

## METHOD 207-2

### ANALYSIS FOR ISOCYANATES BY HIGH PERFORMANCE LIQUID CHROMATOGRAPHY (HPLC)

EPA's Office of Air Quality Planning and Standards (OAQPS) developed Method 207-2 for the determination of derivatized isocyanates collected using OAQPS Method 207-1. Go to <http://www.epa.gov/ttnemc01/tmethods.html> for a copy of Method 207-2, based on its current status (e.g., conditional, proposed, or promulgated).
