

CHAPTER 7

GRITS/STAT GEOS MENU

7.1 Introduction

The **GRITS/STAT** GEOS code is still under development and is not included in this version.

When completed, **GRITS/STAT** GEOS will provide a database system similar in format to the **GRITS/STAT** Database, but will store well boring data and soil analyses. **GRITS/STAT** GEOS will operate in tandem with **GRITS/STAT** Database information on wells and well monitoring.

The GEOS Exporter function will export data from GEOS, not to GEOS.
