

The "Best Practice" Self-Audit

To assist your organization to better understand its current advanced asset management status, this year's Advanced Asset Management workshops include a "benchmarking" exercise. This exercise allows you to benchmark your agency's key asset management practices and activities against those deemed to be "world's best practices".

All attending agencies are invited to participate by completing a 'basic self-audit' questionnaire. Each of the exercise elements in the workshop will assist you to complete the questionnaire. At the end of all workshops, the returns will be aggregated and each agency that elects to participate will receive a basic benchmark report showing:

- ◆ How it rates against the best practice levels
- ◆ How the average agency attending the workshops rated, and
- ◆ A short report identifying the most critical areas for your organization using the "Australian Value Chain" approach.

All data will be remain anonymous.

If you wish to participate in this "benchmarking" exercise contact: Duncan.Rose@parsons.com
