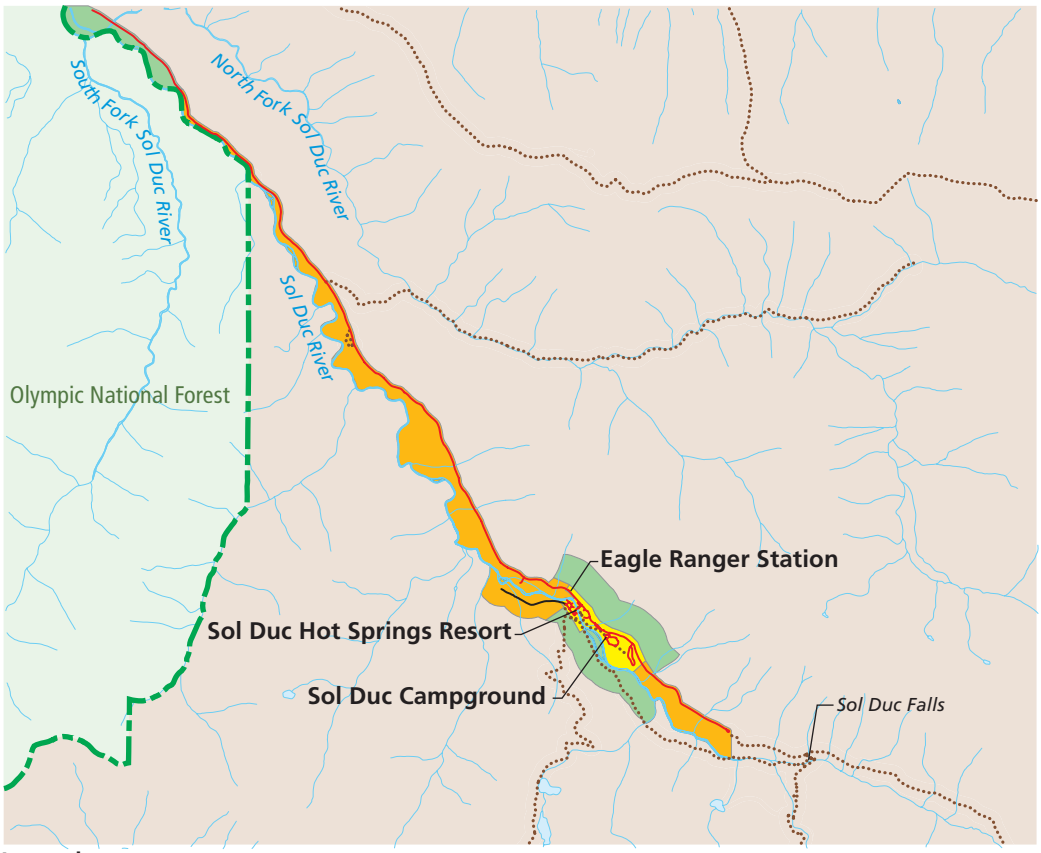
Sol Duc Alternative A - Current Management



1. The Sol Duc Hot Springs Resort facilities would be retained.

2. Seasonal road access would be retained.

3. The current size and function of facilities (e.g., campground and park operations areas) would be retained.

4. Wilderness trail access would be retained.

North

0 1 2 miles

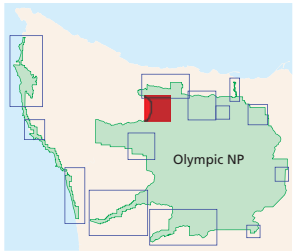
1. The Sol Duc Hot Springs Resort would be closed and the area would be restored.

2. Seasonal road access would be retained unless threatened by river movement, and then options would be explored for alternative access and could include a primitive road, mandatory transit, multipurpose trails, etc.

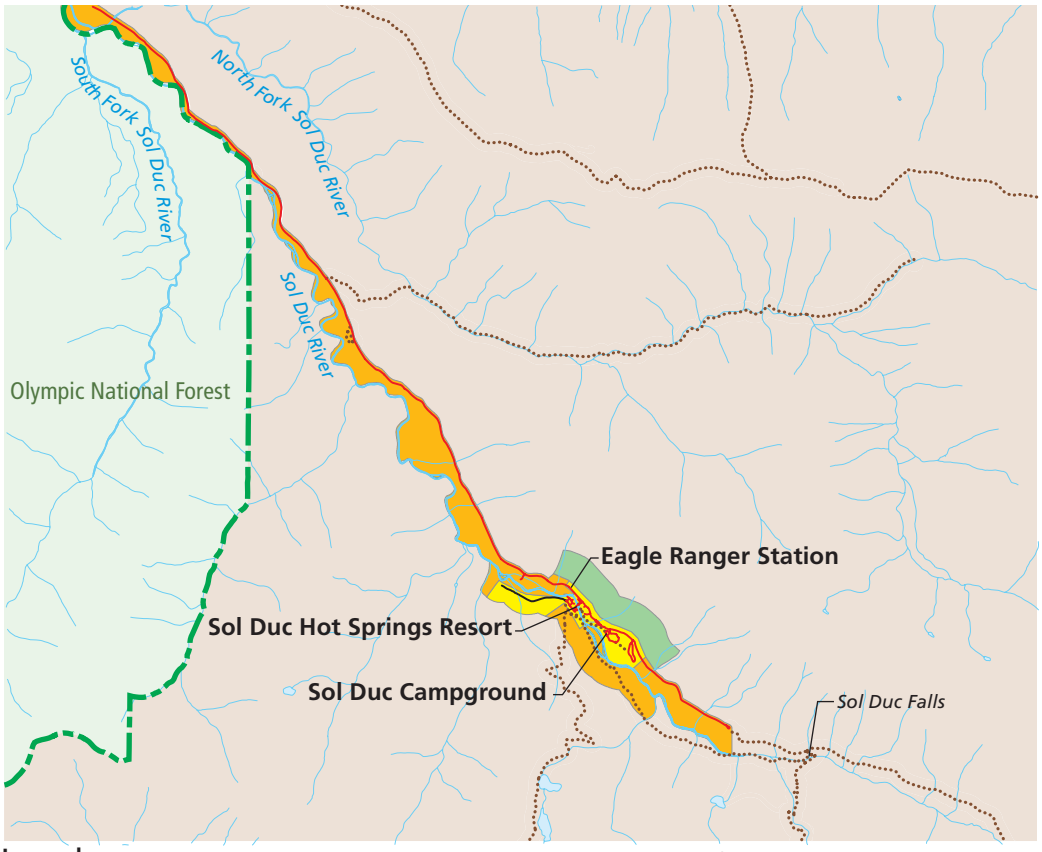
3. The current size and function of facilities (e.g., campground and park operations areas) would be reduced.

4. Wilderness trail access would be retained.

Location



Sol Duc Alternative C - Visitor Opportunities Emphasis



Legend

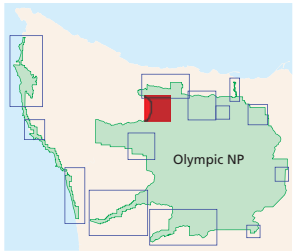
- Development Zone
- NPS Wilderness
- NPS Boundary
- Trail
- Paved road
- Unpaved road
- USFS

North

0 1 2 miles

Location



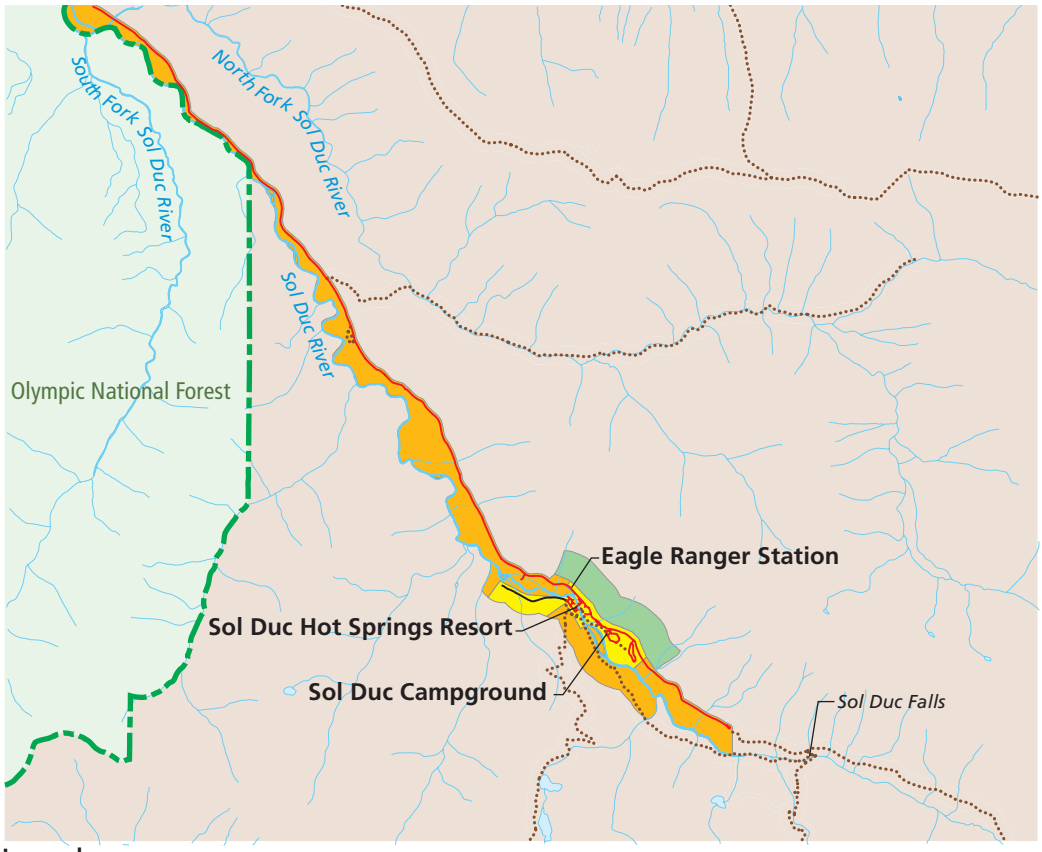
1. The Sol Duc Hot Springs Resort facilities would be expanded and improved, and the resort season would be extended to year-round operation if economically feasible.

2. Year-round road access would be provided and improved. An optional seasonal transit system would be studied, and implemented if feasible.

3. The current size and function of facilities (e.g., campground and park operations areas) would be redesigned, enlarged, and improved.

4. Wilderness trail access would be retained and the frontcountry trail network would be improved. An existing frontcountry trail would be converted to be universally accessible.

Sol Duc Alternative D - Preferred Alternative



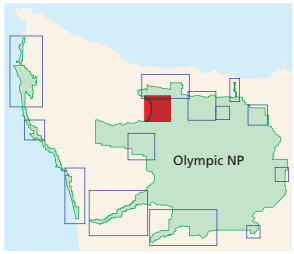
Legend

- Low Use Zone
- Day Use Zone
- Development Zone
- NPS Wilderness
- NPS Boundary
- Trail
- Paved road
- Unpaved road
- USFS

North

0 1 2 miles

Location



1. Existing Sol Duc Hot Springs Resort facilities would be retained seasonally but the season could be adjusted depending on economic feasibility, weather and monitoring/protection of the geothermal resource and adjacent natural resources (e.g. discharge into river).

2. Seasonal road access would be retained, but access season could be adjusted depending on weather. Road access would be retained using methods that minimize adverse effects on river processes and aquatic and riparian habitats, to the extent possible

An optional, seasonal transit system would be studied, and implemented if feasible.

3. The current size and function of facilities (e.g., campground and park operations areas) may be relocated, and/or expanded.

4. Wilderness trail access would be retained, and an existing frontcountry trail would be converted to be universally accessible.
