Subject: *Status of GAO Recommendations to the Department of Defense (Fiscal Years 2001-2008)*

Section 502 of the Concurrent Resolution on the Budget for Fiscal Year 2010¹ required us to report to the appropriate congressional committees by December 31, 2009, regarding the Department of Defense's (DOD) progress in implementing GAO's audit recommendations. From fiscal years 2001 through 2008, we issued 743 reports to DOD or its components that included 3,099 recommendations.² By law, agencies, including DOD, are required to submit written statements to Congress explaining actions taken in response to recommendations we have made.³ We follow up on the implementation status of each recommendation at least annually after report issuance to determine whether DOD has instituted sufficient corrective actions. This report, which responds to this mandate, contains the results of our analysis on the implementation status of the 3,099 recommendations.

Scope and Methodology

To conduct our work, we analyzed information on the implementation status of recommendations made to DOD from our reports issued during fiscal years 2001 through 2008 at the request of the committee offices. The implementation status for each recommendation falls into one of three categories: recommendations that remain open, recommendations that are closed and implemented, and recommendations that are closed but not implemented. The results reflect information from our Engagement Results database as of September 30, 2009. As noted in our Performance and Accountability Report for Fiscal Year 2009,⁴ our performance reporting is reliable—transactions and other data that support reported performance measures are properly recorded, processed, and summarized to permit the preparation of performance information consistent with the criteria set forth in the Government Performance and Results Act of 1993⁵ and related Office of Management and Budget guidance. We conducted our work from September to December 2009 in accordance with all sections of GAO's Quality Assurance Framework that are relevant to our objectives. The framework requires that we plan and perform the engagement to obtain sufficient and appropriate evidence to meet our stated objectives and to discuss any limitations in our work. We believe that the information and data obtained, and the analysis conducted, provide a reasonable basis for any findings and conclusions in this product.

Background

For GAO products that contain recommendations, we update the status of these recommendations at least annually after report issuance and usually by the end of the fiscal year. To accomplish this, our staff may interview agency officials, obtain agency documents, access agency databases, or obtain information from an agency's inspector general. Recommendations that are reported as implemented are reviewed by a senior executive and our Office of Quality and Continuous Improvement. It is important for us to keep this recommendation information updated since Congress, federal agencies, and the public have online access to our report, Status of Open Recommendations, which is based on information from our Recommendations Follow-Up application.⁶ Congress uses the information to prepare for hearings and budget deliberations, and agencies use it to track the status of recommendations targeted to their agency. This database can be searched by congressional requester, by subject matter, or in various other ways such as target agency or product title. We also use this information to measure the implementation rate of our recommendations.

There are three options for recording the implementation status of a recommendation: open, closed-implemented, and closed-not implemented. A recommendation will stay open when action has not been taken but may be taken in the future, action is in the planning stage, or action has been taken on only part of the recommendation. A recommendation will be listed as closed-implemented when the action is fully implemented or action has been taken that essentially meets the recommendation's intent (i.e., the action meets the spirit—rather than the letter—of the recommendation) or all parts of the recommendation have been implemented. A recommendation will be listed as closed-not implemented when either DOD has indicated that it has no intention of implementing the recommendation or circumstances have changed and the recommendation is no longer valid.

GAO Recommendations to DOD and Their Implementation Status

During fiscal years 2001 through 2008, we issued 743 reports to DOD that included a total of 3,099 recommendations. As of September 30, 2009, 841 or 27 percent of these recommendations are reported as open, 1,878 or 61 percent are closed-implemented, and 380 or 12 percent are closed-not implemented. Consistent with past experience that shows it takes agencies some time to implement recommendations, we found most recommendations from fiscal year 2001 have been implemented while most recommendations from fiscal year 2008 remain open. For example, of the 292 recommendations made to DOD in fiscal year 2001, 234 recommendations or 80 percent have been implemented while 12, or 4 percent, remain open. The remaining 46 recommendations or 16 percent are closed but not implemented. Conversely, for the 381 recommendations we made to DOD in fiscal year 2008, 18 recommendations or 5 percent have been implemented while 352 recommendations or 92 percent are open. The remaining 11 recommendation or 3 percent are closed but not implemented. Enclosure I lists each report issued from fiscal year 2001 through fiscal year 2008 that included recommendations for DOD or its components and the implementation status of those recommendations.

Table 1 summarizes the number of the recommendations made to DOD in fiscal year 2001 through fiscal year 2008 and their implementation status by number and percentage.

**Implementation Status of GAO Recommendations Made to DOD
in Fiscal Year 2001 through Fiscal Year 2008**

This enclosure provides eight tables containing our analysis on the implementation status of the 3,099 GAO recommendations made to the Department of Defense (DOD) in the 743 reports issued from fiscal year 2001 through fiscal year 2008. Tables 2 through 9 separately display the implementation status for each respective fiscal year. For each year, the results are arranged alphabetically by report title and include the product number and status of the report's recommendations. At the bottom of each table is a fiscal year summary total. The bottom of table 9 additionally shows grand totals for recommendations made to DOD and the implementation status as open, closed-implemented, and closed-not implemented.
