FACILITIES

Locations of public marine facilities are shown by large purple numbers with leaders and refer to the facility tabulation.

STORM SIGNALS

	DAY SIGNALS	NIGHT SIGNALS
SMALL CRAFT ADVISORY Winds from 18 to 33 knots. Check radio for latest marine weather forecast.		
GALE WARNING Winds forecast from 34-47 knots.		
STORM WARNING Winds forecast from 48-63 knots.		
HURRICANE WARNING Winds forecast 64 knots and above.		

DISTRESS SIGNALS

DAY: Slowly and repeatedly raise and lower arms outstretched to each side.

NIGHT: Flames on the boat as from a burning tar barrel, oil barrel, and so forth.

DAY OR NIGHT: Continuous sounding of fog signal apparatus, or firing a gun.

FOG SIGNALS

WHILE UNDERWAY

Motorboats: Prolonged blast every minute.

Sailboats: When on starboard tack one blast, port tack 2 blasts and wind abaft of beam 3 blasts.

Boats towing or towed: One prolonged and 2 short blasts every minute.

AT ANCHOR

All boats: 5 seconds of bell every minute.

RULES OF THE ROAD

(ABRIDGED)

Motorless craft have the right-of-way in almost all cases. Sailing vessels and motorboats less than sixty-five feet in length, shall not hamper, in a narrow channel, the safe passage of a vessel which can navigate only inside that channel.

A motorboat being overtaken has the right-of-way.

Motorboats approaching head to head or nearly so should pass port to port.

When motorboats approach each other at right angles or obliquely, the boat on the right has the right-of-way.

Motorboats must keep to the right in narrow channels, when safe and practicable.

Mariners are urged to become familiar with the complete text of the rules of the road in pamphlet CG-169. The pamphlet may be obtained free from the local Coast Guard Marine Inspection Office.

WHISTLE SIGNALS

Signal given by one boat is repeated by other boat if safe, and understood. Use whistle signals when boats are in sight of each other in the daytime by sight of the boat itself, or by night by seeing its signal lights.

When approaching a bend, sound one long blast. If answered immediately upon sighting other boat give usual passing signals.

A long blast is used as a warning signal when leaving a slip.

1 SHORT BLAST
Meeting head-on
Overtaking

2 SHORT BLASTS
Maintaining Course
Overtaking

3 SHORT BLASTS
Engine is going astern

4 OR MORE SHORT BLASTS
Danger, or first boats signal not understood, or considered dangerous.
