

# Quarterly Banking Profile

FOURTH QUARTER 2005

- **Full-Year Earnings Set New Record For Fifth Year In A Row**
- **Fourth-Quarter Net Income Of \$32.9 Billion Is Fourth-Highest Ever, But Quarterly ROA Falls To A Three-Year Low**
- **Surge In Bankruptcy Filings Produces Spike In Credit-Card Charge-Offs**
- **Reduction In Loss Reserves Resumes At Large Banks**
- **2005 Is First Year With No Insured Institution Failures**

## Earnings Continue to Improve Over Year-Earlier Levels

Challenged by a flattening yield curve and softening loan demand, FDIC-insured institutions managed to post their fourth-best earnings quarter ever in the fourth quarter of 2005. Net income of the 8,832 insured banks and thrifts was \$1.7 billion (5.4 percent) higher than in the fourth quarter of 2004, thanks primarily to a \$3.2-billion (4.0-percent) increase in net interest income. Noninterest income made a modest \$373 million (0.7 percent) pretax contribution to the improvement in earnings. Against these positive factors, expenses for loan-loss provisions were \$893 million (11.6 percent) higher, and gains on sales of securities and other assets were \$624 million (56.4 percent) lower. Noninterest expenses registered a small increase, rising by \$824 million (1.0 percent) from a year earlier. The average return on assets (ROA) in the fourth quarter was 1.22 percent, the lowest quarterly level since the fourth quarter of 2002. The average ROA in the fourth quarter of 2004 was 1.25 percent. Almost half of all insured institutions (49.7 percent) reported a fourth-quarter ROA of one percent or better, slightly above the 48.0 percent of institutions that achieved that benchmark in the fourth quarter of 2004. At the other end of the performance spectrum, the share of unprofitable institutions declined slightly to 9.4 percent, from 9.5 percent a year earlier. More than half of all institutions reported higher quarterly earnings (58.6 percent), and higher quarterly ROAs (51.2 percent) than a year ago.

## Loan Growth Offsets Narrower Margins

The average net interest margin in the fourth quarter was 3.49 percent, down slightly from 3.50 percent in the third quarter, and matching the fourteen-year low level reached in the second quarter. The average margin in the fourth quarter of 2004 was 3.63 percent. A combination of rising short-term interest rates and relatively stable longer-term rates has caused the spread between these rates to diminish considerably throughout 2005. For insured banks and thrifts, which have traditionally lent "long" and borrowed "short," the narrowing of this spread has put downward pressure on the relative profitability of their lending and deposit-taking. The effect has been less pronounced at smaller institutions during 2005. They obtain most of their funding from smaller denomination "core" deposits, which tend to reprice upward more slowly when short-term interest rates rise. Large institutions fund a larger share of their assets with short-term nondeposit liabilities, which reprice more quickly when rates rise. A majority of institutions (54.9 percent) reported higher net interest margins for the full year in 2005 than they reported for 2004, but most of the improvements occurred prior to the fourth quarter, and they were concentrated among smaller institutions. The 4.0-percent increase in net interest income between the fourth quarter of 2004 and the fourth quarter of 2005 was made possible by 7.9-percent growth in interest-earning assets during that period which outweighed the negative effect of the narrower average margin.

### Annual Profits Rise, But Profitability Declines

For the full year, the industry's net income totaled a record \$134.2 billion, an increase of \$11.8 billion (9.6 percent) over the total earned in 2004. A comparison of the annual earnings reported at these year-ends exaggerates the underlying improvement in earnings, because of the effect of merger accounting on earnings reported for 2004. If adjustments are made for the impact of purchase accounting applied to mergers in 2004 and 2005, the year-to-year earnings improvement is closer to \$8.4 billion (6.6 percent). Similarly, the ROA for 2004, based on full-year earnings reported at year-end, was 1.28 percent, the same as for 2005; adjusted for the effect of merger accounting, the 2004 ROA would have been approximately 1.33 percent, and the adjusted ROA for 2005 would have been 1.29 percent, the lowest annual average since 2001. Even with these adjustments, however, earnings were still higher in 2005, with almost two out of every three institutions (64.5 percent) registering increased net income. More than half of all institutions (53.4 percent) reported higher ROAs in 2005. The number of institutions reporting negative net income for the year -- 535 -- was the same as in 2004.

### Approach of New Bankruptcy Rules Leads to Increase in Loan Losses

Both net charge-offs and noncurrent loans increased in the fourth quarter, but the causes of these increases suggest that this may not be the beginning of a trend. Total net charge-offs increased to \$9.9 billion, the highest quarterly level in two years, and \$802 million (8.8 percent) above the level of a year earlier. The increase was caused by a \$1.1-billion (24.6-percent) increase in net charge-offs on credit card loans. During the fourth quarter, personal bankruptcy filings soared to record levels, as borrowers sought Chapter 7 protection from their debts before a new, more stringent bankruptcy law took effect in mid-October. The jump in bankruptcies was directly reflected in higher loan losses in credit card portfolios. No other loan categories showed a significant year-over-year increase in quarterly charge-offs; absent the increase in losses on credit cards, total charge-offs in the fourth quarter were \$324 million (3.6 percent) lower than a year earlier.

### New Accounting Rules Continue to Drive Increase in Reported Noncurrent Mortgages

Noncurrent loans (loans 90 days or more past due or in nonaccrual status) increased for the second consecutive quarter, after declining in each of the previous eleven quarters. The \$1.2-billion (2.4-percent) increase in the fourth quarter, like the \$2.9-billion increase in the third quarter, was mainly the result of rebooking of delinquent GNMA mortgage loans under new accounting guidelines. Insured institutions added \$1.8 billion to their rebooked noncurrent GNMA mortgages in the fourth quarter, after a \$2.8-billion increase in the third quarter. No other loan category registered a sizable increase in noncurrent levels in the fourth quarter. Noncurrent commercial and industrial (C&I) loans declined by \$1.1 billion (11.7 percent) during the quarter.

### Reserves Decline to Four-Year Low

The industry added \$1.3 billion less in loan-loss provisions to its reserves than it charged-off during the fourth quarter, and this difference contributed to a \$2.0-billion (2.6-percent) decline in reserves. This is the seventh time in the past eight quarters that reserves have declined, with most of the reductions occurring at a few large institutions. At the end of 2005, insured institutions held \$1.15 in reserves for every \$100 of loans and leases on their balance sheets, the lowest level in more than 20 years. The industry's "coverage ratio" declined from \$1.63 in reserves for every \$1.00 in noncurrent loans to \$1.55 during the fourth quarter. This is the second consecutive quarter that the coverage ratio has declined, after eleven consecutive quarters of improvement, and the ratio ended the year at its lowest level since the first quarter of 2004. Yearend reserves totaled \$77.4 billion, the lowest level since the end of the third quarter of 2001.

### Merger-Related Goodwill Continues to Grow

Equity capital increased by \$22.0 billion (2.0 percent) during the fourth quarter. Retained earnings contributed \$14.2 billion, and merger-related goodwill added \$10.2 billion. These additions to equity were partially offset by declines in market values on institutions' securities held for sale. The lower market values, caused by rising interest rates, were reflected in adjustments to equity capital. Goodwill has grown substantially in recent years, as accounting changes that took effect after 2001 eliminated the use of pooling-of-interest accounting for mergers and eliminated the amortization of goodwill. A few

large mergers since that time have caused the total amount of goodwill on the industry's balance sheet to almost triple, from \$86.8 billion at the end of 2001 to \$249.8 billion at the end of 2005. Five large institutions account for more than 42 percent of the industry's total goodwill. While goodwill has been the most rapid-growing component of equity capital, other components have increased as well. The industry's regulatory capital, which does not include goodwill or adjustments for securities values, increased by \$20.8 billion (2.0 percent) during the fourth quarter, and by \$89.3 billion (9.3 percent) during the 12 months ended December 31. More than 99 percent of all insured institutions, representing more than 99 percent of total industry assets, were in the highest regulatory capital category at the end of 2005.

### **Growth in Residential Mortgage Assets Slows**

Loans grew at a faster rate than assets in the fourth quarter (2.2 percent vs. 1.7 percent). This is the sixth time in the last seven quarters that the growth rate of loans has outstripped that of total assets, but the rate of loan growth also slowed for a fourth consecutive quarter. Residential mortgage assets (residential mortgage loans, home equity loans and mortgage-backed securities) registered their smallest increase in two years in the fourth quarter, rising by \$24.0 billion (0.6 percent). They accounted for only 13.6 percent of the increase in total industry assets during the quarter. The slack was taken up by growth in C&I loans (up \$35.5 billion, or 3.4 percent), real estate construction and development loans (up \$31.1 billion, or 7.5 percent), and credit-card loans (up \$26.7 billion, or 7.2 percent). Loans secured by commercial real estate properties increased by \$16.9 billion (2.1 percent). Altogether, loans to commercial borrowers increased by \$101.0 billion (3.3 percent), accounting for 57.3 percent of total asset growth. Home equity loans registered their first quarterly decline in five and a half years, falling by \$3.9 billion (0.7 percent). This decline was caused by borrowers converting from variable-rate home equity loans to fixed-rate junior lien mortgages, in response to rising short-term interest rates. Deposit growth was strong, with total deposits increasing by \$172.2 billion (2.5 percent). Interest-bearing deposits rose by \$129.3 billion (2.7 percent), as insured institutions grew their brokered deposits by \$51.2 billion (11.9 percent). Increased deposits funded 97.5 percent of total asset growth in the fourth quarter. Nondeposit liabilities declined by \$17.6 billion (0.7 percent).

### **2005 is First Year With No Failures, "Problem List" Shrinks to Historic Low at Yearend**

The number of FDIC-insured institutions filing quarterly financial reports declined from 8,858 in the third quarter to 8,832 in the fourth. There were 57 new charters added during the fourth quarter. Eighty-one institutions were merged into other institutions during the quarter, and one institution had not yet filed a yearend report when this issue of the QBP went to press. No insured institution failed during the fourth quarter, marking the sixth consecutive quarter without a failure of an FDIC-insured commercial bank or savings institution. This is the most quarters without a failure since the inception of Federal deposit insurance. 2005 was the first calendar year without a failure of a federally insured bank or thrift. The number of institutions on the FDIC's "Problem List" declined from 68 to 52 institutions during the fourth quarter. This is the smallest number of "problem" institutions in the 36 years for which data are available. Total assets of "problem" institutions declined from \$20.9 billion to \$6.6 billion. Two mutually-owned savings institutions, with \$2 billion in assets, converted to stock ownership during the fourth quarter. For all of 2005, there were 179 new charters added, the largest annual total since 2000. Mergers absorbed 315 institutions during the year. The net reduction in the number of insured financial institutions for all of 2005 was 144, the smallest reduction since 1985.

\*Asset Concentration Group Definitions (Groups are hierarchical and mutually exclusive):

Credit-card Lenders - Institutions whose credit-card loans plus securitized receivables exceed 50 percent of total assets plus securitized receivables.

International Banks - Banks with assets greater than \$10 billion and more than 25 percent of total assets in foreign offices.

Agricultural Banks - Banks whose agricultural production loans plus real estate loans secured by farmland exceed 25 percent of the total loans and leases.

Commercial Lenders - Institutions whose commercial and industrial loans, plus real estate construction and development loans, plus loans secured by commercial real estate properties exceed 25 percent of total assets.

Mortgage Lenders - Institutions whose residential mortgage loans, plus mortgage-backed securities, exceed 50 percent of total assets.

Consumer Lenders - Institutions whose residential mortgage loans, plus credit-card loans, plus other loans to individuals, exceed 50 percent of total assets.

Other Specialized < \$1 Billion - Institutions with assets less than \$1 billion, whose loans and leases are less than 40 percent of total assets.

All Other < \$1 billion - Institutions with assets less than \$1 billion that do not meet any of the definitions above, they have significant lending activity with no identified asset concentrations.

All Other > \$1 billion - Institutions with assets greater than \$1 billion that do not meet any of the definitions above, they have significant lending activity with no identified asset concentrations.

All line items are reported on a quarterly basis.

\*Includes spot foreign exchange contracts. All other references to foreign exchange contracts in which notional values or fair values are reported exclude spot foreign exchange contracts.

\*\* Derivative contracts subject to the risk-based capital requirements for derivatives.

\*\*\* The reporting of credit losses on derivatives is applicable to all banks filing the FFIEC 031 report form and to those banks filing the FFIEC 041 report form that have \$300 million or more in total assets.

\* Estimated insured deposits are based on preliminary data. A reserve ratio is the fund balance as a percentage of estimated insured deposits. As with other Call Report items, prior periods may reflect adjustments. As a result, prior period reserve ratios may differ from previously reported values. Only year-end fund balances are audited by GAO. Fund balances for the most recent period are unaudited. BIF-insured deposit totals include U.S. branches of foreign banks.
