

CHAPTER 2.1.1.

EPIZOOTIC HAEMATOPOIETIC NECROSIS

Article 2.1.1.1.

For the purposes of this *Code*, susceptible host species for epizootic haematopoietic necrosis (EHN) are: redfin perch (*Perca fluviatilis*), rainbow trout (*Oncorhynchus mykiss*), Macquarie perch (*Macquaria australasica*), silver perch (*Bidyanus bidyanus*), mountain galaxias (*Galaxias olidus*), sheatfish (*Silurus glanis*), [and] catfish (*Ictalurus melas*), and mosquito fish (*Gambusia affinis*) and other species belonging to the family Poeciliidae.

Standards for diagnostic tests are described in the *Manual*.
