Integrating Technology in the Classroom

What do we know about appropriate ways to enhance student learning with technology? How can technology change the nature of teaching and learning? This issue addresses these questions while offering practical ideas for using technology in your classroom.

Welcome to the electronic version of the *ENC Focus* issue on the topic Integrating Technology in the Classroom.

This page provides access to the full text of all articles in the print version of the magazine. Some articles have been enhanced for this electronic version, and the list of theme articles has been organized by content rather than reflecting the layout of the print version.

This electronic version has other benefits. Live links are provided for all web sites mentioned. [Focus on the Collection](#) links to complete catalog records of resources selected from ENC's vast collection.

You will also find theme articles from this issue in the Topic area [Implementing Technology](#). That area will grow as new content is added and links are made to related resources in other areas of ENC Online.

Update: Around the Clearinghouse and the Nation

This section features educational news, editorials, essays, classroom stories, and columns on topics of interest to classroom innovators.
