Department of Energy
Annual Report to the Secretary on Small Business Programs
Fiscal Year 2006

I. INTRODUCTION

The *Report to the Secretary of Energy on the U.S. Department of Energy's Small Business Programs* is prepared annually to document activities and achievements during each fiscal year. The report includes small business participation in prime contracting, subcontracting, innovative research, and technology transfer.

II. DOE MISSION

The Department of Energy (DOE) has an overarching mission to advance the national, economic and energy security of the United States; to promote scientific and technological innovation in support of that mission; and to ensure the environmental cleanup of the national nuclear weapons complex.

**III. OFFICE of SMALL and DISADVANTAGED BUSINESS UTILIZATION
(OSDBU)**

The OSDBU was established in 1979 pursuant to Public Law 95-507. The specific duties of this office are identified in 15 U.S.C. 644 (k). The OSDBU program is headed by a Director who reports directly to the Secretary or his Deputy, and is responsible for carrying out Sections 8 and 15 of the Small Business Act. The OSDBU is responsible for administering the DOE small business program and for promoting small business participation through the tasks listed below:

- Negotiates the Department's annual small business goals with the Small Business Administration (SBA);
- Monitors and tracks small business goals from the Information Data Warehouse (IDW);
- Reports performance against goals to the Secretary and to Congress;
- Counsels small businesses regarding DOE's procurement processes, opportunities and challenges;
- Assists and counsels departmental prime contractors regarding subcontract goals and requirements; and
- Assists and counsels departmental offices regarding small business goals and requirements.

For more information about OSDBU programs and activities, visit <http://smallbusiness.doe.gov>

IV. LAWS AND REGULATIONS

All small business activities at DOE are conducted in response to the following Federal

statutes, laws and regulations and departmental initiatives:

- Federal Acquisition Regulation (FAR), Part 19 (48 CFR Chapter 1)
- Department Of Energy Acquisition Regulation (DEAR), supplement to the FAR (48 CFR part 970)
- Code of Federal Regulations (CFR)
- Executive Orders (EO)
- The Small Business Act, as amended (15 U.S.C. 631 *et seq.*)
- The Federal Acquisition Streamlining Act of 1994 (Public Law 103-355)
- Small Business Administration Reauthorization and Amendment Act of 1994 (Public Law 103-403)
- Energy Policy Act of 1992 (Public Law 102-486, Section 3021)
- Prompt Payment Act Amendments of 1988 (Public Law 100-496, Section 12)
- Business Opportunity Development Reform Act of 1988 (Section 501)
- The HUBZone Act of 1997 (Public Law 105-135, Title VI)
- The Veterans Entrepreneurship and Small Business Development Act of 1999 (Public Law 106-50)
- Veteran Benefit Act of 2003 (Public Law 108-183, Section 308)
- Federal Acquisition Reform Act (Public Law 104-106)
- Women's Business Ownership Act of 1988 (Public Law 100-533, Section 502)
- Executive Order 12138
- Executive Order 13157
- Executive Order 13170
- Executive Order 13360
- Energy Policy Act of 2005 (Public Law 109-58)
- Emergency Supplemental Appropriations for Defense, the Global War on Terror and Tsunami Relief 2005 (Public Law 109-13)
- Acquisition Letter (AL) 2005-06
- Acquisition Letter (AL) 2005-08

V. DOE BUSINESS MODEL

A. Facility Management Contracts (FMC)

The DOE business model is designed to outsource a major portion of its work. This model has resulted in contracts to operate facilities and national laboratories known as Management and Operating contracts (M&Os), Management and Integration contracts (M&Is), and Environmental Restoration and Waste Management Contracts (ERWMCs). These contracts are also known as Facility Management Contracts (FMCs). These FMC contracts are generally awarded to large businesses, educational institutions and non-profit organizations and represent 84.4 % of the DOE procurement base.

B. Non- FMC contracts

The remaining 15.6% of the total procurement base is used to fund non-FMC contracts. Many of the non-FMC contracts are also awarded to large businesses; however, DOE has

made a commitment to consider all new contracts not designated for M&O contracts for small business set-asides unless a compelling reason can be shown to do otherwise.

VI. SMALL BUSINESS GOALS

A. Government-wide Statutory Goals

Under statutory authority, of the Small Business Act 15 U.S.C. 644 (g)(1), the President establishes annual government-wide goals for small business participation in providing goods and services to the Federal Government. Below are the government-wide statutory goals:

- 23 % of prime contracts for small businesses;
- 5 % of prime and subcontracts for small disadvantaged businesses;
- 5 % of prime and subcontracts for women-owned small businesses;
- 3 % of prime contracts for HUBZone small businesses;
- 3 % of prime and subcontracts for service-disabled, veteran-owned small businesses.

B. FY 2006 DOE Negotiated Goals

Section 15(g) of the Small Business Act, 15 U.S.C. 644(g), authorizes each agency to establish realistic goals for the award of contracts to small businesses. Listed below are the DOE negotiated goals for FY 2006, as well as the individual program office goals:

	<u>Prime goal</u>	<u>Subcontract goal</u>
• Small business	4.34%	41.3 %
• Small disadvantaged business	1.6 %	6.3 %
• Women-owned business	0.3 %	5.8 %
• HUBZone business	0.1 %	2.2 %
• Service-disabled veteran business	0.0 %	1.3 %

Yellow highlighted program elements have not submitted in writing their SB Goaling form.

Numbers and percentages entered in "black" indicate that goaling form was signed by element director.

Numbers and percentages entered in "red" indicate that goaling form has not been signed by element director.

This revision contains LM SB goal change from 100% to 58.99%

FINAL

VII. PRIME CONTRACT SMALL BUSINESS ACHIEVEMENTS

The small business prime contracting achievement in FY 2006 was \$1,206,041,000 or 5.5% of total obligations. From FY 2001 through FY 2006, DOE has increased its small business prime contract achievements from \$538,334,000 to \$1,206,041,000 which is an increase of \$667,707,000. DOE achieved its small business socioeconomic goals in most social economic categories, including women owned small business, HUBZone small businesses, and service disabled veteran owned small business. However, DOE did not achieve its small business goals in 8(a). To review a sample of some success stories with prime contracts, see **Exhibit 1** on page 18.

Service-Disabled Veteran	\$132,679	1.3%		0.0%
Total Prime and Subcontracting Small Business Awards	\$5,191,619		\$1,206,041	

FY 2006 Subcontracting Achievements are not available from the electronic Subcontracting Reporting System (eSRS).

A narrative of DOE achievements in the various small business socioeconomic programs is provided below:

A. 8(a) and Small & Disadvantaged Business (SDB)

In FY 2006, DOE awarded \$356,497,000 in prime awards to 8(a) and SDBs. This

amount represents 1.6% of total obligations. The OSDBU has worked closely with this socioeconomic group including having 8(a) and SDB associations as members of the DOE Small Business Advisory Team. Information on this program can be accessed at <http://smallbusiness.doe.gov>.

B. Women-Owned Small Business (WOSB)

In FY 2006, DOE awarded \$160,084,000 prime awards to women-owned small businesses. This represents .7% of total obligations. The OSDBU featured a panel of women-owned businesses at the 6th DOE Annual Small Business Conference held this year in Seattle, Washington. To review the conference agenda see **EXHIBIT 2** on page 24. Additionally, the OSDBU has participated in various women-owned small business related conferences, worked closely with the U.S. Women's Chamber of Commerce (who are an active member of the DOE Small Business Advisory Team). **EXHIBIT 3** on page 26 of this report reflects specifics on some of these prime contract awards.

Information on DOE's Women Small Business Programs can be found at http://smallbusiness.doe.gov/Small_Business_Programs/WomenOwned_Business/women-owned_business.html.

C. HUBZone Small Business

In FY 2006, DOE awarded \$48,003,000 in prime contracts to HUBZone businesses. This represents .2% of total obligations at DOE. In outreaching to HUBZone firms, the OSDBU participated in conferences targeting HUBZone small businesses and has HUBZone association representation on the DOE Small Business Advisory Team. **EXHIBIT 1** on page 18 reflects specific examples on some of these HUBZone awards.

For more information on the DOE HUBZone Empowerment Contracting Program, visit http://smallbusiness.doe.gov/Small_Business_Programs/HUBZones/hubzones.html.

D. Service Disabled Veteran-Owned Small Business (SDVOSB)

The SDVOSB FY 2006 DOE award was \$156,421,000, which represents .7% of total obligations. The SDVOSB group has had the largest increase in prime contracting achievement of all of the socio-economic small business groups from FY 2005 to FY 2006. In outreaching to SDVOSB firms, DOE took the following actions:

- Sponsor a veterans panel at its annual small business conference consisting of several SDVOSB executives informing the audience on business development practices.
- Provide small business program managers as exhibitors to support SDVOSB conferences.

For more information about the SDVOSB Program, please visit http://smallbusiness.doe.gov/Small_BusinessPrograms/ServiceDisabledVeterans-Owned/servicedisabledveterans-owned.html.

VIII. SUBCONTRACT SMALL BUSINESS ACHIEVEMENTS

The Electronic Subcontract Reporting System (eSRS), which collects subcontracting achievements government-wide, provides data after the DOE Small Business Annual Report is due. Therefore, this year the OSDBU will be reporting the FY 2005 data not the FY 2006 data.

In FY 2005, DOE's prime contractors awarded a total of \$3,924,067,000 to small business or 45.6% of their total contracts. A list of DOE's subcontract achievements for the individual socioeconomic programs is listed below, followed by a chart on page 11. Examples of small business subcontract success stories can be found in **EXHIBIT 1** on page 18.

A. Women-Owned Small Business (WOSB)

In FY 2005, DOE awarded \$668,362,000 subcontract awards to women-owned small businesses which represent 7.8% of total obligations. The FY 2005 goal for subcontract awards to women-owned small businesses was 10% ; therefore, the amount obligated was 2.2% below goal.

B. HUBZone Small Business

The goal for HUBZone subcontracts awarded to small business in FY 2005 was 3.0%. In FY 2005, DOE achieved its goal of 3.0% which is \$255,343,000 in subcontracts to HUBZone businesses.

C. Service Disabled Veteran-Owned Small Business

The subcontracting goal for SDVOSB small businesses for FY 2005 was 1.5%. In FY 2005, SDVOSB small businesses were awarded \$44,796,000 in subcontracts from DOE representing .5% of total obligations.

D. The 8(a) Pilot and Small & Disadvantaged Business (SDB)

In FY 2005, DOE's prime contractors awarded \$660,847,000 in subcontracts to 8(a) firms and other SDBs. This amount represents 7.7% of all subcontracts.

Currently, there are 31 prime contractors participating in the 8(a) Pilot Program. In FY 2006, there were two new additions.

Department of Energy's 8(a) Pilot Program

The Department of Energy's "8(a) Pilot Program," hereafter referred to as "the Program," was established in FY 1991 to: 1) target 8(a) businesses for DOE procurement opportunities at the subcontract level; 2) allow flexibility to DOE's major prime contractors in awarding subcontracts to 8(a) business concerns; and 3) create additional ways for 8(a) businesses to access the economic mainstream of American society. The Program strengthens DOE's support of the Federal 8(a) Program administered by the U.S. Small Business Administration (SBA). The Program, which is voluntary to DOE's major prime contractors, awarded a total of \$167,182 to 8(a) businesses in 1991, its first year of operation. The Program's achievement has grown to more than \$150 million today.

Benefits of the Program

The Program mimics the SBA 8(a) Program, except that it is applicable only when DOE prime contractors subcontract with 8(a) firms.

- DOE prime contractors can award sole-source contracts to 8(a) firms up to \$3 million for goods and services, and \$5 million for manufacturing.
- DOE prime contractors can limit subcontracts to 8(a) firms on competitive procurements above \$3 million for goods and services, and above \$5 million for manufacturing.

For more information on the 8(a) Pilot Program small business contractors that are 8(a) certified and interested in seeking 8(a) business opportunities with DOE's major prime contractors, access: <http://smallbusiness.doe.gov>.

The FY 2001 through 2003 prime contracting achievement numbers are from the FPDS.

The FY 2004 prime contracting achievement numbers are from the FPDS-NG.

The subcontracting numbers are from DOE's Subcontracting Reporting System (SRS) and eSRS

The FY 2005 prime contract numbers are from the FPDS-NG lot 10/27/05.

The FY 2006 prime contract numbers are from the FPDS-NG lot 10/17/06.

IX. FY 2006 DEPARTMENTAL OBJECTIVES

DOE included several objectives to increase small business contracting in its FY 2006 Small Business Strategic Plan. Listed below are actions taken throughout the year to achieve these objectives.

A. Periodically meet with the SBA to discuss small business goals

The OSDBU staff met with several senior leaders of the SBA, including the Administrator and the Associate Administrator, Office of Government Contracting and Business Development, as well other key SBA staff. Various issues were discussed such as Prime and Subcontracting Goals, the 8(a) Mentor Protégé Program, the DOE/SBA MOU and Study, and the SBA Partnership Agreement.

B. Establish and track small business goals and achievements

1. Prime Contracts

The annual goaling workshop was conducted on July 13, 2005 to review and explain the prime contracts goaling process using the SBA's guide titled "Goaling Guidelines for Small Business Preference Programs." The DOE program elements were required to submit goals that cumulatively result in a Department wide goal. These goals were then reported to the Deputy Secretary for his review/approval and submitted to the SBA for their review and concurrence.

Small Business achievements were tracked and reported on a quarterly basis for each program element using DOE's "Standard Accounting and Reporting System" (STARS).

2. Subcontracts

The subcontract annual goaling process includes surveying the DOE's prime contractors. Once the subcontract goals are submitted to the OSDBU for review, the goals are tallied and reported to the Deputy Secretary for his review and approval. Once approved, the Departmental subcontract goals are submitted to the SBA for review and concurrence. The FY 2006, subcontracting process began in August, 2006 and was completed in October 2006.

C. Publish and maintain a Department-wide procurement forecast

The OSDBU is responsible for managing the Department's procurement forecast of potential prime and subcontracting opportunities. The forecast is prepared by program offices on a real-time basis by the small business program managers, and can be found at <https://hqinc.doe.gov/registration>

D. Review acquisition requests over \$3 million not set aside for small business

DOE has in place a process which requires that all acquisitions over \$3 million not awarded to small business be reviewed and signed by the OSDBU. A sampling of some of the reviews conducted in FY 2006 is provided below.

- Western Area Power Administration (WAPA) Architectural – Engineering Services for Eastern Plains Project
- AMES National Laboratory Re compete
- Pacific Northwest National Laboratory (PNNL) Re compete
- FERMI National Laboratory Re compete
- NETL Albany, Oregon NETL A-76 competition
- Ultra-Deep-Water Project for NETL
- WAPA Rocky Mountain IT Services to Chickasaw Native American Indians
- Savannah River Site Re compete
- Hanford Central Plateau
- MOAB Tailings – Environmental project
- Management Support Services Contract currently being performed by Booz Allen Hamilton

E. Advanced Acquisition Planning Team (AAPT) Meetings

DOE has initiated a process whereby proposed acquisitions will be reviewed for small business participation prior to the issuance of a Request for Proposal (RFP). The AAPT meetings are held on the first Wednesday of every month to address specific proposed acquisitions for consideration of small business prime/subcontract opportunities. There is also general discussions on various other small business issues including the DOE/SBA goaling process and small business award tracking and reporting, the APAT process/structure, GAO recommendations, agreements with the SBA, and the DOE Annual Small Business Conference, and other small business policies and procedures. In FY 2006, the Advanced Acquisition Planning Team held meetings on the following dates: 1) 11/2/05, 2) 12/7/05, 3) 1/4/06, 4) 3/8/06, 5) 5/3/06, 6) 6/7/06 and 7) 7/6/06.

F. Outreach and Technical Assistance

The OSDBU staff participated in numerous small business conferences and technical assistance workshops, including the SBA Matchmaking Conferences across the country and the 7th Annual DOE Small Business Conference in Seattle, Washington on June 27-30, 2006. There were approximately 1,500 attendees at the conference which included workshops, exhibitors and a “Matchmaking” Forum. DOE’s prime contractors brought in over \$1 billion in possible subcontracting opportunities for small businesses and participated in approximately 1,200 appointments to make this the most successful Matchmaking Forum to date. At this time, it is reported that \$3.4 million has been awarded to small businesses. For a list of the DOE OSDBU events calendar see **EXHIBIT 3** on page 26.

G. Assist in developing Implementation Plans

Due to the lack of funds, the Department of Energy has been unable to develop implementation plans for potential breakout of M&O subcontracts.

H. Conduct subcontract reviews of M&O Prime Contractors

Due to the lack of funds, DOE has not been able to conduct subcontract reviews of any M&O contracts.

I. DOE Mentor-Protégé Program

The Department's Mentor-Protégé Program strives to increase subcontracting opportunities by utilizing DOE prime contractors to mentor small businesses. The DOE Mentor-Protégé Program provides all prime contractors with the ability to serve as a mentor. This process allows the prime contractor, as a mentor, to negotiate subcontracts directly with 8(a), SDB, WOSB and HUBZone firms without competition and with no limits to the size of the subcontract. It further provides that a protégé can be accessed by any prime contractors serving as a mentor.

The DOE OSDBU was pro-active in reaching out to the prospective mentors about the Mentor-Protégé Program. As a result of these efforts, six (6) new Mentor-Protégé Agreements between DOE's prime contractors and small businesses were established.

In FY 2006, DOE had a total of 57 protégés participating in the DOE Mentor-Protégé Program. For a complete list of DOE Mentor Protégés see **EXHIBIT 4** on page 33.

J. SBA Mentor-Protégé Program

DOE continues to work with the SBA to increase the number of SBA Mentor-Protégé agreements. The result of these efforts will be the increased ability of the small business to serve as prime contractors at DOE. In FY 2006, DOE reported 31 firms that received awards as SBA 8(a) Mentor-Protégés.

K. OSDBU Small Business Database

The OSDBU database was developed to identify small businesses that have indicated an interest in doing work with DOE. This database is a customized list that can assist the DOE program offices and procurement staffers identify potential bidders both at the prime and subcontract levels. In FY 2006, DOE added approximately 200 new small businesses to the database. Currently, the database has approximately 2,000 small businesses. The DOE small business database can be accessed at <https://hqlnc.doe.gov/registration>

L. Prepare Small Business Annual Report to the DOE Secretary and the SBA Administrator

DOE has gathered the necessary information for the preparation and submission of the FY 2006 Annual Report.

X. SMALL BUSINESS RESEARCH & TECHNOLOGY PROGRAMS

In addition to contracting with small businesses, other opportunities involving research and development, technology development and transfer technology are targeted to small business. The inclusion of this achievement provides a more accurate view of the Department's overall efforts on behalf of small business.

A. Small Business Innovation Research Program (SBIR)

The SBIR is managed by the Department's Office of Science, and supports small businesses with strong research capabilities in science or engineering areas critical to Departmental missions. In FY 2006, the SBIR program obligated about \$99,967,019 to small businesses to perform research and development of innovative advanced concepts aimed at addressing scientific or engineering problems.

For a list of SBIR projects, please visit

<http://www.science.doe.gov/sbir/newweb/awards.htm>

B. Small Business Technology Transfer Program (STTR)

The STTR is a competitively awarded, three-phase Federal Government program, designed to stimulate technological innovation and provide opportunities for small businesses. The STTR is managed by the Office of Science. It supports small businesses with strong research capabilities, and issues grants that involve substantial cooperative research collaboration between a small business and a non-profit research institution.

The total STTR agency obligations for FY 2006 amounted to \$12,162,300. Of this total, \$9,220,796 was for small businesses. The STTR projects were selected to cover a broad spectrum of energy-related research and development in the areas of electric transmission and distribution; biological and environmental research; fossil, fusion, and renewable energy; energy efficiency; high energy and nuclear physics; advance scientific and computing research; and basic energy sciences.

For a list of projects and additional information, visit: <http://www.science.doe.gov/sbir>.

XI. SMALL BUSINESS AWARDS AND SUCCESS STORIES

DOE has a variety of programs geared to support small business. The chart below reflects the total dollar value of small business awards made by the Department of Energy, followed by success stories of some of the awardees.

DOE FY 2005 Total Small Business Contributions

Activity/Programs	Value
Small Business Prime Contracts	\$ 1,206,041,000
Small Business Subcontracts	\$ 3,924,067,000
Small Business Innovation Research Program (SBIR)	\$ 99,967,000
Small Business Technology Transfer Program (STTR)	\$ 9,220,796
Total	\$ 5,239,295,815

Small Businesses are making great strides at DOE in the development of their business and technical lines, achievements which are not always reflected by statistics. They are often innovators and pacesetters in new technologies. Whether as a prime contractor or subcontractor, a protégé in a Mentor-Protégé relationship, or as a member of a team, these small businesses provide outstanding contributions to the DOE mission, often achieving savings and efficiencies for DOE. **EXHIBIT 1** includes a sampling of some of the premier small businesses with superior performance.

EXHIBITS

EXHIBIT 1

DOE Small Business Success Stories

1 Source Consulting, Inc.
7501 Forbes Boulevard
Suite 101
Seabrook, MD 20706-2252
www.1-sc.com
DUNS: 127896384
Certifications: SB, SDB, 8(a)

In December, 2005, DOE awarded a 7 year, \$1 billion award to Energy Enterprise Solutions, LLC (EES) in partnership with the Department of Energy's Most Efficient Organization (MEO), to support the Department's IT requirements as a result of the recently completed DOE A-76 IT Competitive Sourcing Study. EES, a small business joint venture, was between 1 Source Consulting, Inc. (<http://www.1-sc.com>) and 8(a) firm RS Information Systems (<http://www.rsis.com>) as part of an SBA certified Mentor Protégé agreement.

1 Source was formed in May 1999 and was certified by the US Small Business Administration as an 8(a) company in July 2000. Its corporate headquarters are located in Seabrook, Maryland, with satellite offices in Germantown, Maryland, and Washington, DC. It offers mission-critical Program Management and Oversight, Business Transformation, Software Engineering and Applications Development, Network Engineering and Management, Help Desk/Call Center and End-User Technical Support, and Systems Engineering and Technical Assistance.

The first contract ever awarded to 1 Source was in 1999 supporting the Department's Office of Science, providing application development and maintenance support. Since that time, 1 Source has provided support to a number of programs within DOE including: Office of Mathematical, Informational and Computational Sciences (ESNet Support and Maintenance), Office of the Chief Information Officer (Project eXCITE), Office of Environmental Management (Help Desk), Office of Independent and Oversight Assurance (Tier I, II, III support), Office of Science (ePME & Streamlining Departmental Grants Processes Initiative).

In conjunction with the DOE Federal IT workforce, this single integrated Federal/contractor solution is providing consolidated IT services, simple access, effective management, strengthened security, and improved performance by delivering services on time and with exemplary quality throughout DOE, its Federal stakeholder communities, and the American public. EES will support DOE in a wide range of information technology areas including enterprise architecture and capital investment planning, cyber-security, applications/ web design and engineering for DOE corporate systems, and technical support for the DOE IT Infrastructure and operations, including telecommunications, network engineering and operations, applications hosting, desktop

management and user support services. EES leads an integrated team of experienced DOE contractors including ASRC Airfield and Range Services Corporation, CNSI, and DSD Laboratories, Science Applications International Corporation (SAIC), Booz Allen Hamilton, Computer Sciences Corporation, e-Management, Highland Technology Services Inc., Project Performance Corporation and many others.

Fluid Controls and Components, Inc.

**455 St. Helens Avenue
Tacoma, WA 98404-2433
(253)383-3224**

www.fluidcontrols.net

DUNS: 128932303

Certifications: SB, SDB, HUBZone, Women Owned

Fluid Controls and Components, Inc. (FCCI), serves as a subcontractor to Bechtel National, Inc., at the Hanford Nuclear Reservation. As of 2006, FCCI contracted values are in the range of \$2.5 to \$3.5 million.

Fluid Controls and Components Inc. (FCCI) was formed in the spring of 2003. Individuals such as Carrie Brittain, Bechtel Small Business Advocate, helped educate, direct and encourage FCCI as well as other small companies to participate with Bechtel on the River Protection Project-Waste Treatment Plant (RPP-WTP) located on the Hanford Nuclear Reservation. After fulfilling the registration requirements for Bechtel National Inc., FCCI attended various supplier forums held at the project office. Each discipline was represented by specific individuals responsible for developing meaningful business relationships, with emphasis on small business arrangements.

Shortly thereafter, FCCI received its first inquiry and prepared a response which resulted in a \$900 purchase order for forged steel pipe. Although the profit was only \$90, this transaction eventually lead to a multi-million dollar contract.

Bechtel's involvement has assisted FCCI in developing relationships with other companies regarding similar industrial requirements. These groups include DOE, DOD, Parsons, Fluor and Worley Parsons. FCCI is currently exporting materials to Iraq for numerous reconstruction projects via these groups and supporting their North American requirements as well.

Integrated Solutions & Services, Inc.

**318 N Gay St. Suite 202
Knoxville, TN 37917-7515
(865) 524-5223**

www.intsolutions.net

DUNS: 067943477

Certifications: SB, HUBZone, Women Owned

On October 4, 2005, Oak Ridge Associated Universities (ORAU) extended a Mentor-

Protégé agreement to Integrated Solutions and Services, Inc. (ISS), a woman-owned small business located in a HUBZone in Knoxville, TN. ISS owner Vickie Dyer, ISS president Tom Jones and ORAU president Ron Townsend signed an agreement initiating a support relationship as provided under the U.S. Department of Energy's (DOE) Mentor-Protégé program.

Recently, ISS was awarded a \$1 million, one year waste management blanket contract with the M&O contractor at a DOE national security complex. Due to funding requirements, the project was fast tracked, and the first phase was completed in three weeks, a reduction from the estimated 15 week forecast. The scope of the project included establishing an assembly line where individual chemicals could be brought from all points inside the complex. The chemicals would be received and sorted for compatibility, packaged and loaded for transportation and disposed. The assembly line concept was so efficient that the customer management and the end users expanded the project scope and funded an additional half million to this project. Over 3,000 containers in total were sorted packaged and shipped in the three week period substantially reducing the administrative management cost to the national security complex customer.

ISS has been doing work with ORAU for the past year and supports several ORAU programs for both DOE and other government agencies. ISS's technical capabilities have increased tremendously over the last year. The firm has developed capabilities in several very complex service areas, such as health physics, toxicological services and modeling, and event planning/meeting management services. ISS is astute in recognizing specific capabilities required and ensuring that resources are made available to meet those requirements, even when the requirements necessitate staff expansion by nominee subcontractor.

KQ Services, Inc.
7274 Bankhead Hwy.
Suite B
Douglasville, GA 30134-1643
(770)489-0244
DUNS: 613387240
SBA Certifications: SB, SDB

KQ Services, Inc., is a Small Disadvantaged Business recently graduated from the Section 8(a) Program. They provide janitorial and building maintenance services and have been a Protégé of Washington Savannah River Co. (WSRC) since 2005.

KQ Services received a subcontract with Savannah River with a one year term and one option year. The total estimated cost for this scope was \$2.9 Million. Based upon KQ Services' performance during this subcontract, a Mentor-Protégé Agreement was entered into between KQ Services and WSRC.

During the term of the subcontract, a decision was made to restructure the subcontract to include additional scope. Since WSRC had a Mentor-Protégé Agreement in place with

KQ Services, a noncompetitive award was made to KQ Services to provide the additional scope and add three additional option years to the subcontract. The total estimated price for the additional scope and option years is \$11.4 Million.

This relationship has been very successful for both WSRC and KQ Services. Through the team effort, KQ Services has been afforded skills and opportunities in a strong safety oriented program that has allowed them to hone their skills in OSHA reporting requirements and other safety related programs. Based on customer satisfaction and their ability to meet deadlines, along with recommendations from SRS, KQ Services was recently awarded a subcontract at Fort Steward Army Base located in Fort Steward, Georgia, to provide janitorial services, including floor care services. The subcontract is a one year base with three option years. The total estimated price of the subcontract is \$1.8 Million.

KQ Services recently completed a contract at Fort Gordon, Georgia, in December 2005. They have had contracts at Fort Bragg, NC, Tyndall Air Force Base in Florida and Hurl Burt AFB in Florida. Based upon documentation received from KQ Services, the assistance given to KQ's business partners and the business relationship that KQ has established with their Mentor, WSRC has put KQ over the top and in position to be awarded the future contracts.

Randolph Construction Services, Inc
116 W. Bonneville Street
Pasco, WA 99301-5331
www.randolphcs.com
DUNS: 063864623
SBA Certifications: SB, SDB, 8(a)

Randolph Construction Services Inc. is a Small Disadvantaged, Woman-Owned, Veteran-Owned, 8(a), full service general construction firm that specializes in projects with unique requirements such as difficult site conditions, occupancy requirements and or extremely fast track schedules. Randolph demonstrates the skills and the philosophy that Fluor looks for in a small business, to groom to be a long term partner. In March of 2005, Fluor adopted Randolph in a formal DOE Mentor-Protégé Agreement. The relationship was carefully structured to ensure that it would provide real long term benefits to Randolph.

2005 was a year of tremendous growth for Randolph. Through this growth, Fluor has provided mentoring and assistance to Randolph in areas including: government cost accounting, general business and long term planning, development of a website, marketing assistance and proposal review, bonding capacity, and general business acumen. Specific areas of success are:

- Fluor provided Randolph's with an opportunity to embed themselves for an apprenticeship in a project management organization on one of Fluor's key initiatives. Randolph gained first hand experience in project management on a larger scale.

- With an introduction provided by Fluor Hanford, Randolph has secured a teaming arrangement on a large Air Force contract which Fluor was awarded. Randolph is a partner on a number of other proposals which Fluor is currently preparing.
- Randolph was awarded \$523K contract dollars in FY05. For FY06, pending funding approval, FH is poised to award a design build contract in excess of \$1 million dollars, and another similar project of approximately \$1.5M. Randolph has proven its ability to add value to our projects, which is leading to this increase in Hanford business volume.

In 2005, Randolph more than doubled its business from \$4.4 to \$10.4 million in annual sales. Such rapid growth for any company is difficult; for a small business, it can be fatal. Thanks to the tenacity of the woman in the President's chair, and in part to the guiding hand of Fluor, Randolph has survived and is growing ever stronger. Sales for 2006 are already at \$8M. Randolph was awarded the Mid-Columbia Small Business of the Year Silver Award in 2005 and 2006. Fluor is very proud of its Protégé, and is excited to see them grow into a valuable partner in our government arena.

White Shield, Inc.
2515 W. Falls Avenue
Kennewick, WA 99339-3041
(509)734-0789
www.whiteshield.com
DUNS: 097242234
SBA Certifications: SB, SDB, 8(a)

Under a \$6.5 Million Dollar subcontract with Bechtel National, White Shield Inc., is providing construction-surveying services for the Waste Vitrification Plant at the Hanford Nuclear Reservation. The project started October 2001 and is expected to last 10 years with an overall price tag over \$10 billion. This contract has permitted White Shield, Inc., to employ ten (10) experienced survey crews, survey managers and CADD support personnel to provide technical support for the industrial construction layout, GPS layout, and CADD operations.

White Shield, Inc. is supporting the construction of the Pretreatment Building, High-Level Waste Building, Low Activity Waste Building, Laboratories, in addition to the support and balance of facilities for this Department of Energy, River Protection Project. Due to the complex nature of this project, the surveying services require a high degree of competence and experience in industrial construction and GPS surveying techniques for the construction layout and the as-builds. Because the project is a nuclear processing facility the surveying is governed by the Price Anderson Act (PAAA) commission requirements, and the rigorous Nuclear Quality Assurance (NQA-1) standards. White Shield, Inc., is a Native American owned land surveying and environmental consulting firm established in 1978. The firm is owned and managed by Stuart Fricke, a member of the Arikara Tribe from Fort Berthold, North Dakota. The firm employs a staff of over thirty-five personnel located throughout the Pacific Northwest within two office locations. Experienced personnel include project managers, surveyors, construction

inspectors, environmental engineers, licensed hydrologists and geologists, environmental assessors, quality assurance professionals, CADD technicians and administrative support staff.

White Shield Inc. is Washington State Certified MBE, DBE and SBA 8(a) Certified and is active in various minority organizations such as the American Indian Council of Architects and Engineers (AICAE), The Northwest Minority Business Council and the Northwest Minority Supplier Development Council.

Environmental Management (EM) Large Contract Awards to Small Businesses

In FY 2006, EM made awards to the following small business firms:

- | | |
|---------------|---|
| October 2005 | A \$4.5 million small business set-aside contract was awarded to <u>Pecos Management Services, Inc.</u> , to provide independent reviews and evaluations of the design, construction and operation of the Waste Isolation Pilot Plant in Carlsbad, New Mexico. |
| October 2005 | A \$19.4 million Indefinite Delivery/Indefinite Quantity contract task order was awarded to <u>LATA-Sharp</u> for the completion of cleanup activities at the Ashtabula Closure Project in Ashtabula, Ohio. LATA-Sharp is a service-disabled veteran owned small business firm. |
| December 2005 | A \$191.6 million small business set-aside contract was awarded to <u>Paducah Remediation Services, LLC</u> , a joint venture between <u>Portage Environmental, Inc.</u> , an 8(a) small disadvantaged business, and Shaw Environmental, Inc. The contract is for environmental remediation and waste management at the Department's Paducah Gaseous Diffusion Plan in Paducah, Kentucky. |
