Overview

In this guide you will learn about:

1) Basic SmartWay information
2) Joining SmartWay Transport Partnership as a shipper company
3) Understanding the details of the SmartWay Partnership Agreement
4) Meeting software/hardware requirements for participating in the program, and
5) Gathering the necessary data to become a SmartWay Shipper Partner.

Please review this guide carefully BEFORE attempting to gather your company data, or enter data into the Shipper Tool. Understanding the basics of the program will simplify your joining process.
Section 1—Basic Information for Shippers

This section covers frequently asked questions and essential information about the SmartWay Transport Partnership and how shipper companies can participate.

WHAT IS THE SMARTWAY TRANSPORT PARTNERSHIP?

Developed jointly in 2003 by EPA and charter partners represented by industry stakeholders, environmental groups, American Trucking Associations, and Business for Social Responsibility, the SmartWay Transport Partnership is EPA’s flagship program for improving fuel efficiency and reducing greenhouse gases and air pollution from the transportation supply chain industry.

Seven types of freight transport companies can join SmartWay:

- Freight shippers
- Logistics companies (including 3PLs/4PLs1)
- Truck carriers
- Rail carriers
- Barge carriers
- Air carriers
- Multimodal carriers

Companies join the SmartWay Transport Partnership by submitting a partner tool to SmartWay. The SmartWay tools (1) assess freight operations; (2) calculate fuel consumption and carbon footprints; and (3) track fuel-efficiency and emission reductions. SmartWay tools must be submitted each year for the company to remain a partner in good standing. Tools submitted and approved on time qualify partners to use the SmartWay Logo.

SmartWay ranks Partners’ efficiency and environmental performance. Superior performance in various Partner categories is also recognized through the SmartWay Excellence Awards.

WHY DO SHIPPERS JOIN THE SMARTWAY TRANSPORT PARTNERSHIP?

The SmartWay Transport Partnership provides shipper companies with ways to reduce the environmental impact of their freight operations and address costs. Designed with and for the freight sector, the SmartWay Transport Partnership delivers solutions to marketplace needs and challenges. With access to the latest in EPA-tested technologies and peer-provided success stories, carriers that join the SmartWay Transport Partnership can gain a better understanding of their environmental footprint and assert their corporate leadership.

Additionally, SmartWay Partners are associated with an internationally recognized and respected brand that symbolizes cleaner, more efficient transportation choices.

1 3PLs/4PLs Third party logistics companies/fourth-party logistics companies.
Shipper companies that join SmartWay move significant amounts of freight with SmartWay Carriers. The higher efficiency of carriers in SmartWay compared to non-SmartWay carriers gives SmartWay shipper companies an opportunity to improve corporate freight efficiency, reduce their carbon footprint, and voluntarily advance freight sustainability for themselves and their customers.

Participation in SmartWay helps SmartWay Shipper Partners

- identify opportunities to improve efficiency,
- demonstrate efficiency to customers and stakeholders,
- evaluate and compare carrier performance, and
- determine the company’s transportation carbon footprint.

SmartWay provides shippers with free tools that help assess and compare various freight transportation options with detailed reports and analyses that support better business decision making.

**HOW DO SHIPPERS JOIN THE SMARTWAY TRANSPORT PARTNERSHIP?**

Shipper companies join SmartWay by submitting a SmartWay Shipper Tool (hereafter known as the “Shipper Tool,” or simply, the “Tool.”)

Shipper companies that submit tools that are approved by EPA are known as “SmartWay Shipper Company Partners.”

When a shipper company submits a Shipper Tool to EPA, they agree to the requirements stipulated in the SmartWay Shipper Partnership Agreement—notably, that they will measure and report the emissions performance of their company *annually* and provide supporting documentation to EPA upon request.

All SmartWay Shipper Partners agree to complete and submit the SmartWay Shipper Tool to

- define company composition,
- characterize company activity,
- individually benchmark multiple companies, and
- track annual changes in performance.

Upon approval of a Shipper Tool submission, a shipper company will be identified as a SmartWay Shipper Partner on EPA’s website, on the SmartWay Partner List, and in a database used to identify companies that meet SmartWay’s annual requirements. On-time submission and approval of the Tool also qualifies Shipper Partners for use of the SmartWay Logo. The carrier will also receive information on how to access its current SmartWay registration document and other information through the Partner Portal.
**HOW DO I JOIN IF MY PARENT COMPANY HAS MULTIPLE SUBSIDIARIES?**

Shippers with subsidiaries may submit a single tool for their parent company and all of its subsidiaries. If a shipper chooses to do this, the entire organization will be considered a SmartWay Partner and the performance rating will be assigned to the entire organization. The partner will be listed on the SmartWay website under the parent company’s name.

Individual subsidiaries may join as separate partners if the parent company wishes to have them listed individually on the SmartWay website. Each subsidiary would submit a separate tool.

_SmartWay highly recommends developing your list of subsidiary companies beforehand by using an organization chart or perhaps a customer interface web page. For example, evaluate how your organization contracts with carriers, identify your companies’ different NAICS codes, and determine how they choose what carriers to hire._

_The best strategy is to have a clear idea of how to define your companies before filling out the tool._

**WHAT DATA DO I NEED TO GATHER TO COMPLETE THE SHIPPER TOOL?**

To participate in SmartWay, shippers need to gather the following essential information to complete the Shipper Tool:

- SmartWay ID number (if this is not your first tool submission)
- The official company name to be used on the SmartWay website for public recognition of participation in SmartWay Company contact information
  - Contact details for your Working Contact
  - Contact details for an Executive Contact (cannot be the same as the working contact)
  - Contact details for your Sustainability Contact and Other contacts (optional)
- North American Industry Classification System (NAICS) codes for the company; and
- A comprehensive list of all SmartWay carriers that the shipper uses to haul their freight for the reporting calendar year (this list should include all truck, rail, multimodal, barge, air, and logistics companies hired by the shipper)

Additional information is required depending on the shipper’s selected level of participation. There are 4 ways shippers can participate in SmartWay. Way 1, the SmartWay Candidate level, is only for companies who want to learn more about SmartWay before joining as a SmartWay Shipper Partner. To become a SmartWay Shipper Partner, select Way 2, Way 3, or Way 4. Under Way 2, 3, or 4, shippers participate as full SmartWay partners and submit activity and performance data using the SmartWay Shipper Tool. Selecting Way 3 or 4 will qualify shippers to compete for an annual SmartWay performance award.
Way 2 data requirements:

- A non-mileage-based measure of how much business you do with each carrier. Examples include the amount of money you spend with each carrier, or the number of shipments per carrier;
- A description of the data sources used to compile the alternative activity metric

Note that Way 2 selection only provides shippers with a percent SmartWay score, not an emissions footprint, and will not qualify shippers for an annual SmartWay Award.

Way 3 data requirements:

- Activity data for all the carriers the shipper uses
  - Total miles contracted, ton-miles contracted, and/or average payload data for each SmartWay and non-SmartWay carrier
  - Description of data sources used to compile the activity data

Way 4 data requirements:

- All data required for Way 3 participation, plus at least one of the following:
  - Information to differentiate the freight the company moves with individual carriers by various methods, such as inbound versus outbound, domestic versus international, business unit, internal ID code, or other custom method
  - Information to evaluate company operational strategies eliminating miles or weight from their freight operations to reduce the shipper’s carbon footprint
  - Information to evaluate strategies to shift freight from one mode to another (e.g., from truck to rail)

This data should be provided for all of the shipper’s companies.

**WHAT IS INCLUDED IN THE SMARTWAY SHIPPER PARTNERSHIP AGREEMENT?**

To join the SmartWay Transport Partnership as a shipper company, you must agree to the language on the “Partnership Agreement for Shippers.” When you begin working within the tool, you will be asked to check a box stating that you agree to the terms of the partnership agreement. This agreement must be renewed annually.

Please review this language with the appropriate personnel within your organization before completing or submitting a Tool to EPA.
Partnership Agreement for Shippers

With this agreement, your company joins EPA’s SmartWay Transport Partnership and commits to:

1. Measure and report to EPA on an annual basis the emissions performance of your company using EPA’s SmartWay Shipper Tool. (Existing companies must report the 12 months of data for the prior year ending December 31. Newly formed companies require a minimum of 3 months of operational data.)
2. Agree to SmartWay listing your name on the SmartWay Transport Partnership website as a Partner company.
3. Agree to submit supporting documentation to EPA for any data used to complete this tool and agree to EPA audit of this data upon request by EPA.
4. Treat individual corporate data as sensitive business information.

In return, EPA commits to:

1. Promote company participation in the Partnership by posting Partner names on the EPA SmartWay website and in related educational, promotional, and media materials. EPA will obtain express written consent from the Partner before using the Partner’s name, other than in the context of increasing public awareness of its participation as described here.
2. Provide companies with industry-wide performance benchmark data as this data becomes available to EPA.
3. Assist Partners in achieving emission and fuel usage reduction goals (subject to Federal Government Appropriations).

General Terms

1. If the Partner or EPA defaults upon this agreement at any point, the agreement shall be considered null and void.
2. Either party can terminate the agreement at any time without prior notification or penalties or any further obligation.
3. EPA agrees not to comment publicly regarding the withdrawal of specific partners.
4. EPA reserves the right to suspend or revoke partner status for any Partner that fails to accomplish the specific actions to which it committed in the SmartWay Transport Partnership Agreement and subsequent Agreements.
5. The Partner agrees that it will not claim or imply that its participation in the SmartWay Transport Partnership constitutes EPA approval or endorsement of anything other than the Partner’s commitment to the program. The Partner will not make statements or imply that EPA endorses the purchase or sale of the Partner’s products and services or the views of the Partner.
6. Submittal of this SmartWay Shipper Tool constitutes agreement to all terms in this Partnership Agreement. No separate agreement need be submitted.

---

2 Individual corporate data will be treated as sensitive business information.
WHAT SOFTWARE & HARDWARE ARE REQUIRED TO COMPLETE THE SMARTWAY SHIPPER TOOL?

The Shipper Tool was designed in “Microsoft Excel Forms.” Completing the Shipper Tool requires the following software and hardware:

- A 2007 or later version of Microsoft Excel
- Excel security level set at Medium or lower
- A PC running Windows XP or newer operating system, or a Mac that is running the Windows XP operating system. The tool does not currently work using the Mac operating system.
- A minimum of 15 megabytes of free disk space. More disk space may be required based on the number of companies you define in your tool
- Adequate memory (RAM) to run Microsoft Office
- A monitor resolution of at least 1,024 x 768

NOTE: The Excel web application in MS Office 365 (the cloud-based version of the Office operating system) does not currently support the macros used in the SmartWay tools. Therefore, SmartWay tools do no function properly in Office 365 at this time.

Please check with the user specifications for your computer, online support, or your company’s IT department to make sure your system is set up to use the Shipper Tool.

We encourage you to make sure that your virus software is up to date, and to scan your PC before putting data in the Shipper Tool.

HOW TO SET SECURITY LEVELS FOR THE SMARTWAY TOOLS

In some cases, Microsoft Excel will ask you to adjust your security settings before opening the Tool. Instructions should appear on your screen if you need to change your security settings before running the Tool. The instructions differ depending upon what version of Excel you use (Excel 2007, 2010, 2013, or 2016).

Section 2—Overview of Shipper Data Collection and Input Requirements

This section will describe the data required for completing the required sections of the Shipper Tool.

INTRODUCTORY SCREENS

Upon opening the 2018 Shipper Tool you will see a Welcome screen. Next you will find several Introduction screens. If you are not familiar with the Tool, or if you wish to review the basic organization and functions of the Tool, these screens can help you become oriented. The Assistance for New Users screen appears first, and allows users to view an orientation video. Additional screens may be accessed from this screen including data collection needs, Tool help and navigation, the SmartWay Partner Schedule for 2018, and a link to the SmartWay website. These are general information screens and may be skipped if you are already familiar with the Tool. However, upon proceeding you MUST select the box at the bottom of the Partnership Agreement screen, indicating that you agree to the terms of the Partnership Agreement.

Before proceeding to the Home screen you will see an Auto-population screen. This screen allows partners to input their SmartWay ID and automatically upload the information for the initial steps of the Tool (Partner Name, Contact Information, and, for existing partners, Shipper Company Description(s)), based on the prior year’s submittal or, for new partners, information submitted through the on-line SmartWay Portal. This option can save time and ensure naming consistency for your contacts and subsidiary companies from year to year. If you do not have a SmartWay ID, or prefer to enter this data manually, you may skip this step.

ESTABLISHING YOUR DATA COLLECTION YEAR

Before beginning your data collection, identify the last calendar year for which you have full annual (12 months) data. This means that you have data from January of the calendar year through December of the same year. If you are a new SmartWay partner and do not have a full year of operational data, please collect a minimum of three months’ data for input into the SmartWay tool. In your next update year, you will be required to submit a full year’s data.

STEP 1: SPECIFY OFFICIAL PARTNER NAME

Your Partner Name is the official name that your customers would recognize for your company.

You must specify your company’s official Partner Name, exactly as you want it to appear on the SmartWay website.

For example, if you enter

- ABC Company,
- ABC Company, Inc., or
- ABC COMPANY LLC
Your company will be listed exactly as you’ve entered above. Therefore, it is important to pay special attention to proper capitalization, abbreviations, annotations, and punctuation.

If you selected the auto-populate option please review the Partner Name as it appears on the screen, revising it as necessary.

**STEP 2: ENTER CONTACT INFORMATION**

The SmartWay Tool asks for:

- **General company information** such as location, web address, phone number, etc.
- **A Working Contact**\(^3\) for any questions about your company’s participation and Tool submissions
- **An Executive Contact**\(^4\) for participation in awards and recognition events
- **A Sustainability Contact**\(^5\) (optional), such as the company Sustainability Officer (may be the same as the Working or Executive Contact)
- **Additional contacts (optional):** Additional contacts may include anyone who is not the Working Contact but may be involved with SmartWay (e.g., press/media contact, fleet manager, etc.).

Note the Working and Executive contacts must be different. SmartWay recommends developing an internal succession plan to make sure that your Shipper Tool submission schedule is maintained, in the event that a Working Contact is reassigned, or leaves the company for any reason. Please use Worksheet #1 in Appendix A of this document to help you prepare your company’s contact information.

**STEP 3: DEFINE YOUR SHIPPER COMPANIES (COMPANY DESCRIPTION(S))**

The Shipper Tool tracks shipping operations at the company level. Most partners should create one company, i.e. one line.

However, if you have multiple subsidiary companies all with separate corporate identities and transportation systems, you may want to create multiple company records in the tool and characterize their carrier operations individually.

---

\(^3\) The Working Contact is the individual designated by the executive contact to directly interface with SmartWay regarding specific tasks involved in the timely submission of the Tool. The Working Contact is responsible for coordinating the assembly of information to complete/update company data; completing and updating the Tool itself; maintaining direct communication with SmartWay; and keeping interested parties within the company apprised of relevant developments with SmartWay. (NOTE: To ensure that emails from SmartWay/EPA are not blocked, new Working Contacts may need to add SmartWay/EPA to their preferred list of trusted sources.)

\(^4\) The Executive Contact is the company executive who is responsible for agreeing to the requirements in the SmartWay Partnership Agreement, overseeing the Working Contact (as appropriate), and ensuring the timely submission of the Tool to SmartWay. The Executive Contact also represents the company at awards/recognition events. This person should be a Vice President or higher-level representative for the company.

\(^5\) The Sustainability Contact is responsible for monitoring and improving the company’s environmental performance.
Note that if you participate at the Way 4 level, you will also have the option of further refining your transportation activity for each company by internally tracking different business units, inbound/outbound/internal freight, and domestic versus international freight within the company’s carrier data identification; therefore, there is no need to list different internal divisions, product lines, etc. as separate companies.

NOTE: Your Subsidiary Company Names will NOT appear on the SmartWay website, only your Partner Name. If you wish to have your companies/subsidiaries appear separately on the SmartWay website, please submit separate tools for each to EPA.

**Data Requirements for “Company Characterization” Screen**

For each shipper company, you will need to specify:

- **Company Name(s):** Name your companies, beginning with your Partner Name followed by the specific company name.

- **NAICS Code(s):** NAICS, or North American Industry Classification System codes, are the Federal standard for classifying businesses by activity type. NAICS codes can be up to six digits in length. Use the NAICS code(s) that most appropriately describes your company. Note: some large companies with multiple operations may only use two or three digit NAICS codes; in this case, you do not have to enter the full six digits. Detailed information can be found at [http://www.census.gov/eos/www/naics/](http://www.census.gov/eos/www/naics/).

**STEP 4: DOWNLOAD THE LATEST CARRIER DATA FILE**

To ensure that the Shipper Tool gives you the most current list of SmartWay carriers to select from, you must select the **Download Latest SmartWay Carrier Data File** button on the **Home** screen. A new box will appear next to the button indicating the “Date of Current Carrier File.” You are now ready to go on to selecting carriers and entering activity data for each shipper company.

You will not be able to input the required shipper company data in Step 5 without this file. You must have an active Internet connection to perform this step.

**STEP 5: SPECIFY PARTICIPATION LEVEL AND DATA INPUT METHOD**

No data are needed to complete this step, however you must choose the level at which you wish to participate and select how you would like to input data into the Tool. These choices will affect data needed to complete the following sections. On the **Participation Level** screen, you have the option to choose to participate at the Way 2, Way 3, or Way 4 level. The table below summarizes the three options and describes the benefits, inputs needed, and the input methods available.
<table>
<thead>
<tr>
<th>Option</th>
<th>Way 2: Basic Freight Assessment</th>
<th>Way 3: Standard Freight Assessment</th>
<th>Way 4: Advanced Freight Assessment</th>
</tr>
</thead>
<tbody>
<tr>
<td>Best for:</td>
<td>Shippers with limited data that want to start freight efficiency planning.</td>
<td>Shippers that want a freight emissions footprint to guide their freight decision making.</td>
<td>Shippers that want a more-detailed freight emissions footprint and added analysis.</td>
</tr>
<tr>
<td>Inputs needed:</td>
<td>Carrier names and relative data (e.g., amount spent, number of shipments, volume shipped, or another custom metric)</td>
<td>Carrier names; mileage, ton-miles and/or payload data per carrier</td>
<td>Carrier names; mileage, ton-miles and/or payload data per carrier; and additional operational strategies and mode split data</td>
</tr>
<tr>
<td>Benefits:</td>
<td>Manual only</td>
<td>Manual or data import</td>
<td>Manual or data import</td>
</tr>
<tr>
<td></td>
<td>Define a relative freight performance metric (% SmartWay)</td>
<td>Build a freight performance assessment based on per carrier mileage and payload</td>
<td>The ability to:</td>
</tr>
<tr>
<td></td>
<td>Be recognized as a Smartway Partner</td>
<td>Compete for recognition through the SmartWay Excellence Awards</td>
<td>Subdivide freight activity based on inbound vs outbound, domestic vs international, discrete business units, and/or other criteria</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td>Compare emissions savings from various mode and operational strategy changes</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td>Receive additional credit for SmartWay Excellence Award</td>
</tr>
</tbody>
</table>

**STEP 6: ENTER DATA FOR EACH OF YOUR COMPANIES**

Next you will identify the carriers included in each of your shipper companies, and then enter either detailed activity data or relative carrier data depending on the Participation Level you selected in the previous section. The screens you must complete will depend on the Participation Level and Data Input Method you specified in the previous section.

**Select Shipper Company for Data Entry**

On the Home screen, you will now see all the shipper companies you created listed in the window below item # 5: Data Entry. There will be a status message after each company, indicating whether or not the data entry for that company is complete. The following information may appear beside a company name:

- **Not checked** - Data has not been entered yet.
- **Incomplete** - Some data is still missing and/or inconsistent.
- **Complete** - All data requirements have been met and validation has occurred.
In addition to the status indicators above, you may also see one of two qualifiers: “Errors” or “Warnings.”

- **Errors** will prevent you from generating the metrics reports under the Review Your Results section and must be addressed before you can submit your Tool to EPA.
- **Warnings** will still allow you to proceed and submit your data to EPA. However, it is strongly recommended that you carefully review each warning message before sending your data to EPA so that you can anticipate questions that may come from a Partner Account Manager as a result of your data being outside the expected ranges. The method addressing errors and warnings is described for subsequent input screens in the following sections.

To add data to a particular company, highlight the company name and then double-click. You will then proceed to the Tool **Data Entry Screens**.

**Input Carriers Screens**

In this section, you must specify the carriers that your shipper company uses. There are different methods to select carriers depending on your level of participation and input method. Regardless of the method you choose you will need to first identify the mode of transport for the carrier. Six carrier mode selections are available, including:

- Rail
- Truck
- Multimodal
- Logistics
- Barge
- Air

Next, you may also specify a SmartWay Category for the Truck and Multimodal modes. Truck SmartWay Categories include:

- Auto Carrier
- Dray
- Expedited
- Flatbed
- Heavy/Bulk
- LTL Dry Van
- Mixed
- Moving
- Package
- Refrigerated
- Specialized
- Tanker
- TL Dry Van

Multimodal SmartWay Categories include:
- Surface
- Surface-Air
- Surface Marine
- Surface-Air-Marine

SmartWay Category selections are not currently available for other modes but may be added in the future.

After identifying the mode (and SmartWay Category, if available), you should identify each carrier’s specific fleet name, listed in the SmartWay Carrier Data file, along with any associated SCACs, DOT numbers, MCNs, and NSCs.

After identifying your SmartWay carriers, you must also enter the number of non-SmartWay carriers used by the shipper company. *Only include carriers used during the reporting year.* If the company has non-SmartWay carriers, you will also select the carrier mode(s) associated with the non-SmartWay carrier(s). For truck carriers, specify the appropriate carrier type (e.g., non-SmartWay Dray). If you are not sure of the appropriate truck carrier type, select the “General” option.

Details on data entry and which screens you will have to complete depending on your participation level and input method selections are described in the Data Entry section below.

**Carrier Subdivision Screen**

NOTE: This screen is only applicable to the Way 4 participation level.

If you selected the Way 4 participation level, you may specify supplemental information to help you further characterize your carrier use on this screen. For example, you can designate certain carriers used for domestic or international routes. The optional information may be applied to any carrier and include the following:

- Company Identifier
- ID Code
- Inbound/Outbound/Internal
- Domestic/International
- Internal Shipper Segment 1
- Internal Shipper Segment 2

*You must complete this screen, the Mile & Weight Improvements screen, or the Modal Shift Impacts screen if you selected the Way 4 level.*

**Activity Data Screen**

NOTE: This screen is only applicable to the Way 3 and Way 4 level.

First provide detailed text describing the Data Source(s) used to estimate your mileage and ton-mile data for your carriers. Be sure to indicate how you calculated the values, and where this data was obtained.
Next, identify any carrier fleets operated directly by the shipper company by checking the Shipper Carrier box. This allows the Tool to exclude these carriers from the Scope 3 emissions calculations provided in the Public Disclosure Report. See the Shipper Tool Technical Documentation for further details on the Public Disclosure Reports.

Next specify a Data Availability option for each carrier. There are four Data Availability options:

- a - Ton-miles and Total miles (preferred option),
- b - Ton-miles and Average Payload,
- c - Total miles and Average Payload, and
- d - Total miles only

You should use the option for which you have the most reliable data:

- If you have reliable data for both ton-miles and miles, you should select Option a.
- If you don’t have reliable miles data, but do have reliable ton-mile data, select Option b.
- If you don’t have reliable ton-miles data, but do have reliable miles data, select from options c or d.

NOTE: LTL and Package carriers may not select Option d, due to the importance of estimating precise payloads for these carrier types.

Choose the method that uses the most accurate data at your disposal for each carrier. In this way the Tool will utilize the most accurate data available for the ton-mile and mile comparison metrics as well as for the emissions footprint calculations.

After specifying the Data Availability Option, record your activity data.

If the carrier mode is rail, record total railcar-miles, or if barge, then record barge-miles, otherwise specify total truckload-miles. Enter the data to the nearest whole number.

Data Availability Option a – Enter total ton-miles and total miles. Total miles corresponds to truck miles, railcar miles, or barge miles, as appropriate. For rail carriers, DO NOT enter train miles, and for barge carriers, DO NOT enter miles for the entire string of barges – enter the sum of miles for each individual railcar and/or barge load.

Data Availability Option b - Enter total ton-miles along with your estimated average payload (per truck or railcar, as appropriate) in short tons (2,000 lbs.)

Data Availability Option c - Enter total miles along with your estimated average payload (per truck, barge or railcar, as appropriate) in short tons (2,000 lbs.)

Data Availability Option d - Enter total miles.
IMPORTANT: Correctly calculating Ton-Miles is critically important for the accurate
determination of your carbon footprint.

You can calculate your company’s ton-miles as follows:

Enter the ton-miles hauled per year attributable to each carrier. A ton-mile is one ton moving one
mile. DO NOT ESTIMATE TON-MILES BY SIMPLY MULTIPLYING TOTAL MILES BY TOTAL TONS - this
calculation effectively assumes your entire tonnage is transported on EACH AND EVERY truck, and will
clearly overstate your ton-miles.

There are two ways to calculate ton-miles:

1. Companies can determine their average payload per carrier, multiply the average payload by
the total miles per carrier, and sum the results for all carriers for the reporting year; or

2. Set Ton-miles per carrier = (total miles per carrier x total tons per carrier) / total # of trips per carrier

To check your estimate, divide ton-miles by miles. The result is your fleet-average payload. If this
number is not reasonable, please check your calculations.

% SmartWay Screen

The % SmartWay screen calculates your % SmartWay Value, reflecting the fraction of miles, ton-miles,
or user-provided custom metric attributable to SmartWay carrier partners.

The % SmartWay Value is used to help determine eligibility for SmartWay Excellence Awards for Way 3
and Way 4 participants.

Carriers identified in the Input Carriers screens are automatically carried over to this screen. If you
selected the Way 3 or Way 4 participation level, the fractional mileage and ton-mile amounts
attributable to each carrier are also shown here and may be used as weighting factors across your
carriers to calculate your % SmartWay Value. There are no data requirements if you select to use ton-
miles or total miles as the weighting factor on this screen.

If you selected the Way 2 participation level or would like to use something other than ton-miles or total
miles, you must specify an alternative weighting factor to apply across the different carriers, such as the
percentage of total payments, the percentage of total weight or total packages, or an alternative
“custom” for calculating your % SmartWay Value. In this case you must enter the type of data you use
for your percentage allocation estimates using the drop-down menu at the top of the screen, and then
enter the percent allocated to each carrier. Percentages must sum to 100. You must also document the
custom factor methodology in the text box presented at the lower left of the screen.
Note: If you are participating at the Way 2 level, you will not see the Ton-Mile or Total Mile columns presented on the % SmartWay screen.

**Mile & Weight Improvements Screen**

NOTE: This screen is only applicable to the Way 4 participation level.

This screen allows users to estimate the emissions savings impacts for a range of activities and best practices which impact the emission footprint of the transportation supply chain (e.g., reducing miles traveled in the transportation network through route or cube optimization, or reducing weight through package reduction, among others). You should have data about your company’s activities or possible activities to complete this screen. You must complete this screen, the Carrier Subdivision screen, or the Modal Shift Impacts screen if you selected the Way 4 level.

**Modal Shift Impacts Screen**

NOTE: This screen is only applicable to the Way 4 participation level.

The Modal Shift Impacts screen allows partners to evaluate the emissions impact of moving to different modes (e.g. truck-to-rail or rail-to-barge). You need data about potential modal shifts in order to complete this screen. You must complete this screen, the Carrier Subdivision screen, or the Mile & Weight Improvements screen if you selected the Way 4 level.

**STEP 7: REVIEW YOUR RESULTS**

Now that you have identified your carriers and provided the required activity information, you must examine your company’s emission performance and mass emission estimates by selecting the Review Your Results button under Step 6 on the Home screen. Carefully review the three reports shown on the Emissions Summary, Carrier Performance, and Truck Carrier Performance (SmartWay Category Detail) screens. These reports provide high level emissions and performance summaries as well as detailed breakouts by mode and for specific carriers, as well as by other category groupings. Review the results carefully for any anomalous results that may indicate possible carrier and/or activity data entry errors.

You will not be allowed to proceed through the Tool until you view each of these three screens. Once complete you can return to the Home screen.

**ADDITIONAL SMARTWAY RESOURCES**

After completing Steps 1 – 7 on the Home screen, EPA strongly encourages you to explore the optional sections of the Tool available at the bottom of the screen before completing your submission. Four options are provided in this section including the following.
**View Summary Data Reports** – this button gives you access to 14 reports to help you understand your data and use it to make better performance decisions, including the new **Public Disclosure Report** containing Scope 3 emissions.

**Feedback and Recruiting Assistance** – On the **Suggestions** screen, you may respond to some or all of these questions in order to provide feedback regarding the various aspects of the SmartWay program. SmartWay values your feedback. Any information you provide will be used to improve the program, and will be kept confidential. Use the scroll bar to the right to display additional questions. On the **Recruiting Targets** screen, you may select up to 10 of your largest non-SmartWay carriers to help target companies for potential recruitment into the program.

**Year-to-Year Performance** - The **Year-to-Year Performance Report** allows the user to compare the company characteristics and activity values, as well as performance metrics for the current year with those of the prior year. This report is particularly helpful in identifying any changes that may have occurred since your last reporting period, determining trends in activity and performance over multiple years, and performing general quality assurance of the inputs used for your current Tool.

**Visit the Partner Portal** - You may select the **Visit the SmartWay Partner Portal** button which will open a web browser to the login page of the **EPA SmartWay Portal**. The portal provides access to a range of useful documents and functions including the partner registration document, the SmartWay Partner Logo, a sample press release, an online version of the feedback survey, and Awards information if applicable.

**STEP 8: GENERATE DATA FILE FOR EPA**

Once data entry is successfully completed you will generate a file in XML format to send to EPA.
Next Steps

Your next step is to download the detailed Shipper Tool User Guide and the Tool itself to begin completing your Shipper Tool submission.

Please visit https://www.epa.gov/smartway/smartway-shipper-partner-tools-and-resources for additional resources, including data collection worksheets and video tutorials.
