8) The modifications to the HTS made by this proclamation, including the Annex hereto, shall be effective with respect to goods entered, or withdrawn from warehouse for consumption, on or after March 1, 2000, and shall continue in effect as provided in the Annex to this proclamation, unless such actions are earlier expressly modified or terminated.

IN WITNESS WHEREOF, I have hereunto set my hand this sixteenth day of February, in the year of our Lord two thousand, and of the Independence of the United States of America the two hundred and twenty-fourth.

Title 3—

Proclamation 7274 of February 18, 2000

To Facilitate Positive Adjustment to Competition From Imports of Certain Circular Welded Carbon Quality Line Pipe

By the President of the United States of America

A Proclamation

1. On December 22, 1999, the United States International Trade Commission (USITC) transmitted to the President an affirmative determination in its investigation under section 202 of the Trade Act of 1974, as amended (the ''Trade Act'') (19 U.S.C. 2252), with respect to imports of certain circular welded carbon quality line pipe (line pipe) provided for in subheadings 7306.10.10 and 7306.10.50 of the Harmonized Tariff Schedule of the United States (HTS). The USITC determined that line pipe is being imported in such increased quantities as to be a substantial cause of serious injury or the threat of serious injury to the domestic industry producing a like or directly competitive article.

2. Pursuant to section 311(a) of the North American Free Trade Agreement Implementation Act (the ''NAFTA Implementation Act'') (19 U.S.C. 3371(a)), the USITC made negative findings with respect to imports of line pipe from Mexico and Canada. The USITC also transmitted to the President its recommendations made pursuant to section 202(e) of the Trade Act (19 U.S.C. 2252(e)) with respect to the action that would address the serious injury or threat thereof to the domestic industry and be most effective in facilitating the efforts of the domestic industry to make a positive adjustment to import competition.

3. Pursuant to section 203 of the Trade Act (19 U.S.C. 2253), and after taking into account the considerations specified in section 203(a)(2) of the Trade Act, I have determined to implement action of a type described in section 203(a)(3). Pursuant to section 312(a) of the NAFTA Implementation Act (19 U.S.C. 3372(a)), I have determined that imports of line pipe from Mexico, considered individually, do not contribute importantly to the serious injury, or threat of serious injury, found by the USITC, and that imports from Canada, considered individually, do not contribute importantly to such injury or threat. Accordingly, pursuant to section 312(b) of the NAFTA Implementation Act (19 U.S.C. 3372(b)), I have excluded line pipe the product of Mexico or Canada from the action I am taking under section 203 of the Trade Act.

4. Such action shall take the form of an increase in duty on imports of certain line pipe provided for in HTS subheadings 7306.10.10 and 7306.10.50, imposed for a period of 3 years plus 1 day, with the first 9,000 short tons of imports that are the product of each supplying country excluded from the increased duty during each year that this action is in effect, and with annual reductions in the rate of duty in the second and third years, as provided for in the Annex to this proclamation.

5. Except for products of Mexico and Canada, which shall be excluded from this action, the increase in duty shall apply to imports of line pipe from all countries. Pursuant to section 203(a)(1)(A) of the Trade Act (19 U.S.C. 2253(a)(1)(A)), I have further determined that this action will facilitate efforts by the domestic industry to make a positive adjustment to import competition and provide greater economic and social benefits than costs.

6. Section 604 of the Trade Act, as amended (19 U.S.C. 2483), authorizes the President to embody in the HTS the substance of the relevant provisions of that Act, and of other acts affecting import treatment, and actions thereunder, including the removal, modification, continuance, or imposition of any rate of duty or other import restriction.

NOW, THEREFORE, I, WILLIAM J. CLINTON, President of the United States of America, acting under the authority vested in me by the Constitution and the laws of the United States of America, including but not limited to sections 203 and 604 of the Trade Act, do proclaim that:

(1) In order to establish an increase in duty on imports of certain line pipe classified in HTS subheadings 7306.10.10 and 7306.10.50, subchapter III of chapter 99 of the HTS is modified as provided in the Annex to this proclamation.

(2) Such imported line pipe that is the product of Mexico or of Canada shall not be subject to the increase in duty established by this proclamation.

(3) I hereby suspend, pursuant to section 503(c)(1) of the Trade Act (19 U.S.C. 2463(c)(1)), duty-free treatment for line pipe the product of beneficiary countries under the Generalized System of Preferences (GSP) (Title V of the Trade Act, as amended (19 U.S.C. 2461–2467)); pursuant to section 213(e)(1) of the Caribbean Basin Economic Recovery Act, as amended (CBERA) (19 U.S.C. 2703(e)(1)), duty-free treatment for line pipe the product of beneficiary countries under that Act (19 U.S.C. 2701–2707); pursuant to section 204(d)(1) of the Andean Trade Preference Act, as amended (ATPA) (19 U.S.C. 3203(d)(1)), duty-free treatment for line pipe the product of beneficiary countries under that Act (19 U.S.C. 3201–3206); and pursuant to section 403(a) of the Trade and Tariff Act of 1984 (19 U.S.C. 2112 note), duty-free treatment for line pipe the product of Israel under the United States-Israel Free Trade Area Implementation Act of 1985 (the ''IFTA Act'') (19 U.S.C. 2112 note), to the extent necessary to apply the increase in duty to those products, as specified in the Annex to this proclamation.

(4) Effective at the close of March 1, 2003, or at the close of the date that may earlier be proclaimed by the President as the termination of the import relief set forth in the Annex to this proclamation, the suspension of duty-free treatment under the GSP, the CBERA, the ATPA, and the IFTA Act shall terminate, unless otherwise provided in such later proclamation, and qualifying goods the product of beneficiary countries or of Israel entered under such programs shall again be eligible for duty-free treatment.

(5) Effective at the close of March 1, 2004, or such other date that is 1 year from the close of this relief, the U.S. note and tariff provisions established in the Annex to this proclamation shall be deleted from the HTS.

(6) Any provisions of previous proclamations and Executive orders that are inconsistent with the actions taken in this proclamation are superseded to the extent of such inconsistency.

(7) The modifications to the HTS made by this proclamation, including the Annex hereto, shall be effective with respect to goods entered, or withdrawn from warehouse for consumption, on or after March 1, 2000, and shall continue in effect as provided in the Annex to this proclamation, unless such actions are earlier expressly modified or terminated.

IN WITNESS WHEREOF, I have hereunto set my hand this eighteenth day of February, in the year of our Lord two thousand, and of the Independence of the United States of America the two hundred and twenty-fourth.

The President

Proclamation 7314—To Modify the Quantitative Limitations Applicable to Imports of Wheat Gluten

Federal Register
Vol. 65, No. 105
Wednesday, May 31, 2000

Presidential Documents

Title 3—

The President

Proclamation 7314 of May 26, 2000

To Modify the Quantitative Limitations Applicable to Imports of Wheat Gluten

By the President of the United States of America

A Proclamation

1. On May 30, 1998, pursuant to section 203 of the Trade Act of 1974, as amended (the ''Trade Act'') (19 U.S.C. 2253), I issued Proclamation 7103, which imposed quantitative limitations on certain wheat gluten imports provided for in subheadings 1109.00.10 and 1109.00.90 of the Harmonized Tariff Schedule of the United States (HTS) for a period of 3 years plus 1 day, with annual increases in such quota limits of 6 percent during the second and the third year. I exempted imports of wheat gluten that is the product of certain countries, including designated beneficiary countries under the Generalized System of Preferences (''GSP countries''), from the application of the quantitative limitations.

2. On December 1, 1999, the United States International Trade Commission (USITC) issued a report, as required under section 204(a)(2) of the Trade Act (19 U.S.C. 2254(a)(2)), on the results of its monitoring of developments with respect to the domestic wheat gluten industry. The USITC report notes that in the 12-month period prior to the imposition of the quota (June 1, 1997–May 31, 1998), 440,000 pounds of wheat gluten entered the United States from Poland. During the first quota year (June 1, 1998–May 31, 1999), imports from Poland grew to 5,004,000 pounds, or more than eleven times the amount of the previous year, accounting for 2.9 percent of total U.S. imports. The USITC report has been provided to me (Investigation Number TA–204–2). More recent data from the United States Customs Service indicate that in the first 10 months of the second quota year (June 1999–March 2000), imports from Poland totaled 8,965,800 pounds, accounting for 6.9 percent of total U.S. imports.

3. Section 204(b)(1)(A) of the Trade Act (19 U.S.C. 2254(b)(1)(A)) authorizes the President, after taking into account the report of the USITC required under section 204(a)(2) of the Trade Act and seeking advice from the Secretary of Commerce and the Secretary of Labor, to reduce, modify, or terminate an action taken under section 203 of the Trade Act when the President determines that changed economic circumstances so warrant.

4. After taking into account the information provided in the USITC's report, and after receiving advice from the Secretary of Commerce and the Secretary of Labor, I have determined, on the basis that increased imports of wheat gluten the product of Poland have impaired the effectiveness of the action I proclaimed in 1998 under section 203 of the Trade Act, that changed economic circumstances warrant a modification in the action. Accordingly, I have decided to include in the action imports of wheat gluten the product of Poland, beginning June 1, 2000.

5. Pursuant to section 203(g) of the Trade Act (19 U.S.C. 2253(g)), I have further determined to provide for the efficient and fair administration of the quantitative limitation on imports of wheat gluten by allocating on a quarterly basis the quantitative limitations applicable during the third year of the action.

6. Pursuant to section 503(b)(2) of the Trade Act (19 U.S.C. 2463(b)(2)), no article shall be eligible for duty-free treatment provided under section 501 of the Trade Act if that article is subject to an action proclaimed under section 203.

7. Section 604 of the Trade Act (19 U.S.C. 2483) authorizes the President to embody in the HTS the substance of the relevant provisions of that Act, and of other acts affecting import treatment, and actions thereunder, including the removal, modification, continuance, or imposition of any rate of duty or other import restriction.

NOW, THEREFORE, I, WILLIAM J. CLINTON, President of the United States of America, acting under the authority vested in me by the Constitution and the laws of the United States of America, including but not limited to sections 204, 503, and 604 of the Trade Act, do proclaim that:

(1) In order to modify the scope of the quantitative limitations applicable to imports of wheat gluten under HTS heading 1109, and to allocate the quota quantities for the third quota year on a quarterly basis, subchapter III of chapter 99 of the HTS is modified as set forth in the Annex to this proclamation.

(2) Such imported wheat gluten that is the product of Poland shall be included within the scope of the quantitative limitations during the third quota year, as provided in the Annex.

(3) Any provisions of previous proclamations and Executive orders that are inconsistent with the actions taken in this proclamation are superseded to the extent of such inconsistency.

(4) Effective at the close of June 1, 2002, or such other date that is 1 year from the close of the action taken under section 203 of the Trade Act, as modified by this proclamation, HTS subheadings 9903.11.08 through 9903.11.11 and the superior text thereto shall be deleted from the HTS.

(5) Pursuant to section 503(b)(2) of the Trade Act (19 U.S.C. 2463(b)(2)), duty-free treatment for certain wheat gluten that is the product of beneficiary countries under the Generalized System of Preferences (GSP) (Title V of the Trade Act, as amended (19 U.S.C. 2461–2467)), is suspended.

(6) The modifications to the HTS made by this proclamation and the Annex thereto shall be effective with respect to goods entered, or withdrawn from warehouse for consumption, on or after 12:01 a.m. EDT June 1, 2000, and shall continue in effect through the close of June 1, 2001, unless such actions are earlier expressly modified or terminated.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-sixth day of May, in the year of our Lord two thousand, and of the Independence of the United States of America the two hundred and twenty-fourth.

Title 3—

The President

Proclamation 7325 of June 29, 2000

To Modify Duty-Free Treatment Under the Generalized System of Preferences and for Other Purposes

By the President of the United States of America

A Proclamation

1. Pursuant to sections 501, 503(a)(1)(A), and 503(c)(1) of title V of the Trade Act of 1974, as amended (the ''1974 Act'') (19 U.S.C. 2461, 2463(a)(1)(A), and 2463(c)(1)), the President may designate or withdraw designation of specified articles provided for in the Harmonized Tariff Schedule of the United States (HTS) as eligible for preferential tariff treatment under the Generalized System of Preferences (GSP) when imported from designated beneficiary developing countries.

2. Pursuant to section 503(c)(2)(A) of the 1974 Act (19 U.S.C. 2463(c)(2)(A)), beneficiary developing countries, except those designated as least-developed beneficiary developing countries pursuant to section 503(c)(2)(D) of the 1974 Act (19 U.S.C. 2463(c)(2)(D)), are subject to competitive need limitations on the preferential treatment afforded under the GSP to eligible articles.

3. Pursuant to section 503(c)(2)(C) of the 1974 Act (19 U.S.C. 2463(c)(2)(C)), a country that is no longer treated as a beneficiary developing country with respect to an eligible article may be redesignated as a beneficiary developing country with respect to such article if imports of such article from such country did not exceed the competitive need limitations in section 503(c)(2)(A) (19 U.S.C. 2463(c)(2)(A)) during the preceding calendar year.

4. Pursuant to section 503(c)(2)(F) of the 1974 Act (19 U.S.C. 2463(c)(2)(F)), the President may disregard the competitive need limitation provided in section 503(c)(2)(A)(i)(II) of the 1974 Act (19 U.S.C. 2463(c)(2)(A)(i)(II)) with respect to any eligible article if the appraised value of the total imports of such article into the United States during the preceding calendar year does not exceed an amount set forth in section 503(c)(2)(F)(ii) of the 1974 Act (19 U.S.C. 2463(c)(2)(F)(ii)).

5. Pursuant to section 503(d) of the 1974 Act (19 U.S.C. 2463(d)), the President may waive the application of the competitive need limitations in section 503(c)(2)(A) with respect to any eligible article from any beneficiary developing country if certain conditions are met.

6. Pursuant to section 503(c)(2)(E) of the 1974 Act (19 U.S.C. 2463(c)(2)(E)), section 503(c)(2)(A)(i)(II) shall not apply with respect to any eligible article if a like or directly competitive article was not produced in the United States on January 1, 1995.

7. Pursuant to sections 501 and 503(a)(1)(A) of the 1974 Act, and after receiving advice from the International Trade Commission in accordance with section 503(e), I have determined to designate certain articles, previously designated under section 503(a)(1)(B), as eligible articles when imported from any beneficiary developing country.

8. Pursuant to section 503(c)(1) of the 1974 Act, I have determined to limit the application of duty-free treatment accorded to certain articles from certain beneficiary developing countries.

9. Pursuant to section 503(c)(2)(A) of the 1974 Act, I have determined that certain beneficiary countries should no longer receive preferential tariff

treatment under the GSP with respect to certain eligible articles imported in quantities that exceed the applicable competitive need limitation.

10. Pursuant to section 503(c)(2)(C) of the 1974 Act, I have determined that certain countries should be redesignated as beneficiary developing countries with respect to certain eligible articles that previously had been imported in quantities exceeding the competitive need limitations of section 503(c)(2)(A).

11. Pursuant to section 503(c)(2)(F) of the 1974 Act, I have determined that the competitive need limitation provided in section 503(c)(2)(A)(i)(II) should be waived with respect to certain eligible articles from certain beneficiary developing countries.

12. Pursuant to section 503(d) of the 1974 Act, I have determined that the competitive need limitations of section 503(c)(2)(A) should be waived with respect to certain eligible articles from certain beneficiary developing countries. I have received the advice of the International Trade Commission on whether any industries in the United States are likely to be adversely affected by such waivers, and I have determined, based on that advice and on the considerations described in sections 501 and 502(c), that such waivers are in the national economic interest of the United States.

13. Pursuant to section 503(c)(2)(E) of the 1974 Act (19 U.S.C. 2463(c)(2)(E)), I have determined that the limitation provided for in section 503(c)(2)(A)(i)(II) shall not apply with respect to HTS subheading 3817.10.50 because no like or directly competitive article was produced in the United States on January 1, 1995.

14. Section 604 of the 1974 Act, as amended (19 U.S.C. 2483), authorizes the President to embody in the HTS the substance of the relevant provisions of that Act, and of other acts affecting import treatment, and actions thereunder, including the removal, modification, continuance, or imposition of any rate of duty or other import restriction.

NOW, THEREFORE, I, WILLIAM J. CLINTON, President of the United States of America, acting under the authority vested in me by the Constitution and the laws of the United States of America, including but not limited to title V and section 604 of the 1974 Act, do proclaim that:

(1) In order to provide that one or more countries that have not been treated as beneficiary developing countries with respect to one or more eligible articles should be designated as beneficiary developing countries with respect to such article or articles for purposes of the GSP, and that one or more countries should no longer be treated as beneficiary developing countries with respect to one or more eligible articles for purposes of the GSP, general note 4(d) to the HTS is modified as provided in section A of Annex I to this proclamation.

(2)(a) In order to designate certain articles as eligible articles for purposes of the GSP when imported from any beneficiary developing country, the Rates of Duty 1–Special subcolumn for certain HTS subheadings is modified as provided in section B(1) of Annex I to this proclamation.

(b) In order to provide preferential tariff treatment under the GSP to a beneficiary developing country that has been excluded from the benefits of the GSP for certain eligible articles, the Rates of Duty 1–Special subcolumn for each of the HTS subheadings enumerated in section B(2) of Annex I to this proclamation is modified as provided in such section.

(c) In order to provide that one or more countries should not be treated as a beneficiary developing country with respect to certain eligible articles for purposes of the GSP, the Rates of Duty 1–Special subcolumn for each of the HTS subheadings enumerated in section B(3) of Annex I to this proclamation is modified as provided in such section.

(3) A waiver of the application of section 503(c)(2)(A) of the 1974 Act shall apply to the eligible articles in the HTS subheadings and to the beneficiary developing countries set forth in Annex II to this proclamation.

(4) Any provisions of previous proclamations and Executive Orders that are inconsistent with the actions taken in this proclamation are superseded to the extent of such inconsistency.

(5)(a) The modifications made by Annex I to this proclamation shall be effective with respect to articles entered, or withdrawn from warehouse for consumption, on or after July 1, 2000.

(b) The action taken in Annex II to this proclamation shall be effective on the date of publication of this proclamation in the **Federal Register**.

(c) The action taken in paragraph 13 of this proclamation shall be effective on the date of publication of this proclamation in the **Federal Register**.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-ninth day of June, in the year of our Lord two thousand, and of the Independence of the United States of America the two hundred and twenty-fourth.

OFFICE OF THE UNITED STATES TRADE REPRESENTATIVE

Implementation of Preferential Tariff Treatment Under the Generalized System of Preferences for Certain Articles From South Africa

AGENCY: Office of the United States Trade Representative.

ACTION: Notice.

SUMMARY: Implementation of preferential tariff treatment under the Generalized System of Preferences (GSP) for three articles from South Africa.

FOR FURTHER INFORMATION CONTACT: Jon Rosenbaum, Assistant United States Trade Representative for Trade and Development, Office of the United States Trade Representative, 600 17th Street, NW., Room 517, Washington, D.C. 20508. The telephone number is (202) 395–6971.

SUPPLEMENTARY INFORMATION: Pursuant to section 503(c)(2) of the Trade Act of 1974, as amended (19 U.S.C. 2463 (c)(2)), beneficiary developing countries are subject to competitive need limitations on the preferential tariff treatment afforded under the GSP. Presidential Proclamation 7107 of June 30, 1998 (63 FR 36531; July 6, 1998), in relevant part, proclaimed the waiver of competitive need limitations and the granting of GSP preferential tariff treatment with respect to certain articles from South Africa, with an effective date to be determined and announced by the United States Trade Representative by publication of a notice in the Federal Register. These included four articles in Harmonized Tariff Schedule of the United States (''HTS'') subheadings 7108.12.50 (unwrought gold, for electronics, dental), HTS 7108.13.70 (semi-manufactured gold), HTS 8704.10.50 (articulated dump trucks), and HTS 2849.90.50 (carbides). Since that time, the normal tariff for one of these items, articles in subheading HTS 8704.10.50 (articulated dump trucks) has been reduced to zero in accordance with the Annex to Presidential Proclamation 6763 of December 23, 1994 (60 FR 1007, 1614; January 4, 1995), implementing U.S. commitments under the Uruguay Round agreements.

Granting GSP preferential tariff treatment for the articles listed above was held in abeyance because of concerns regarding South Africa's Medicines Act and its protection of patent rights for pharmaceuticals. Section 503 of the Trade Act of 1974 requires the President to consider the program's eligibility requirements, including a country's protection of intellectual property rights, before granting waivers or extending GSP benefits (19 U.S.C. 2463). On September 17, 1999, the Governments of the United States and South Africa came to an understanding with respect to South Africa's urgent need to provide better, more affordable health care while ensuring that intellectual property rights are protected. Both Governments reaffirmed their shared objective of fully protecting intellectual property rights, including their commitment to comply with the WTO Agreement on Trade-Related Aspects of Intellectual Property Rights (the TRIPS Agreement).

Pursuant to authority vested in the United States Trade Representative by the laws of the United States, including but not limited to sections 503 and 604 of the Trade Act of 1974 and Proclamation 7107 of June 30, 1998, and in order to (1) grant GSP preferential tariff treatment to articles in HTS subheadings 7108.12.50 (unwrought gold, for electronics, dental) and 7108.13.70 (semi-manufactured gold), and (2) provide GSP preferential tariff treatment to articles from South Africa in HTS subheading 2849.90.50 (carbides), the HTS is modified as specified in the Annex to this notice, effective with respect to articles entered, or withdrawn from warehouse, on or

after the day of publication of this notice.

Charlene Barshefsky,

United States Trade Representative.

Background

The Final EIS evaluated a No-Action, and a Preferred Alternative (including transportation management solutions) in the Southeast Corridor and determined the estimated costs and potential impacts associated with each. The project study limits are on I–25 from Broadway Avenue to Lincoln Avenue, which includes I–225 from I–25 to Parker Road. CDOT was the local lead agency for the preparation of the Final EIS.

The FHWA, the FTA, the CDOT, the RTD and other local agencies invite interested individuals, organizations, and Federal, State and local agencies to comment on the identified preferred alternative and associated social, economic, or environmental impacts related to the alternatives.

The preferred alternative is generally consistent with the Southeast Corridor Major Investment Study completed in July 1997. It begins at approximately I–25 and Broadway Avenue and proceeds south and southeast to Lincoln Avenue following the general alignment of I–25. Also included is a segment along I–225 from I–25 to Parker Road. The preferred alternative excludes any proposed roadway improvements near I–25 from 6th Avenue to approximately the Logan Street crossing including the I–25 interchanges at Alameda, Santa Fe, and Broadway. The primary purpose of the Southeast Corridor Multi-Modal Project is to improve travel time and enhance safety along these two transportation corridors, while causing the least disruption to neighboring residents, businesses, and commuters. The Southeast Corridor is the most heavily congested corridor on a daily basis, in the State of Colorado. It has been the focus of study for twenty years. These studies have consistently recommended

Technical Correction to the Harmonized Tariff Schedule of the United States

AGENCY: Office of the United States Trade Representative.

ACTION: Technical correction to the Harmonized Tariff Schedule of the United States.

SUMMARY: The United States Trade Representative (the USTR) is modifying the Harmonized Tariff Schedule of the United States (HTS) as set forth below, pursuant to authority granted by Congress to the President in section 604 of the Trade Act of 1974 (Trade Act) and delegated to the USTR in Presidential Proclamation No. 6969 of January 27, 1997 (62 FR 4415). This technical correction is to ensure that the intended tariff treatment is accorded to certain imported valve spring quality wire rod.

ADDRESSES: Office of the United States Trade Representative, 600 17th Street, NW, Washington, DC 20508.

FOR FURTHER INFORMATION CONTACT: Gordana Earp, Acting Assistant United States Trade Representative, (202) 395–6160, or Audrey Winter, Associate General Counsel, (202) 395–7305.

Correction to HTS

Presidential Proclamation 7273 of February 16, 2000 (65 FR 8621) modified subchapter III of chapter 99 of the HTS in order to facilitate positive adjustment to competition from imports of certain steel wire rod. The proclamation inserted new U.S. note 9 in that subchapter; the note provides that various steel products are excluded from the new subheadings

implementing the adjustment action. However, new subdivision (b) of note 9, which describes the valve spring quality wire rod intended to be excluded from the new tariff subheading, inadvertently misstated the purchasers of the subject product. Accordingly, the HTS is modified as follows:

Subdivision (b) of U.S. note 9 to subchapter III of chapter 99 of the HTS is modified by deleting the phrase ''order from an automotive valve spring or automotive brake spring manufacturer in'' and by inserting in lieu thereof the phrase ''order from an automotive valve spring manufacturer, automotive valve spring wire manufacturer, automotive brake spring manufacturer or automotive brake spring wire manufacturer in''.

This modification to the HTS shall be effective with respect to goods entered, or withdrawn from warehouse for consumption, on or after March 1, 2000, and shall continue in effect as if this language had been contained in Proclamation 7273, under the terms provided for therein.

Federal Aviation Administration

Noise Exposure Map Notice: Receipt of Noise Compatibility Program and Request for Review; Corpus Christi International Airport, Corpus Christi, Texas

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice.

SUMMARY: The Federal Aviation Administration (FAA) announces its determination that the noise exposure maps submitted by City of Corpus Christi for Corpus Christi International Airport under the provisions of Title 49 U.S.C., Chapter 475 (hereinafter referred to as ''Title 49'') and 14 CFR Part 150 are in compliance with applicable requirements. The FAA also announces that it is reviewing a proposed noise compatibility program that was submitted for Corpus Christi International Airport under Part 150 in conjunction with the noise exposure maps and that this program will be approved or disapproved on or before August 1, 2000.

EFFECTIVE DATE: The effective date of the FAA's determination on the noise exposure maps and the start of its review of the associated noise compatibility program are March 1, 2000. The public comment period ends May 1, 2000.

FOR FURTHER INFORMATION CONTACT: Nan L. Terry, Department of transportation, Federal Aviation Administration, Fort Worth, Texas, 76193–0650, (817) 222–5607. Comments on the proposed noise compatibility program should also be submitted to the above office.

SUPPLEMENTARY INFORMATION: This notice announces that the FAA finds that the noise exposure maps submitted for Corpus Christi International Airport are in compliance with applicable requirements of Part 150, effective March 1, 2000. Further, the FAA is reviewing a proposed noise compatibility program for that airport which will be approved or disapproved on or before August 1, 2000. This notice also announces the availability of this program for public review and comment.

Under Title 49, an airport operator may submit to the FAA noise exposure maps which meet applicable regulations and which depict non-compatible land uses as of the date of submission of such maps, a description of projected aircraft operations, and the ways in which such operations will affect such maps. Title 49 requires such maps to be developed in consultation with interested and affected parties in the local community, government agencies, and persons using the airport.

An airport operator who has submitted noise exposure maps that are found by the FAA to be in compliance with the requirements of Federal Aviation Regulations (FAR) Part 150, promulgated pursuant to Title 49, may submit a noise compatibility program for FAA approval which sets forth the measures the operator has taken or proposes for the reduction of existing non-compatible uses and for the prevention of the introduction of additional non-compatible uses.

The City of Corpus Christi submitted to the FAA on January 10, 2000 noise exposure maps, descriptions and other documentation, which were produced during the Master Plan Update and the Federal Aviation Regulations (FAR) Part 150 Airport Noise Compatibility Planning Study for Corpus Christi International Airport beginning on July 18, 1995.

It was requested that the FAA review this material as the noise exposure maps, as described in Title 49, and that the noise mitigation measures, to be implemented jointly by the airport and surrounding communities, be approved as a noise compatibility program under Title 49.

The FAA has completed its review of the noise exposure maps and related descriptions submitted by the City of Corpus Christi. The specific maps under consideration are Noise Exposure Map 1999, Figure 5–1, Noise Exposure Map 2004, Figure 5–2, and Noise Exposure Map Ultimate Airfield, Figure 5–3 in the submission.

The FAA has determined that these maps for Corpus Christi International Airport are in compliance with applicable requirements. This determination is effective on March 1, 2000. The FAA's determination on an airport operator's noise exposure maps is limited to a finding that the maps were developed in accordance with the procedures contained in Appendix A of FAR Part 150. Such determination does not constitute approval of the applicant's data, information, plans, a commitment to approve a noise compatibility program, or to fund the implementation of that program.

If questions arise concerning the precise relationship of specific properties to noise exposure contours depicted on a noise exposure map submitted under section 103 of the Act, it should be noted that the FAA is not involved in any way in determining the relative locations of specific properties with regard to the depicted noise contours, or in interpreting the noise exposure maps to resolve questions concerning, for example, which properties should be covered by the provisions of Title 49.

These functions are inseparable from the ultimate land use control and planning responsibilities of local government. These local responsibilities are not changed in any way under Part 150 or through FAA's review of noise exposure maps. Therefore, the responsibility for the detailed overlaying of noise exposure contours onto the map depicting properties on the surface rests exclusively with the airport operator which submitted those maps, or with those public agencies and planning agencies with which consultation is required under Title 49. The FAA has relied on the certification by the airport operator, under section 150.21 of FAR Part 150, that the statutorily required consultation has been accomplished.

The FAA has formally received the noise compatibility program for Corpus Christi International Airport, also effective on March 1, 2000. Preliminary review of the submitted material indicates that it conforms to the requirements for the submittal of noise compatibility programs, but that further

Generalized System of Preferences (GSP); Copper Wire Bars From Russia

AGENCY: Office of the United States Trade Representative.

ACTION: Notice of correction.

SUMMARY: The purpose of this notice is to correct the Harmonized Tariff Schedule of the United States (HTS) to reflect the correct treatment under the GSP program of refined copper wire bars imported from Russia.

FOR FURTHER INFORMATION CONTACT: GSP subcommittee, Office of the United States Trade Representative, 600 17th Street, NW, Room 518, Washington, DC 20508 (Tel. 202/395–6971).

EFFECTIVE DATE: The correction made in this notice is effective with respect to articles entered, or withdrawn from warehouse for consumption, on or after July 1, 1999.

SUPPLEMENTARY INFORMATION: The GSP program grants duty-free treatment to designated eligible articles that are imported from certain developing countries. The GSP program is authorized by Title V of the Trade Act of 1974, as amended (''Trade Act'') (19 U.S.C. 2461 *et seq*). Each year, certain products from eligible countries are excluded from GSP treatment to the extent imports of those products have exceeded the applicable competitive need limits (CNL) during the previous year (19 U.S.C. 2463 (2)(A)). Based on import data from the U.S. Bureau of Census showing that imports of refined copper wire bars (HTS subheading 7403.12.00) from Russia had exceeded the applicable CNL, the President revoked duty-free treatment for those articles beginning July 1, 1999. (Proclamation 206, 64 FR 36229, 36234 (July 2, 1999); 64 FR 36952 (July 8, 1999)). Revised Bureau of Census statistics show that imports of copper wire bars from Russia did not exceed the applicable CNL and thus that duty-free treatment for those articles should not have been withdrawn.

Accordingly, pursuant to authority granted by Congress to the President in section 604 of the Trade Act (19 U.S.C. 2483) and delegated by the President to the United States Trade Representative in Proclamation 6969 of January 27, 1997 (62 FR 4415), effective with respect to articles entered, or withdrawn from warehouse for consumption, on or after July 1, 1999, general note 4(d) to the Harmonized Tariff Schedule of the United States is modified by striking ''; Russia'' after subheading 7403.12.00 in the enumeration of designated beneficiary countries that are ineligible to receive GSP benefits for that tariff provision.

Requests for application of the tariff modification and duty treatment provided for herein must contain sufficient information to enable the Customs Service to identify each relevant entry (including but not limited to the entry number for the shipment concerned).

United States Trade Representative.

Title 3—

The President

Proclamation 7273 of February 16, 2000

To Facilitate Positive Adjustment to Competition From Imports of Certain Steel Wire Rod

By the President of the United States of America

A Proclamation

1. On July 12, 1999, the United States International Trade Commission (USITC) transmitted to the President a report on its investigation under section 202 of the Trade Act of 1974, as amended (the ''Trade Act'') (19 U.S.C. 2252), with respect to imports of certain steel wire rod provided for in subheadings 7213.91, 7213.99, 7227.20 and 7227.90.60 of the Harmonized Tariff Schedule of the United States (HTS). The USITC commissioners were equally divided with respect to the determination required under section 202(b) of the Trade Act (19 U.S.C. 2252(b)) regarding whether such steel wire rod is being imported into the United States in such increased quantities as to be a substantial cause of serious injury, or threat of serious injury, to the domestic industry producing a like or directly competitive article.

2. Section 330(d)(1) of the Tariff Act of 1930, as amended (the ''Tariff Act'') (19 U.S.C. 1330(d)(1)) provides that when the USITC is required to determine under section 202(b) of the Trade Act whether increased imports of an article are a substantial cause of serious injury, or the threat thereof, and the commissioners voting are equally divided with respect to such determination, then the determination agreed upon by either group of commissioners may be considered by the President as the determination of the USITC. Having reviewed the determinations of both groups of commissioners, I have decided to consider the determination of the group of commissioners voting in the affirmative to be the determination of the USITC.

3. Pursuant to section 311(a) of the North American Free Trade Agreement Implementation Act (the ''NAFTA Implementation Act'') (19 U.S.C. 3371(a)), the USITC made negative findings with respect to imports of steel wire rod from Mexico and Canada. The USITC commissioners voting in the affirmative also transmitted to the President their recommendations made pursuant to section 202(e) of the Trade Act (19 U.S.C. 2252(e)) with respect to the action that would address the serious injury or threat thereof to the domestic industry and be most effective in facilitating the efforts of the domestic industry to make a positive adjustment to import competition.

4. Pursuant to section 203 of the Trade Act (19 U.S.C. 2253), and after taking into account the considerations specified in section 203(a)(2) of the Trade Act, I have determined to implement action of a type described in section 203(a)(3) and to provide exclusions for enumerated steel wire rod products (''excluded products''). Pursuant to section 312(a) of the NAFTA Implementation Act (19 U.S.C. 3372(a)), I have determined that imports of steel wire rod from Mexico, considered individually, do not account for a substantial share of total imports and do not contribute importantly to the serious injury, or threat of serious injury, found by the USITC, and that imports from Canada, considered individually, do not contribute importantly to such injury or threat. Accordingly, pursuant to section 312(b) of the NAFTA Implementation Act (19 U.S.C. 3372(b)), I have excluded steel wire rod the product of Mexico or Canada from the action I am taking under section 203 of the Trade Act.

5. Such action shall take the form of a tariff-rate quota on imports of steel wire rod (other than excluded products), provided for in HTS subheadings 7213.91, 7213.99, 7227.20 and 7227.90.60, imposed for a period of 3 years plus 1 day, with annual increases in the within-quota quantities and annual reductions in the rate of duty applicable to goods entered in excess of those quantities in the second and third years, as provided for in the Annex to this proclamation.

6. Except for products of Mexico and of Canada, which shall all be excluded from this restriction, such tariff-rate quota shall apply to imports of steel wire rod from all countries. Pursuant to section 203(a)(1)(A) of the Trade Act (19 U.S.C. 2253(a)(1)(A)), I have further determined that this action will facilitate efforts by the domestic industry to make a positive adjustment to import competition and provide greater economic and social benefits than costs.

7. Section 604 of the Trade Act, as amended (19 U.S.C. 2483), authorizes the President to embody in the HTS the substance of the relevant provisions of that Act, and of other acts affecting import treatment, and actions thereunder, including the removal, modification, continuance, or imposition of any rate of duty or other import restriction.

NOW, THEREFORE, I, WILLIAM J. CLINTON, President of the United States of America, acting under the authority vested in me by the Constitution and the laws of the United States of America, including but not limited to sections 203 and 604 of the Trade Act, do proclaim that:

(1) In order to establish a tariff-rate quota on imports of steel wire rod (other than excluded products), classified in HTS subheadings 7213.91, 7213.99, 7227.20 and 7227.90.60, subchapter III of chapter 99 of the HTS is modified as provided in the Annex to this proclamation.

(2) Such imported steel wire rod that is the product of Mexico or of Canada shall be excluded from the tariff-rate quota established by this proclamation, and such imports shall not be counted toward the tariff-rate quota limits that trigger the over-quota rates of duty.

(3) I hereby suspend, pursuant to section 503(c)(1) of the Trade Act (19 U.S.C. 2463(c)(1)), duty-free treatment for steel wire rod the product of beneficiary countries under the Generalized System of Preferences (GSP) (Title V of the Trade Act, as amended (19 U.S.C. 2461–2467)); pursuant to section 213(e)(1) of the Caribbean Basin Economic Recovery Act, as amended (CBERA) (19 U.S.C. 2703(e)(1)), duty-free treatment for steel wire rod the product of beneficiary countries under that Act (19 U.S.C. 2701–2707); pursuant to section 204(d)(1) of the Andean Trade Preference Act, as amended (ATPA)(19 U.S.C. 3203(d)(1)), duty-free treatment for steel wire rod the product of beneficiary countries under that Act (19 U.S.C. 3201–3206); and pursuant to section 403(a) of the Trade and Tariff Act of 1984 (19 U.S.C. 2112 note), duty-free treatment for steel wire rod the product of Israel under the United States-Israel Free Trade Area Implementation Act of 1985 (the ''IFTA Act'') (19 U.S.C. 2112 note), to the extent necessary to apply the tariff-rate quota to those products, as specified in the Annex to this proclamation.

(4) During each of the first three quarters of a quota year, any articles subject to the tariff-rate quota that are entered, or withdrawn from warehouse for consumption, in excess of one-third of the annual within-quota quantity for that quota year (as specified in the Annex to this proclamation) shall be subject to the over-quota rate of duty then in effect. During the fourth quarter of a quota year, any articles subject to the tariff-rate quota that are entered, or withdrawn from warehouse for consumption, in excess of the remaining quantity of the annual within-quota quantity for that quota year shall be subject to the over-quota rate of duty then in effect. The remaining quantity shall be determined by subtracting the total quantity of goods entered at the in-quota rate during the first three quarters of the quota year from the annual within-quota quantity for that quota year.

(5) Effective at the close of March 1, 2003, or at the close of the date which may earlier be proclaimed by the President as the termination of the import relief set forth in the Annex to this proclamation, the suspension of duty-free treatment under the GSP, the CBERA, the ATPA and the IFTA Act shall terminate, unless otherwise provided in such later proclamation, and qualifying goods the product of beneficiary countries or of Israel entered under such programs shall again be eligible for duty-free treatment.

(6) Effective at the close of March 1, 2004, or such other date that is one year from the close of this relief, the U.S. note and tariff provisions established in the Annex to this proclamation shall be deleted from the HTS.

(7) Any provisions of previous proclamations and Executive orders that are inconsistent with the actions taken in this proclamation are superseded to the extent of such inconsistency.

(8) The modifications to the HTS made by this proclamation, including the Annex hereto, shall be effective with respect to goods entered, or withdrawn from warehouse for consumption, on or after March 1, 2000, and shall continue in effect as provided in the Annex to this proclamation, unless such actions are earlier expressly modified or terminated.

IN WITNESS WHEREOF, I have hereunto set my hand this sixteenth day of February, in the year of our Lord two thousand, and of the Independence of the United States of America the two hundred and twenty-fourth.

Title 3—

Proclamation 7274 of February 18, 2000

To Facilitate Positive Adjustment to Competition From Imports of Certain Circular Welded Carbon Quality Line Pipe

By the President of the United States of America

A Proclamation

1. On December 22, 1999, the United States International Trade Commission (USITC) transmitted to the President an affirmative determination in its investigation under section 202 of the Trade Act of 1974, as amended (the ''Trade Act'') (19 U.S.C. 2252), with respect to imports of certain circular welded carbon quality line pipe (line pipe) provided for in subheadings 7306.10.10 and 7306.10.50 of the Harmonized Tariff Schedule of the United States (HTS). The USITC determined that line pipe is being imported in such increased quantities as to be a substantial cause of serious injury or the threat of serious injury to the domestic industry producing a like or directly competitive article.

2. Pursuant to section 311(a) of the North American Free Trade Agreement Implementation Act (the ''NAFTA Implementation Act'') (19 U.S.C. 3371(a)), the USITC made negative findings with respect to imports of line pipe from Mexico and Canada. The USITC also transmitted to the President its recommendations made pursuant to section 202(e) of the Trade Act (19 U.S.C. 2252(e)) with respect to the action that would address the serious injury or threat thereof to the domestic industry and be most effective in facilitating the efforts of the domestic industry to make a positive adjustment to import competition.

3. Pursuant to section 203 of the Trade Act (19 U.S.C. 2253), and after taking into account the considerations specified in section 203(a)(2) of the Trade Act, I have determined to implement action of a type described in section 203(a)(3). Pursuant to section 312(a) of the NAFTA Implementation Act (19 U.S.C. 3372(a)), I have determined that imports of line pipe from Mexico, considered individually, do not contribute importantly to the serious injury, or threat of serious injury, found by the USITC, and that imports from Canada, considered individually, do not contribute importantly to such injury or threat. Accordingly, pursuant to section 312(b) of the NAFTA Implementation Act (19 U.S.C. 3372(b)), I have excluded line pipe the product of Mexico or Canada from the action I am taking under section 203 of the Trade Act.

4. Such action shall take the form of an increase in duty on imports of certain line pipe provided for in HTS subheadings 7306.10.10 and 7306.10.50, imposed for a period of 3 years plus 1 day, with the first 9,000 short tons of imports that are the product of each supplying country excluded from the increased duty during each year that this action is in effect, and with annual reductions in the rate of duty in the second and third years, as provided for in the Annex to this proclamation.

5. Except for products of Mexico and Canada, which shall be excluded from this action, the increase in duty shall apply to imports of line pipe from all countries. Pursuant to section 203(a)(1)(A) of the Trade Act (19 U.S.C. 2253(a)(1)(A)), I have further determined that this action will facilitate efforts by the domestic industry to make a positive adjustment to import competition and provide greater economic and social benefits than costs.

6. Section 604 of the Trade Act, as amended (19 U.S.C. 2483), authorizes the President to embody in the HTS the substance of the relevant provisions of that Act, and of other acts affecting import treatment, and actions thereunder, including the removal, modification, continuance, or imposition of any rate of duty or other import restriction.

NOW, THEREFORE, I, WILLIAM J. CLINTON, President of the United States of America, acting under the authority vested in me by the Constitution and the laws of the United States of America, including but not limited to sections 203 and 604 of the Trade Act, do proclaim that:

(1) In order to establish an increase in duty on imports of certain line pipe classified in HTS subheadings 7306.10.10 and 7306.10.50, subchapter III of chapter 99 of the HTS is modified as provided in the Annex to this proclamation.

(2) Such imported line pipe that is the product of Mexico or of Canada shall not be subject to the increase in duty established by this proclamation.

(3) I hereby suspend, pursuant to section 503(c)(1) of the Trade Act (19 U.S.C. 2463(c)(1)), duty-free treatment for line pipe the product of beneficiary countries under the Generalized System of Preferences (GSP) (Title V of the Trade Act, as amended (19 U.S.C. 2461–2467)); pursuant to section 213(e)(1) of the Caribbean Basin Economic Recovery Act, as amended (CBERA) (19 U.S.C. 2703(e)(1)), duty-free treatment for line pipe the product of beneficiary countries under that Act (19 U.S.C. 2701–2707); pursuant to section 204(d)(1) of the Andean Trade Preference Act, as amended (ATPA) (19 U.S.C. 3203(d)(1)), duty-free treatment for line pipe the product of beneficiary countries under that Act (19 U.S.C. 3201–3206); and pursuant to section 403(a) of the Trade and Tariff Act of 1984 (19 U.S.C. 2112 note), duty-free treatment for line pipe the product of Israel under the United States-Israel Free Trade Area Implementation Act of 1985 (the ''IFTA Act'') (19 U.S.C. 2112 note), to the extent necessary to apply the increase in duty to those products, as specified in the Annex to this proclamation.

(4) Effective at the close of March 1, 2003, or at the close of the date that may earlier be proclaimed by the President as the termination of the import relief set forth in the Annex to this proclamation, the suspension of duty-free treatment under the GSP, the CBERA, the ATPA, and the IFTA Act shall terminate, unless otherwise provided in such later proclamation, and qualifying goods the product of beneficiary countries or of Israel entered under such programs shall again be eligible for duty-free treatment.

(5) Effective at the close of March 1, 2004, or such other date that is 1 year from the close of this relief, the U.S. note and tariff provisions established in the Annex to this proclamation shall be deleted from the HTS.

(6) Any provisions of previous proclamations and Executive orders that are inconsistent with the actions taken in this proclamation are superseded to the extent of such inconsistency.

(7) The modifications to the HTS made by this proclamation, including the Annex hereto, shall be effective with respect to goods entered, or withdrawn from warehouse for consumption, on or after March 1, 2000, and shall continue in effect as provided in the Annex to this proclamation, unless such actions are earlier expressly modified or terminated.

IN WITNESS WHEREOF, I have hereunto set my hand this eighteenth day of February, in the year of our Lord two thousand, and of the Independence of the United States of America the two hundred and twenty-fourth.

The President

Proclamation 7314—To Modify the Quantitative Limitations Applicable to Imports of Wheat Gluten

Federal Register
Vol. 65, No. 105
Wednesday, May 31, 2000

Presidential Documents

Title 3—

The President

Proclamation 7314 of May 26, 2000

To Modify the Quantitative Limitations Applicable to Imports of Wheat Gluten

By the President of the United States of America

A Proclamation

1. On May 30, 1998, pursuant to section 203 of the Trade Act of 1974, as amended (the ''Trade Act'') (19 U.S.C. 2253), I issued Proclamation 7103, which imposed quantitative limitations on certain wheat gluten imports provided for in subheadings 1109.00.10 and 1109.00.90 of the Harmonized Tariff Schedule of the United States (HTS) for a period of 3 years plus 1 day, with annual increases in such quota limits of 6 percent during the second and the third year. I exempted imports of wheat gluten that is the product of certain countries, including designated beneficiary countries under the Generalized System of Preferences (''GSP countries''), from the application of the quantitative limitations.

2. On December 1, 1999, the United States International Trade Commission (USITC) issued a report, as required under section 204(a)(2) of the Trade Act (19 U.S.C. 2254(a)(2)), on the results of its monitoring of developments with respect to the domestic wheat gluten industry. The USITC report notes that in the 12-month period prior to the imposition of the quota (June 1, 1997–May 31, 1998), 440,000 pounds of wheat gluten entered the United States from Poland. During the first quota year (June 1, 1998–May 31, 1999), imports from Poland grew to 5,004,000 pounds, or more than eleven times the amount of the previous year, accounting for 2.9 percent of total U.S. imports. The USITC report has been provided to me (Investigation Number TA–204–2). More recent data from the United States Customs Service indicate that in the first 10 months of the second quota year (June 1999–March 2000), imports from Poland totaled 8,965,800 pounds, accounting for 6.9 percent of total U.S. imports.

3. Section 204(b)(1)(A) of the Trade Act (19 U.S.C. 2254(b)(1)(A)) authorizes the President, after taking into account the report of the USITC required under section 204(a)(2) of the Trade Act and seeking advice from the Secretary of Commerce and the Secretary of Labor, to reduce, modify, or terminate an action taken under section 203 of the Trade Act when the President determines that changed economic circumstances so warrant.

4. After taking into account the information provided in the USITC's report, and after receiving advice from the Secretary of Commerce and the Secretary of Labor, I have determined, on the basis that increased imports of wheat gluten the product of Poland have impaired the effectiveness of the action I proclaimed in 1998 under section 203 of the Trade Act, that changed economic circumstances warrant a modification in the action. Accordingly, I have decided to include in the action imports of wheat gluten the product of Poland, beginning June 1, 2000.

5. Pursuant to section 203(g) of the Trade Act (19 U.S.C. 2253(g)), I have further determined to provide for the efficient and fair administration of the quantitative limitation on imports of wheat gluten by allocating on a quarterly basis the quantitative limitations applicable during the third year of the action.

6. Pursuant to section 503(b)(2) of the Trade Act (19 U.S.C. 2463(b)(2)), no article shall be eligible for duty-free treatment provided under section 501 of the Trade Act if that article is subject to an action proclaimed under section 203.

7. Section 604 of the Trade Act (19 U.S.C. 2483) authorizes the President to embody in the HTS the substance of the relevant provisions of that Act, and of other acts affecting import treatment, and actions thereunder, including the removal, modification, continuance, or imposition of any rate of duty or other import restriction.

NOW, THEREFORE, I, WILLIAM J. CLINTON, President of the United States of America, acting under the authority vested in me by the Constitution and the laws of the United States of America, including but not limited to sections 204, 503, and 604 of the Trade Act, do proclaim that:

(1) In order to modify the scope of the quantitative limitations applicable to imports of wheat gluten under HTS heading 1109, and to allocate the quota quantities for the third quota year on a quarterly basis, subchapter III of chapter 99 of the HTS is modified as set forth in the Annex to this proclamation.

(2) Such imported wheat gluten that is the product of Poland shall be included within the scope of the quantitative limitations during the third quota year, as provided in the Annex.

(3) Any provisions of previous proclamations and Executive orders that are inconsistent with the actions taken in this proclamation are superseded to the extent of such inconsistency.

(4) Effective at the close of June 1, 2002, or such other date that is 1 year from the close of the action taken under section 203 of the Trade Act, as modified by this proclamation, HTS subheadings 9903.11.08 through 9903.11.11 and the superior text thereto shall be deleted from the HTS.

(5) Pursuant to section 503(b)(2) of the Trade Act (19 U.S.C. 2463(b)(2)), duty-free treatment for certain wheat gluten that is the product of beneficiary countries under the Generalized System of Preferences (GSP) (Title V of the Trade Act, as amended (19 U.S.C. 2461–2467)), is suspended.

(6) The modifications to the HTS made by this proclamation and the Annex thereto shall be effective with respect to goods entered, or withdrawn from warehouse for consumption, on or after 12:01 a.m. EDT June 1, 2000, and shall continue in effect through the close of June 1, 2001, unless such actions are earlier expressly modified or terminated.

Vol. 65, No. 128

Presidential Documents

Title 3—

The President

Proclamation 7325 of June 29, 2000

To Modify Duty-Free Treatment Under the Generalized System of Preferences and for Other Purposes

By the President of the United States of America

A Proclamation

1. Pursuant to sections 501, 503(a)(1)(A), and 503(c)(1) of title V of the Trade Act of 1974, as amended (the ''1974 Act'') (19 U.S.C. 2461, 2463(a)(1)(A), and 2463(c)(1)), the President may designate or withdraw designation of specified articles provided for in the Harmonized Tariff Schedule of the United States (HTS) as eligible for preferential tariff treatment under the Generalized System of Preferences (GSP) when imported from designated beneficiary developing countries.

2. Pursuant to section 503(c)(2)(A) of the 1974 Act (19 U.S.C. 2463(c)(2)(A)), beneficiary developing countries, except those designated as least-developed beneficiary developing countries pursuant to section 503(c)(2)(D) of the 1974 Act (19 U.S.C. 2463(c)(2)(D)), are subject to competitive need limitations on the preferential treatment afforded under the GSP to eligible articles.

3. Pursuant to section 503(c)(2)(C) of the 1974 Act (19 U.S.C. 2463(c)(2)(C)), a country that is no longer treated as a beneficiary developing country with respect to an eligible article may be redesignated as a beneficiary developing country with respect to such article if imports of such article from such country did not exceed the competitive need limitations in section 503(c)(2)(A) (19 U.S.C. 2463(c)(2)(A)) during the preceding calendar year.

4. Pursuant to section 503(c)(2)(F) of the 1974 Act (19 U.S.C. 2463(c)(2)(F)), the President may disregard the competitive need limitation provided in section 503(c)(2)(A)(i)(II) of the 1974 Act (19 U.S.C. 2463(c)(2)(A)(i)(II)) with respect to any eligible article if the appraised value of the total imports of such article into the United States during the preceding calendar year does not exceed an amount set forth in section 503(c)(2)(F)(ii) of the 1974 Act (19 U.S.C. 2463(c)(2)(F)(ii)).

5. Pursuant to section 503(d) of the 1974 Act (19 U.S.C. 2463(d)), the President may waive the application of the competitive need limitations in section 503(c)(2)(A) with respect to any eligible article from any beneficiary developing country if certain conditions are met.

6. Pursuant to section 503(c)(2)(E) of the 1974 Act (19 U.S.C. 2463(c)(2)(E)), section 503(c)(2)(A)(i)(II) shall not apply with respect to any eligible article if a like or directly competitive article was not produced in the United States on January 1, 1995.

7. Pursuant to sections 501 and 503(a)(1)(A) of the 1974 Act, and after receiving advice from the International Trade Commission in accordance with section 503(e), I have determined to designate certain articles, previously designated under section 503(a)(1)(B), as eligible articles when imported from any beneficiary developing country.

8. Pursuant to section 503(c)(1) of the 1974 Act, I have determined to limit the application of duty-free treatment accorded to certain articles from certain beneficiary developing countries.

9. Pursuant to section 503(c)(2)(A) of the 1974 Act, I have determined that certain beneficiary countries should no longer receive preferential tariff

treatment under the GSP with respect to certain eligible articles imported in quantities that exceed the applicable competitive need limitation.

10. Pursuant to section 503(c)(2)(C) of the 1974 Act, I have determined that certain countries should be redesignated as beneficiary developing countries with respect to certain eligible articles that previously had been imported in quantities exceeding the competitive need limitations of section 503(c)(2)(A).

11. Pursuant to section 503(c)(2)(F) of the 1974 Act, I have determined that the competitive need limitation provided in section 503(c)(2)(A)(i)(II) should be waived with respect to certain eligible articles from certain beneficiary developing countries.

12. Pursuant to section 503(d) of the 1974 Act, I have determined that the competitive need limitations of section 503(c)(2)(A) should be waived with respect to certain eligible articles from certain beneficiary developing countries. I have received the advice of the International Trade Commission on whether any industries in the United States are likely to be adversely affected by such waivers, and I have determined, based on that advice and on the considerations described in sections 501 and 502(c), that such waivers are in the national economic interest of the United States.

13. Pursuant to section 503(c)(2)(E) of the 1974 Act (19 U.S.C. 2463(c)(2)(E)), I have determined that the limitation provided for in section 503(c)(2)(A)(i)(II) shall not apply with respect to HTS subheading 3817.10.50 because no like or directly competitive article was produced in the United States on January 1, 1995.

14. Section 604 of the 1974 Act, as amended (19 U.S.C. 2483), authorizes the President to embody in the HTS the substance of the relevant provisions of that Act, and of other acts affecting import treatment, and actions thereunder, including the removal, modification, continuance, or imposition of any rate of duty or other import restriction.

NOW, THEREFORE, I, WILLIAM J. CLINTON, President of the United States of America, acting under the authority vested in me by the Constitution and the laws of the United States of America, including but not limited to title V and section 604 of the 1974 Act, do proclaim that:

(1) In order to provide that one or more countries that have not been treated as beneficiary developing countries with respect to one or more eligible articles should be designated as beneficiary developing countries with respect to such article or articles for purposes of the GSP, and that one or more countries should no longer be treated as beneficiary developing countries with respect to one or more eligible articles for purposes of the GSP, general note 4(d) to the HTS is modified as provided in section A of Annex I to this proclamation.

(2)(a) In order to designate certain articles as eligible articles for purposes of the GSP when imported from any beneficiary developing country, the Rates of Duty 1–Special subcolumn for certain HTS subheadings is modified as provided in section B(1) of Annex I to this proclamation.

(b) In order to provide preferential tariff treatment under the GSP to a beneficiary developing country that has been excluded from the benefits of the GSP for certain eligible articles, the Rates of Duty 1–Special subcolumn for each of the HTS subheadings enumerated in section B(2) of Annex I to this proclamation is modified as provided in such section.

(c) In order to provide that one or more countries should not be treated as a beneficiary developing country with respect to certain eligible articles for purposes of the GSP, the Rates of Duty 1–Special subcolumn for each of the HTS subheadings enumerated in section B(3) of Annex I to this proclamation is modified as provided in such section.

(3) A waiver of the application of section 503(c)(2)(A) of the 1974 Act shall apply to the eligible articles in the HTS subheadings and to the beneficiary developing countries set forth in Annex II to this proclamation.

(4) Any provisions of previous proclamations and Executive Orders that are inconsistent with the actions taken in this proclamation are superseded to the extent of such inconsistency.

(5)(a) The modifications made by Annex I to this proclamation shall be effective with respect to articles entered, or withdrawn from warehouse for consumption, on or after July 1, 2000.

(b) The action taken in Annex II to this proclamation shall be effective on the date of publication of this proclamation in the **Federal Register**.

(c) The action taken in paragraph 13 of this proclamation shall be effective on the date of publication of this proclamation in the **Federal Register**.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-ninth day of June, in the year of our Lord two thousand, and of the Independence of the United States of America the two hundred and twenty-fourth.

OFFICE OF THE UNITED STATES TRADE REPRESENTATIVE

Implementation of Preferential Tariff Treatment Under the Generalized System of Preferences for Certain Articles From South Africa

AGENCY: Office of the United States Trade Representative.

ACTION: Notice.

SUMMARY: Implementation of preferential tariff treatment under the Generalized System of Preferences (GSP) for three articles from South Africa.

FOR FURTHER INFORMATION CONTACT: Jon Rosenbaum, Assistant United States Trade Representative for Trade and Development, Office of the United States Trade Representative, 600 17th Street, NW., Room 517, Washington, D.C. 20508. The telephone number is (202) 395–6971.

SUPPLEMENTARY INFORMATION: Pursuant to section 503(c)(2) of the Trade Act of 1974, as amended (19 U.S.C. 2463 (c)(2)), beneficiary developing countries are subject to competitive need limitations on the preferential tariff treatment afforded under the GSP. Presidential Proclamation 7107 of June 30, 1998 (63 FR 36531; July 6, 1998), in relevant part, proclaimed the waiver of competitive need limitations and the granting of GSP preferential tariff treatment with respect to certain articles from South Africa, with an effective date to be determined and announced by the United States Trade Representative by publication of a notice in the Federal Register. These included four articles in Harmonized Tariff Schedule of the United States (''HTS'') subheadings 7108.12.50 (unwrought gold, for electronics, dental), HTS 7108.13.70 (semi-manufactured gold), HTS 8704.10.50 (articulated dump trucks), and HTS 2849.90.50 (carbides). Since that time, the normal tariff for one of these items, articles in subheading HTS 8704.10.50 (articulated dump trucks) has been reduced to zero in accordance with the Annex to Presidential Proclamation 6763 of December 23, 1994 (60 FR 1007, 1614; January 4, 1995), implementing U.S. commitments under the Uruguay Round agreements.

Granting GSP preferential tariff treatment for the articles listed above was held in abeyance because of concerns regarding South Africa's Medicines Act and its protection of patent rights for pharmaceuticals. Section 503 of the Trade Act of 1974 requires the President to consider the program's eligibility requirements, including a country's protection of intellectual property rights, before granting waivers or extending GSP benefits (19 U.S.C. 2463). On September 17, 1999, the Governments of the United States and South Africa came to an understanding with respect to South Africa's urgent need to provide better, more affordable health care while ensuring that intellectual property rights are protected. Both Governments reaffirmed their shared objective of fully protecting intellectual property rights, including their commitment to comply with the WTO Agreement on Trade-Related Aspects of Intellectual Property Rights (the TRIPS Agreement).

Pursuant to authority vested in the United States Trade Representative by the laws of the United States, including but not limited to sections 503 and 604 of the Trade Act of 1974 and Proclamation 7107 of June 30, 1998, and in order to (1) grant GSP preferential tariff treatment to articles in HTS subheadings 7108.12.50 (unwrought gold, for electronics, dental) and 7108.13.70 (semi-manufactured gold), and (2) provide GSP preferential tariff treatment to articles from South Africa in HTS subheading 2849.90.50 (carbides), the HTS is modified as specified in the Annex to this notice, effective with respect to articles entered, or withdrawn from warehouse, on or

after the day of publication of this notice.

Charlene Barshefsky,

United States Trade Representative.

Background

The Final EIS evaluated a No-Action, and a Preferred Alternative (including transportation management solutions) in the Southeast Corridor and determined the estimated costs and potential impacts associated with each. The project study limits are on I–25 from Broadway Avenue to Lincoln Avenue, which includes I–225 from I–25 to Parker Road. CDOT was the local lead agency for the preparation of the Final EIS.

The FHWA, the FTA, the CDOT, the RTD and other local agencies invite interested individuals, organizations, and Federal, State and local agencies to comment on the identified preferred alternative and associated social, economic, or environmental impacts related to the alternatives.

The preferred alternative is generally consistent with the Southeast Corridor Major Investment Study completed in July 1997. It begins at approximately I–25 and Broadway Avenue and proceeds south and southeast to Lincoln Avenue following the general alignment of I–25. Also included is a segment along I–225 from I–25 to Parker Road. The preferred alternative excludes any proposed roadway improvements near I–25 from 6th Avenue to approximately the Logan Street crossing including the I–25 interchanges at Alameda, Santa Fe, and Broadway. The primary purpose of the Southeast Corridor Multi-Modal Project is to improve travel time and enhance safety along these two transportation corridors, while causing the least disruption to neighboring residents, businesses, and commuters. The Southeast Corridor is the most heavily congested corridor on a daily basis, in the State of Colorado. It has been the focus of study for twenty years. These studies have consistently recommended

Technical Correction to the Harmonized Tariff Schedule of the United States

AGENCY: Office of the United States Trade Representative.

ACTION: Technical correction to the Harmonized Tariff Schedule of the United States.

SUMMARY: The United States Trade Representative (the USTR) is modifying the Harmonized Tariff Schedule of the United States (HTS) as set forth below, pursuant to authority granted by Congress to the President in section 604 of the Trade Act of 1974 (Trade Act) and delegated to the USTR in Presidential Proclamation No. 6969 of January 27, 1997 (62 FR 4415). This technical correction is to ensure that the intended tariff treatment is accorded to certain imported valve spring quality wire rod.

ADDRESSES: Office of the United States Trade Representative, 600 17th Street, NW, Washington, DC 20508.

FOR FURTHER INFORMATION CONTACT: Gordana Earp, Acting Assistant United States Trade Representative, (202) 395–6160, or Audrey Winter, Associate General Counsel, (202) 395–7305.

Correction to HTS

Presidential Proclamation 7273 of February 16, 2000 (65 FR 8621) modified subchapter III of chapter 99 of the HTS in order to facilitate positive adjustment to competition from imports of certain steel wire rod. The proclamation inserted new U.S. note 9 in that subchapter; the note provides that various steel products are excluded from the new subheadings

implementing the adjustment action. However, new subdivision (b) of note 9, which describes the valve spring quality wire rod intended to be excluded from the new tariff subheading, inadvertently misstated the purchasers of the subject product. Accordingly, the HTS is modified as follows:

Subdivision (b) of U.S. note 9 to subchapter III of chapter 99 of the HTS is modified by deleting the phrase ''order from an automotive valve spring or automotive brake spring manufacturer in'' and by inserting in lieu thereof the phrase ''order from an automotive valve spring manufacturer, automotive valve spring wire manufacturer, automotive brake spring manufacturer or automotive brake spring wire manufacturer in''.

This modification to the HTS shall be effective with respect to goods entered, or withdrawn from warehouse for consumption, on or after March 1, 2000, and shall continue in effect as if this language had been contained in Proclamation 7273, under the terms provided for therein.

United States Trade Representative.

Federal Aviation Administration

Noise Exposure Map Notice: Receipt of Noise Compatibility Program and Request for Review; Corpus Christi International Airport, Corpus Christi, Texas

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice.

SUMMARY: The Federal Aviation Administration (FAA) announces its determination that the noise exposure maps submitted by City of Corpus Christi for Corpus Christi International Airport under the provisions of Title 49 U.S.C., Chapter 475 (hereinafter referred to as ''Title 49'') and 14 CFR Part 150 are in compliance with applicable requirements. The FAA also announces that it is reviewing a proposed noise compatibility program that was submitted for Corpus Christi International Airport under Part 150 in conjunction with the noise exposure maps and that this program will be approved or disapproved on or before August 1, 2000.

EFFECTIVE DATE: The effective date of the FAA's determination on the noise exposure maps and the start of its review of the associated noise compatibility program are March 1, 2000. The public comment period ends May 1, 2000.

FOR FURTHER INFORMATION CONTACT: Nan L. Terry, Department of transportation, Federal Aviation Administration, Fort Worth, Texas, 76193–0650, (817) 222–5607. Comments on the proposed noise compatibility program should also be submitted to the above office.

SUPPLEMENTARY INFORMATION: This notice announces that the FAA finds that the noise exposure maps submitted for Corpus Christi International Airport are in compliance with applicable requirements of Part 150, effective March 1, 2000. Further, the FAA is reviewing a proposed noise compatibility program for that airport which will be approved or disapproved on or before August 1, 2000. This notice also announces the availability of this program for public review and comment.

Under Title 49, an airport operator may submit to the FAA noise exposure maps which meet applicable regulations and which depict non-compatible land uses as of the date of submission of such maps, a description of projected aircraft operations, and the ways in which such operations will affect such maps. Title 49 requires such maps to be developed in consultation with interested and affected parties in the local community, government agencies, and persons using the airport.

An airport operator who has submitted noise exposure maps that are found by the FAA to be in compliance with the requirements of Federal Aviation Regulations (FAR) Part 150, promulgated pursuant to Title 49, may submit a noise compatibility program for FAA approval which sets forth the measures the operator has taken or proposes for the reduction of existing non-compatible uses and for the prevention of the introduction of additional non-compatible uses.

The City of Corpus Christi submitted to the FAA on January 10, 2000 noise exposure maps, descriptions and other documentation, which were produced during the Master Plan Update and the Federal Aviation Regulations (FAR) Part 150 Airport Noise Compatibility Planning Study for Corpus Christi International Airport beginning on July 18, 1995.

It was requested that the FAA review this material as the noise exposure maps, as described in Title 49, and that the noise mitigation measures, to be implemented jointly by the airport and surrounding communities, be approved as a noise compatibility program under Title 49.

The FAA has completed its review of the noise exposure maps and related descriptions submitted by the City of Corpus Christi. The specific maps under consideration are Noise Exposure Map 1999, Figure 5–1, Noise Exposure Map 2004, Figure 5–2, and Noise Exposure Map Ultimate Airfield, Figure 5–3 in the submission.

The FAA has determined that these maps for Corpus Christi International Airport are in compliance with applicable requirements. This determination is effective on March 1, 2000. The FAA's determination on an airport operator's noise exposure maps is limited to a finding that the maps were developed in accordance with the procedures contained in Appendix A of FAR Part 150. Such determination does not constitute approval of the applicant's data, information, plans, a commitment to approve a noise compatibility program, or to fund the implementation of that program.

If questions arise concerning the precise relationship of specific properties to noise exposure contours depicted on a noise exposure map submitted under section 103 of the Act, it should be noted that the FAA is not involved in any way in determining the relative locations of specific properties with regard to the depicted noise contours, or in interpreting the noise exposure maps to resolve questions concerning, for example, which properties should be covered by the provisions of Title 49.

These functions are inseparable from the ultimate land use control and planning responsibilities of local government. These local responsibilities are not changed in any way under Part 150 or through FAA's review of noise exposure maps. Therefore, the responsibility for the detailed overlaying of noise exposure contours onto the map depicting properties on the surface rests exclusively with the airport operator which submitted those maps, or with those public agencies and planning agencies with which consultation is required under Title 49. The FAA has relied on the certification by the airport operator, under section 150.21 of FAR Part 150, that the statutorily required consultation has been accomplished.

The FAA has formally received the noise compatibility program for Corpus Christi International Airport, also effective on March 1, 2000. Preliminary review of the submitted material indicates that it conforms to the requirements for the submittal of noise compatibility programs, but that further

OFFICE OF THE UNITED STATES TRADE REPRESENTATIVE

Generalized System of Preferences (GSP); Copper Wire Bars From Russia

AGENCY: Office of the United States Trade Representative.

ACTION: Notice of correction.

SUMMARY: The purpose of this notice is to correct the Harmonized Tariff Schedule of the United States (HTS) to reflect the correct treatment under the GSP program of refined copper wire bars imported from Russia.

FOR FURTHER INFORMATION CONTACT: GSP subcommittee, Office of the United States Trade Representative, 600 17th Street, NW, Room 518, Washington, DC 20508 (Tel. 202/395–6971).

EFFECTIVE DATE: The correction made in this notice is effective with respect to articles entered, or withdrawn from warehouse for consumption, on or after July 1, 1999.

SUPPLEMENTARY INFORMATION: The GSP program grants duty-free treatment to designated eligible articles that are imported from certain developing countries. The GSP program is authorized by Title V of the Trade Act of 1974, as amended (''Trade Act'') (19 U.S.C. 2461 *et seq*). Each year, certain products from eligible countries are excluded from GSP treatment to the extent imports of those products have exceeded the applicable competitive need limits (CNL) during the previous year (19 U.S.C. 2463 (2)(A)). Based on import data from the U.S. Bureau of Census showing that imports of refined copper wire bars (HTS subheading 7403.12.00) from Russia had exceeded the applicable CNL, the President revoked duty-free treatment for those articles beginning July 1, 1999. (Proclamation 206, 64 FR 36229, 36234 (July 2, 1999); 64 FR 36952 (July 8, 1999)). Revised Bureau of Census statistics show that imports of copper wire bars from Russia did not exceed the applicable CNL and thus that duty-free treatment for those articles should not have been withdrawn.

Accordingly, pursuant to authority granted by Congress to the President in section 604 of the Trade Act (19 U.S.C. 2483) and delegated by the President to the United States Trade Representative in Proclamation 6969 of January 27, 1997 (62 FR 4415), effective with respect to articles entered, or withdrawn from warehouse for consumption, on or after July 1, 1999, general note 4(d) to the Harmonized Tariff Schedule of the United States is modified by striking ''; Russia'' after subheading 7403.12.00 in the enumeration of designated beneficiary countries that are ineligible to receive GSP benefits for that tariff provision.

Requests for application of the tariff modification and duty treatment provided for herein must contain sufficient information to enable the Customs Service to identify each relevant entry (including but not limited to the entry number for the shipment concerned).

United States Trade Representative.

Title 3—

The President

Proclamation 7328 of July 6, 2000

To Amend the Generalized System of Preferences

By the President of the United States of America

A Proclamation

1. Section 502(c)(7) of the Trade Act of 1974, as amended (the ''Trade Act'') (19 U.S.C. 2462(c)(7)), provides that, in determining whether to designate any country a beneficiary developing country under this section, the President shall take into account whether that country has taken or is taking steps to afford internationally recognized worker rights to workers in that country. Section 502(d)(1) of the Trade Act (19 U.S.C. 2462(d)(1)) provides that the President may withdraw, suspend, or limit the application of duty-free treatment under the Generalized System of Preferences (GSP) with respect to any designated beneficiary developing country based on consideration of the factors set forth in sections 501 and 502(c) of the Trade Act (19 U.S.C. 2461 and 2462(c)). Section 502(f)(2) of the Trade Act (19 U.S.C. 2462(f)(2)) requires the President to notify the Congress and the affected country, at least 60 days before termination, of the President's intention to terminate the affected country's designation as a beneficiary developing country for purposes of the GSP.

2. Section 502(e) of the Trade Act (19 U.S.C. 2462(e)) provides that the President shall terminate the designation of a country as a beneficiary developing country if the President determines that such country has become a ''high income'' country as defined by the official statistics of the International Bank for Reconstruction and Development. Termination is effective on January 1 of the second year following the year in which such determination is made.

3. Pursuant to section 502(d) of the Trade Act, and having considered the factors set forth in sections 501 and 502(c), I have determined that it is appropriate to suspend Belarus's GSP benefits because it has not taken and is not taking steps to afford workers in that country internationally recognized worker rights. In order to reflect the suspension of benefits under the GSP for articles imported from Belarus, I have determined that it is appropriate to modify general note 4(a) of the Harmonized Tariff Schedule of the United States (HTS).

4. Pursuant to section 502(e) of the Trade Act, I have determined that Malta, French Polynesia, New Caledonia, and Slovenia meet the definition of a ''high income'' country as defined by the official statistics of the International Bank for Reconstruction and Development. Accordingly, pursuant to section 502(e) of the Trade Act, I am terminating the preferential treatment under the GSP for articles that are currently eligible for such treatment and that are imported from Malta, French Polynesia, New Caledonia, and Slovenia, effective January 1, 2002.

5. Section 604 of the Trade Act, as amended (19 U.S.C. 2483), authorizes the President to embody in the HTS the substance of the relevant provisions of that Act, and of other Acts affecting import treatment, and actions thereunder.

NOW, THEREFORE, I, WILLIAM J. CLINTON, President of the United States of America, acting under the authority vested in me by the Constitution and the laws of the United States of America, including but not limited to Title V and section 604 of the Trade Act, do proclaim that:

(1) In order to reflect the suspension of benefits under the GSP with respect to Belarus, general note 4(a) of the HTS is modified by deleting ''Belarus'' from the list of independent countries, effective with respect to articles entered, or withdrawn from warehouse for consumption, on or after 60 days after the date of publication of this proclamation in the **Federal Register**.

(2) In order to terminate the designation of Malta, French Polynesia, New Caledonia, and Slovenia as beneficiary developing countries under the GSP, general note 4(a) of the HTS is modified by:

(a) deleting ''Malta'' and ''Slovenia'' from the list of independent countries, and

(b) deleting ''French Polynesia'' and ''New Caledonia'' from the list of nonindependent countries and territories, effective with respect to articles entered, or withdrawn from warehouse for consumption, on or after January 1, 2002.

(3) Any provisions of previous proclamations and Executive Orders that are inconsistent with the actions taken in this proclamation are superseded to the extent of such inconsistency.

IN WITNESS WHEREOF, I have hereunto set my hand this sixth day of July, in the year of our Lord two thousand, and of the Independence of the United States of America the two hundred and twenty-fifth.

A Proclamation

1. Pursuant to sections 501 and 502 of the Trade Act of 1974, as amended (the ''1974 Act'') (19 U.S.C. 2461 and 2462), the President is authorized to designate countries as beneficiary developing countries for purposes of the Generalized System of Preferences (GSP).

2. Pursuant to sections 501 and 502 of the 1974 Act, and having due regard for the eligibility criteria set forth therein, I have determined that it is appropriate to designate Nigeria as a beneficiary developing country for purposes of the GSP.

3. Section 604 of the 1974 Act (19 U.S.C. 2483) authorizes the President to embody in the Harmonized Tariff Schedule of the United States (HTS) the substance of the relevant provisions of that Act, and of other acts affecting import treatment, and actions thereunder, including the removal, modification, continuance, or imposition of any rate of duty or other import restriction.

NOW, THEREFORE, I, WILLIAM J. CLINTON, President of the United States of America, acting under the authority vested in me by the Constitution and the laws of the United States of America, including but not limited to title V and section 604 of the 1974 Act, do proclaim that:

(1) In order to reflect in the HTS the addition of Nigeria as a beneficiary country under the GSP, general note 4(a) to the HTS is modified by adding ''Nigeria'' to the list of independent countries, effective with respect to articles entered, or withdrawn from warehouse for consumption, on or after the date of signature of this proclamation.

(2) Any provisions of previous proclamations and Executive Orders that are inconsistent with the actions taken in this proclamation are superseded to the extent of such inconsistency.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-seventh day of August, in the year of our Lord two thousand, and of the Independence of the United States of America the two hundred and twenty-fifth.

OFFICE OF THE UNITED STATES TRADE REPRESENTATIVE

Determination Under the Caribbean Basin Trade Partnership Act

AGENCY: Office of the United States Trade Representative.

ACTION: Notice.

SUMMARY: The United States Trade Representative has determined that Belize, Costa Rica, Dominican Republic, El Salvador, Guatemala, Haiti, Honduras, Jamaica, Nicaragua, and Panama have implemented and follow, or are making substantial progress toward implementing and following, the customs procedures required by the Caribbean Basin Trade Partnership Act and, therefore, imports of eligible products from these countries qualify for the enhanced trade benefits provided under the Act.

EFFECTIVE DATE: October 2, 2000.

FOR FURTHER INFORMATION CONTACT: Christopher Wilson, Director for Central America and the Caribbean, Office of the United States Trade Representative, (202) 395–5190.

SUPPLEMENTARY INFORMATION: The Caribbean Basin Trade partnership Act (Title II of the Trade and Development Act of 2000, Pub. L. No. 106–200) (CBTPA) expands the trade benefits available to Caribbean and Central American countries under the Caribbean Basin Economic Recovery Act (CBERA). The CBTPA reduces or eliminates tariffs and eliminates quantitative restrictions on certain products that previously were not eligible for preferential treatment under the CBERA. The enhanced trade benefits provided by the CBTPA are available to imports of eligible products from countries that (1) are designated as ''CBTPA beneficiary countries,'' and (2) have implemented and follow, or are making substantial progress toward implementing and following, certain customs procedures, drawn from Chapter 5 of the North American Free Trade Agreement, that allow U.S. Customs to verify the origin of the products.

On October 2, 2000, the President designated all 24 current beneficiaries under the CBERA as ''CBTPA beneficiary countries.'' Proclamation 7351 delegated to the United States Trade Representative (USTR) the authority to determine whether the designated CBTPA beneficiary countries have implemented and follow, or are making substantial progress toward implementing and following, the customs procedures required by the CBTPA. The President directed the USTR to announce any such determinations in the **Federal Register** and to implement any such determinations in the Harmonized Tariff Schedule (HTS).

Based on information and commitments received from beneficiary countries to date, I have determined that Belize, Costa Rica, Dominican Republic, El Salvador, Guatemala, Haiti, Honduras, Jamaica, Nicaragua, and Panama have implemented and follow, or are making substantial progress toward implementing and following, the customs procedures required by the CBTPA. Accordingly, pursuant to the authority vested in the USTR by Proclamation 7351, the HTS is modified as provided in Proclamation 7351 and as specified in the Annex to this notice, effective with respect to articles entered, or withdrawn from warehouse, on or after October 2, 2000. The USTR will publish additional notices in the **Federal Register** announcing any determinations that other CBTPA beneficiary countries have satisfied the required customs procedures.

Charlene Barshefsky,

United States Trade Representative.

Annex

Pursuant to the authority created in Proclamation 7351, the HTS is modified as follows:

1(a). General note 17(a) to the HTS, as established by the annex to such Proclamation, is modified by inserting at the end of the text the following new sentence and enumeration:

''The following countries have been determined by the USTR to have satisfied the customs requirements of the CBTPA and, therefore, to be afforded the tariff treatment provided for in this note:

Belize, Costa Rica, Dominican Republic, El Salvador, Guatemala, Haiti, Honduras, Jamaica, Nicaragua, Panama''

(b). General note 17(d) to the HTS, as established by the annex to such Proclamation, is modified by striking ''the date announced in a **Federal Register** notice issued by the United

States Trade Representative'' and by inserting in lieu thereof ''October 2, 2000.''

2. The text of U.S. note 7 to subchapter II of chapter 98 of the HTS, as established by the annex to such Proclamation, is modified by inserting before it the paragraph designation ''(b)''. Such paragraph is modified by inserting at the end thereof the following new sentence and enumeration:

''The following countries have been determined by the USTR to have satisfied the customs requirements of the CBTPA and, therefore, to be afforded the tariff treatment provided for in this note:

Belize, Costa Rica, Dominican Republic, El Salvador, Guatamala, Haiti, Honduras, Jamaica, Nicaragua, Panama''

3. U.S. note 1 subchapter XX of chapter 98 of the HTS, as established by the annex to such Proclamation, is modified by adding at the end of the text of such note the following new sentence and enumeration:

''The following countries have been determined by the USTR to have satisfied the customs requirements of the CBTPA and, therefore, to be afforded the tariff treatment provided for in this note:

Belize, Costa Rica, Dominican Republic, El Salvador, Guatemala, Haiti, Honduras, Jamaica, Nicaragua, Panama''

4. U.S. note 2(b) and (c) are each modified by striking the expression ''the date announced in a **Federal Register** notice issued by the United States Trade Representative'' and by inserting in lieu thereof ''October 2, 2000''.

On July 25, 2000, FRA published a 60-day notice in the **Federal Register** soliciting comment on ICRs that the agency was seeking OMB approval. 65 FR 45825. FRA received no comments in response to this notice.

Before OMB decides whether to approve these proposed collections of information, it must provide 30 days for public comment. 44 U.S.C. 3507(b); 5 CFR 1320.12(d). Federal law requires OMB to approve or disapprove paperwork packages between 30 and 60 days after the 30 day notice is published. 44 U.S.C. 3507 (b)-(c); 5 CFR 1320.12(d); see also 60 FR 44978, 44983, Aug. 29, 1995. OMB believes that the 30 day notice informs the regulated community to file relevant comments and affords the agency adequate time to digest public comments before it renders a decision. 60 FR 44983, Aug. 29, 1995. Therefore respondents should submit their respective comments to OMB within 30 days of publication to best ensure having their full effect. 5 CFR 1320.12(c); see also 60 FR 44983, Aug. 29, 1995.

The summaries below describe the nature of the information collection requirements (ICRs) and the expected burden. The revised requirements are being submitted for clearance by OMB as required by the PRA.

Title: Regional Inspection Point Listing Forms.

OMB Control Number: 2130-New.

Type of Request: New collection.

Affected Public: Businesses.

Form(s): FRA F 6180.106(a)-(e).

Abstract: Through a direct comparison of inspection data with accident/incident data, the collection of information proposes to develop a profile county-by-county of what there is to inspect, and how much inspection activity was done by Federal and State railroad inspectors each year nationwide. The information collected will produce ''snapshots'' which will allow FRA to determine where the gaps are in inspection territories so that it can focus inspection resources where they will do the most good. As a result of the proposed information collection, FRA will be better able to equalize inspector workloads, and will be able to make informed hiring decisions regarding the most effective placement of new inspectors. More targeted inspections will permit FRA to maximize its limited resources, and will serve to enhance overall safety on the nation's rail system.

Annual Estimated Burden Hours: 3,387.

Addressee: Send comments regarding these information collections to the Office of Information and Regulatory Affairs, Office of Management and Budget, 725 Seventeenth Street, NW., Washington, DC, 20503. Attention: FRA Desk Officer.

Comments are invited on the following: Whether the proposed collections of information are necessary for the proper performance of the functions of FRA, including whether the information will have practical utility; the accuracy of FRA's estimates of the burden of the proposed information collections; ways to enhance the quality, utility, and clarity of the information to be collected; and ways to minimize the burden of the collections of information on respondents, including the use of automated collection techniques or other forms of information technology.

A comment to OMB is best assured of having its full effect if OMB receives it within 30 days of publication of this notice in the **Federal Register**.

Authority: 44 U.S.C. 3501–3520.

Issued in Washington, DC on October 3, 2000.

Kathy A. Weiner,

Director, Office of Information Technology and Support Systems, Federal Railroad Administration.

CHAPTER 2—SPECIAL CLASSIFICATION RELATING TO PRODUCT DEVELOPMENT AND TESTING

SEC. 1431. SHORT TITLE.

This chapter may be cited as the "Product Development and Testing Act of 2000".

SEC. 1432. FINDINGS; PURPOSE.

(a) FINDINGS.—The Congress finds the following:

(1)(A) A substantial amount of development and testing occurs in the United States incident to the introduction and manufacture of new products for both domestic consumption and export overseas.

(B) Testing also occurs with respect to merchandise that has already been introduced into commerce to insure that it continues to meet specifications and performs as designed.

(2) The development and testing that occurs in the United States incident to the introduction and manufacture of new products, and with respect to products which have already been introduced into commerce, represents a significant industrial activity employing highly-skilled workers in the United States.

(3)(A) Under the current laws affecting the importation of merchandise, such as the provisions of part I of title IV of the Tariff Act of 1930 (19 U.S.C. 1401 et seq.), goods commonly referred to as "prototypes", used for product development testing and product evaluation purposes, are subject to customs duty upon their importation into the United States unless the prototypes qualify for duty-free treatment under special trade programs or unless the prototypes are entered under a temporary importation bond.

(B) In addition, the United States Customs Service has determined that the value of prototypes is to be included in the value of production articles if the prototypes are the result of the same design and development effort as the articles.

(4)(A) Assessing duty on prototypes twice, once when the prototypes are imported and a second time thereafter as part of the cost of imported production merchandise, discourages development and testing in the United States, and thus encourages development and testing to occur overseas, since, in that case, duty will only be assessed once, upon the importation of production merchandise.

(B) Assessing duty on these prototypes twice unnecessarily inflates the cost to businesses, thus reducing their competitiveness.

(5) Current methods for avoiding the excessive assessment of customs duties on the importation of prototypes, including the use of temporary importation entries and obtaining drawback, are unwieldy, ineffective, and difficult for both importers and the United States Customs Service to administer.

(b) PURPOSE.—The purpose of this chapter is to promote product development and testing in the United States by permitting the importation of prototypes on a duty-free basis.

SEC. 1433. AMENDMENTS TO HARMONIZED TARIFF SCHEDULE OF THE UNITED STATES.

(a) HEADING.—Subchapter XVII of Chapter 98 is amended by inserting in numerical sequence the following new heading:

"	9817.85.01	Prototypes to be used exclusively for development, testing, product evaluation, or quality control purposes	Free		The rate applicable in the absence of this heading	".

(b) U.S. NOTE.—The U.S. Notes to subchapter XVII of chapter 98 are amended by adding at the end the following:

"6. The following provisions apply to heading 9817.85.01:

"(a) For purposes of this subchapter, including heading 9817.85.01, the term 'prototypes' means originals or models of articles that—

"(i) are either in the preproduction, production, or postproduction stage and are to be used exclusively for development, testing, product evaluation, or quality control purposes; and

"(ii) in the case of originals or models of articles that are either in the production or postproduction stage, are associated with a design change from current production (including a refinement, advancement, improvement, development, or quality control in either the product itself or the means for producing the product).

For purposes of clause (i), automobile racing for purse, prize, or commercial competition shall not be considered to be "development, testing, product evaluation, or quality control.".

"(b)(i) Prototypes may be imported only in limited noncommercial quantities in accordance with industry practice.

"(ii) Except as provided for by the Secretary of the Treasury, prototypes or parts of prototypes may not be sold after importation into the United States or be incorporated into other products that are sold.

"(c) Articles subject to quantitative restrictions, antidumping orders, or countervailing duty orders may not be classified as prototypes under this note. Articles subject to licensing requirements, or which must comply with laws, rules, or regulations administered by agencies other than the United States Customs Service before being imported, may be classified as prototypes if they comply with all applicable provisions of law and otherwise meet the definition of 'prototypes' under paragraph (a).".

SEC. 1434. REGULATIONS RELATING TO ENTRY PROCEDURES AND SALES OF PROTOTYPES.

(a) IDENTIFICATION OF PROTOTYPES.—The Secretary of the Treasury shall promulgate regulations regarding the identification of prototypes at the time of importation into the United States in accordance with the provisions of this chapter and the amendments made by this chapter.

(b) SALES OF PROTOTYPES.—Not later than 10 months after the date of the enactment of this Act, the Secretary of the Treasury shall promulgate final regulations regarding the sale of prototypes entered under heading 9817.85.01 of the Harmonized Tariff Schedule of the United States as scrap, or waste, or for recycling, if all duties are tendered for sales of the prototypes, including prototypes and parts of prototypes incorporated into other products, as scrap, waste, or recycled materials, at the rate of duty in effect

for such scrap, waste, or recycled materials at the time of importation of the prototypes.

SEC. 1435. EFFECTIVE DATE.

This chapter, and the amendments made by this chapter, shall apply with respect to—

(1) an entry of a prototype under heading 9817.85.01, as added by section 1433(a), on or after the date of the enactment of this Act; and

(2) an entry of a prototype (as defined in U.S. Note 6(a) to subchapter XVII of chapter 98, as added by section 1433(b)) under heading 9813.00.30 for which liquidation has not become final as of the date of the enactment of this Act.

CHAPTER 3—PROHIBITION ON IMPORTATION OF PRODUCTS MADE WITH DOG OR CAT FUR

SEC. 1441. SHORT TITLE.

This chapter may be cited as the "Dog and Cat Protection Act of 2000".

SEC. 1442. FINDINGS AND PURPOSES.

(a) FINDINGS.—Congress makes the following findings:

(1) An estimated 2,000,000 dogs and cats are slaughtered and sold annually as part of the international fur trade. Internationally, dog and cat fur is used in a wide variety of products, including fur coats and jackets, fur trimmed garments, hats, gloves, decorative accessories, stuffed animals, and other toys.

(2) The United States represents one of the largest markets for the sale of fur and fur products in the world. Market demand for fur products in the United States has led to the introduction of dog and cat fur products into United States commerce, frequently based on deceptive or fraudulent labeling of the products to disguise the true nature of the fur and mislead United States wholesalers, retailers, and consumers.

(3) Dog and cat fur, when dyed, is not easily distinguishable to persons who are not experts from other furs such as fox, rabbit, coyote, wolf, and mink, and synthetic materials made to resemble real fur. Dog and cat fur is generally less expensive than other types of fur and may be used as a substitute for more expensive types of furs, which provides an incentive to engage in unfair or fraudulent trade practices in the importation, exportation, distribution, or sale of fur products, including deceptive labeling and other practices designed to disguise the true contents or origin of the product.

(4) Forensic texts have documented that dog and cat fur products are being imported into the United States subject to deceptive labels or other practices designed to conceal the use of dog or cat fur in the production of wearing apparel, toys, and other products.

(5) Publicly available evidence reflects ongoing significant use of dogs and cats bred expressly for their fur by foreign fur producers for manufacture into wearing apparel, toys, and other products that have been introduced into United States commerce. The evidence indicates that foreign fur producers also rely on the use of stray dogs and cats and stolen pets for the manufacture of fur products destined for the world and United States markets.

(6) The methods of housing, transporting, and slaughtering dogs and cats for fur production are generally unregulated and inhumane.

(7) The trade of dog and cat fur products is ethically and aesthetically abhorrent to United States citizens. Consumers in the United States have a right to know if products offered for sale contain dog or cat fur and to ensure that they are not unwitting participants in this gruesome trade.

(8) Persons who engage in the sale of dog or cat fur products, including the fraudulent trade practices identified above, gain an unfair competitive advantage over persons who engage in legitimate trade in apparel, toys, and other products, and derive an unfair benefit from consumers who buy their products.

(9) The imposition of a ban on the sale, manufacture, offer for sale, transportation, and distribution of dog and cat fur products, regardless of their source, is consistent with the international obligations of the United States because it applies equally to domestic and foreign producers and avoids any discrimination among foreign sources of competing products. Such a ban is also consistent with provisions of international agreements to which the United States is a party that expressly allow for measures designed to protect the health and welfare of animals and to enjoin the use of deceptive trade practices in international or domestic commerce.

(b) PURPOSES.—The purposes of this chapter are to—

(1) prohibit imports, exports, sale, manufacture, offer for sale, transportation, and distribution in the United States of dog and cat fur products, in order to ensure that United States market demand does not provide an incentive to slaughter dogs or cats for their fur;

(2) require accurate labeling of fur species so that consumers in the United States can make informed choices and ensure that they are not unwitting contributors to this gruesome trade; and

(3) ensure that the customs laws of the United States are not undermined by illicit international traffic in dog and cat fur products.

SEC. 1443. PROHIBITION ON IMPORTATION OF PRODUCTS MADE WITH DOG OR CAT FUR.

(a) IN GENERAL.—Title III of the Tariff Act of 1930 is amended by inserting after section 307 the following new section:

"(3) CUSTOMS LAWS.—The term 'customs laws of the United States' means any other law or regulation enforced or administered by the United States Customs Service.

"(4) DESIGNATED AUTHORITY.—The term 'designated authority' means the Secretary of the Treasury, with respect to the prohibitions under subsection (b)(1)(A), and the President

(or the President's designee), with respect to the prohibitions under subsection (b)(1)(B).

"(5) DOG FUR.—The term 'dog fur' means the pelt or skin of any animal of the species *Canis familiaris*.

"(b) PROHIBITIONS.—

"(1) IN GENERAL.—It shall be unlawful for any person to—

"(A) import into, or export from, the United States any dog or cat fur product; or

"(B) introduce into interstate commerce, manufacture for introduction into interstate commerce, sell, trade, or advertise in interstate commerce, offer to sell, or transport or distribute in interstate commerce in the United States, any dog or cat fur product.

"(2) EXCEPTION.—This subsection shall not apply to the importation, exportation, or transportation, for noncommercial purposes, of a personal pet that is deceased, including a pet preserved through taxidermy.

"(c) PENALTIES AND ENFORCEMENT.—

"(1) CIVIL PENALTIES.—

"(A) IN GENERAL.—Any person who violates any provision of this section or any regulation issued under this section may, in addition to any other civil or criminal penalty that may be imposed under title 18, United States Code, or any other provision of law, be assessed a civil penalty by the designated authority of not more than—

"(i) $10,000 for each separate knowing and intentional violation;

"(ii) $5,000 for each separate grossly negligent violation; or

"(iii) $3,000 for each separate negligent violation.

"(B) DEBARMENT.—The designated authority may prohibit a person from importing, exporting, transporting, distributing, manufacturing, or selling any fur product in the United States, if the designated authority finds that the person has engaged in a pattern or practice of actions that has resulted in a final administrative determination with respect to the assessment of civil penalties for knowing and intentional or grossly negligent violations of any provision of this section or any regulation issued under this section.

"(C) FACTORS IN ASSESSING PENALTIES.—In determining the amount of civil penalties under this paragraph, the designated authority shall take into account the degree of culpability, any history of prior violations under this section, ability to pay, the seriousness of the violation, and such other matters as fairness may require.

"(D) NOTICE.—No penalty may be assessed under this paragraph against a person unless the person is given notice and opportunity for a hearing with respect to such violation in accordance with section 554 of title 5, United States Code.

"(2) FORFEITURE.—Any dog or cat fur product manufactured, taken, possessed, sold, purchased, offered for sale or purchase, transported, delivered, received, carried, shipped, imported, or exported contrary to the provisions of this section or any regulation issued under this section shall be subject to forfeiture to the United States.

"(4) REGULATIONS.—Not later than 270 days after the date of the enactment of this section, the designated authorities shall, after notice and opportunity for comment, issue regulations to carry out the provisions of this section. The regulations of the Secretary of the Treasury shall provide for a process by which testing laboratories, whether domestic or foreign, can qualify for certification by the United States Customs Service by demonstrating the reliability of the procedures used for determining the type of fur contained in articles intended for sale or consumption in interstate commerce. Use of a laboratory certified by the United States Customs Service to determine the nature of fur contained in an item to which subsection (b) applies is not required to avoid liability under this section but may, in a case in which a person can establish that the goods imported were tested by such a laboratory and that the item was not found to be a dog or cat fur product, prove dispositive in determining whether that person exercised reasonable care for purposes of paragraph (6).

OFFICE OF THE UNITED STATES TRADE REPRESENTATIVE

Determination Under the Caribbean Basin Trade Partnership Act

AGENCY: Office of the United States Trade Representative.

ACTION: Notice.

SUMMARY: The United States Trade Representative has determined that Guyana is making substantial progress toward implementing and following the customs procedures required by the Caribbean Basin Trade Partnership Act and, therefore, imports of eligible products from Guyana qualify for the enhanced trade benefits provided under the Act.

EFFECTIVE DATE: November 9, 2000.

FOR FURTHER INFORMATION CONTACT: Christopher Wilson, Director for Central America and the Caribbean, Office of the United States Trade Representative, (202) 395–5190.

SUPPLEMENTARY INFORMATION: The Caribbean Basin Trade Partnership Act (Title II of the Trade and Development Act of 2000, Pub. L. No. 106–200) (CBTPA) expands the trade benefits available to Caribbean and Central American countries under the Caribbean Basin Economic Recovery Act (CBERA). The CBTPA reduces or eliminates tariffs and eliminates quantitative restrictions on certain products that previously were not eligible for preferential treatment under the CBERA. The enhanced trade benefits provided by the CBTPA are available to imports of eligible products from countries that (1) are designated as ''CBTPA beneficiary countries,'' and (2) have implemented and follow, or are making substantial progress toward implementing and following, certain customs procedures, drawn from Chapter 5 of the North American Free Trade Agreement, that allow U.S. Customs to verify the origin of the products.

On October 2, 2000, the President designated all 24 current beneficiaries under the CBERA as ''CBTPA beneficiary countries.'' Proclamation 7351 delegated to the United States Trade Representative (USTR) the authority to determine whether the designated CBTPA beneficiary countries have implemented and follow, or are

making substantial progress toward implementing and following, the customs procedures required by the CBTPA. The President directed the USTR to announce any such determinations in the **Federal Register** and to implement any such determinations in the Harmonized Tariff Schedule of the United States (HTS).

Based on information and commitments provided by the Government of Guyana, I have determined that Guyana is making substantial progress toward implementing and following the customs procedures required by the CBTPA. Accordingly, pursuant to the authority vested in the USTR by Proclamation 7351, general note 17(a) to the HTS, U.S. note 7 to subchapter II of chapter 98 of the HTS, and U.S. note 1 to subchapter XX of chapter 98 of the HTS are each modified by inserting in alphabetical sequence in the list of eligible CBTPA beneficiary countries the name ''Guyana.'' General note 17(d) to the HTS is modified by striking ''duty-free'' and inserting in lieu thereof ''tariff'' and by striking ''October 2, 2000'' and inserting in lieu thereof ''the date announced in one or more **Federal Register** notices issued by the United States Trade Representative as the date on which each CBTPA beneficiary country qualifies for the tariff treatment provided in this note.'' The foregoing modifications to the HTS are effective with respect to articles entered, or withdrawn from warehouse for consumption, on or after November 9, 2000. The USTR will publish additional notices in the **Federal Register** announcing any determinations that other CBTPA beneficiary countries have satisfied the required customs procedures.

Richard Fisher,

Deputy United States Trade Representative.

National Highway Traffic Safety Administration

[Docket No. NHTSA–2000–8241]

Notice of Receipt of Petition for Decision That Nonconforming 1991–1995 BMW 8 Series Passenger Cars Are Eligible for Importation

AGENCY: National Highway Traffic Safety Administration, DOT.

ACTION: Notice of receipt of petition for decision that nonconforming 1991–1995 BMW 8 Series passenger cars are eligible for importation.

SUMMARY: This document announces receipt by the National Highway Traffic Safety Administration (NHTSA) of a petition for a decision that 1991–1995 BMW 8 Series passenger cars that were not originally manufactured to comply with all applicable Federal motor vehicle safety standards are eligible for importation into the United States because (1) they are substantially similar to vehicles that were originally manufactured for importation into and sale in the United States and that were certified by their manufacturer as complying with the safety standards, and (2) they are capable of being readily altered to conform to the standards.

DATE: The closing date for comments on the petition is December 21, 2000.

ADDRESSES: Comments should refer to the docket number and notice number, and be submitted to: Docket Management, Room PL–401, 400 Seventh St., SW, Washington, DC 20590. Docket hours are from 9 am to 5 pm.

FOR FURTHER INFORMATION CONTACT: George Entwistle, Office of Vehicle Safety Compliance, NHTSA (202–366–5306).

SUPPLEMENTARY INFORMATION:

Background

Under 49 U.S.C. 30141(a)(1)(A), a motor vehicle that was not originally manufactured to conform to all applicable Federal motor vehicle safety standards shall be refused admission into the United States unless NHTSA has decided that the motor vehicle is substantially similar to a motor vehicle originally manufactured for importation into and sale in the United States, certified under 49 U.S.C. 30115, and of the same model year as the model of the motor vehicle to be compared, and is capable of being readily altered to conform to all applicable Federal motor vehicle safety standards.

Petitions for eligibility decisions may be submitted by either manufacturers or importers who have registered with NHTSA pursuant to 49 CFR Part 592. As specified in 49 CFR 593.7, NHTSA publishes notice in the **Federal Register** of each petition that it receives, and affords interested persons an opportunity to comment on the petition. At the close of the comment period, NHTSA decides, on the basis of the petition and any comments that it has received, whether the vehicle is eligible for importation. The agency then publishes this decision in the **Federal Register**.

J.K. Technologies of Baltimore, Maryland (''J.K.'') (Registered Importer 90–006) has petitioned NHTSA to decide whether 1991–1995 BMW 8 Series passenger cars are eligible for importation into the United States. The vehicles which J.K. believes are substantially similar are 1991–1995 BMW 8 Series passenger cars that were manufactured for importation into, and sale in, the United States and certified by their manufacturer, Bayerische Motoren Werke, A.G., as conforming to
