PULPWOOD PRODUCTION IN THE NORTHERN REGION, 2006

Ronald J. Piva

Abstract

Discusses 2006 production and receipts of pulpwood in the Northern Region. Breaks down production from four subregions: Central States, Lake States, Mid-Atlantic States, and New England States, by species group for each state and compares production with that of previous years. Production for 2006 for the Plains States by species group and product form are included.

The Author

Ronald J. Piva, Forester, received a B.S. in forest management from the University of Missouri-Columbia. He joined the Forest Service in 1987 and has been working with the Northern Research Station's Forest Inventory and Analysis unit since.

INTRODUCTION

Current detailed information about pulpwood production¹ is necessary for intelligent planning and decisionmaking in wood procurement, forest-resource management, forest-industry development, and scientific studies.

This report includes information regarding pulpwood produced for use in the manufacture of all primary products made from reconstituted wood fiber. The two major products produced from pulpwood are pulp products and composite panel products. Pulp products include wood pulp, corrugated medium, roofing material, and insulation board. Composite panel products include flakeboard, waferboard, medium density fiberboard, hardboard, particleboard, oriented strandboard, and parallel strand lumber. Wood chips or fibers used at composite panel mills are nearly identical to wood chips or fibers used at pulp mills. Therefore, including this wood in our data compilation provides a more accurate estimate of demand for pulpwood-like material. This report presents the production of the raw fiber material delivered to mills. Thus, these data report only that portion of the timber harvest used as raw material and do not necessarily reflect the volume of growing stock harvested.

Pulpwood is a large component of the industrial timber products harvested annually in the Northern Region, accounting for more than half of the total harvest in some states each year. The Central States (Illinois, Indiana, Iowa, Missouri), Lake States (Michigan, Minnesota, Wisconsin), Mid-Atlantic States (Delaware, Maryland, New Jersey, New York, Ohio, Pennsylvania, West Virginia), New England States (Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, Vermont), and Plains States (Kansas, Nebraska, North Dakota, South Dakota) are discussed separately because the timber types in each area are different and the flow of wood between the areas is nominal. Results for pulpwood production and receipts are discussed at the broad regional level to avoid revealing the operations of individual mills.

¹Definitions of many terms used in this publication are found in the “Definition of Terms” section found in the Appendix.

STUDY METHODS

The Northern Research Station's (NRS) pulpwood study uses questionnaires designed to determine the size and composition of the primary pulpwood-using industry, its use of roundwood and wood residues, and its generation and disposition of wood residues. These questionnaires were mailed or emailed to all known users of pulpwood in the Northern Region, and to all Canadian pulpwood mills that were possible users of Northern Region pulpwood. Follow-up emails and phone calls were made in an effort to achieve a 100 percent response. Completed questionnaires were sent to NRS for data entry and processing.

As part of data entry and processing, all roundwood volumes reported on the questionnaires were converted to standard units of measure using regional conversion factors found in the Appendix. Timber removals by source of material and harvest residues generated during logging were estimated from standard product volumes using factors developed from logging utilization studies previously conducted by NRS. Finalized data on NRS's pulpwood receipts were loaded into a regional timber removals database where they were supplemented with data from other regions to provide a complete assessment of the Northern Region's production and use of pulpwood. Table 30 lists the pulpwood mills from Canada and other regions that reported receiving pulpwood from the Northern Region.

As part of requirements for reporting forest resource statistics for the national Resource Planning Act (RPA), the Northern Station must provide harvest volumes by state, county, and species. Some mills are not able to provide the county and/or species level of reporting. Instead, they report species volume as different groups, such as mixed hardwoods and softwoods, or county volumes listed as other counties instead of specific. In such cases, volumes are prorated to counties and/or species based on distance from mill and Forest Inventory and Analysis statistics of the volume of growing stock on forest land by county and species.

In 2006, surveys were conducted with pulp and composite panel mills from the Northern Region. Mills reported pulpwood receipts by species group and county of origin. This bulletin presents the results of the survey, compiles the data, compares results with those of 2005 and earlier years, and discusses trends in pulpwood production and use.

When new surveys are completed, errors and omissions from previous surveys are corrected. As a result of ongoing efforts to improve the survey's efficiency and reliability, changes may have been made to the previous survey's data. All comparisons and analyses in this report are based on the reprocessed data from earlier surveys, which may vary slightly from previously published data.

CENTRAL STATES

PRODUCTION AND RECEIPTS

Because of few pulpwood mills in the Central States, detailed county and receipt information is not reported for Illinois, Indiana, Iowa, and Missouri to avoid disclosure of information from individual mills.

- There were 398,000 cords of pulpwood produced in the Central States in 2006. Overall, 20 percent came from roundwood (including chips from roundwood) and 80 percent came from the residue of wood-using plants (Fig. 1 and Table 1).
- Hard hardwoods was the most harvested species group for pulpwood with 55,000 cords (70 percent of the total roundwood harvested) (Table 2). Another 18,000 cords of soft hardwoods (23 percent of the total roundwood harvest) and 6,000 cords of softwoods (7 percent of the total roundwood harvested) were harvested in 2006.

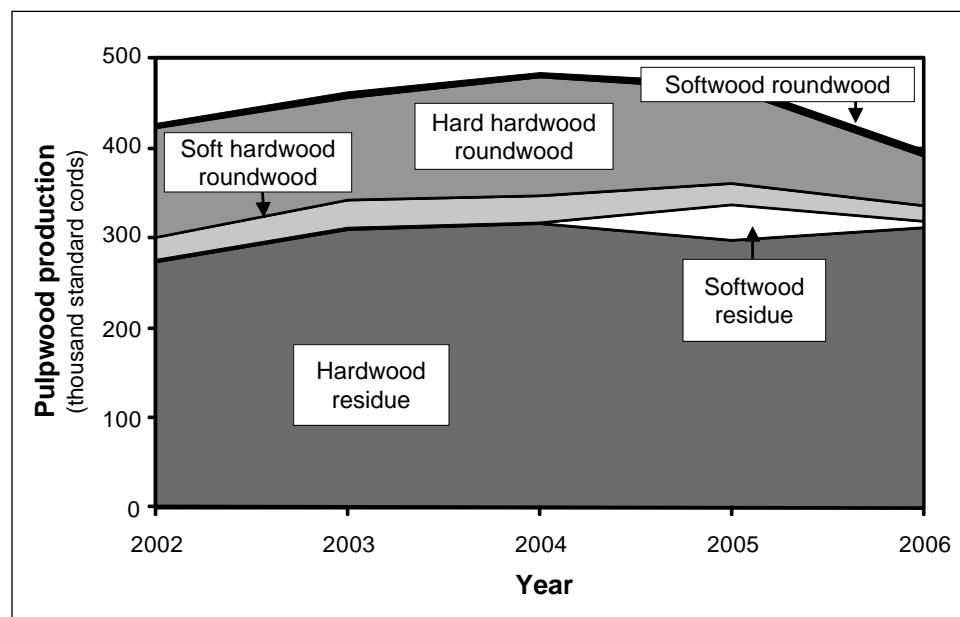

Figure 1.—Pulpwood production in the Central States by softwoods, hard hardwoods, soft hardwoods, and roundwood and residues, 2002-2006.

- Missouri was the largest producer of pulpwood in the Central States in 2006 with 52 percent of the regional total, or 207,000 cords. Indiana produced 39 percent of the pulpwood produced in the Central States, Illinois produced 6 percent, and Iowa produced 3 percent (Fig. 2).
- Almost 90 percent of the Central State's pulpwood production went to mills that produce pulp products. All of the roundwood harvested for pulpwood and 98 percent of the mill residues used for pulpwood were used by pulp mills (Fig. 3).

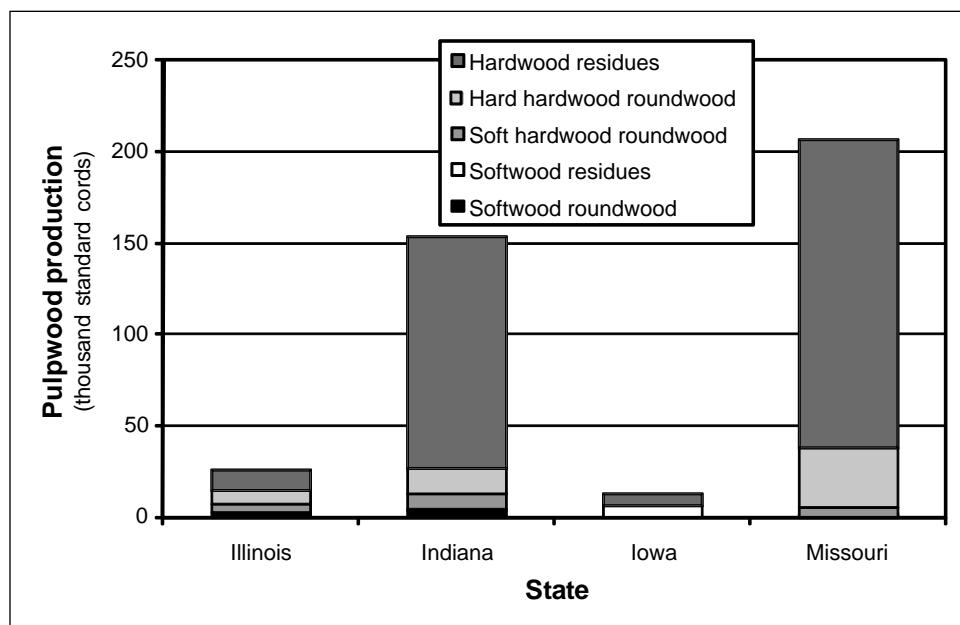

Figure 2.—Pulpwood production in the Central States by state, softwoods, hard hardwoods, soft hardwoods, and product form, 2006.

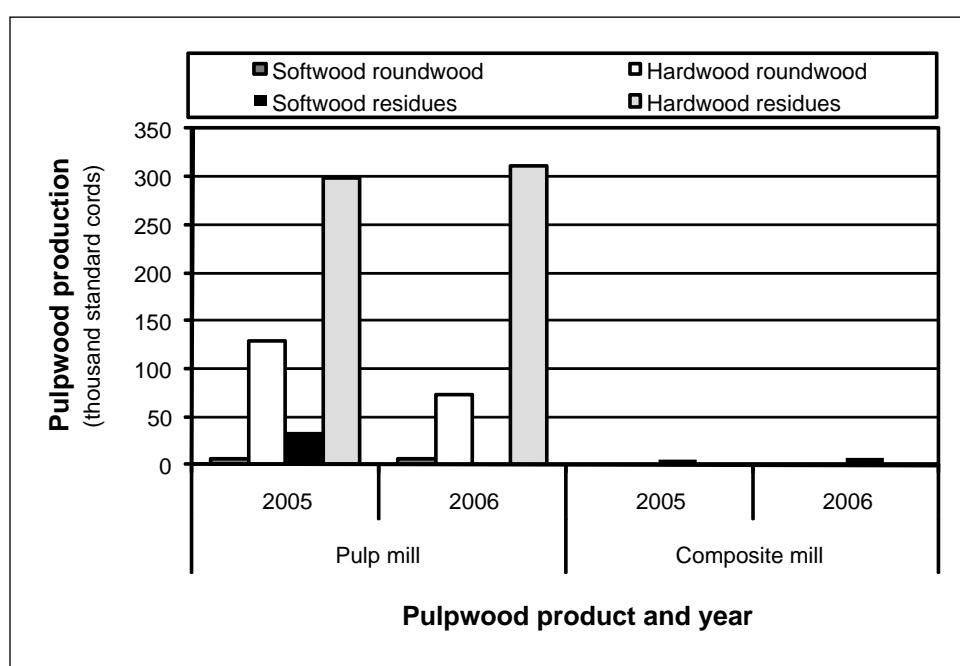

Figure 3.—Pulpwood production in the Central States by softwood and hardwood, product form, and mill type, 2005 and 2006.

- Central States pulpwood mills received 87,000 cords of pulpwood in 2006. Twenty-two percent of the pulpwood received was in the form of roundwood. The remainder was residues from other primary wood processors. The Lake States supplied 20 percent of the pulpwood (all residues from other primary wood processors) to mills in the Central States.

INDUSTRY TRENDS AND ANALYSIS

- Pulpwood production in the Central States decreased by 16 percent, from 473,000 cords in 2005 to 398,000 cords in 2006. Pulpwood production from mill residues decreased by 5 percent and pulpwood production from roundwood decreased by 42 percent.
- Only 4 percent of the roundwood and 16 percent of the mill residues that were produced in the Central States for pulpwood went to mills in the Central States. Mills in the Southern States received 77 percent of the total wood material produced in the Central States for pulpwood in 2006. Collectively, the Lake States and Mid-Atlantic States received 6 percent.
- In 2006, there were two pulp mills and one composite panel mill in the Central States (Table 3). The International Paper mill at Fort Madison, Iowa, closed at the end of 2005.
- Pulpwood harvesting in most of the Central States was minimal in 2006. There were 50 counties in the Central States that had pulpwood harvesting. There was an average of 17 cords of pulpwood harvested per thousand acres of timberland from these 50 counties. Only three counties had pulpwood harvest greater than 75 cords per thousand acres of timberland (Fig. 4).
- Pulpwood production for the Central States is expected to decrease again in 2007 as pulp products markets continued to decline. Also, the International Paper mill at Terre Haute, Indiana, closed in October 2007.

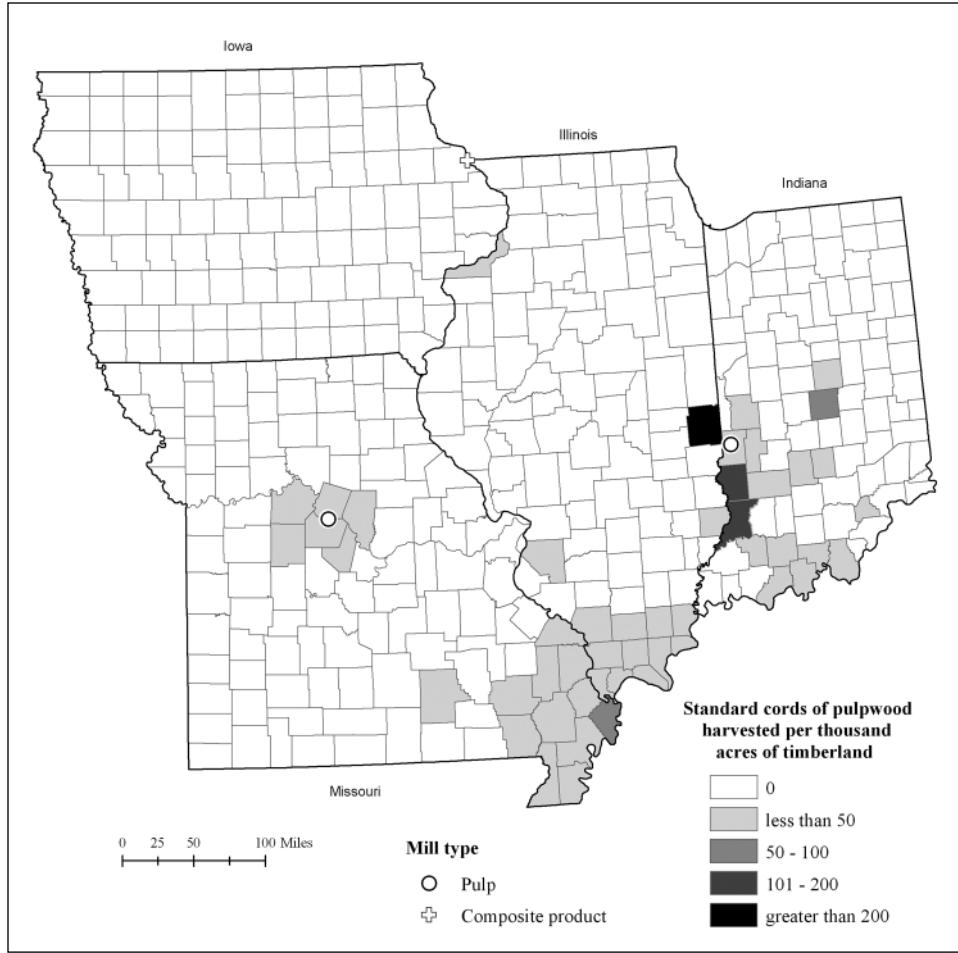

Figure 4.—Standard cords of pulpwood harvested per thousand acres of timberland in the Central States by county, 2006. Area of timberland is based on U.S. Forest Service Inventory and Analysis data for 2006. Map shows active pulp and composite products mills. See Table 3 for pulpwood mills in the Central States.

LAKE STATES

PRODUCTION

- Pulpwood production in the Lakes States fell from 9.8 million cords in 2005 to 7.7 million cords in 2006, a 22 percent decrease. In 2006, 87 percent of the pulpwood produced came from roundwood and 13 percent were mill residues from other primary wood processors in the Lake States (Table 4).
- Aspen/balsam poplar remained the dominant species group harvested for pulpwood in the Lake States in 2006 with 3.0 million cords, or 44 percent of the total roundwood. Other important species harvested for pulpwood in 2006 were soft maple (766,000 cords), hard maple (650,000 cords), spruce (334,000 cords), and balsam fir (288,000 cords) (Fig. 5 and Table 5).
- Production was fairly evenly divided between the three Lake States. Minnesota replaced Wisconsin as the leading producer of pulpwood in the Lake States in 2006 with 2.7 million cords. Wisconsin and Michigan each produced 2.5 million cords of pulpwood in 2006 (Fig. 6).
- Over two-thirds (5.2 million cords) of the pulpwood produced in the Lake States went to pulp mills. The remaining 2.5 million cords of pulpwood produced went to composite products mills (Table 6).

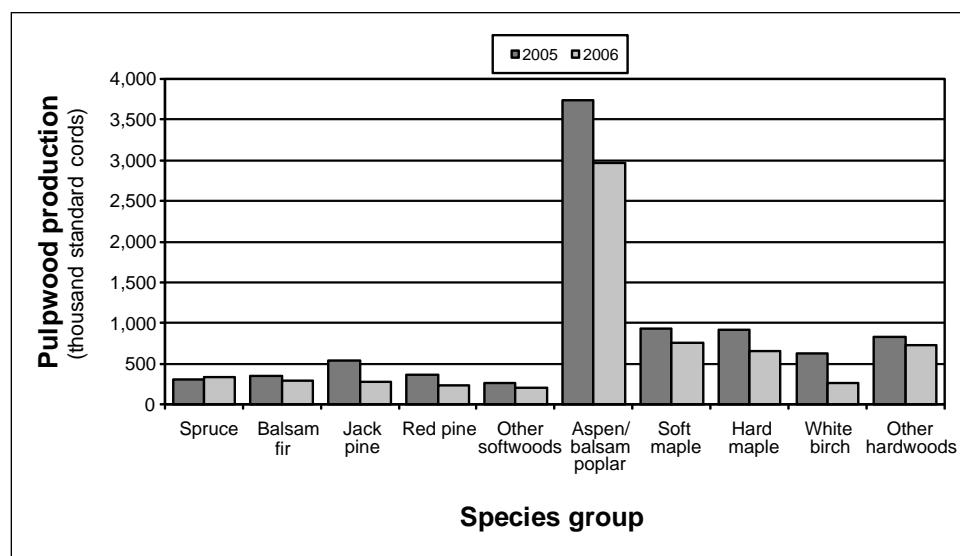

Figure 5.—Pulpwood production from roundwood in the Lake States by species group, 2005 and 2006.

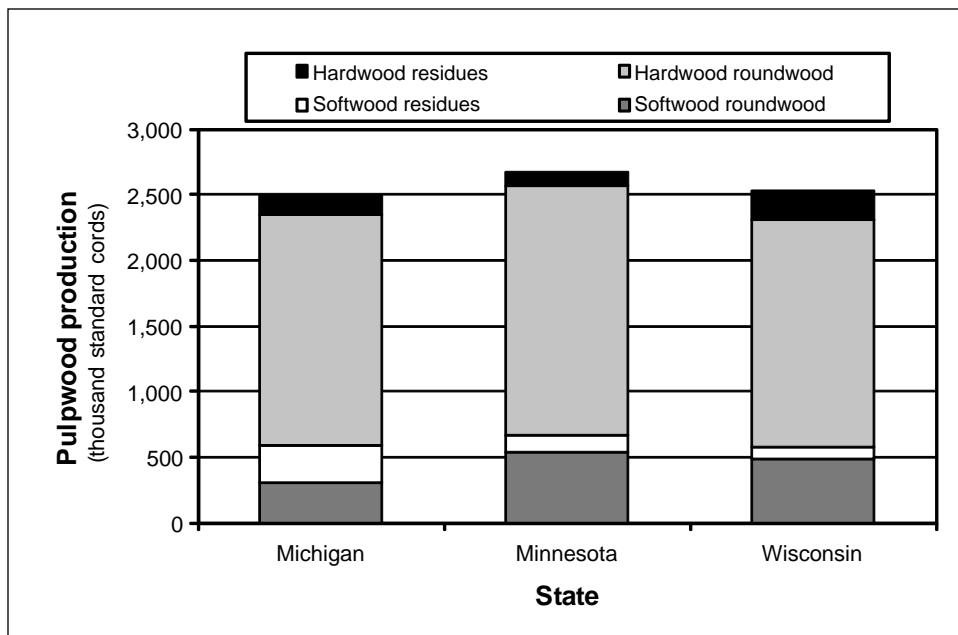

Figure 6.—Pulpwood production in the Lake States by state, softwood and hardwood, and product form, 2006.

- The production of pulpwood decreased by 21 percent for pulp products and 23 percent for composite products between 2005 and 2006 (Fig. 7 and Table 7).

RECEIPTS

- In 2006, 20 pulp and 16 composite products mills in the Lake States acquired 7.8 million cords of pulpwood, a decrease of 24 percent from the year before.

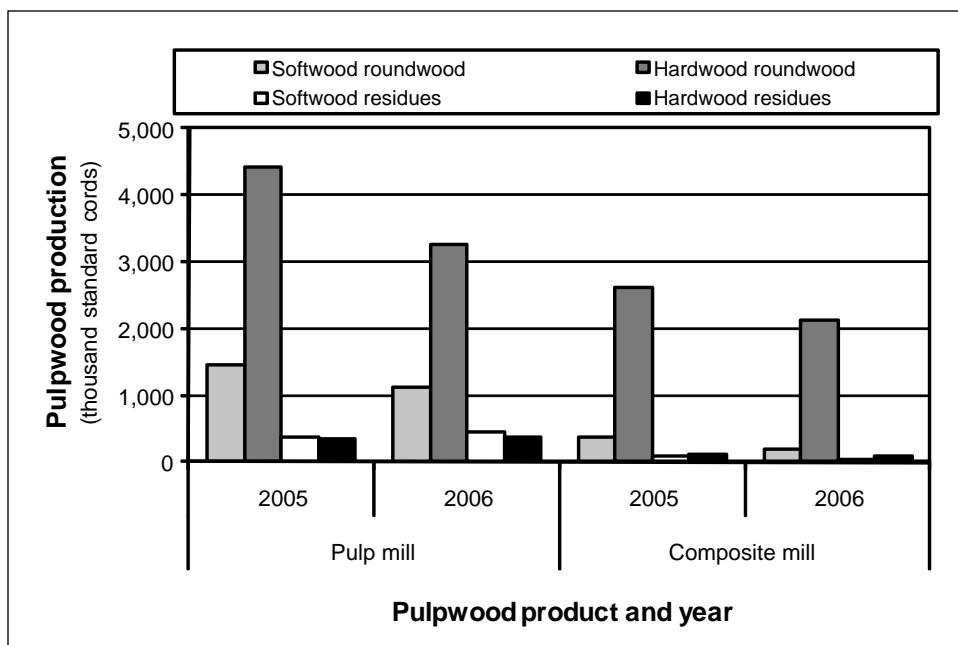

Figure 7.—Pulpwood production in the Lake States by softwood and hardwood, product form, and mill type, 2006.

- Pulpwood mills in Minnesota processed 40 percent of the total receipts in the Lake States; Michigan processed 32 percent; and Wisconsin processed 28 percent.
- Almost 99 percent of the pulpwood produced in the Lake States was processed by mills in the Lake States. Pulpwood produced in the Lake States supplied just over 96 percent of the total wood material required by Lake States mills. Imports of pulpwood material from Canada provided another 3 percent. The remaining 1 percent of the pulpwood imported by Lake States mills came from Illinois, Iowa, and North Dakota.

INDUSTRY TRENDS AND ANALYSIS

- Lake States pulpwood production from roundwood decreased by 24 percent from 2005 to 2006, while pulpwood production from mill residues increased by 4 percent.
- Almost 80 percent of the roundwood harvested for pulpwood in the Lake States occurred in the northern tier of Forest Inventory Units (Eastern Upper Peninsula and Western Upper Peninsula Units of Michigan, Aspen-Birch and Northern Pine Units of Minnesota, and Northeastern and Northwestern Units of Wisconsin) (Tables 8, 9, and 10).
- There were 171 counties in the Lake States that had pulpwood harvesting, with an average of 139 cords of pulpwood harvested per thousand acres of timberland. Forty-five counties had pulpwood harvest levels greater than 150 cords per thousand acres of timberland (Fig. 8).
- Michigan and Wisconsin were hard hit by mill closures in 2005 and 2006. In 2005, idled or closed mills included: GFP Strandwood Corp., Hancock, MI; Menasha Packaging Co., Inc., Otsego, MI; Sappi Fine Paper, Muskegon, MI; Rodman Industries, Marinette, WI; Smart Papers, LLC (Fraser Paper, Inc.), Park Falls, WI; Wausau Paper, Brokaw, WI. In 2006, Georgia-Pacific Corp., Gaylord, MI, and Ainsworth Engineered (USA), LLC, Grand Rapids, MN, were also idled or closed.
- Pulpwood production for the Lake States was expected to decrease again in 2007 as pulp products and composite products markets continued to decline. Three more mills were closed or idled in 2007: Ainsworth Engineered (USA), LLC, Cook, MN; CertainTeed Corp., Shakopee, MN; Trus Joist by Weyerhaeuser, Deerwood, MN.

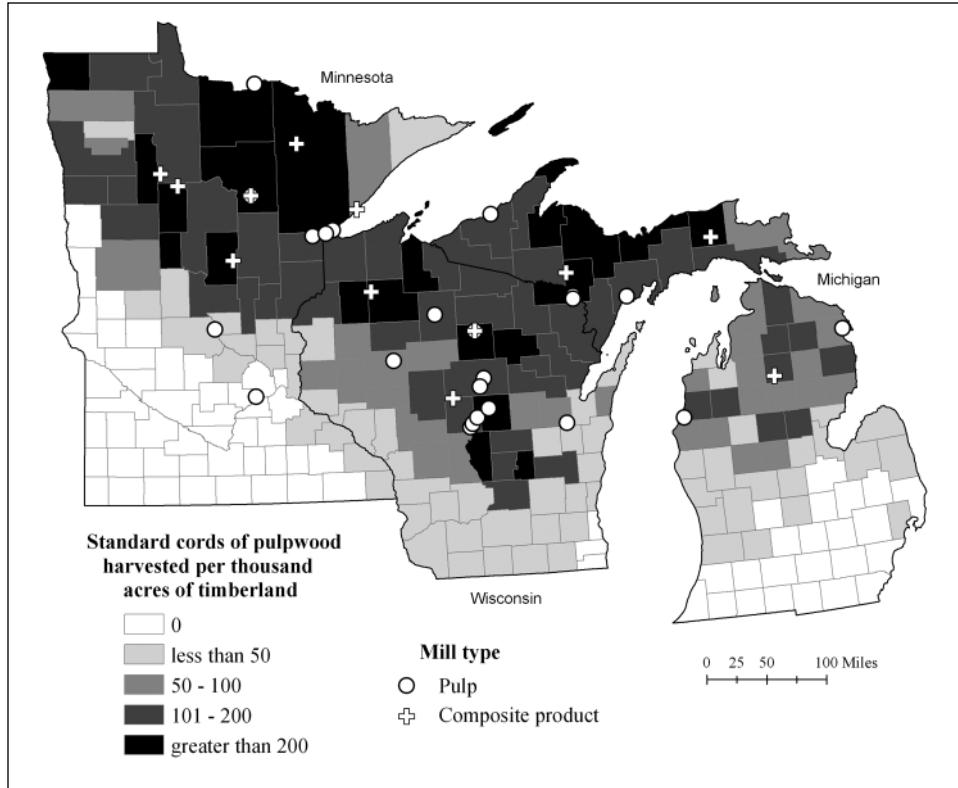

Figure 8.—Standard cords of pulpwood harvested per thousand acres of timberland in the Lake States by county, 2006. Area of timberland is based on U.S. Forest Service Inventory and Analysis data for 2006. Map shows active pulp and composite products mills. See Table 11 for pulpwood mills in the Lake States.

MID-ATLANTIC STATES

PRODUCTION

- Pulpwood production in the Mid-Atlantic States increased 4 percent, from 4.1 million cords in 2005 to 4.2 million cords in 2006. In 2006, 63 percent of the pulpwood produced came from roundwood and 37 percent came from mill residues from other primary wood processors in the Mid-Atlantic States (Table 12).
- Soft maple and yellow-poplar accounted for almost 30 percent of the total volume harvested for pulpwood in the Mid-Atlantic States in 2006, with 397,000 cords and 364,000 cords, respectively. Other important species harvested for pulpwood in 2006 were hard maple (209,000 cords), white oaks (195,000 cords), red oaks (182,000 cords), and white pine (173,000 cords) (Fig. 9 and Table 13).
- Almost one-third (1.4 million cords) of the pulpwood produced in the Mid-Atlantic States came from Pennsylvania. West Virginia was the second largest producer of pulpwood with 1.2 million cords (Fig. 10).

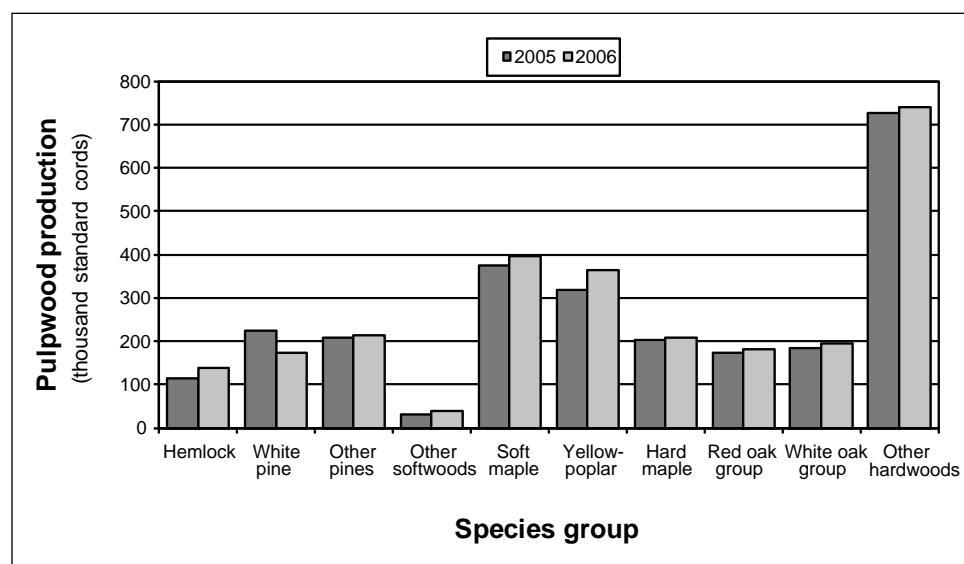

Figure 9.—Pulpwood production in the Mid-Atlantic States by species group, 2005 and 2006.

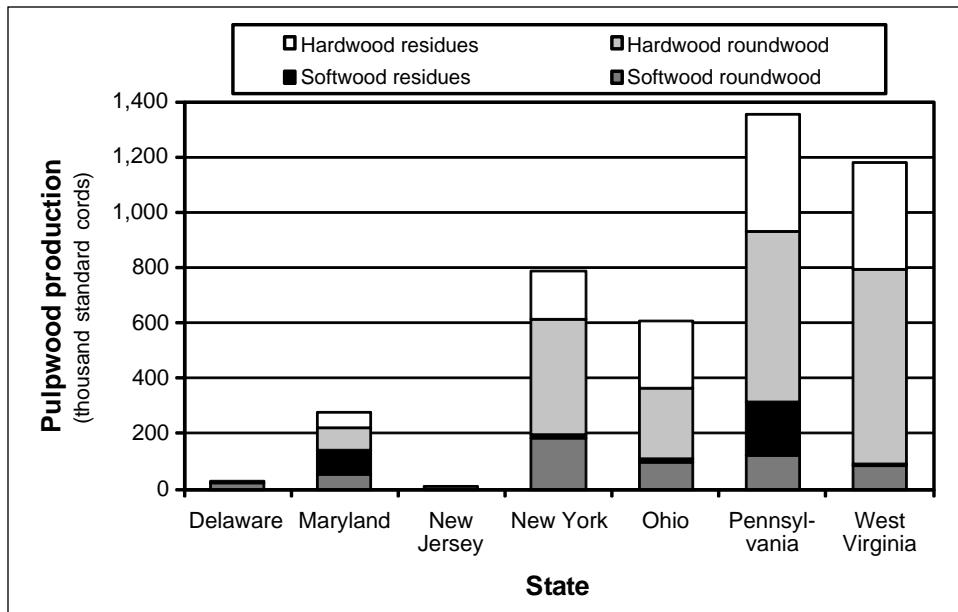

Figure 10.—Pulpwood production in the Mid-Atlantic States by state, softwood and hardwood, and product form, 2006.

- Pulp mills received almost 70 percent (2.9 million cords) of the pulpwood produced in the Mid-Atlantic States. The remaining 1.3 million cords of pulpwood produced went to composite products mills (Table 14).
- The production of pulpwood for composite products increased by 12 percent from 2005 to 2006, while production of pulpwood for pulp products remained at the 2005 level (Fig. 11 and Table 15).

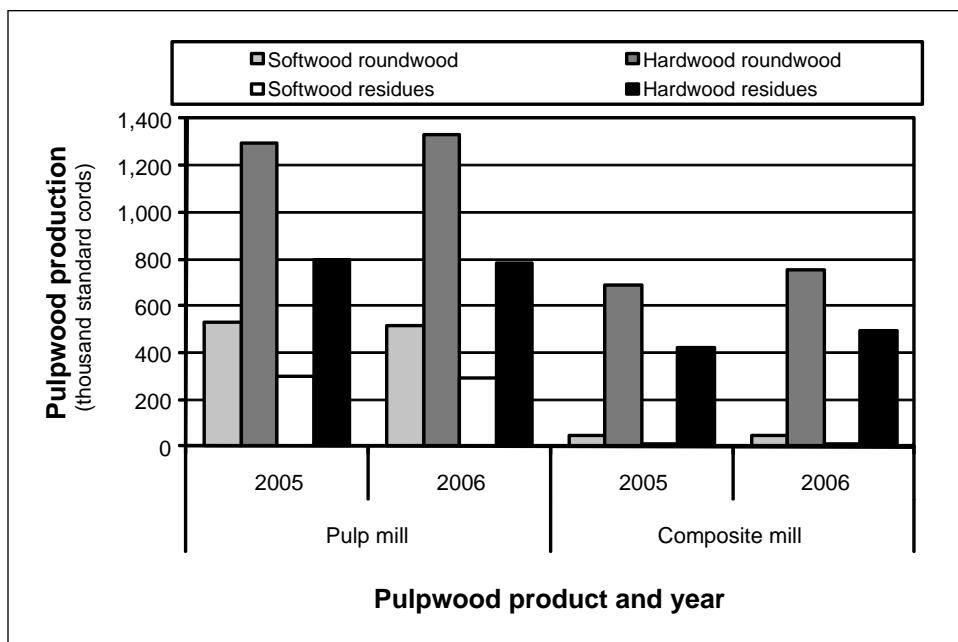

Figure 11.—Pulpwood production in the Mid-Atlantic States by softwood and hardwood, product form, and mill type, 2006.

RECEIPTS

Because of few pulpwood mills in Delaware, Maryland, and New Jersey, detailed receipt information is not reported for the Mid-Atlantic States to avoid disclosure of information from individual mills.

- In 2005, nine wood pulp and 12 composite products mills in the Mid-Atlantic States acquired 4.2 million cords of pulpwood, an increase of 6 percent from the year before.
- Pulpwood mills in Pennsylvania processed more than one-third of the total receipts in the Mid-Atlantic States.
- Eighty-seven percent of the pulpwood produced in the Mid-Atlantic States was processed by mills in the Mid-Atlantic States. Southern States supplied 72 percent, and New England States supplied 24 percent of pulpwood that was imported into the Mid-Atlantic States. The remaining 4 percent of pulpwood imports came from the Central States and Canada.

INDUSTRY TRENDS AND ANALYSIS

- Pulpwood production in the Mid-Atlantic States increased by 4 percent for both roundwood and mill residues.
- Roundwood harvested for pulpwood occurred in 261 of the 320 counties in the Mid-Atlantic States (Tables 16, 17, 18, 19, and 20). One-quarter of the total harvest came from only nine counties: New York—Essex, Franklin, St. Lawrence, and Saratoga counties; Pennsylvania—Clearfield and McKean counties; West Virginia—Greenbrier, Nicholas, and Randolph counties.
- An average of 50 cords of pulpwood was harvested per thousand acres of timberland from the 261 counties in the Mid-Atlantic States that harvested pulpwood in 2006. Thirty-two counties had pulpwood harvest greater than 100 cords per thousand acres of timberland (Fig. 12).
- No pulpwood mills closed in the Mid-Atlantic States in 2005, 2006, or 2007. Since the 2001 pulpwood report for the Northeast (Baker et al. 2005), the International Paper mills in Corinth, NY, and Erie, PA, were closed in 2002.
- A small decrease was expected in 2007 as pulp product and composite product markets continued to decline. Pulpwood mill closings in the New England States will have a minor effect on the production of pulpwood from Mid-Atlantic States.

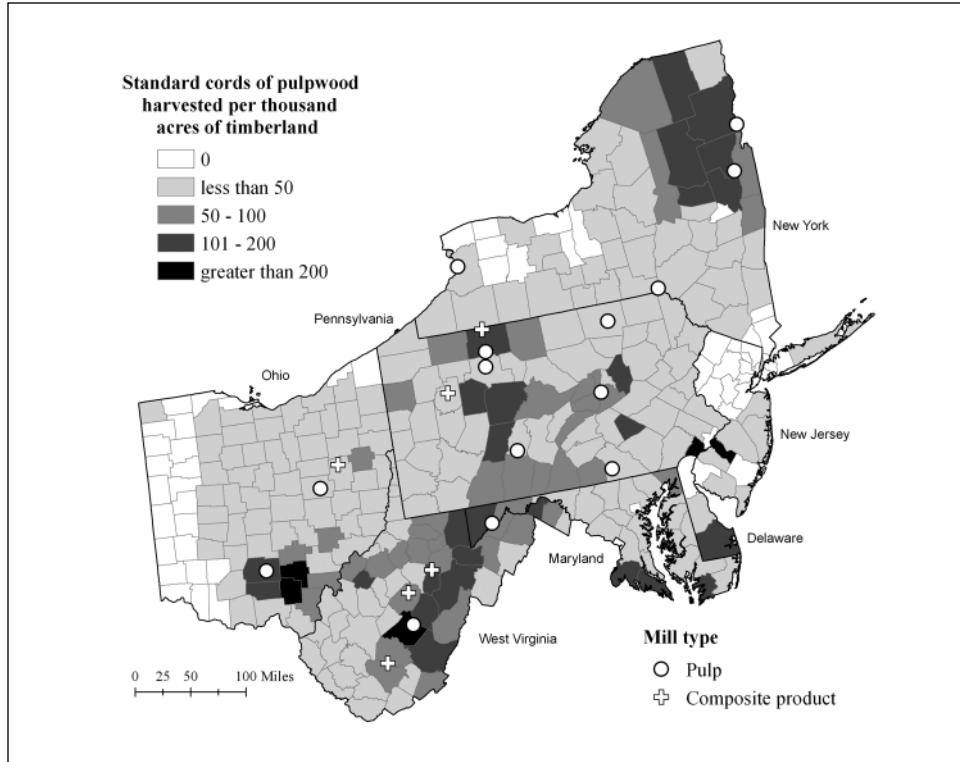

Figure 12.—Standard cords of pulpwood harvested per thousand acres of timberland in the Mid-Atlantic States by county, 2006. Area of timberland is based on U.S. Forest Service Inventory and Analysis data for 2006. Map shows active pulp and composite products mills. See Table 21 for pulpwood mills in the Mid-Atlantic States.

NEW ENGLAND STATES

PRODUCTION

- There were 4.1 million cords of pulpwood produced in the New England States in 2006. Eighty-five percent of the pulpwood produced came from roundwood and 15 percent came from mill residues from other primary wood processors in the New England States (Table 22).
- Soft maple and spruce, collectively, accounted for almost 30 percent of the total volume harvested for pulpwood in the New England States in 2006, with 557,000 cords and 465,000 cords, respectively. Other important species harvested for pulpwood in 2006 were aspen/balsam poplar (406,000 cords), hard maple (369,000 cords), and hemlock (313,000 cords) (Fig. 13 and Table 25).
- Eighty-four percent (3.5 million cords) of the pulpwood produced in the New England States came from Maine. New Hampshire produced 10 percent of the pulpwood, Vermont produced 5 percent, and Connecticut, Massachusetts, and Rhode Island collectively produced 1 percent (Fig. 14).

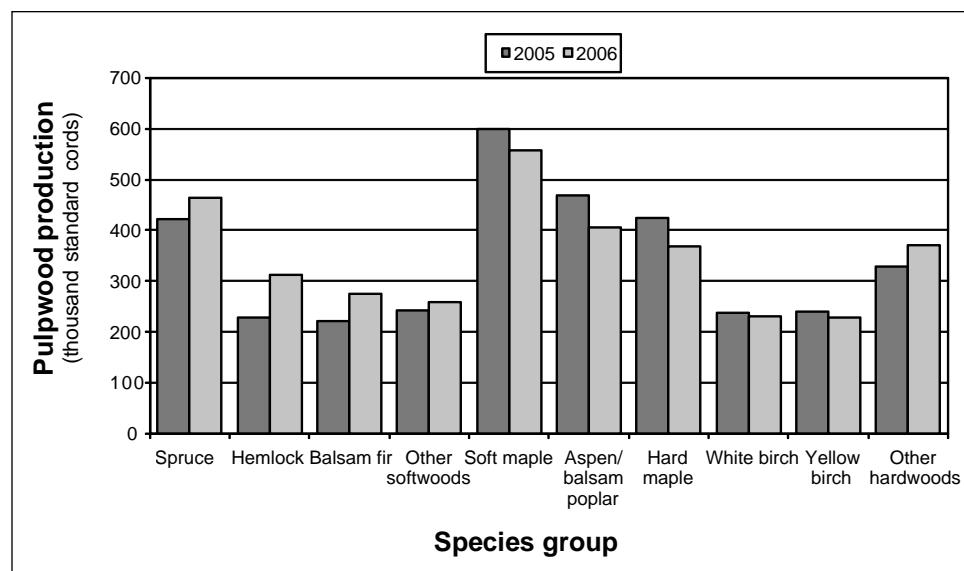

Figure 13.—Pulpwood production in the New England States by species group, 2005 and 2006.

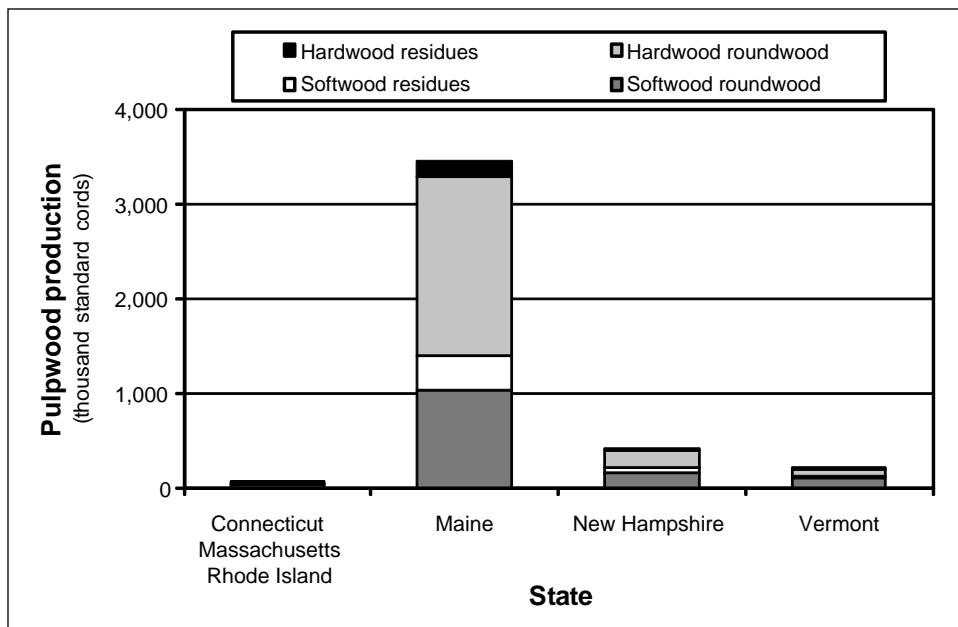

Figure 14.—Pulpwood production in the New England States by state, softwood and hardwood, and product form, 2006.

- In 2006, 96 percent (3.9 million cords) of the pulpwood produced in the New England States went to pulp mills. The remaining 166,000 cords went to composite products mills (Table 24).
- From 2005 to 2006, the production of pulpwood for pulp products decreased by 2 percent for pulp products and decreased by 15 percent for composite products (Fig. 15 and Table 25).

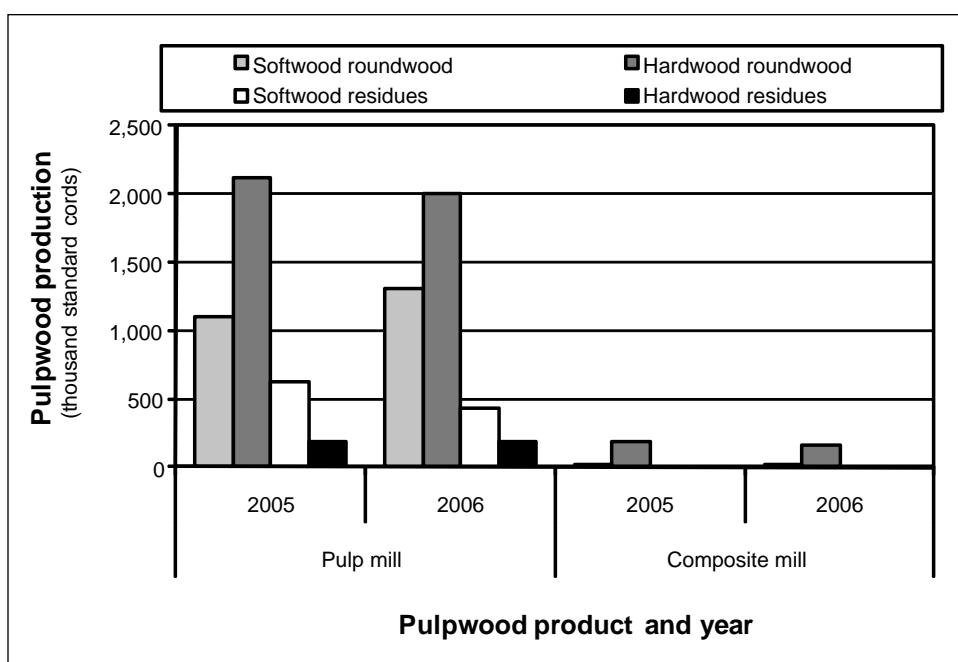

Figure 15.—Pulpwood production in the New England States by softwood and hardwood, product form, and mill type, 2006.

RECEIPTS

Because of the few pulpwood mills in Connecticut, Massachusetts, New Hampshire, Rhode Island, and Vermont, detailed receipt information is not reported for the New England States to avoid disclosure of information from individual mills.

- In 2006, 11 wood pulp and two composite products mills in the New England States acquired 4.4 million cords of pulpwood, a decrease of 6 percent from the year before.
- Pulp mills in Maine received 89 percent of the total volume processed by the mills in the Region.
- Eighty-three percent of the pulpwood produced in the New England States was processed by mills in the region. All but a small fraction of the wood imported for pulpwood came from Canada. Less than 1 percent of the imported pulpwood came from the Mid-Atlantic States.

INDUSTRY TRENDS AND ANALYSIS

- Pulpwood production in the New England States decreased by 3 percent from 2005 to 2006. The 1 percent increase in pulpwood production from roundwood (3.4 million cords in 2005 to 3.5 million cords in 2006) was offset by a more than 20 percent decrease in pulpwood production from mill residues (805,000 cords in 2005 to 623,000 cords in 2006).
- Roundwood harvested for pulpwood occurred in 58 of the 67 counties in the New England States (Tables 26, 27, and 28). More than half of the total harvest came from only five counties in Maine: Somerset, Aroostook, Penobscot, Oxford, and Piscataquis.
- An average of 108 cords of pulpwood was harvested per thousand acres of timberland from the 58 counties in the New England States that harvested pulpwood in 2006. Twelve counties had pulpwood harvest greater than 150 cords per thousand acres of timberland (Fig. 16).
- Three pulp mills in the New England States closed in 2005 and 2006: Groveton Paperboard, Inc., Groveton, NH, in 2005; Fraser Paper, Berlin, NH, and Georgia-Pacific, Old Town, ME, in 2006. The Georgia-Pacific mill at Old Town, ME, was purchased and re-opened by Red Shield in 2007.

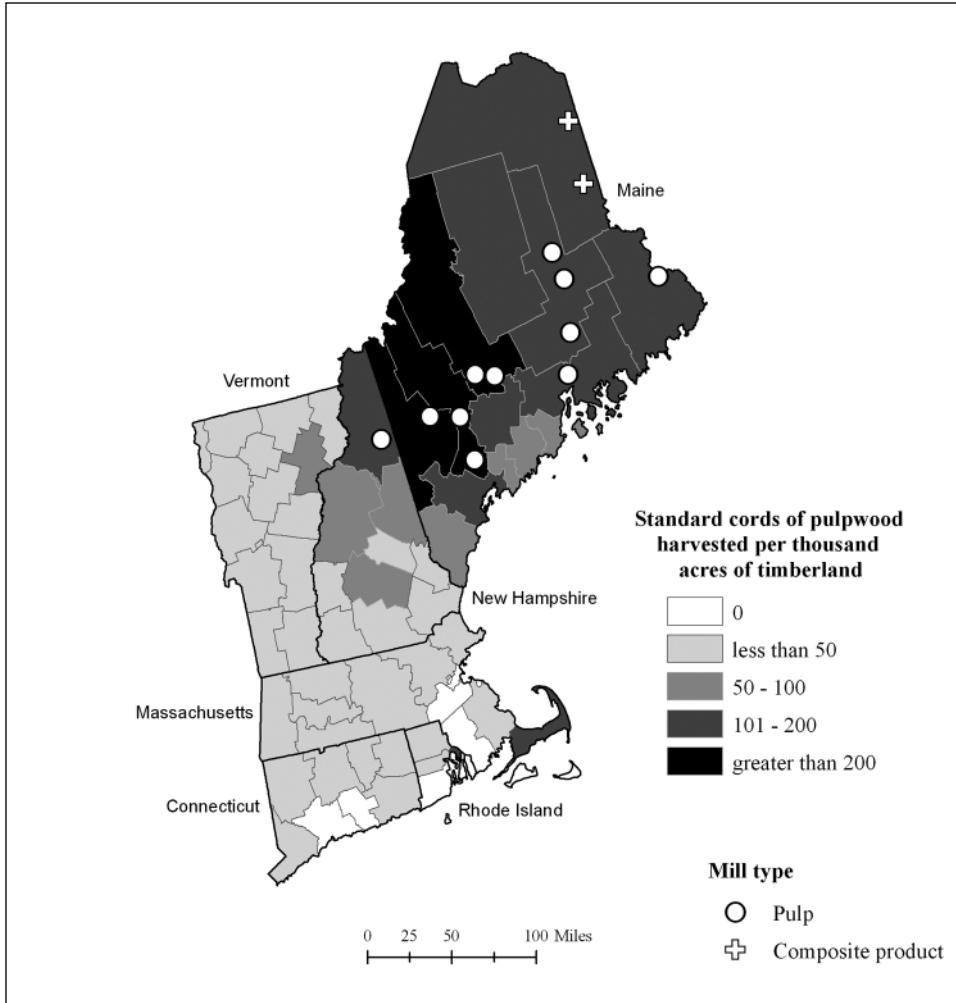

Figure 16.—Standard cords of pulpwood harvested per thousand acres of timberland in the New England States by county, 2006. Area of timberland is based on U.S. Forest Service Inventory and Analysis data for 2006. Map shows active pulp and composite products mills. See Table 29 for pulpwood mills in the New England States.

- A small decrease in pulpwood production was expected in 2007 as pulp product and composite product markets continued to decline. The Fraser Paper (Berlin, NH) mill, which did run for a few months in 2006, will have no production in 2007.

PLAINS STATES

Because of few pulpwood mills in the Plains States, detailed production and receipts are not reported to avoid disclosure of information about individual mill receipts.

PRODUCTION

- In 2006, the Plains States produced 84 thousand cords of roundwood and mill residues for pulpwood production, a decrease of 26 percent from 2005 (Fig. 17).
- Residues accounted for 85 percent of the total pulpwood produced in the Plains States in 2006. Roundwood accounted for 15 percent of the total pulpwood produced, with ponderosa pine, aspen, and cottonwood being the only species harvested (Fig. 18).
- The only mill in the Plains States in 2006 was Merillat Corporation, LLC, (particleboard), in Rapid City, SD, which had an annual production capacity of 95 million square feet, ¾-inch basis.

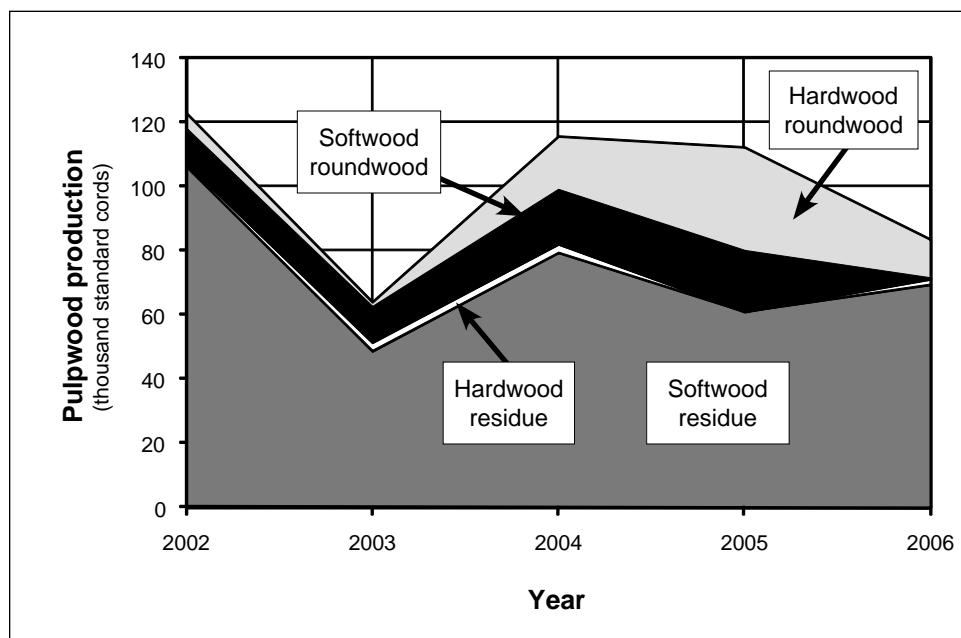

Figure 17.—Pulpwood production in the Plains States by softwood and hardwood, product form, 2002-2006.

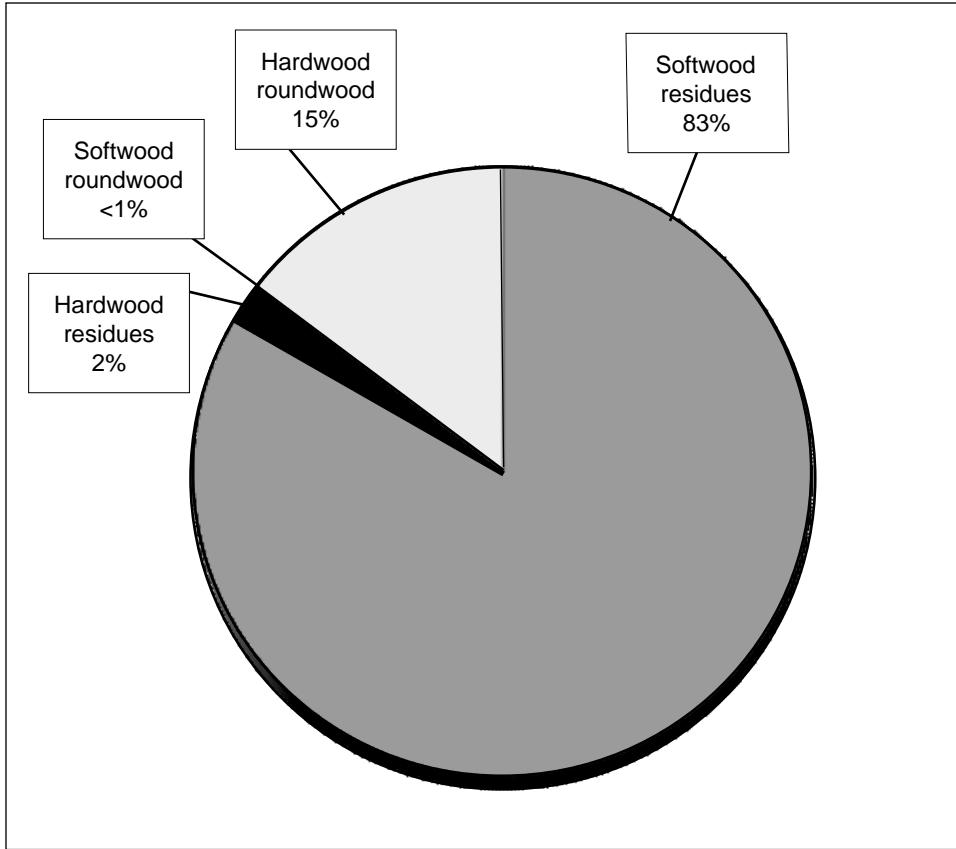

Figure 18.—Pulpwood production in the Plains States by softwood and hardwood, product form, 2006.

APPENDIX I

DEFINITION OF TERMS

Composite products. Products manufactured from chips, wafers, strands, flakes, shavings, or sawdust and then reconstituted into a variety of panel and engineered lumber products. These products include engineered strand lumber, hardboard, medium density fiberboard, oriented strand board, and particleboard.

Consumption. The quantity of a commodity, such as pulpwood, utilized by a particular mill or group of mills. See Pulpwood receipts.

Cord. All references to cords are in standard cords. See definition of standard cord.

Exports. The volume of domestic roundwood utilized by mills outside a state or Region where timber was cut or mill residues were produced.

Forest land. Land at least 10 percent stocked by forest trees of any size, or formerly having had such tree cover, and not currently developed for nonforest use. (Note: Stocking is measured by comparing specified standards with basal area and/or number of trees, age or size, and spacing.) The minimum area for classification of forest land is 1 acre. Roadside, streamside, and shelterbelt strips of timber must have a crown width of at least 120 feet to qualify as forest land. Unimproved roads and trails, streams or other bodies of water, or clearings in forest areas shall be classed as forest if less than 120 feet wide.

Growing-stock removals. The growing-stock volume removed from the timberland inventory by harvesting roundwood products. (Note: Includes sawtimber removals, poletimber removals, and logging residues.)

Growing-stock tree. A live timberland tree of commercial species that meets specified standards of size, quality, and merchantability. (Note: Excludes rough, rotten, and dead trees.)

Growing-stock volume. Net volume of growing-stock trees 5.0 inches d.b.h. and over, from 1 foot above the ground to a minimum 4.0-inch top diameter outside bark of the central stem or to the point where the central stem breaks into limbs.

Hardwoods. Dicotyledonous trees, usually broad-leaved and deciduous.

- a) **Hard hardwoods.** Hardwood species that have wood with an average specific gravity greater than 0.50.
- b) **Soft hardwoods.** Hardwood species that have wood with an average specific gravity 0.50 or less.

Harvest residues. The total net volume of unused portions of trees cut or killed by logging. (Note: Includes both logging residues and logging slash.)

Imports. The volume of domestic roundwood or mill residues delivered to a mill or group of mills in a specific state or Region but harvested outside the state or Region.

Primary wood processor. Mill receiving roundwood or chips from roundwood for processing into products such as lumber, veneer, pulp, etc.

Primary wood processing residue. Wood materials (coarse and fine) and bark generated at manufacturing plants that process roundwood into principal products. These residues include wood products (byproducts) obtained incidental to production of principal products and wood materials not utilized for some product.

- a) **Coarse mill residue.** Wood residue suitable for chipping such as slabs, edgings, and veneer cores.
- b) **Fine mill residue.** Wood residue not suitable for chipping such as sawdust and veneer clippings.

Product form. The type of wood material used in the production of pulpwood products. See Roundwood and Primary wood processing residue.

Pulpwood. Roundwood (includes roundwood that is chipped) and primary wood processing residues that will be reduced to individual wood fibers, fiber bundles, chips, or particles by chemical or mechanical means used to make a broad generic group of products that include pulp and composite products.

Pulpwood production. The volume of roundwood harvested, plus the wood residue volume produced by sawmills, veneer mills, etc. within a state or region and used for pulp, particleboard, waferboard, oriented strandboard, medium density fiberboard, or engineered lumber, regardless of where it is consumed.

Pulpwood receipts. The quantity or volume of roundwood and primary wood processing residues received at a mill or by a group of mills in a state or region, regardless of geographic source. Volume of roundwood receipts is equal to the volume of roundwood retained in a state or region plus roundwood imported from other states or regions.

Residue. See Primary wood processing residue.

Retained. Roundwood and primary wood processing residue volume harvested from and processed by mills within the same state or region.

Roundwood. Any primary use of a tree (includes trees harvested and chipped) for use as industrial products such as saw logs, pulpwood, or veneer logs, intended to be processed into primary wood products such as lumber, wood pulp, or sheathing, at primary wood processor.

Roundwood production. The total volume of known roundwood harvested within a state or region, regardless of where it is consumed. Roundwood production is the sum of timber harvested and used within a state or region and all roundwood exported to other states or Regions.

Softwoods. Coniferous trees, usually evergreen, having needles or scale-like leaves.

Standard cord. A unit of measure applied to roundwood, usually bolts or split wood. It is a stack of wood 4 feet high, 4 feet wide, and 8 feet long encompassing 128 cubic feet of wood, bark, and air space. The Northern Region estimates 79 cubic feet of wood per cord for pulpwood in the Central States, Lake States, and Plains States, and 85 cubic feet of wood per cord for pulpwood in the Mid-Atlantic States and New England States.

Timber product output. The volume of roundwood products produced from an area's forests plus the volume of byproduct recovered from mill residues.

Timberland. Forest land that is producing, or is capable of producing, in excess of 20 cubic feet per acre per year of roundwood products under natural conditions, is not withdrawn from timber utilization by statute or administrative regulation, and is not associated with urban or rural development.

Tree. A woody plant usually having one or more perennial stems, a more or less definitely formed crown of foliage, and a height of at least 12 feet at maturity.

APPENDIX II

COMMON AND SCIENTIFIC NAMES OF TREE SPECIES WITHIN SPECIES GROUPS MENTIONED IN THIS REPORT

SOFTWOODS

Cedars

Atlantic white-cedar	<i>Chamaecyparis thyoides</i>
Rocky Mountain juniper	<i>Juniperus scopulorum</i>
Eastern redcedar	<i>Juniperus virginiana</i>
Northern white-cedar	<i>Thuja occidentalis</i>

Balsam fir

Eastern hemlock

Tamarack

Jack pine

Shortleaf pine

Loblolly pine

Ponderosa pine

Red pine

White pine

Other pines

Table Mountain pine

Pitch pine

Pond pine

Scotch pine

Virginia pine

Austrian pine

Spruce

Norway spruce

White spruce

Black spruce

Blue spruce

Red spruce

HARDWOODS

Ash

White ash	<i>Fraxinus americana</i>
Black ash	<i>Fraxinus nigra</i>
Green ash	<i>Fraxinus pennsylvanica</i>
Pumpkin ash	<i>Fraxinus profunda</i>
Blue ash	<i>Fraxinus quadrangulata</i>

Aspen/balsam poplar	
Balsam poplar	<i>Populus balsamifera</i>
Bigtooth aspen	<i>Populus grandidentata</i>
Quaking aspen	<i>Populus tremuloides</i>
Basswood	
American basswood	<i>Tilia americana</i>
White basswood	<i>Tilia americana</i> var. <i>heterophylla</i>
American beech	<i>Fagus grandifolia</i>
Yellow birch	<i>Betula alleghaniensis</i>
White birch	<i>Betula papyrifera</i>
Other birches	
Sweet birch	<i>Betula lenta</i>
River birch	<i>Betula nigra</i>
Gray birch	<i>Betula populifolia</i>
Black cherry	<i>Prunus serotina</i>
Black walnut	<i>Juglans nigra</i>
Cottonwood	
Eastern cottonwood	<i>Populus deltoides</i>
Swamp cottonwood	<i>Populus heterophylla</i>
Elm	
Winged elm	<i>Ulmus alata</i>
American elm	<i>Ulmus americana</i>
Siberian elm	<i>Ulmus pumila</i>
Slippery elm	<i>Ulmus rubra</i>
Rock elm	<i>Ulmus thomasii</i>
Hickory	
Mockernut hickory	<i>Carya alba</i>
Water hickory	<i>Carya aquatica</i>
Bitternut hickory	<i>Carya cordiformis</i>
Pignut hickory	<i>Carya glabra</i>
Pecan	<i>Carya illinoiensis</i>
Shellbark hickory	<i>Carya laciniosa</i>
Shagbark hickory	<i>Carya ovata</i>
Black hickory	<i>Carya texana</i>
Hard maples	
Black maple	<i>Acer nigrum</i>
Norway maple	<i>Acer platanoides</i>
Sugar maple	<i>Acer saccharum</i>
Soft maples	
Boxelder	<i>Acer negundo</i>
Red maple	<i>Acer rubrum</i>
Silver maple	<i>Acer saccharinum</i>
Red oak group	
Scarlet oak	<i>Quercus coccinea</i>
Northern pin oak	<i>Quercus ellipsoidalis</i>
Southern red oak	<i>Quercus falcata</i>
Shingle oak	<i>Quercus imbricaria</i>
Blackjack oak	<i>Quercus marilandica</i>
Water oak	<i>Quercus nigra</i>
Cherrybark oak	<i>Quercus pagoda</i>

Pin oak	<i>Quercus palustris</i>
Willow oak	<i>Quercus phellos</i>
Northern red oak	<i>Quercus rubra</i>
Shumard oak	<i>Quercus shumardii</i>
Black oak	<i>Quercus velutina</i>
White oak group	
White oak	<i>Quercus alba</i>
Swamp white oak	<i>Quercus bicolor</i>
Overcup oak	<i>Quercus lyrata</i>
Bur oak	<i>Quercus macrocarpa</i>
Swamp chestnut oak	<i>Quercus michauxii</i>
Chinkapin oak	<i>Quercus muehlenbergii</i>
Chestnut oak	<i>Quercus prinus</i>
Post oak	<i>Quercus stellata</i>
Sweetgum	<i>Liquidambar styraciflua</i>
American sycamore	<i>Platanus occidentalis</i>
Tupelo/gum	
Water tupelo	<i>Nyssa aquatica</i>
Swamp tupelo	<i>Nyssa biflora</i>
Blackgum	<i>Nyssa sylvatica</i>
Yellow-poplar	<i>Liriodendron tulipifera</i>
Other hardwoods	
Ohio buckeye	<i>Aesculus glabra</i>
Northern catalpa	<i>Catalpa speciosa</i>
Sugarberry	<i>Celtis laevigata</i>
Hackberry	<i>Celtis occidentalis</i>
Flowering dogwood	<i>Cornus florida</i>
Common persimmon	<i>Diospyros virginiana</i>
Waterlocust	<i>Gleditsia aquatica</i>
Honeylocust	<i>Gleditsia triacanthos</i>
Kentucky coffeetree	<i>Gymnocladus dioicus</i>
American holly	<i>Ilex opaca</i>
Butternut	<i>Juglans cinerea</i>
Cucumbertree	<i>Magnolia acuminata</i>
White mulberry	<i>Morus alba</i>
Red mulberry	<i>Morus rubra</i>
Paulownia or empress-tree	<i>Paulownia tomentosa</i>
Pin cherry	<i>Prunus pensylvanica</i>
Chokecherry	<i>Prunus virginiana</i>
Black locust	<i>Robinia pseudoacacia</i>
White willow	<i>Salix alba</i>
Black willow	<i>Salix nigra</i>
Weeping willow	<i>Salix sepulcralis</i>
Sassafras	<i>Sassafras albidum</i>

APPENDIX III

CONVERSION FACTORS USED IN THE NORTHERN REGION

Standard cords of roundwood per green ton:

(green tons x factor = standard cords)

Species	Factor	Species	Factor
Softwoods	0.4688	White birch	0.4018
Northern white-cedar	.6329	Yellow birch	.3723
Balsam fir	.4688	River birch	.3871
Hemlock	.4150	Sweetgum	.3669
Jack pine	.4688	Yellow-poplar	.4219
Red pine	.4688	Blackgum	.3779
White pine	.4777	Sycamore	.4083
Shortleaf pine	.3956	Cottonwood	.4291
Spruce	.5014	Elm	.4018
Tamarack	.4291	Hickory	.3701
Hardwoods	.3939	Hard maple	.3617
Soft hardwoods	.4171	Soft maple	.4083
Hard hardwoods	.3708	Black cherry	.4688
Ash	.4330	Red oak	.3444
Aspen	.4291	White oak	.3723
Balsam poplar	.4083	Black oak	.3444
Basswood	.5167	Other hardwoods	.4777
Beech	.3956		

LIST OF TABLES

Table 1.—Production and imports of pulpwood in standard cords, unpeeled,
Central States, 2006

Table 2.—Central States pulpwood production in standard cords, unpeeled,
by product form and species group, 2002-2006

Table 3.—Average daily production of active wood-pulp by company, location,
and type of pulp produced, Central States, 2006

Table 4.—Production and imports of pulpwood in standard cords, unpeeled,
Lake States, 2006

Table 5.—Lake States pulpwood production in thousand standard cords,
unpeeled, from roundwood by state and species group, 2002-2006

Table 6.—Pulpwood production in standard cords, unpeeled, by mill type,
product form, state of origin, and species group, Lake States, 2006

Table 7.—Pulpwood production in standard cords, unpeeled, by mill type,
product form, species group, and percent change, Lake States,
2005 and 2006

Table 8.—Pulpwood production in standard cords, unpeeled, from roundwood
by Forest Inventory Unit, county, and species group, Michigan, 2006

Table 9.—Pulpwood production in standard cords, unpeeled, from roundwood
by Forest Inventory Unit, county, and species group, Minnesota, 2006

Table 10.—Pulpwood production in standard cords, unpeeled, from roundwood
by Forest Inventory Unit, county, and species group, Wisconsin, 2006

Table 11.—Average production of active wood-pulp and composite product mills
by company, location, and type of product produced, Lake States,
2006

Table 12.—Production and imports of pulpwood in standard cords, unpeeled,
Mid-Atlantic States, 2006

Table 13.—Mid-Atlantic States pulpwood production in thousand standard cords,
unpeeled, from roundwood by state and species group, 2001-2006

Table 14.—Pulpwood production in standard cords, unpeeled, by mill type,
product form, state of origin, and species group, Mid-Atlantic States,
2006

Table 15.—Pulpwood production in standard cords, unpeeled, by mill type,
product form, species group, and percent change, Mid-Atlantic
States, 2005 and 2006

Table 16.—Pulpwood production in standard cords, unpeeled, from roundwood
by state, Forest Inventory Unit, county, and species group, Delaware,
Maryland, and New Jersey, 2006

Table 17.—Pulpwood production in standard cords, unpeeled, from roundwood
by Forest Inventory Unit, county, and species group, New York, 2006

Table 18.—Pulpwood production in standard cords, unpeeled, from roundwood
by Forest Inventory Unit, county, and species group, Ohio, 2006

Table 19.—Pulpwood production in standard cords, unpeeled, from roundwood
by Forest Inventory Unit, county, and species group, Pennsylvania,
2006

Table 20.—Pulpwood production in standard cords, unpeeled, from roundwood
by Forest Inventory Unit, county, and species group, West Virginia,
2006

Table 21.—Average production of active wood-pulp and composite product mills
by company, location, and type of product produced, Mid-Atlantic
States, 2006

Table 22.—Production and imports of pulpwood in standard cords, unpeeled,
New England States, 2006

Table 23.—New England States pulpwood production in thousand standard
cords, unpeeled, from roundwood by state and species group,
2001-2006

Table 24.—Pulpwood production in standard cords, unpeeled, by mill type, product form, state of origin, and species group, New England States, 2006

Table 25.—Pulpwood production in standard cords, unpeeled, by mill type, product form, species group, and percent change, New England States, 2005 and 2006

Table 26.—Pulpwood production in standard cords, unpeeled, from roundwood by state, county, and species group, Connecticut, Massachusetts, and Rhode Island, 2006

Table 27.—Pulpwood production in standard cords, unpeeled, from roundwood by county and species group, Maine, 2006

Table 28.—Pulpwood production in standard cords, unpeeled, from roundwood by state, Forest Inventory Unit, county, and species group, New Hampshire and Vermont, 2006

Table 29.—Average production of active wood-pulp and composite product mills by company, location, and type of product produced, New England States, 2006

Table 30.—Other mills using Northern Region pulpwood in 2006 by company, location, and type of product produced

^a Includes only those counties that supplied pulpwood in 2006.

All table cells without observations are indicated by -- . Table value of 0 indicates the volume rounds to less than 1 standard cord, unpeeled.
Columns and rows may not add to their totals due to rounding.

Table 9.—Pulpwood production in standard cords, unpeeled, from roundwood by Forest Inventory Unit, county, and species group, Minnesota, 2006

^a Includes only those counties that supplied pulpwood in 2006.

All table cells without observations are indicated by -- . Table value of 0 indicates the volume rounds to less than 1 standard cord, unpeeled.
Columns and rows may not add to their totals due to rounding.

Table 10.—Pulpwood production in standard cords, unpeeled, from roundwood by Forest Inventory Unit, county, and species group, Wisconsin, 2006

^a Includes only those counties that supplied pulpwood in 2006.

All table cells without observations are indicated by --. Table value of 0 indicates the volume rounds to less than 1 standard cord, unpeeled.

Columns and rows may not add to their totals due to rounding.

Table 11.—Average production of active wood-pulp and composite product mills by company, location, and type of product produced, Lake States, 2006

Product and company	Location	Product produced	Average production
Pulp mills			
New Page Corp.	Escanaba, MI	Kraft/groundwood pulp	1,125 tons pulp/day
Packaging Corp. Of America	Filer City, MI	Semicchemical pulp	361 tons pulp/day
Smurfit-Stone Container Corp.	Ontonagon, MI	Semicchemical pulp	751 tons pulp/day
Verso Paper	Quinnsec, MI	Kraft pulp	1,250 tons pulp/day
Boise White Paper, LLC.	International Falls, MN	Kraft pulp	1,150 tons pulp/day
CertainTeed Corp.	Shakopee, MN	Groundwood/mechanical pulp	310 tons pulp/day
Sappi, LLC	Cloquet, MN	Kraft pulp	1,400 tons pulp/day
Stora Enso North America	Proctor, MN	Groundwood/mechanical pulp	325 tons pulp/day
UPM - Blandin	Grand Rapids, MN	Groundwood/mechanical pulp	475 tons pulp/day
Verso Paper	Sartell, MN	Thermomechanical pulp	850 tons pulp/day
Domtar Industries, Inc.	Nekoosa, WI	Kraft pulp	495 tons pulp/day
Domtar Industries, Inc.	Port Edwards, WI	Sulfite pulp	255 tons pulp/day
Mule-Hide Manufacturing	Cornell, WI	Thermomechanical pulp	130 tons pulp/day
Packaging Corp. Of America	Tomahawk, WI	Semicchemical pulpw	1,350 tons pulp/day
Stora Enso North America	Biron, WI	Groundwood/mechanical pulp	400 tons pulp/day
Stora Enso North America	Niagara, WI	Groundwood/mechanical pulp	250 tons pulp/day
Stora Enso North America	Stevens Point, WI	Thermomechanical pulp	200 tons pulp/day
Thilmany, LLC	Kaukauna, WI	Kraft pulp	400 tons pulp/day
Wausau Mosinee Paper	Mosinee, WI	Kraft pulp	212 tons pulp/day
Weyerhaeuser Co.	Rothschild, WI	Sulfite pulp	160 tons pulp/day

Composite product mills

Decorative Panels International, Inc.	Alpena, MI	Hardboard	120 million ft ² , 3/4-inch basis per year
Louisiana-Pacific Corp.	Newberry, MI	Oriented strand board	72 million ft ² , 3/4-inch basis per year
Louisiana-Pacific Corp.	Sagola, MI	Oriented strand board	201 million ft ² , 3/4-inch basis per year
Weyerhaeuser Co.	Grayling, MI	Oriented strand board	250 million ft ² , 3/4-inch basis per year
Ainsworth Engineered (USA), LLC	Bemidji, MN	Oriented strand board	234 million ft ² , 3/4-inch basis per year
Ainsworth Engineered (USA), LLC	Cook, MN	Oriented strand board	159 million ft ² , 3/4-inch basis per year
Ainsworth Engineered (USA), LLC	Grand Rapids, MN	Oriented strand board	97 million ft ² , 3/4-inch basis per year
Georgia-Pacific Corp.	Duluth, MN	Hardboard	220 million ft ² , 3/4-inch basis per year
International Bildrite, Inc.	International Falls, MN	Medium density fiberboard	59 million ft ² , 3/4-inch basis per year
Louisiana-Pacific Corp.	Two Harbors, MN	Oriented strand board	75 million ft ² , 3/4-inch basis per year
Norbord Minnesota	Solway, MN	Oriented strand board	456 million ft ² , 3/4-inch basis per year
Trus Joist by Weyerhaeuser	Deerwood, MN	Engineered wood product	na
Georgia-Pacific Corp., LLC	Phillips, WI	Hardboard	85 million ft ² , 3/4-inch basis per year
Louisiana-Pacific Corp.	Hayward, WI	Oriented strand board	210 million ft ² , 3/4-inch basis per year
Louisiana-Pacific Corp.	Tomahawk, WI	Oriented strand board	66 million ft ² , 3/4-inch basis per year
Marshfield Doorsystems, Inc.	Marshfield, WI	Particleboard	79 million ft ² , 3/4-inch basis per year

^a Vertical columns of figures under the box heading "Production by State" present the amount of roundwood cut or residue generated in each state.

All table cells without observations are indicated by --. Table value of 0 indicates the volume rounds to less than 1 standard cord, unpeeled. Columns and rows may not add to their totals due to rounding.

^a Includes only those counties that supplied pulpwood in 2006.

All table cells without observations are indicated by --. Table value of 0 indicates the volume rounds to less than 1 standard cord, unpeeled.

Columns and rows may not add to their totals due to rounding.

Table 19.—Pulpwood production in standard cords, unpeeled, from roundwood by Forest Inventory Unit, county, and species group, Pennsylvania, 2006

^a Includes only those counties that supplied pulpwood in 2006.
All table cells without observations are indicated by --. Table value of 0 indicates the volume rounds to less than 1 standard cord, unpeeled.

Columns and rows may not add to their totals due to rounding.

Table 20.—Pulpwood production in standard cords, unpeeled, from roundwood by Forest Inventory Unit, county, and species group, West Virginia, 2006

^a Includes only those counties that supplied pulpwood in 2006.

All table cells without observations are indicated by --. Table value of 0 indicates the volume rounds to less than 1 standard cord, unpeeled.

Columns and rows may not add to their totals due to rounding.

Table 21.—Average production of active wood-pulp and composite product mills by company, location, and type of product produced, Mid-Atlantic States, 2006

Product and company Pulp mills	Location	Product produced	Average production
Luke Paper Co., Newpage Corp.	Luke, MD	Kraft pulp	1,200 tons pulp/day
Finch, Pruyn & Company, Inc.	Glens Falls, NY	Sulfite pulp	123 tons pulp/day
International Paper	Ticonderoga, NY	Kraft pulp	590 tons pulp/day
P. H. Glatfelter Co.	Chillicothe, OH	Kraft pulp	1,785 tons pulp/day
Smurfit-Stone	Coshocton, OH	Semichemical pulp	470 tons pulp/day
Appleton Papers, Inc.	Roaring Spring, PA	Kraft pulp	200 tons pulp/day
Glatfelter	Spring Grove, PA	Kraft pulp	700 tons pulp/day
Weyerhaeuser Co.	Johnsonburg, PA	Kraft pulp	231 tons pulp/day

Composite product mills

Great Lakes Mdf	Lacawanna, NY	Medium density fiberboard	120 million ft ² , 3/4-inch basis per year
Norbord Industries, Inc.	Deposit, NY	Medium density fiberboard	80 million ft ² , 3/4-inch basis per year
Inca Presswood Pallets, Ltd	Dover, OH	Molded compression board	na
Clarion Boards, Inc.	Shippenville, PA	Medium density fiber board	126 million ft ² , 3/4-inch basis per year
Craftmaster	Towanda, PA	Hardboard	na
Knight-Celotex, LLC	Sunbury, PA	Medium density fiber board	na
Temple-Inland	Kane, PA	Medium density fiber board	130 million ft ² , 3/4-inch basis per year
Werzalit Of America, Inc.	Bradford, PA	Particleboard	na
Georgia-Pacific Corp.	Mount Hope, WV	Oriented strand board	375 million ft ² , 3/4-inch basis per year
Jeld-Wen Wood Fiber	Craigsville, WV	Medium density fiberboard	na

^a Includes only those counties that supplied pulpwood in 2006.

All table cells without observations are indicated by --. Table value of 0 indicates the volume rounds to less than 1 standard cord, unpeeled. Columns and rows may not add to their totals due to rounding.

Table 29.—Average production of active wood-pulp and composite product mills by company, location, and type of product produced, New England States, 2006

Product and company	Location	Product produced	Average production
Pulp mills			
Domtar Industries	Baileyville, Maine	Kraft pulp	1,450 tons pulp/day
Georgia-Pacific Corp.	Old Town, Maine	Kraft pulp	172 tons pulp/day
Katahdin Paper Company, LLC	East Millinocket, Maine	Groundwood/mechanical pulp	100 tons pulp/day
Knight Celotex Corporation	Farmington, Maine	Groundwood/mechanical pulp	100 tons pulp/day
Lincoln Paper And Tissue, LLC	Lincoln, Maine	Kraft pulp	450 tons pulp/day
Madison Paper Industries	Madison, Maine	Kraft pulp	300 tons pulp/day
Rumford Paper Company	Rumford, Maine	Kraft pulp	860 tons pulp/day
Sappi Fine Paper Company	Skowhegan, Maine	Kraft pulp	1,500 tons pulp/day
Verso Paper	Androscoggin, Maine	Kraft/groundwood pulp	1,570 tons pulp/day
Verso Paper	Bucksport, Maine	Groundwood/mechanical pulp	650 tons pulp/day
Fraser Paper	Berlin, New Hampshire	Sulfite pulp	650 tons pulp/day
Composite product mills			
Huber Engineered Woods, LLC	Easton, Maine	Oriented strand board	135 million ft ² , 3/4-inch basis per year
Louisiana-Pacific Corp.	Houlton, Maine	Oriented strand board	250 million ft ² , 3/4-inch basis per year

Table 30.—Other mills using Northern Region pulpwood in 2006
by company, location, and type of product produced

Company	Location	Product produced
Georgia-Pacific Corp.	Crossett, Arkansas	Sulfate pulp
Potlatch Corp.	McGehee, Arkansas	Sulfate pulp
NewPage Corp.	Wickliffe, Kentucky	Sulfate pulp
Weyerhaeuser Co.	Hawesville, Kentucky	Sulfate pulp
International Paper Co.	Riegelwood, North Carolina	Sulfate pulp
Georgia-Pacific Gypsum, LLC	Plyor, Oklahoma	Groundwood/mechanical pulp
International Paper Co.	Eastover, South Carolina	Sulfate pulp
Weyerhaeuser Co.	Kingsport, Tennessee	Soda and sulfite pulp
International Paper Co.	Franklin, Virginia	Sulfate pulp
MeadWestvaco Co.	Covington, Virginia	Sulfate pulp
St. Laurent Paperboard, Inc.	West Point, Virginia	Sulfate pulp
AV Cell, Inc.	Atholville, New Brunswick	Sulfate pulp
AV Nackowic, Inc.	Nackawic, New Brunswick	Kraft pulp
Fraser Paper	Edmundston, New Brunswick	Chemical/mechanical pulp
ATC Pembroke, Inc.	Pembroke, Ontario	Medium density fiberboard
Abitibi-Consolidated Co.	Thunder Bay, Ontario	Semicemical pulp
Bowater Canadian Forest Products	Fort Frances, Ontario	Kraft/groundwool pulp
Domtar, Inc.	Thunder Bay, Ontario	Kraft pulp
Flakeboard Company Limited	Espanola, Ontario	Groundwood/mechanical pulp
St. Mary's Paper, Ltd.	Sault Ste. Marie, Ontario	Medium density fiberboard
Domtar, Inc.	Sault Ste. Marie, Ontario	Groundwood/mechanical pulp
FPS Canada, Inc.	Windsor, Quebec	Kraft pulp
Kruger, Inc.	Thurso, Quebec	Kraft pulp
	Trios-Rivieres, Quebec	Thermomechanical pulp

Piva, Ronald J. 2010. **Pulpwood production in the Northern Region, 2006.** Resour. Bull. NRS-39. Newtown Square, PA: U.S. Department of Agriculture, Forest Service, Northern Research Station. 104 p.

Discusses 2006 production and receipts of pulpwood in the Northern Region. Breaks down production from four subregions: Central States, Lake States, Mid-Atlantic States, and New England States, by species group for each state and compares production with that of previous years. Production for 2006 for the Plains States by species group and product form are included.

KEY WORDS: Central States, composite products, Lake States, Mid-Atlantic States, New England States, Plains States, pulp products, pulpwood, residue, roundwood.

The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, sex, religion, age, disability, political beliefs, sexual orientation, and marital or family status. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at 202-720-2600 (voice and TDD). To file a complaint of discrimination, write USDA, Director, Office of Civil Rights, Room 326-W, Whitten Building, 1400 Independence Avenue SW, Washington, DC 20250-9410 or call 202-720-5964 (voice and TDD). USDA is an equal opportunity provider and employer.
