

## **Ruminant Origin Meat-and-Bone Meal, Meat Meal, Bone Meal, and Tallow Not For Human Consumption**

These materials may be imported to Taiwan with a VS Form 16-4 with the standard declaration below plus the additional declaration below. No other statements should be made on the VS Form 16-4 for these products exported to Taiwan.

*“This is to certify that rinderpest, foot-and-mouth disease, hog cholera, swine vesicular disease, African swine fever, bovine spongiform encephalopathy, and contagious bovine pleuropneumonia do not exist in the United States of America.*

*The certified materials do not come from a BSE affected country.”*

### **Other Considerations**

- In order for Veterinary Services (VS) to make the certification that the materials do not come from BSE affected countries, VS must verify the country of origin of the materials.
- Export certificates for tallow must indicate in the “PRODUCT” description box, that the material is either “inedible” or “not for human consumption.”
