Figures .....	vii
Tables .....	x
Section Number	Page
1. Introduction .....	1
2. Short-Term Methods for Estimating Chronic Toxicity .....	3
Introduction .....	3
Types of Tests .....	5
Static Tests .....	5
Advantages and Disadvantages of Toxicity Test Types .....	6
3. Health and Safety .....	7
General Precautions .....	7
Safety Equipment .....	7
General Laboratory and Field Operations .....	7
Disease Prevention .....	8
Safety Manuals .....	8
Waste Disposal .....	8
4. Quality Assurance .....	9
Introduction .....	9
Facilities, Equipment, and Test Chambers .....	9
Test Organisms .....	9
Laboratory Water Used for Culturing and Test Dilution Water .....	9
Effluent and Receiving Water Sampling and Handling .....	10
Test Conditions .....	10
Quality of Test Organisms .....	10
Food Quality .....	11
Acceptability of Short-Term Chronic Toxicity Tests .....	11
Analytical Methods .....	11
Calibration and Standardization .....	12
Replication and Test Sensitivity .....	12
Variability in Toxicity Test Results .....	12
Test Precision .....	12
Demonstrating Acceptable Laboratory Performance .....	15
Documenting Ongoing Laboratory Performance .....	15
Reference Toxicants .....	16
Record Keeping .....	18
5. Facilities, Equipment, and Supplies .....	19
General Requirements .....	19
Test Chambers .....	20
Cleaning Test Chambers and Laboratory Apparatus .....	20
Apparatus and Equipment for Culturing and Toxicity Tests .....	21
Reagents and Consumable Materials .....	21
Test Organisms .....	21
Supplies .....	21
6. Test Organisms .....	22
Test Species .....	22

Sources of Test Organisms .....	22
Life Stage .....	23
Laboratory Culturing .....	24
Holding and Handling Test Organisms .....	24
Transportation to the Test Site .....	24
Test Organism Disposal .....	25
7. Dilution Water .....	26
Types of Dilution Water .....	26
Standard, Synthetic Dilution Water .....	26
Use of Receiving Water as Dilution Water .....	28
Use of Tap Water as Dilution Water .....	29
Dilution Water Holding .....	29
8. Effluent and Receiving Water Sampling, Sample Handling, and Sample Preparation for Toxicity Tests .....	30
Effluent Sampling .....	30
Effluent Sample Types .....	30
Effluent Sampling Recommendations .....	31
Receiving Water Sampling .....	31
Effluent and Receiving Water Sample Handling, Preservation, and Shipping .....	32
Sample Receiving .....	33
Persistence of Effluent Toxicity During Sample Shipment and Holding .....	33
Preparation of Effluent and Receiving Water Samples for Toxicity Tests .....	33
Preliminary Toxicity Range-Finding Tests .....	35
Multi-concentration (Definitive) Effluent Toxicity Tests .....	36
Receiving Water Tests .....	36
9. Chronic Toxicity Test Endpoints and Data Analysis .....	37
Endpoints .....	37
Relationship Between Endpoints Determined by Hypothesis Testing and Point Estimation Techniques .....	37
Precision .....	39
Data Analysis .....	39
Choice of Analysis .....	41
Hypothesis Tests .....	44
Point Estimation Techniques .....	45
10. Report Preparation and Test Review .....	47
Report Preparation .....	47
Test Review .....	49
11. Test Method: Fathead Minnow, <i>Pimephales promelas</i> , Larval	
Survival and Growth Test Method 1000.0 .....	53
Scope and Application .....	53
Summary of Method .....	53
Interferences .....	53
Safety .....	58
Apparatus and Equipment .....	58
Reagents and Consumable Materials .....	59
Effluent and Receiving Water Collection, Preservation, and Storage .....	65
Calibration and Standardization .....	65
Quality Control .....	65
Test Procedures .....	65
Summary of Test Conditions and Test Acceptability Criteria .....	72
Acceptability of Test Results .....	77
Data Analysis .....	77

Precision and Accuracy .....	106
12. Test Method: Fathead Minnow, <i>Pimephales promelas</i> , Embryo-larval	
Survival and Teratogenicity Test Method 1001.0 .....	112
Scope and Application .....	112
Summary of Method .....	112
Interferences .....	112
Safety .....	114
Apparatus and Equipment .....	114
Reagents and Consumable Materials .....	115
Effluent and Receiving Water Collection, Preservation, and Storage .....	116
Calibration and Standardization .....	116
Quality Control .....	117
Test Procedures .....	117
Summary of Test Conditions and Test Acceptability Criteria .....	124
Acceptability of Test Result .....	124
Data Analysis .....	128
Precision and Accuracy .....	136
13. Test Method: Daphnid, <i>Ceriodaphnia dubia</i> , Survival and	
Reproduction Test Method 1002.0 .....	141
Scope and Application .....	141
Summary of Method .....	141
Interferences .....	141
Safety .....	143
Apparatus and Equipment .....	143
Reagents and Consumable Materials .....	145
Effluent and Receiving Water Collection, Preservation, and Storage .....	154
Calibration and Standardization .....	154
Quality Control .....	154
Test Procedures .....	154
Summary of Test Conditions and Test Acceptability Criteria .....	161
Acceptability of Test Results .....	161
Data Analysis .....	166
Precision and Accuracy .....	189
14. Test Method: Green Alga, <i>Selenastrum capricornutum</i> , Growth	
Test Method 1003.0 .....	197
Scope and Application .....	197
Summary of Method .....	197
Interferences .....	197
Safety .....	197
Apparatus and Equipment .....	198
Reagents and Consumable Materials .....	199
Effluent and Receiving Water Collection, Preservation, and Storage .....	203
Calibration and Standardization .....	203
Quality Control .....	203
Test Procedures .....	203
Summary of Test Conditions and Test Acceptability Criteria .....	208
Acceptability of Test Results .....	208
Data Analysis .....	212
Precision and Accuracy .....	224

## FIGURES

### SECTIONS 1-10

Number	Page
1. Control charts . . . . .	17
2. Flowchart for statistical analysis of test data . . . . .	43

### SECTION 11

Number	Page
1. Data form for the fathead minnow, <i>Pimephales promelas</i> , larval survival and growth test. Routine chemical and physical determinations . . . . .	69
2. Mortality data for the fathead minnow, <i>Pimephales promelas</i> , larval survival and growth test . . . . .	71
3. Weight data for the fathead minnow, <i>Pimephales promelas</i> , larval survival and growth test . . . . .	73
4. Summary data for the fathead minnow, <i>Pimephales promelas</i> , larval survival and growth test . . . . .	74
5. Flowchart for statistical analysis of fathead minnow, <i>Pimephales promelas</i> , larval survival data by hypothesis testing . . . . .	79
6. Flowchart for statistical analysis of fathead minnow, <i>Pimephales promelas</i> , larval survival data by point estimation . . . . .	80
7. Plot of survival proportion data in Table 3 . . . . .	82
8. Output for USEPA Probit Analysis program, Version 1.5 . . . . .	91
9. Flowchart for statistical analysis of fathead minnow, <i>Pimephales promelas</i> , larval growth data . . . . .	92
10. Plot of weight data from fathead minnow, <i>Pimephales</i> <i>promelas</i> , larval survival and growth test for point estimate testing . . . . .	94
11. Plot of raw data, observed means, and smoothed means for the fathead minnow, <i>Pimephales promelas</i> , growth data in Tables 2 and 18 . . . . .	102

## SECTION 11 (Continued)

Number	Page
12. ICPIN program output for the IC25 .....	104
13. ICPIN program output for the IC50 .....	105

## SECTION 12

Number	Page
1. Data form for the fathead minnow, <i>Pimephales promelas</i> , embryo-larval survival and teratogenicity test. Routine chemical and physical determinations .....	120
2. Data form for the fathead minnow, <i>Pimephales promelas</i> , embryo-larval survival and teratogenicity test. Survival and terata data .....	122
3. Summary data for the fathead minnow, <i>Pimephales promelas</i> , embryo-larval survival and teratogenicity test .....	125
4. Flowchart for statistical analysis of fathead minnow, <i>Pimephales promelas</i> , embryo-larval data .....	129
5. Plot of fathead minnow, <i>Pimephales promelas</i> , total mortality data from the embryo-larval test .....	131
6. Output for USEPA Probit Analysis program, Version 1.5 .....	137

## SECTION 13

Number	Page
1. Examples of a test board and randomizing template .....	152
2. Data form for the daphnid, <i>Ceriodaphnia dubia</i> , survival and reproduction test. Routine chemical and physical determinations .....	159
3. Data form for the daphnid, <i>Ceriodaphnia dubia</i> , survival and reproduction test. Daily summary of data .....	162
4. Flowchart for statistical analysis of the daphnid, <i>Ceriodaphnia dubia</i> , survival data .....	168
5. Output for USEPA Trimmed Spearman-Karber program .....	172

## SECTION 13 (Continued)

Number		Page
6.	Flowchart for statistical analysis of the daphnid, <i>Ceriodaphnia dubia</i> , reproduction data .....	173
7.	Plot of number of young per adult female from a daphnid, <i>Ceriodaphnia dubia</i> , survival and reproduction test .....	174
8.	Plot of raw data, observed means, and smoothed means for the daphnid, <i>Ceriodaphnia dubia</i> , reproductive data .....	185
9.	Example of ICPIN program output for the IC25 .....	187
10.	Example of ICPIN program output for the IC50 .....	188

## SECTION 14

Number		Page
1.	Data form for the green alga, <i>Selenastrum capricornutum</i> , growth test. Routine chemical and physical determinations .....	206
2.	Data form for the green alga, <i>Selenastrum capricornutum</i> , growth test, cell density determinations .....	209
3.	Flowchart for statistical analysis of the green alga, <i>Selenastrum capricornutum</i> , growth response data .....	213
4.	Plot of $\log_{10}$ transformed cell count data from the green alga, <i>Selenastrum capricornutum</i> , growth response test in Table 4 .....	215
5.	Plot of raw data and observed means for the green alga, <i>Selenastrum capricornutum</i> , growth data .....	223
6.	ICPIN program output for the IC25 .....	226
7.	ICPIN program output for the IC50 .....	227

## TABLES

### SECTIONS 1-10

Number	Page
1. National interlaboratory study of chronic toxicity test precision, 1991: Summary of responses using a reference toxicant .....	13
2. National interlaboratory study of chronic toxicity test precision, 2000: Precision of responses using effluent, receiving water, and reference toxicant sample types .....	14
3. Preparation of synthetic freshwater using reagent grade chemicals .....	27
4. Preparation of synthetic freshwater using mineral water .....	28
5. Percent unionized NH <sub>3</sub> in aqueous ammonia solutions: Temperatures 15-26°C and pH 6.0-8.9 .....	35
6. Variability criteria (upper and lower PMSD bounds) for sublethal hypothesis testing endpoints submitted under NPDES permits .....	52

### SECTION 11

Number	Page
1. Summary of test conditions and test acceptability criteria for fathead minnow, <i>Pimephales promelas</i> , larval survival and growth toxicity tests with effluents and receiving waters (Test Method 1000.0) .....	75
2. Summary of survival and growth data for fathead minnow, <i>Pimephales promelas</i> , larvae exposed to a reference toxicant for seven days .....	77
3. Fathead minnow, <i>Pimephales promelas</i> , survival data .....	81
4. Centered observations for Shapiro-Wilk's example .....	83
5. Ordered centered observations for the Shapiro-Wilk's example .....	83
6. Coefficients and differences for Shapiro-Wilk's example .....	84
7. ANOVA table .....	86

## SECTION 11 (Continued)

Number		Page
8.	ANOVA table for Dunnett's Procedure example .....	87
9.	Calculated t values .....	88
10.	Data for Probit Analysis .....	90
11.	Fathead minnow, <i>Pimephales promelas</i> , growth data .....	93
12.	Centered observations for Shapiro-Wilk's example .....	93
13.	Ordered centered observations for Shapiro-Wilk's example .....	95
14.	Coefficients and differences for Shapiro-Wilk's example .....	96
15.	ANOVA table .....	98
16.	ANOVA table for Dunnett's Procedure example .....	99
17.	Calculated t values .....	100
18.	Fathead minnow, <i>Pimephales promelas</i> , mean growth response after smoothing .....	103
19.	Precision of the fathead minnow, <i>Pimephales promelas</i> , larval survival and growth test, using NaPCP as a reference toxicant .....	106
20.	Combined frequency distribution for survival NOECs for all laboratories .....	108
21.	Combined frequency distribution for weight NOECs for all laboratories .....	109
22.	Precision of point estimates for various sample types .....	110
23.	Frequency distribution of hypothesis testing results for various sample types .....	111

## SECTION 12

Number		Page
1.	Summary of test conditions and test acceptability criteria for fathead minnow, <i>Pimephales promelas</i> , embryo-larval survival and teratogenicity toxicity tests with effluents and receiving waters (Test Method 1001.0) .....	126

## SECTION 12 (Continued)

Number		Page
2.	Data from fathead minnow, <i>Pimephales promelas</i> , embryo-larval toxicity test with ground water effluent .....	130
3.	Fathead minnow, <i>Pimephales promelas</i> , embryo-larval total mortality data .....	132
4.	Centered observations for Shapiro-Wilk's example .....	132
5.	Ordered centered observations for the Shapiro-Wilk's example .....	133
6.	Coefficient and differences for the Shapiro-Wilks example .....	134
7.	Assigning ranks to the control and 3.125% effluent concentration for the Steel's Many-One Rank Test .....	135
8.	Table of ranks for Steel's Many-One Rank Test .....	135
9.	Rank sums .....	135
10.	Data for Probit Analysis .....	136
11.	Precision of the fathead minnow, <i>Pimephales promelas</i> , embryo-larval survival and teratogenicity test, using cadmium as a reference toxicant .....	138
12.	Precision of the fathead minnow, <i>Pimephales promelas</i> , embryo-larval, survival and teratogenicity toxicity test, using diquat as a reference toxicant .....	139
13.	Precision of the fathead minnow, <i>Pimephales promelas</i> , embryo-larval survival and teratogenicity static-renewal test conducted with trickling filter effluent .....	140

## SECTION 13

Number		Page
1.	Nutrient stock solutions for maintaining algal stock cultures .....	147
2.	Final concentration of macronutrients and micronutrients in the culture medium .....	148
3.	Summary of test conditions and test acceptability criteria for daphnid, <i>Ceriodaphnia dubia</i> , survival and reproduction toxicity tests with effluents and receiving waters (Test Method 1002.0) .....	164

SECTION 13 (Continued)

Number		Page
4.	Summary of survival and reproduction data for the daphnid, <i>Ceriodaphnia dubia</i> , exposed to an effluent for seven days .....	166
5.	Format of the 2x2 contingency table .....	169
6.	2x2 contingency table for control and 25% effluent .....	170
7.	Data for Trimmed Spearman-Karber Analysis .....	170
8.	The daphnid, <i>Ceriodaphnia dubia</i> , reproduction data .....	171
9.	Centered observations for Shapiro-Wilk's example .....	175
10.	Ordered centered observations for Shapiro-Wilk's example .....	177
11.	Coefficients and differences for Shapiro-Wilk's example .....	178
12.	ANOVA table .....	180
13.	ANOVA table for Dunnett's Procedure example .....	181
14.	Calculated t values .....	182
15.	Daphnid, <i>Ceriodaphnia dubia</i> , reproduction mean response after smoothing .....	184
16.	Single laboratory precision of the daphnid, <i>Ceriodaphnia dubia</i> , survival and reproduction test, using NaPCP as a reference toxicant .....	190
17.	The daphnid, <i>Ceriodaphnia dubia</i> , seven-day survival and reproduction test precision for a single laboratory using NaPCP as the reference toxicant .....	191
18.	Interlaboratory precision for the daphnid, <i>Ceriodaphnia dubia</i> , survival and reproduction test with copper spiked effluent .....	193
19.	Interlaboratory precision data for the daphnid, <i>Ceriodaphnia dubia</i> , summarized for eight reference toxicants and effluents .....	194
20.	Precision of point estimates for various sample types .....	195
21.	Frequency distribution of hypothesis testing results for various sample types .....	196

## SECTION 14

Number	Page
1. Nutrient stock solutions for maintaining algal stock cultures and test control cultures .....	201
2. Final concentration of macronutrients and micronutrients in the culture medium .....	202
3. Summary of test conditions and test acceptability criteria for green alga, <i>Selenastrum capricornutum</i> , growth toxicity tests with effluents and receiving waters (Test Method 1003.0) .....	210
4. Green alga, <i>Selenastrum capricornutum</i> , growth response data .....	212
5. Centered observations for Shapiro-Wilk's example .....	214
6. Ordered centered observations for Shapiro-Wilk's example .....	216
7. Coefficients and differences for Shapiro-Wilk's example .....	216
8. ANOVA table .....	218
9. ANOVA table for Dunnett's Procedure example .....	220
10. Calculated t values .....	220
11. Algal mean growth response after smoothing .....	222
12. Single laboratory precision of the green alga, <i>Selenastrum capricornutum</i> , 96-h toxicity tests, using the reference toxicant cadmium chloride .....	228
13. Precision of point estimates for various sample types .....	229
14. Frequency distribution of hypothesis testing results for various sample types .....	230
