Planning Your Recovery Month Event

Special events are one of the most visible ways communities celebrate National Alcohol and Drug Addiction Recovery Month (Recovery Month). You can participate this year by planning an event in your local area to raise awareness about the treatment of and recovery from substance use disorders. By participating, you can help sustain the Recovery Month mission of encouraging all people to seek treatment for substance use disorders, celebrating individuals and families in long-term recovery, and acknowledging those working in the field who provide recovery services. You, along with the Substance Abuse and Mental Health Services Administration’s (SAMHSA’s) Center for Substance Abuse Treatment (CSAT), within the U.S. Department of Health and Human Services, can help improve the lives of those suffering from addiction.

This year’s theme, “Join the Voices for Recovery: Now More Than Ever!,” emphasizes how high levels of stress, especially endured by public safety officials, people in the workforce, older adults, and families, may contribute to or exacerbate alcohol and/or drug use, which can lead to a substance use disorder or relapse. Recovery Month is an essential element of one of SAMHSA’s 10 Strategic Initiatives that focuses on public awareness and support. The goal of this initiative is to increase the understanding of mental and substance use disorder prevention and treatment services to achieve the full potential of prevention, and help people recognize and seek assistance for these health conditions with the same urgency as any other health condition.

This document includes sample events to consider, possible goals for those events, and planning tips to organize a successful Recovery Month event. Through informative, educational, and celebratory events, individuals who need treatment may be encouraged to seek help and celebrate colleagues and friends who have achieved long-term recovery.

Planning Your Event

Recovery Month events can encompass a variety of activities, such as festivals, recovery worship services, recovery walks and 5K races, town-hall meetings, and local rallies. In 2009, more than 1,000 Recovery Month events were held, including the 2nd Annual Washington Recovery Rally in Washington, DC, featuring an afternoon of live jazz, recovery stories, exhibits, and refreshments. The first step of planning your event is to decide which type of event will be most successful in your community. For example, a 5K race may be popular in a large city where there are many participants and widespread media coverage, while a smaller town may benefit from a festival or a picnic in the town square. All events, big or small, aid in opening a dialogue about the detrimental effects that stress and alcohol and/or drug use can have on people across the country, as well as spread the positive message that treatment is effective and recovery is possible. Create your own event idea, tailor events from previous years listed on the Recovery Month Web site, or use the following examples to serve your community’s needs. Raising public awareness and support to increase understanding of substance use and mental health disorders, and treatment and recovery services is one of SAMHSA’s 10 Strategic Initiatives. It was created to ensure individuals seek help with the same urgency as any other health conditions.

TOOLKIT TIP

Refer to the “Guide to Interacting With the Media and Gaining Attention For Your Event” piece in this toolkit for specific publicity tips.
media outreach

Walk or run – Because exercise is a positive way to combat stress, this is an ideal way to link this year’s theme of stress and alcohol and/or drug use to your event and attract the broader public. Encourage participants to walk or run in celebration of those in recovery.

Festival – This can be a free community event intended to raise awareness and can include music, a job fair, fitness classes, carnival rides, informational booths, raffle prizes, testimonies, and keynote speakers such as elected officials and people in your community in long-term recovery. During a previous Recovery Month campaign, one community held a fair providing free health care services for the entire family and handed out information about substance use prevention and treatment.

Prayer weekend – Churches and places of worship may be important to some in their personal treatment and recovery plan, and can provide hope or strength for individuals and their families who are in recovery. Also, some people find that attending religious services helps combat stress and provide a sense of peace.

Town-hall meeting – This informal public gathering allows all community members to voice their opinions, tell their stories, and hear responses directly from public figures or elected officials. These assemblies also can be held to educate public officials on current trends in the field and ways addiction affects their community. Encourage participating public officials to issue a Recovery Month proclamation to raise additional awareness. Refer to “Maximizing Outreach Through Town Halls: A Planning Guide” for step-by-step instructions for planning an effective town hall meeting.

Rally – Gathering people to generate enthusiasm on a specific topic will raise awareness of local addiction treatment and recovery issues. Additionally, rallies highlight the community’s need for prevention and treatment resources. They also celebrate individuals who are in recovery and those who work in the field. Previous Recovery Month rallies have been hosted by celebrity emcees and held in conjunction with a 5K walk or run or a concert.

Webinar or other online event – Online events, such as a Webinar or Webcast featuring experts talking about treatment options, including e-therapy services, give participants the opportunity to confidentially interact “live” with professionals and their peers. Additionally, the audience can encompass people from the entire country. Remember to provide log-in information to all participants if necessary and provide them with additional Recovery Month resources after your event.

In addition to the above events, consider joining forces with other organizations to build on existing programs where you can hand out educational information, set up a display regarding addiction treatment and recovery, and connect individuals with needed resources available in your community.

TOOLKIT TIP
Refer to the “Official Proclamations” piece for information on how to involve government officials in your celebration.

TOOLKIT TIP
Refer to the “Building Community Coalitions” piece for more information on developing a partnership for your event.
Goals of Your Event

While you plan your activities, keep in mind the objectives of your event. The foremost goal should be to educate the overall community about addiction and the diverse local and national treatment and recovery resources available. It is important to encourage colleagues, friends, and family members of those in need to provide them with the necessary resources to seek treatment. In addition, including individuals in long-term recovery and their families in your event provides positive examples of the possibility of recovery. Your event should:

- **Distinguish itself from similar events.** Create a unique theme, message, and design to differentiate your event from other activities in your area. If possible, schedule your event so it doesn’t conflict with similar activities, or partner with other organizations to reach a broader audience and increase attendance and chances of media coverage. Also, check out event postings in your newspaper’s community calendar or online at http://www.charityhappenings.org, a master calendar of nonprofit events, galas, and benefits. Remember to search for local conflicts on http://www.recoverymonth.gov and post your event on the Recovery Month Web site for additional publicity. Most importantly, be sure to brand your event as a Recovery Month event and place the Recovery Month logo on your materials and banners next to your organization’s sponsor logos.

- **Garner press coverage.** Media coverage of your event can increase your organization’s name recognition, ultimately helping to drive more people to seek help and become more knowledgeable about recovery.

- **Turn your volunteers and attendees into advocates for your cause.** Your event should be a starting point for creating a dialogue between the community and your organization. After your event, participants should be more informed about substance use disorders and can help spread your message to friends and family. Follow up with them after the event to determine other activities they may undertake. If you partnered with other organizations, expand those relationships to network and educate others year-round about the effectiveness of treatment and the possibility of recovery.

**TOOLKIT TIP**

Use the Recovery Month logo, which can be found in the “Media Outreach” section on the Web site, on all materials to create a common theme and brand. Remember to post your events on the Recovery Month Web site at http://www.recoverymonth.gov.

**TOOLKIT TIP**

Refer to the “Press Materials for Your Recovery Month Event” piece for information on tailoring a Recovery Month press release or media advisory for your event.
Planning a Successful Event

The following steps can aid in the planning process and help you organize a successful Recovery Month event:

- **Form a committee** that meets regularly and select a chairperson to serve as spokesperson and leader of the group. This group can work together to plan a Recovery Month event and should develop a master plan and timeline of deliverables.

- **Determine your budget** in the early stages of planning. Don’t forget to think realistically and plan for any hidden costs that you may encounter. Include in this estimate fundraising opportunities such as sponsorship and ticket sales, as well as any expenses for permits and licenses, food and beverages, rentals for seating, music or entertainment, audio/visual equipment, invitations, and decorations.

- **Consider logistics** and identify the venue, date, and size of your event based on available resources. After you decide what kind of event to hold, reserve your venue and secure any necessary permits so that you can move forward with the process. It is crucial to work with town or city officials, particularly if an event uses a public space. Permits, police detail, public safety needs, and insurance to cover any accidents are better addressed earlier rather than later. Additionally, your committee has to decide how many volunteers will be needed on-site at the event and establish whether speakers and moderators will be needed.

- **Meet with potential partners**, including local businesses, key leaders, organizations, and media contacts who may consider sponsoring the event. These partners may choose to participate in your event, help raise community awareness, or support your cause financially.

**TOOLKIT TIP**

Refer to the “Building Community Coalitions” document of this toolkit, as well as the SAMHSA “Fundraising Guide” for additional information.
media outreach

- **Formulate a publicity plan** by deciding when and how to contact media to invite them to your event.

- **Prepare printed materials** for use prior to the event date, as well as materials that will be distributed on-site. These materials should highlight the current landscape of addiction, how stress can influence substance use disorders, as well as treatment and recovery resources. Materials may include flyers, brochures, banners, and fact sheets and should emphasize issues relevant to your community.

---

**TOOLKIT TIP**

Refer to the “Guide for Interacting with the Media” piece for more background information on how to publicize your event.

---

- **Hold a meeting** a week before the event to ensure that all loose ends are wrapped up. Review the responsibilities of committee members at the event and discuss any additional assignments. Answer any outstanding questions from the committee.

- **Set up booths or multimedia needs prior to your event** and ensure that all special equipment works properly. Remember that technical problems can occur, and all committee members and volunteers should know how to handle a problem should the situation arise. Additionally, provide speakers or moderators with an agenda or directions that will help them prepare for the event. Arrange an informal preparation session for the speakers or moderators an hour before your event.

- **After the event concludes, evaluate it** while the details and activities are fresh in your mind. You can meet with your committee to discuss whether the event fulfilled its objectives, decide what could be fine-tuned next time, or even begin planning for next year. Posting a “thank you” letter on your Web site or in the local paper citing those who were involved highlights the success of your event. Additionally, you can prepare a questionnaire for participants and use this information to alter your *Recovery Month* event next year. Send any materials that you used for promotional purposes to recoverymonth@samhsa.hhs.gov and remember to thank all of those who contributed to your successes!
Share Your Event’s Outcomes and Successes

Promote your event and share the success of your organization’s *Recovery Month* event by:

- Posting your event materials, photos, or videos on the *Recovery Month* Web site, [http://www.recoverymonth.gov](http://www.recoverymonth.gov), with your event listing to show the purpose and outcomes. Help spread the success of your event with others by sharing your outcomes through *Recovery Month* social media outlets such as the *Recovery Month* Facebook page, YouTube channel, and Twitter account. Refer to the “Online Voices” and “New Media Glossary” for ideas on how to use these online tools.

- Sharing your *Recovery Month* efforts by completing the “Customer Satisfaction Form.”

- Sending a copy of your promotional materials electronically to recoverymonth@samhsa.hhs.gov or to:
  
  Office of the Director, Consumer Affairs  
  SAMHSA’s Center for Substance Abuse Treatment  
  1 Choke Cherry Road, Second Floor  
  Rockville, MD 20857

To view additional local and national events that are taking place regarding treatment and recovery, click the “Community Events” link on the *Recovery Month* Web site at [http://www.recoverymonth.gov](http://www.recoverymonth.gov).

More Resources on *Recovery Month* and Substance Use Disorders

The following resources provide additional information about *Recovery Month* and substance use disorders:

- Substance use, treatment, and recovery information, and treatment referral is available by calling SAMHSA’s 24-hour National Helpline, 1-800-662-HELP, or 1-800-487-4889 (TDD), for free and confidential information in English and Spanish, or at SAMHSA’s Web site, [http://www.samhsa.gov/treatment](http://www.samhsa.gov/treatment).

- All materials from this toolkit and an extensive array of relevant information are available electronically at the *Recovery Month* Web site, [http://www.recoverymonth.gov](http://www.recoverymonth.gov).

Inclusion of Web Sites and other event examples in this document and on the *Recovery Month* Web site does not constitute official endorsement by the U.S. Department of Health and Human Services or the Substance Abuse and Mental Health Services Administration.
A Guide to Recovery Month Event Publicity and Media Interviews

Media outreach and publicizing your event are an essential part of your National Alcohol and Drug Addiction Recovery Month (Recovery Month) activities. Recovery Month is an essential element of one of SAMHSA's 10 Strategic Initiatives that focuses on public awareness and support. The goal of this initiative is to increase the understanding of mental and substance use disorder prevention and treatment services to achieve the full potential of prevention, and help people recognize and seek assistance for these health conditions with the same urgency as any other health condition. Whether you are planning a wellness fair to help people with stress relief and addiction, a ribbon-cutting ceremony for a new recovery center, a sporting event, or a proclamation signing, your efforts to raise awareness of addiction treatment and recovery won’t be as successful without proper publicity. Gaining media attention for your Recovery Month event will encourage attendance and increase public interest. Identifying all available media outlets — print, broadcast, and online — as well as public forms of communication, such as neighborhood and church forums, will both increase your attendance and garner media coverage.

This year’s Recovery Month theme, “Join the Voices for Recovery: Now More Than Ever!,” emphasizes that stress faced by public safety officials, the workforce, older adults, and families can contribute to or exacerbate alcohol and/or drug use, which can lead to a substance use disorder or relapse. Recovery Month encourages all people to seek treatment for substance use disorders, celebrates individuals and families in long-term recovery, and acknowledges those working in the field who provide recovery services. This document focuses on how reporters decide which events to cover, media outreach tools, key Recovery Month messages, and tips on how to speak with the media.

What is News?

Although you may already read the news online and follow local television news coverage, you may have wondered what makes something newsworthy enough to be published or broadcasted. The media considers the following factors when deciding whether to cover your Recovery Month event:

- **Impact**, or the number of people affected by the issue, is important. Emphasize to the media that addiction is the Nation’s number one health problem, affecting millions, including children and families, and that high levels of stress can contribute to increased alcohol and/or drug use. Additionally, gain credibility by letting reporters know that your organization is participating in the national Recovery Month initiative, presented by the Substance Abuse and Mental Health Services Administration’s (SAMHSA’s) Center for Substance Abuse Treatment (CSAT), within the U.S. Department of Health and Human Services.

- **Proximity** to your event is imperative. National outlets probably won’t cover a small community event, but local media are more likely to attend.

- **Prominence** of those attending your event may increase media attention. Let reporters know if local celebrities or political officials support your cause.
- **Timeliness** of your outreach is essential. For a weekly newsletter, events that have occurred since its previous issue may be considered timely or appropriate, whereas for broadcast outlets, a reporter might cover it as “breaking news” live at the event scene.

A wide range of traditional and online publicity tools, as well as other creative options, can be used to invite the media to your *Recovery Month* event.

### Traditional Media Outreach

Traditional media refers to newspapers, magazines, Web sites of print outlets, and television and radio stations. Present information to reporters at these outlets in a clear and straightforward manner in the weeks and days before the event. The more time reporters have to develop a story, the more accurate and detailed it will be. Offer any experts in the addiction, treatment, and recovery field for interviews to provide supplementary information to add credibility. Be aware of each outlet’s submission deadlines and preferences—each newspaper, magazine, online resources, and television and radio station is different.

Today’s media landscape is pressured by tight deadlines and fewer staff members who cover several beats. Use the following publicity tools to help them understand the addiction, treatment, and recovery landscape. Modify them to help garner media coverage and raise awareness of your *Recovery Month* event:

- **Media advisory** – Outlines the schedule or specific details of an event, along with a brief description; distributed in advance to invite media to attend the event

- **Press release** – Provides background, describes your organization’s activities, and includes a quote by your group’s spokesperson; distributed the day of the event to provide reporters with supplementary information

- **Public service announcement (PSA)** – Raises awareness about addiction treatment and recovery issues, and can be distributed in radio or television format. (Distribute the live-read radio PSA scripts and the pre-recorded *Recovery Month* PSAs, which can be ordered through recoverymonth@samhsa.hhs.gov. Tips for distribution can be found in the “Promoting *Recovery Month* with Public Service Announcements” document in this toolkit).

- **Op-ed** – Expresses the opinion of the writer or the spokesperson of your organization about important issues
**Online Outreach**

Promoting events online has become as common as using the traditional tools referred to above. Several online publicity options to consider are:

- **Web sites** – Publicize your event by posting announcements on the *Recovery Month* Web site at [http://www.recoverymonth.gov](http://www.recoverymonth.gov). Ask your sponsors, supporters, and partners to post announcements on their Web sites and provide a link to the *Recovery Month* Web site when your organization or event is referenced. Add the “Events Widget” to your organization’s Web site to feature your *Recovery Month* event.

- **Email chains** – Send a mass email to your friends, colleagues, and supporters of your organization to raise awareness of addiction and to promote your event. You can request that recipients forward the message or event invitation to others.

- **Social media** – Engage the general public through *Recovery Month* social media outlets such as the *Recovery Month* Facebook page, YouTube channel, and Twitter account. Post general information about substance use disorders and offer photos, video content, and event invitations.

- **Blogs** – Use the blogs of local treatment centers or organizations to increase online mentions of *Recovery Month* and your event. When contacting a blogger, by locating contact information you can typically find in the “about” section of a blog, use conversational and casual language, and hyperlink as much text as you can to provide additional information. Remember to be careful when speaking with bloggers; everything you say will be “on the record” and they do not have traditional journalism ethics guidelines to follow.

**Other Creative Publicity Tools**

In addition to traditional media and online tools, numerous tactics were often used before online resources became available that continue to effectively reach the general public:

- **“Guerilla marketing”** – Create a buzz through word-of-mouth conversations. By publicizing your event in public places such as churches, community centers, local businesses, and the public library, or handing out memorable items, such as stress balls or water bottles, you can engage people who are curious about your event.

---

**TOOLKIT TIP**

Refer to the “Banners, Logos, and Flyers” page on the *Recovery Month* Web site to find banners and logos for use on your Web site.

**TOOLKIT TIP**

Refer to the “Online Voices” piece for more information on engaging bloggers.
media outreach

- **Door-to-door publicity** – Knocking on doors and speaking with people face-to-face will draw participants. Be sure to hand out educational information on addiction and recovery as well as event logistics.

- **Phone-calling tree** – Call five colleagues or friends and tell them about your event. Ask each of them to call five others to continue the cycle.

Tailor these tools to target specific groups who may be susceptible to increasing use of alcohol and/or drugs or an addiction due to the high levels of stress they face at work or at home. For example, if you would like to target public safety officials, hand out promotional items at a fire or police station. If you’d like to target the workplace, reach out to large and small companies in the area. Remember to call and get approval from the station or company before you promote your event on-site. All these methods can reach a large amount of people and are often effortless and economical.

**Speaking with the Media**

Now that you know how to publicize your *Recovery Month* event to achieve a higher turnout, you may want to understand how to speak with the media if the opportunity arises. For an example, listen to this successful radio interview, by Faces & Voices of Recovery’s Executive Director Pat Taylor, who appeared as a guest on *Recovery Talk* last September. When preparing for an interview with the media, you should identify local reporters who have covered health or addiction and recovery-related issues in the past. To secure an interview for your organization’s spokesperson, modify your outreach to target the specific interests of each reporter. Some people prefer phone calls, while others prefer an email (do not send attachments; it may wind up in their spam filter). Once you secure an interview, use the following tips to prepare:

- **Research the outlets and reporters** before your interview by reading or watching previous stories they developed. This information allows you to become aware of the target audience, see the reporter’s writing style, and gain a better idea of the types of questions that may be asked.

- **Consider key messages** to highlight during your interview. Think about evidence that you have to support your messages, and anticipate questions the journalist may ask you in response.

- **Create any supplementary materials** in advance of your interview. Sharing graphs, photos, biographies of spokespeople, or videos with reporters in advance can enhance your interview.

- **Practice and role play** before your interview with a colleague. Avoid using jargon and practice using short, catchy sentences that can be easily understood or picked up as quotes for a story.

TOOLKIT TIP

Refer to the "Press Materials for Your Recovery Month Event" piece for additional information on how to identify key media contacts and build a media list.

**TOOLKIT TIP**

Refer to the *Recovery Month* key messages provided at the end of this document.
The day before your interview, remember to confirm the date, time, place, and anticipated length of the interview. Also, always be professional and polite. Keep in mind that the goal of the interview is to communicate the Recovery Month key messages and share your perspective. The following techniques can help lead to a successful interview:

- **Bridging** – If asked a question that doesn’t allow you to discuss one of your key messages or predetermined topics, you can use what’s known as “bridging” to find a connection to your issue. For example, you may respond to an irrelevant question by stating “yes, but that speaks to a bigger point…”

- **Blocking** – Sometimes a reporter can ask a question that you may not want to answer. Never say “no comment” because it may appear that you are hiding something. If possible, explain why you can’t answer the question and then “bridge” on to points that you would like to discuss.

- **Headlining** – To flag your key messages clearly in an interview, you should start with the conclusion, and then explain it.

It is helpful to restate the question in your response so the answer is a complete thought and can be used independently. Remember to speak slowly, and if you aren’t immediately sure how to answer a question, pause, restate the question, and then answer. If you are unsure of an answer, offer to follow up with the reporter later, or provide the reporter with a contact who may be able to answer the question for them.

### In-Person Interview Techniques

For an in-person interview, keep in mind the following:

- **Eye contact** – Make eye contact with the reporter. If you are on camera, do not stare directly at it. Don’t be distracted by activity surrounding you.

- **Posture** – Remember to sit up straight, find a place to rest your hands to avoid fidgeting, and use gestures sparingly.

- **Voice** – Vary your pitch by raising your voice slightly to emphasize key points and use a conversational tone. Avoid using “ums” and nodding too much to agree with statements.

- **Dress** – For most interviews, dress conservatively, although there are exceptions. If your event is a 5K run, for example, it is appropriate to wear running gear.
Telephone Interview Techniques

Use the following techniques for a telephone interview:

- **Timing** – If a reporter calls you without prior notice, find out the reporter’s deadline. If the reporter is not on deadline, ask if you can call back at a later time. Any amount of preparation time enhances your interview.

- **Location** – Call from a quiet place with no background noise. If possible, use a land line rather than a cell phone to avoid connection issues.

- **Notes** – It’s okay to make notes prior to the meeting and review them during the interview; no one is watching you. Try to rehearse so you don’t sound like you are reading directly from a script.

- **Feedback** – Ask reporters questions to ensure that they understand your messages. With no visual cues to react to, this is important.

- **Smile and stand up** – Both of these actions can make a significant difference in the tone and quality of your voice.

Key Messages to Communicate

When speaking with the media, convey the following key points concerning *Recovery Month* and your organization’s specific event.

- **For a Specific Event:** On [date] at [time], *[organization]* is hosting *[event or activity]* at *[location]* to [encourage people who experience high levels of stress in their lives, which has contributed to increased substance use, and the need for help in seeking treatment]. Addiction can affect anyone, including people in *[city]*. It is essential that our community remains dedicated to the recovery process by advocating for resources that confront this treatable disease and support individuals in recovery and their affected family members.

- **To Promote Recovery Month:** *[Organization]*’s activities are part of the *National Alcohol and Drug Addiction Recovery Month (Recovery Month)* initiative celebrated for more than 20 years. Sponsored by the Substance Abuse and Mental Health Services Administration’s (SAMHSA’s) Center for Substance Abuse Treatment, within the U.S. Department of Health and Human Services, this month-long observance celebrates individuals and families in recovery, as well as those who work in the field. It urges all of us to provide needed services and encourage individuals still in need of treatment to seek help. As we face increased levels of stress in our society, it is now more imperative than ever to share resources to facilitate healing and recovery from substance use disorders. This year, *[organization]* will be observing *Recovery Month* by *[include the name and brief description of your Recovery Month activities]*.
media outreach

- To Provide Information and Resources: Visit the Recovery Month Web site at http://www.recoverymonth.gov and [insert organization’s Web site] for detailed information on addiction, treatment, and recovery. For specific information on substance use disorders and local treatment options in our community, visit SAMHSA’s “Find Substance Abuse and Mental Health Treatment” Web site, http://www.samhsa.gov/treatment, or call SAMHSA’s 24-hour National Helpline, 1-800-662-HELP, or 1-800-487-4889 (TDD), for free and confidential information in English and Spanish.

After Your Recovery Month Event

Publicizing your Recovery Month event is continuous—coverage following the event is equally important to your initial outreach efforts. Media outlets today may have less staff to send to events. Even if the media doesn’t attend on-site, send a press release with pictures as soon as possible after your event. Include final figures such as number of participants, prominent attendees, and the amount of money raised at your event.

Additionally, you should begin crafting subsequent campaigns around the success of your Recovery Month event and continue increasing awareness by:

- Posting your event materials, photos, or videos on the Recovery Month Web site, http://www.recoverymonth.gov, with your event listing to show the purpose and outcomes. Help spread the success of your event with others by sharing your outcomes through Recovery Month social media outlets such as the Recovery Month Facebook page, YouTube channel, and Twitter account. Refer to the “Online Voices” and “New Media Glossary” for ideas on how to use these online tools.

- Sharing your Recovery Month efforts by completing the “Customer Satisfaction Form.”

- Sending your promotional materials electronically to recoverymonth@samhsa.hhs.gov or to:
  Office of the Director, Consumer Affairs
  SAMHSA’s Center for Substance Abuse Treatment
  1 Choke Cherry Road, Second Floor
  Rockville, MD 20857

Inclusion of Web Sites and other event examples in this document and on the Recovery Month Web site does not constitute official endorsement by the U.S. Department of Health and Human Services or the Substance Abuse and Mental Health Services Administration.
Press Materials for Your Recovery Month Event

The key to hosting a successful National Alcohol and Drug Addiction Recovery Month (Recovery Month) event is to publicize it well. Recovery Month is an essential element of one of SAMHSA's 10 Strategic Initiatives that focuses on public awareness and support. The goal of this initiative is to increase the understanding of mental and substance use disorder prevention and treatment services to achieve the full potential of prevention, and help people recognize and seek assistance for these health conditions with the same urgency as any other health condition. You can put in a large amount of time and money to plan a wonderful event, but if the public doesn’t know about it, attendance may not be as high as expected. This year’s Recovery Month theme, “Join the Voices for Recovery: Now More Than Ever!,” is designed to reach groups who often face times of high stress, such as public safety officials, the workforce, older adults, and families. This stress may contribute to or exacerbate alcohol and/or drug use, which can lead to a substance use disorder or relapse.

Your press materials should emphasize this theme and that your event is part of the national Recovery Month initiative, presented by the Substance Abuse and Mental Health Services Administration’s (SAMHSA’s) Center for Substance Abuse Treatment (CSAT), within the U.S. Department of Health and Human Services. Recovery Month is an essential element of one of SAMHSA’s 10 Strategic Initiatives that focuses on public awareness and support. The goal of this initiative is to increase the understanding of mental and substance use disorder prevention and treatment services to achieve the full potential of prevention, and help people recognize and seek assistance for these health conditions with the same urgency as any other health condition. Your outreach should emphasize the importance of helping people in need of treatment, supporting individuals in recovery, and recognizing the addiction treatment and recovery workforce who help individuals and families in need.

Traditional tools, such as a media advisory or press release, can be distributed to members of the media—broadcast, print, and online—who may decide to attend or cover your event, garnering larger community interest. Additionally, posting these materials on the Recovery Month Web site as well as your own or any community bulletin Web sites helps spread the word. This document guides you on how to develop, draft, and distribute a media advisory and press release to promote your Recovery Month events so you can have a successful celebration.

Media Advisories vs. Press Releases

Media advisories and press releases share newsworthy and timely information with members of the media. Each ultimately builds community interest for your event and encourages the media to become involved.

A media advisory is highly specific and brief. It alerts reporters to an upcoming event, almost like a detailed invitation, to encourage them to attend and learn more. It should contain:

- A headline detailing the most important information;
- The answers to the five “Ws”: who, what, where, when, and why, often listed in bullet format; and
- The contact information for your organization or Recovery Month planning committee so reporters can request additional information.
media outreach

A press release, however, has a different purpose. It’s sent to the media so they will cover your story to raise visibility among the public. Reporters should be able to repurpose the press release as a stand-alone article, or use it as background when writing a story. It should contain:

- Approximately 500 words, formatted in short paragraphs;
- An inverted pyramid style of writing, meaning the most important information is at the top, filtering down to the less crucial details toward the end;
- Quotes from the organization or event spokespeople; and
- The name and contact information for the person responsible for providing the media with additional information and scheduling interviews.

Modify the sample template press release and media advisory at the end of this document to publicize your Recovery Month event. To view an effective example, this press release was issued by Purple, Inc., an alcohol and drug recovery residence, in conjunction with the Georgia Association of Recovery Residences (GARR) last September. The release highlights the Recovery Month theme, the organization’s mission, and key components to their event, in this case a Recovery Awareness Fair. When drafting these materials, remember to use your organization’s letterhead or the Recovery Month letterhead found at http://www.recoverymonth.gov.

Building a Solid Media List

It’s important to broadly disseminate your media advisory and press release to gain the best results. The first step is to build an effective media list that includes the names of media outlets, key reporters, and contact information of those who have covered issues surrounding substance use, treatment, and recovery in the past. Also, include any notes about specific articles they have written or how they prefer to be contacted in a separate column of this list. To conduct this research, you may:

- **Set up a Google Alert online** that will automatically search for news stories based on specific keywords. To set up and receive Google Alerts, go to http://www.google.com/alerts, and enter your search term in the top box that states “Create a Google Alert.” Be sure to include your search term, as well as your local area, to narrow your monitoring results. Scroll down the “type” drop box to “news,” the “how often” drop box to “as-it-happens,” and enter your email address in the final box. You should receive an email to verify your alerts, and will then receive them immediately.

- **Scan your local newspapers** for the most recent health and community stories.

- **Search the outlet or publication’s Web site** for relevant contact information, which will later be used for follow-up phone calls or emails.
While building your media list, look for community calendars, daybooks, and “week-ahead” columns that may include your *Recovery Month* events on their Web sites of event listings. You can often find them on your local media Web sites. Also, share your information with community newsletters, local school publications, and other organizations or businesses to increase the awareness and visibility of your event. Remember to frequently update your media list so that you can use it in other outreach efforts, and during next year’s *Recovery Month* celebration.

**Distributing Media Advisories and Press Releases**

Send your media advisory and press release, along with any additional materials, such as photographs, in the body of an email. Media may not open an attachment from an unknown recipient. It is best to send an advisory 5- to 7-days in advance of the event, or earlier if your event is on a weekend. A press release, on the other hand, is usually sent the morning of your event or distributed in a press kit at your *Recovery Month* event.

Many resources help you publish media advisories and press releases on online distribution sites. Be aware that some of these resources require a fee, though some offer discounts for nonprofits, so you should research their individual costs before submitting your event materials. These sites include:

- Business Wire
- PR Newswire
- PRWeb Direct Press Release Newswire
- 24/7 Press Release
- PR Leap
- Press Release Service
- PR Log
- AP Day Book

In addition, post the press release for your event on the *Recovery Month* Web site at [http://www.recoverymonth.gov](http://www.recoverymonth.gov) and on your organization’s Web site to increase community interest in your cause.
Pitching Tips

After you have sent out your media advisory or press release, follow up with reporters to ensure they received all information needed regarding your *Recovery Month* event. Use your media list to call all reporters, and remember the following tips:

- **Be courteous.** When reporters answer the phone, ask if it’s a good time for them to speak with you. If not, ask when would be a better time to call back.

- **Know what you plan to say before calling.** Rehearse what your pitch will be before you call, but don’t sound like you are reading straight from a script.

- **Plan around their deadlines.** Journalists’ deadlines may vary depending on whether they work for a weekly or daily publication. Reporters for daily outlets typically have deadlines ranging from around 2 p.m. to 4 p.m. The best times to call them are likely from 10 a.m. to 12 p.m.

- **Leave brief voicemails.** It is acceptable to leave a reporter a voicemail, but keep your message concise and end your message with your contact information. However, if the reporter does not answer your first phone call, try again later. Voicemails may not be returned by the busy reporter.

For optimal media attendance, follow up to remind all reporters of your *Recovery Month* activity the day before your event.

Resources to Customize Your Press Materials

Use the following resources, along with any local recovery and substance use disorder data available, to customize your media advisory and press release:

- **Your Single-State Agency (SSA)**

- **SAMHSA’s National Survey on Drug Use and Health**

- **SAMHSA’s National Survey of Substance Abuse Treatment Services (N-SSATS)**

- **SAMHSA’s Drug Abuse Warning Network**

- **SAMHSA’s Treatment Episode Data Set**
Share Your Activities’ Outcomes and Successes

Promote your activities and share the success of your Recovery Month events and press materials by:

- Posting your press materials on the Recovery Month Web site, http://www.recoverymonth.gov, with your event listing to show the purpose and outcomes. Help spread the success of your event with others by sharing your outcomes through Recovery Month social media outlets such as the Recovery Month Facebook page, YouTube channel, and Twitter account. Refer to the “Online Voices” and “New Media Glossary” for ideas on how to use these online tools.

- Sharing your stories and other outreach efforts during Recovery Month by completing the “Customer Satisfaction Form.”

- Sending your promotional materials electronically to recoverymonth@samhsa.hhs.gov or to:
  Office of the Director, Consumer Affairs
  SAMHSA’s Center for Substance Abuse Treatment
  1 Choke Cherry Road, Second Floor
  Rockville, MD 20857

More Resources on Recovery Month and Substance Use Disorders

The following resources provide additional information about Recovery Month and substance use disorders:

- Substance use, treatment, and recovery information, and treatment referral is available by calling SAMHSA’s 24-hour National Helpline, 1-800-662-HELP, or 1-800-487-4889 (TDD), for free and confidential information in English and Spanish, or at SAMHSA’s Web site, http://www.samhsa.gov/treatment.

- All materials from this toolkit and an extensive array of relevant studies and information are available electronically at the Recovery Month Web site, http://www.recoverymonth.gov.

Inclusion of Web Sites and other event examples in this document and on the Recovery Month Web site does not constitute official endorsement by the U.S. Department of Health and Human Services or the Substance Abuse and Mental Health Services Administration.
[Adapt as needed for your event by modifying the type of event, date, etc.]

[Date]

[Name of Organization] to Hold Wellness Fair to Raise Awareness of Substance Use Disorders in [Town/City]

More than 23 million people in the United States needed treatment for a substance use disorder in the past year according to the 2008 National Survey on Drug Use and Health, and an estimated [number] people in [town/city/community] alone are affected by addiction. To raise awareness of this disease and inform people of the available treatment and recovery resources, [name of organization] will host a wellness fair in [town/city] on [date].

The wellness fair is part of the 21st observance of National Alcohol and Drug Addiction Recovery Month (Recovery Month), sponsored by the Substance Abuse and Mental Health Services Administration’s (SAMHSA’s) Center for Substance Abuse Treatment (CSAT), within the U.S. Department of Health and Human Services. This year’s theme, “Join the Voices for Recovery: Now More Than Ever!,” intends to educate the general public as well as specific groups on how daily and increased stress can contribute to alcohol and/or drug use, as well as the effectiveness of treatment and the possibility of recovery.

The fair will educate the community about substance use disorders, promote positive approaches to combating stress, and honor those living a healthy life in recovery. Activities are for all ages and consist of a job fair, yoga classes, horseback rides, and massages. Four keynote speakers, including [name], a local police officer; [name], the CEO of [prominent local company]; [name], a retired adult; and [name], a mother of four children, will share their stories of overcoming addiction triggered by stressful situations, and their lives in long-term recovery. Booths will provide health care services such as information on substance use prevention and treatment, stress management, and support groups, as well as on-site glucose and blood pressure testing.

[Name of Organization] Sponsors Wellness Fair to Educate [Town/City]'s Residents about Substance Use Treatment and Recovery Resources

[City, State], [date] – A wellness fair held today in [town/city] and sponsored by [name of organization] raised awareness of substance use disorders by promoting positive ways of combating stress, encouraging a healthy lifestyle, and informing our community about the available treatment and recovery resources. Many people who endure prolonged high levels of stress can develop substance use disorders, especially people in the military, the workforce, older adults, and families.

The wellness fair was held as part of a national initiative known as National Alcohol and Drug Addiction Recovery Month (Recovery Month), which is sponsored by the Substance Abuse and Mental Health Services Administration's (SAMHSA's) Center for Substance Abuse (CSAT), within the U.S. Department of Health and Human Services. This year marks the 21st annual celebration of Recovery Month, which honors people in recovery from substance use disorders, as well as those who provide treatment and recovery services, and promotes the need for treatment access and long-term recovery.

According to the 2008 National Survey on Drug Use and Health, and [name of spokesperson], [title/position] at [name of organization], who spoke at the fair, 23.1 million people in the United States needed treatment for a substance use disorder in the past year, and an estimated [number] people in [town/city] alone are affected by addiction.

The fair was held to commemorate this year’s Recovery Month theme, “Join the Voices for Recovery: Now More Than Ever!,” with the goal of reaching groups who may be susceptible to alcohol and/or drug use and relapse during times of stress. “Stress can be a major contributor to the use of alcohol and/or drugs, and may trigger some people to relapse or return to substance use after periods of abstinence,” said [insert name of spokesperson]. “Today’s fair is the optimal opportunity to share positive ways a person can cope with stress, highlight the benefits of treatment, and encourage friends, colleagues, and family members to begin their journey through recovery.”
Today’s event expected attendance of more than [number] community members, and received support from local businesses and sponsors, including [list one or two local prominent guests, businesses, or sponsors]. The fair included information on substance use prevention and treatment, stress management, and support groups, while participants took advantage of other health care services, such as glucose and blood pressure testing. In addition, there was a job fair with over [number] local businesses represented, as well as yoga classes, massages, and horseback riding—all positive ways to cope with stress.

Four keynote speakers, including [name], a local police officer; [name], the CEO of [prominent local company]; [name], a retired adult; and [name], a mother of four children, shared their stories of overcoming substance use disorders triggered by stressful situations, and their lives in recovery. “By working together as a community, we can raise awareness of addiction during Recovery Month, and encourage those in [town/city] to seek the treatment services they need,” said [name of keynote speaker], a local police officer who is in long-term recovery.

*National Alcohol and Drug Addiction Recovery Month (Recovery Month)* is celebrated each September in communities across the country to help people recognize that substance use disorders are treatable and recovery is possible. Treatment and other recovery support programs are as effective as treatment for other chronic conditions such as diabetes or heart disease—yet nationally, only 10 percent of Americans who need treatment for substance use disorders actually receive it, according to the 2008 National Survey on Drug Use and Health. Recovery Month encourages people affected by addiction to seek treatment and recovery services so they can reclaim healthy and productive lives in their community.

###
Drafting and Submitting an Op-Ed During Recovery Month

An op-ed is one of the best ways to gain credible visibility for National Alcohol and Drug Addiction Recovery Month (Recovery Month) and raise awareness about addiction treatment and recovery. Op-eds, short for “opposite editorials,” are opinion articles that are published opposite a publication’s editorial page. They try to influence public opinion and create a dialogue about issues affecting your community. Recovery Month is an essential element of one of SAMHSA’s 10 Strategic Initiatives that focuses on public awareness and support. The goal of this initiative is to increase the understanding of mental and substance use disorder prevention and treatment services to achieve the full potential of prevention, and help people recognize and seek assistance for these health conditions with the same urgency as any other health condition. An op-ed to promote Recovery Month can be written by a local expert or treatment provider, thought leader, someone in recovery, or someone affected by another person’s substance use disorder. Use the tips provided below as a guide to write an original article, or tailor the sample op-ed at the end of this document as appropriate to meet your organization’s needs.

Remember to showcase this year’s Recovery Month theme, “Join the Voices for Recovery: Now More Than Ever!” It emphasizes how stress in our society may contribute to or exacerbate alcohol and/or drug use, which can lead to a substance use disorder or relapse. Your op-ed should incorporate the Recovery Month mission to encourage all people in need of help to seek treatment for substance use disorders, celebrate individuals and families in long-term recovery, and acknowledge those working in the field who provide recovery services. Also, to gain credibility, remember to mention that the national celebration is sponsored by the Substance Abuse and Mental Health Services Administration’s (SAMHSA’s) Center for Substance Abuse Treatment (CSAT), within the U.S. Department of Health and Human Services.

Planning and Writing Your Op-ed

Before you begin writing your op-ed, follow several steps. First, take a stand on an issue related to addiction and recovery. For example, do you think your community needs more recovery support services? Or do misconceptions and discrimination against people with substance use disorders and in recovery resonate in your local area? Whatever the issue, decide specifically what you want to address when writing your op-ed. You should consider the audience affected by the problem, and suggest potential solutions. Consider the following tips as you begin writing your op-ed:

- Open with a strong lead paragraph;
- State the argument up front;
- Be clear and brief;
- Include a central idea and support it with statistics and research;
- Tell your readers why they should care about the issue;
media outreach

- Make an emotional connection by telling a personal or real-life story;
- Use active voice rather than passive voice; and
- End with a realistic call to action.

At the end of your op-ed, include a brief paragraph that explains your qualifications, your full name, job title, and a description about yourself. Also, add your personal contact information with your submission, as many publications will call to verify your information before printing your op-ed.

Tools to Make Your Op-Ed More Convincing

Use the following resources to customize your op-ed to make it more appealing for local outlets to publish during Recovery Month. Local recovery and substance use disorder data make your argument stronger by demonstrating the true impact on your community, so only use national numbers if you don’t have access to community statistics. Resources include:

- Your Single-State Agency (SSA)
- SAMHSA’s National Survey on Drug Use and Health
- SAMHSA’s National Survey of Substance Abuse Treatment Services (N-SSATS)
- SAMHSA’s Drug Abuse Warning Network
- SAMHSA’s Treatment Episode Data Set

Submitting and Placing Your Op-ed

Remember that publications receive a large amount of op-eds and have high standards for publication. For example, top-tier publications such as The New York Times or The Wall Street Journal generally seek op-eds that focus on national or international issues, while your local paper is more likely to publish about local issues.

Use the following tips for getting your op-ed published in traditional media outlets:

- Begin building a relationship with the editors months before you hope to publish an op-ed for Recovery Month. If possible, invite them to moderate events or meetings, or simply give them key information on local and State recovery issues.
- Submit the op-ed to one outlet at a time. Newspapers probably won’t run an op-ed if it will be or has been published in another outlet.
media outreach

- **Follow the publication’s guidelines** for word count, which is typically less than 700 words, and submission preferences, such as receiving files via email or fax.

- **Include a cover letter** that summarizes the op-ed and your expertise.

- **Follow up with the editor** approximately one week after submission so that he or she has had time to review the piece and offer constructive feedback.

Op-eds are not just for print publications. Use the following tips for getting your op-ed published online, either in the online version of a newspaper or in publications issued only online.

- **Reach out to a publication’s Web site managing editor or Webmaster** to see if your op-ed can be posted online, even if it has been rejected by the print version.

- **Search for online news sites about community events** that may be interested in using your op-ed as a guest article to highlight *Recovery Month* in your area.

- **Consider submitting your op-ed** to Web sites such as *Slate*, *iVillage*, and *The Huffington Post*, which are gaining in authority among Internet news sites.

- **Revise your op-ed for use on blogs.** Many op-eds can be rewritten in the form of a guest blog post on a community or specialty blog.

Either way you choose to submit an op-ed, whether through traditional or online outlets, be prepared to make changes or additions to the op-ed based on the editor’s comments. If your op-ed is rejected, consider modifying and resubmitting your piece or forwarding it to another outlet. Also, remember that if your op-ed is published, it may be picked up by *Google News*, *Yahoo News*, or other sites that collect news from a variety of sources, yielding a wider reach. Search online a few days after your submission is published to track your coverage and see if it has been reprinted anywhere else.

**TOOLKIT TIP**

Refer to the “Online Voices for Recovery” piece for additional information about outreach to blogs.
Promote Recovery Month and Share Your Op-ed’s Outcomes and Successes

Share the success of your op-ed placements by:

- Posting your op-ed or other event materials on the Recovery Month Web site with your event listing to show the purpose and outcomes. Help spread the success of your event with others by sharing your outcomes through Recovery Month social media outlets such as the Recovery Month Facebook page, YouTube channel, and Twitter account. Refer to the “Online Voices” and “New Media Glossary” for ideas on how to use these online tools.

- Sharing your outreach efforts by completing the “Customer Satisfaction Form.”

- Sending a copy of your published op-ed and placement information electronically to recoverymonth@samhsa.hhs.gov or to:
  Office of the Director, Consumer Affairs
  SAMHSA’s Center for Substance Abuse Treatment
  1 Choke Cherry Road, Second Floor
  Rockville, MD 20857

More Resources on Recovery Month and Substance Use Disorders

The following resources provide additional information about Recovery Month and substance use disorders:

- Substance use disorder, treatment, and recovery information, and treatment referral is available by calling SAMHSA’s National Helpline, 1-800-662-HELP, or 1-800-487-4889 (TDD), for free and confidential information in English and Spanish, or at SAMHSA’s Web site, http://www.samhsa.gov/treatment.

- All materials from this planning toolkit and an extensive array of relevant studies and information are available electronically at the Recovery Month Web site, http://www.recoverymonth.gov.

Inclusion of Web Sites and other event examples in this document and on the Recovery Month Web site does not constitute official endorsement by the U.S. Department of Health and Human Services or the Substance Abuse and Mental Health Services Administration.
Working Together to Combat Stress and Substance Use Disorders

Substance use disorders are a treatable, yet serious health problem that can be exacerbated by a variety of external circumstances, including stress. Addressing this problem and finding a positive outlet for dealing with stress is now more important than ever, given the many causes of stress that exist today. In the spirit of the annual National Alcohol and Drug Addiction Recovery Month (Recovery Month) campaign, a national initiative presented by the U.S. Department of Health and Human Services’ Substance Abuse and Mental Health Services Administration (SAMHSA) and its Center for Substance Abuse Treatment (CSAT), I’m urging all members of [community/city/town] to take a few minutes and recognize the negative impact this disease has on our community. It also is important for all people to understand that recovery is possible through a variety of treatment resources and recovery support programs.

Individuals face varying levels of stress at work, at home, in our families, and in our communities. In 2008, nearly half of Americans reported that their stress levels increased during the past year, with as many as 30 percent rating their average stress as extreme, according to the American Psychological Association’s 2008 Executive Report. Whether this stress is caused by the recent economic downturn, a career transition, a big life change, or an increase in drinking or drug use because of these issues, educating our community about how stress can contribute to addiction and affect all people is essential in combating the misconceptions associated with the disease.

Having [been in recovery for XX years / worked in the recovery field for XX years / other statement of personal experience], I have firsthand knowledge of the devastation that stress and alcohol and/or drug use brings to people and their families. Addiction is a real issue, with an estimated 23.1 million people needing treatment for an alcohol or illicit drug use problem in 2008, according to the 2008 National Survey on Drug Use and Health. Locally, [number] people needed treatment last year in [community].

The good news is that we can help people address their addiction and live a healthy and productive life in recovery. Together, we can do the following:

- Encourage our friends, colleagues, or family members who are suffering to enter treatment facilities or seek recovery resources;
- Reach out to individuals throughout our communities to prevent stigma against people receiving treatment services on military bases and in adult living centers; and
- Offer all people in our community strategies to combat and manage stress, such as learning to reduce unnecessary or extra responsibilities, exercising regularly, identifying, removing, or reducing the source of stress, or seeking professional support or assistance.
This September, in conjunction with the *Recovery Month* commemoration, I call on all people in [community] to improve the lives of those suffering from addiction, support individuals in recovery, and recognize the individuals who work in our community to provide recovery services. To maximize this opportunity, I urge local businesses, government agencies, and community organizations to showcase details about local treatment and recovery resources on their Web sites and link to additional information available at [http://www.recoverymonth.gov](http://www.recoverymonth.gov).

[Include author name, title, and brief summary of qualifications that make him or her an expert.]
Official Recovery Month Proclamations

Official government support of National Alcohol and Drug Addiction Recovery Month (Recovery Month) in your State, county, and/or city increases the educational impact of your outreach about substance use disorders. The most effective way to involve your local government officials and agencies is to ask them to issue a proclamation designating September as Recovery Month in their jurisdiction.

In the proclamation, highlight the mission of Recovery Month: to improve the lives of those suffering from addiction, to celebrate individuals and families in long-term recovery, and to acknowledge those working in the field who provide recovery services. In addition, your proclamation should emphasize this year’s theme, “Join the Voices for Recovery: Now More Than Ever!” This theme reminds us that stress in our society may contribute to or exacerbate alcohol and/or drug use, which can lead to a substance use disorder or relapse. Recovery Month is sponsored by the Substance Abuse and Mental Health Services Administration’s (SAMHSA’s) Center for Substance Abuse Treatment (CSAT) within the U.S. Department of Health and Human Services. Adding the support of your local government offices elevates the observance in your community to new heights. Recovery Month is an essential element of one of SAMHSA’s 10 Strategic Initiatives that focuses on public awareness and support. The goal of this initiative is to increase the understanding of mental and substance use disorder prevention and treatment services to achieve the full potential of prevention, and help people recognize and seek assistance for these health conditions with the same urgency as any other health condition.

Federal Government officials, governors, State legislators, or city, county, and town officials issue proclamations. They simply and effectively demonstrate government support for educating the community about substance use disorders and the need for wide-ranging treatment and recovery support programs.

Proclamation signings have been successful in the past, with hundreds issued in previous years to support Recovery Month. In 2009, there were 206 proclamations issued across the country and posted on the Recovery Month Web site. For nearly 10 years, the President of the United States has signed a proclamation declaring September as Recovery Month, recognizing that addiction to alcohol and/or drugs is a rising public health problem in the United States that needs to be addressed.

This document discusses the different types of proclamations, tips for getting an official to issue a proclamation, and activities to draw attention to the proclamation.

Types of Proclamations

When you write a proclamation, choose from one of two styles, traditional or modern. Traditional proclamations begin with a series of “whereas” clauses, meaning “since” or “because,” which state the problem or issue being addressed. They are followed by a “therefore” statement, which is the specific request for support. Modern proclamations are written in a letter format and also are acceptable.

Samples of both traditional and modern proclamations are included at the end of this document, and past signed proclamations are posted on the Recovery Month Web site at http://www.recoverymonth.gov under the “Proclamations” section. Modify these examples to include details relevant to your community, statistics about substance use disorders, and treatment and recovery resources available in your area.
Developing and Securing Your *Recovery Month* Proclamation

Take the following steps to secure a government official or agency to sign your proclamation:

- **Research** local officials and the appropriate staff members to contact in their offices. Consider past supporters of your organization’s efforts and anyone willing to discuss the value of treatment and recovery. These officials should be your first priority to ask for support.

- **Contact** a member of the official’s communications office 3- to 4-months in advance of *Recovery Month* to determine the process of getting a proclamation signed. Introduce your organization, the details of your *Recovery Month* activities, and why it is a significant issue in your community. Remember that some offices are not in session during the summer months, so you may need to plan further in advance to have everything squared away for September. Tell the staff member you would like to draft a proclamation for consideration and inquire which style of proclamation he or she prefers.

- **Write** your proclamation once you have determined the initial interest and proclamation style preference. Prepare your proclamation in advance to make it easier for officials and staff members to focus on your goals.

- **Examine relevant background information** to help you write the proclamation. Keep this background on hand in case you are asked to provide additional information on the overall treatment and recovery landscape.

- **Follow up** with the official’s office regularly after you have submitted your proclamation to receive status updates and provide additional information if needed.

Publicize Your Proclamation

Once an official or his or her staff decides to issue a *Recovery Month* proclamation, use the following tips to help publicize it to maximize its effectiveness:

- **Organize a press conference** where the official proclamation will actually be signed. Work with the official’s communications team to combine efforts and resources, which will allow you to reach a broader audience. Use your media list to invite reporters and remember to bring copies of the proclamation for journalists to reference. Broadcast the event live on your Web site so reporters can still view and write about the event even if they can’t attend in person. Be sure to include a link to the *Recovery Month* Web site as well.
media outreach

- **Share copies of the signed proclamation** with the “local” or “metro” desks of local newspapers, along with a press release announcing that a local official has issued a *Recovery Month* proclamation. Be sure to scan in the proclamation as a PDF file, so that it can be seen on its original letterhead.

- **Post a copy of the proclamation** on the *Recovery Month* Web site, [http://www.recoverymonth.gov](http://www.recoverymonth.gov), and send it electronically to recoverymonth@samhsa.hhs.gov or in hard copy to:
  
  Office of the Director, Consumer Affairs  
  SAMHSA’s Center for Substance Abuse Treatment  
  1 Choke Cherry Road, Second Floor  
  Rockville, MD 20857

Also, display the proclamation in the lobbies of public places, such as libraries and government buildings. (Obtain permission before displaying these copies.) In addition, inquire about posting a copy of the proclamation on the Web sites of similar public venues.

**Share Your Proclamation’s Outcomes and Successes**

Promote and share the signed proclamation by:

- Posting your event materials, photos, or videos on the *Recovery Month* Web site, [http://www.recoverymonth.gov](http://www.recoverymonth.gov), with your event listing to show the purpose and outcomes. Help spread the success of your event with others by sharing your outcomes through *Recovery Month* social media outlets such as the *Recovery Month* Facebook page, YouTube channel, and Twitter account. Refer to the “Online Voices” and “New Media Glossary” for ideas on how to use these online tools.

- Sharing how you used these *Recovery Month* proclamation tips by completing the “Customer Satisfaction Form.”

**More Resources on Recovery Month and Substance Use Disorders**

The following resources provide additional information and treatment referral about *Recovery Month* and substance use disorders:

- Substance use, treatment, and recovery information, and treatment referral is available by calling SAMHSA’s 24-hour National Helpline, 1-800-662-HELP, or 1-800-487-4889 (TDD), for free and confidential information in English and Spanish, or at SAMHSA’s Web site, [http://www.samhsa.gov/treatment](http://www.samhsa.gov/treatment).

- All materials from this toolkit and an extensive array of relevant studies and information are available electronically at the *Recovery Month* Web site, [http://www.recoverymonth.gov](http://www.recoverymonth.gov).

Inclusion of Web Sites and other event examples in this document and on the *Recovery Month* Web site does not constitute official endorsement by the U.S. Department of Health and Human Services or the Substance Abuse and Mental Health Services Administration.
sample proclamation 1: traditional format

WHEREAS, recovery from substance use disorders is possible through a variety of treatment resources and recovery support programs; and

WHEREAS, thousands of people across the United States are living happy, healthy, and productive lives in recovery; and

WHEREAS, stress can contribute to substance use disorders, and finding a positive outlet for dealing with stress is crucial as people continue to face stressful situations in their lives; and

WHEREAS, nearly half of Americans reported that their stress levels had increased over the past year in 2008, with as many as 30 percent rating their stress levels as extreme (American Psychological Association, Executive Report, October 7, 2008); and

WHEREAS, in 2008, an estimated 23.1 million people of every age, race, ethnicity, and socio-economic status needed treatment for substance dependence or abuse in the United States (2008 National Survey on Drug Use and Health); and

WHEREAS, substance use disorders are a treatable, yet serious health care problem, and our community must take steps to address it; and

WHEREAS, educating our community about how substance use disorders affect all people in the community, including public safety officials, the workforce, older adults, and families, therefore is essential to combat misconceptions associated with addiction; and

WHEREAS, to help more people enter a path of recovery, the U.S. Department of Health and Human Services, the Substance Abuse and Mental Health Services Administration, the White House Office of National Drug Control Policy, and [name of State, city, county, or treatment organization] invite all residents of [city/town] to participate in National Alcohol and Drug Addiction Recovery Month (Recovery Month); and

NOW, THEREFORE, I, [name and title of your elected official], by virtue of the authority vested in me by the laws of [city, State, or locality], do hereby proclaim the month of September 2010 as National Alcohol and Drug Addiction Recovery Month

in [city or State] and call upon the people of [city or State] to observe this month with appropriate programs, activities, and ceremonies supporting this year’s theme, “Join the Voices for Recovery: Now More Than Ever!”

In Witness Whereof, I have hereunto set my hand this [day of month] day of September, in the year of our Lord two thousand ten, and of the Independence of the United States of America the two hundred and thirty-fifth.

media outreach

sample proclamation 2: modern format

Thousands of people across the United States are living happy, healthy, and productive lives in recovery from substance use disorders. That is why this year’s National Alcohol and Drug Addiction Recovery Month (Recovery Month) theme is “Join the Voices for Recovery: Now More Than Ever!” Even with the promise of treatment and recovery, substance use disorders are a serious health care problem that can be triggered by a variety of external circumstances, including stress. This theme emphasizes how the stress in our society can contribute to addiction in some, and encourages all people to learn about how to help those suffering from addiction live a positive life in recovery. Addressing this problem and finding positive outlets for dealing with stress is now more important than ever, given the increasing amounts of stress in our lives.

In 2008, nearly half of Americans reported their stress levels had increased over the past year, with as many as 30 percent rating their average stress levels as extreme, according to the American Psychological Association. Additionally, an estimated 23.1 million people in the United States needed treatment for substance dependence or abuse in 2008, with only approximately 1.7 million receiving treatment for alcohol or illicit drug problems, according to the 2008 National Survey on Drug Use and Health. In our community alone, more than [number] of [State/city/town]’s residents suffer from addiction.

Educating our community about substance use disorders is essential to combat the misconceptions associated with addiction. Substance use disorders affect all people of every age, race, gender, ethnicity, community, and socio-economic status, including public safety officials, the workforce, older adults, and families in our community.

For more than 20 years, Recovery Month has worked to improve the lives of those suffering from addiction by raising awareness of the disease and educating communities about the treatment and recovery resources available. For all these reasons, I am asking the citizens of [city or State] to join me in celebrating this September as National Alcohol and Drug Addiction Recovery Month.

The Substance Abuse and Mental Health Services Administration within the U.S. Department of Health and Human Services, the White House Office of National Drug Policy, and [the State of (your State) / city (your city) / name of a treatment organization in your community] welcome your participation in Recovery Month.

I, [name and title of elected official], do hereby proclaim the month of September 2010 as

National Alcohol and Drug Addiction Recovery Month

In [city or State] and call upon our community to observe this month with compelling programs, activities, and events that support this year’s theme, “Join the Voices for Recovery: Now More Than Ever!”

Promoting *Recovery Month* With Public Service Announcements

Every year, the Substance Abuse and Mental Health Services Administration’s (SAMHSA’s) Center for Substance Abuse Treatment (CSAT), within the U.S. Department of Health and Human Services, provides a series of public service announcements (PSAs) in a variety of formats. PSAs are advertisements aired at no cost on television and radio stations. You can put your own stamp on the *National Alcohol and Drug Addiction Recovery Month (Recovery Month)* PSAs to generate media interest in your community for *Recovery Month* and to alter public attitudes surrounding substance use disorders and their impact on affected family members. Use the PSAs in conjunction with advertising your event, and year-round to encourage individuals to seek recovery services.

This year’s *Recovery Month* theme, “*Join the Voices for Recovery: Now More Than Ever!*,” emphasizes how stress in our society may contribute to or exacerbate alcohol and/or drug use, which can lead to a substance use disorder or relapse. For more than 20 years, *Recovery Month* has worked to improve the lives of those suffering from addiction, to celebrate individuals and families in long-term recovery, and acknowledge those working in the field who provide recovery services. The *Recovery Month* PSAs encourage all people and families experiencing an alcohol or drug problem to seek help.

This document discusses how to distribute *Recovery Month* live-read radio scripts and pre-recorded television and radio PSAs to local stations. It also provides valuable promotional tips for sharing the PSAs in new ways, including posting or linking to the PSAs online.

**Distributing Live-Read Radio PSAs**

Live-read radio PSAs are scripts read by disc jockeys (DJs) on air to raise awareness about a particular topic, such as *Recovery Month* and issues surrounding addiction and recovery. Distribute the two 30-second and two 15-second radio PSA scripts, provided at the end of this document, to local radio stations. These scripts serve as a call to action for listeners, or someone they know, who may be in need of treatment. They include the *Recovery Month* Web address, [http://www.recoverymonth.gov](http://www.recoverymonth.gov), and SAMHSA’s National Helpline, 1-800-662-HELP, or 1-800-487-4889 (TDD), a 24-hour free and confidential treatment referral resource in English and Spanish.

The PSA scripts should be mailed, faxed, emailed, or hand-delivered to the radio station’s PSA director for broadcast consideration. You should call in advance to figure out which format is preferred. When you distribute the scripts, include a cover letter explaining the PSAs’ message, the *Recovery Month* campaign, and your contact information. Remember to express your appreciation of the station’s support in spreading the message of *Recovery Month* to its listeners throughout the community.
Use the following resources to localize your cover notes. Please note that local recovery and substance use disorder data will make your argument stronger by demonstrating the true impact to your community, so only use national numbers if you don’t have access to community statistics. Resources include:

- Your Single-State Agency (SSA)
- SAMHSA’s National Survey on Drug Use and Health
- SAMHSA’s National Survey of Substance Abuse Treatment Services (N-SSATS)
- SAMHSA’s Drug Abuse Warning Network
- SAMHSA’s Treatment Episode Data Set

**Pre-Recorded Television and Radio PSAs**

There are two sets of *Recovery Month* radio and television PSAs produced each year, which are sent to more than 1,000 television and 3,000 radio stations nationwide. They are available in both English and Spanish in 30- and 15-second lengths for television, and in 30- and 20-second lengths for radio. You can use these PSAs as recorded, or you may request versions you can customize by adding local resource information at the end of the spot. For further information on how to receive and customize the open-ended versions, contact recoverymonth@samhsa.hhs.gov.

To insert supplementary information, work with a local production studio to insert a voiceover, logo, Web site, or phone number. Remember to alert any local resources that you decide to incorporate into your PSA, so they can prepare for an increase in inquiries.

**Promoting Television and Radio PSAs**

Promote the *Recovery Month* television and radio PSAs by using the following traditional media and online tactics:

- **Call** local television and radio outlets and request that they play the PSAs. Find this information through an online search to find your local station’s contact information, and remember to ask for the PSA director when you call. Email recoverymonth@samhsa.hhs.gov or call 617-520-2576 to obtain additional copies of the PSAs to send to stations that request them.

**TOOLKIT TIP**

Refer to the “Online Voices for Recovery” document for additional tips about online outreach.
media outreach

- **Play** the PSAs, in English and Spanish, at your *Recovery Month* events.

- **Include** a link on your Web site or in promotional materials to the PSAs housed on the *Recovery Month* Web site, Facebook page, and YouTube channel, and embed them directly on your Web site.

- **Send** an email blast with the PSAs to supporters, including detailed information about how they, too, can help promote them.

**TOOLKIT TIP**

Refer to the “Multimedia” section of the *Recovery Month* Web site, [http://www.recoverymonth.gov](http://www.recoverymonth.gov), for electronic copies of the PSAs.

Inclusion of Web Sites and other event examples in this document and on the *Recovery Month* Web site does not constitute official endorsement by the U.S. Department of Health and Human Services or the Substance Abuse and Mental Health Services Administration.

National Alcohol & Drug Addiction Recovery Month

Join the Voices for recovery

now more than ever!
Recovery has given my life great purpose and value—something I sought but never found with drugs.

Carol McDaid

Many people who misuse alcohol and/or drugs can and do recover. Reducing stress lowers the risk of relapse for those in long-term recovery.

Overview: Now More Than Ever!

The Substance Abuse and Mental Health Services Administration’s (SAMHSA’s) Center for Substance Abuse Treatment (CSAT), within the U.S. Department of Health and Human Services, sponsors National Alcohol and Drug Addiction Recovery Month (Recovery Month) each September. This celebration focuses on improving the lives of those suffering from substance abuse through treatment and recovery. While many people achieve recovery, there is still a need to continue to educate people about addiction and motivate those who may have a problem to seek help. In 2008, an estimated 23.1 million people needed treatment for a substance use disorder in the United States.1

Stressful experiences may increase the vulnerability of some to turn to addictive substances for relief or to relapse, even after a prolonged abstinence.2 Stress is an all too common issue: an estimated 75 to 90 percent of all visits to primary care physicians are for stress-related problems.3 This document outlines issues surrounding stress, substance use, treatment, and recovery.

Stress in Today’s World

This year’s Recovery Month theme, “Join the Voices for Recovery: Now More Than Ever!,” emphasizes the increase of stress in our society. It addresses how stress and other external circumstances can contribute to the onset and relapse of substance use disorders, and highlights specific groups affected by these stressors, including:

- **Public safety officials**, including the military, police, and fire personnel, who have careers in which they frequently put their lives at risk for the safety of others. Up to 20 percent of service members returning from the war in Iraq and Afghanistan disclose symptoms that are consistent with emotional problems or depression.4

- **People in the workforce**, who can feel tremendously stressed, especially during rough economic times. Such stress puts people who are in recovery from substance use disorders at risk for relapse, while causing others to begin to use alcohol and/or drugs to relieve stress.5

- **Older adults**, who can find retirement stressful due to the sudden change of pace, financial worries, or health concerns. According to research, 2.5 million older adults and 21 percent of hospital patients older than age 65 have had alcohol-related problems.6 Among people aged 50 to 59, the rate of current illicit drug use increased from 2.7 percent in 2002 to 5.0 percent in 2007.7

- **Families**, who endure personal stress that can lead to increased use of alcohol and/or drugs. In one study, people who experienced 4 or more adverse childhood experiences, such as growing up in the home of someone who abused alcohol, had 4- to 12-fold increased risks for alcoholism and drug abuse, compared with those who experienced none.8

Recovery is Possible

Many people who misuse alcohol and/or drugs can and do recover. Stress may negatively influence treatment effectiveness and can contribute to relapse even for individuals and families in long-term recovery. To combat this, SAMHSA has identified 10 Strategic Initiatives, which can be found at http://www.samhsa.gov by clicking on “About Us,” that focus on improving the delivery of recovery support for many groups, including military families, people affected by financial problems, or those who have experienced trauma.
The following recommendations may help reduce stress when incorporated into daily routines:

- **Simplify your life** – Figure out which activities are really important in your life and manage the time you have allotted to them wisely. Learn to say “no” to activities that are not necessary.

- **Be prepared** – Anticipate challenges that may arise at work or with your immediate family, learn to delegate, and, if necessary, allot extra time for projects so they are manageable and not overwhelming.

- **Live a healthy lifestyle** – Exercise regularly to reduce tension and eat a diet rich in fruits, vegetables, and whole grains to increase energy and keep stress under control.

- **Keep open communication** – Let others know when you have trouble and ask for assistance.

### Challenges in Seeking Treatment

While recovery is accessible and possible for many, some people with substance use disorders may feel hopeless and that recovery is out of reach. A staggering 20.8 million people needed but did not receive treatment in 2008. People with addictions encounter multiple obstacles that prohibit them from receiving treatment, including:

- **Cost** – Based on combined data between 2005 and 2008, 37.4 percent of people who needed but did not receive treatment stated they did not have health care coverage or they couldn’t afford the cost.

- **Stigma** – Although fewer than 20 percent of people in America actually would think less of a loved one who is in recovery from addiction, stigma still exists.

- **Denial** – In 2008, an estimated 8.2 percent of people with substance use disorders who did not receive treatment felt they didn’t need it.

- **Education** – Of those who needed but did not receive treatment between 2005 and 2008, 8.1 percent stated they were unsure where to go for treatment, 8.3 percent felt there was no program for the kind of treatment they needed, and 10.6 percent believed that treatment was inconvenient or had no available transportation.

### Recovery Resources

A variety of recovery and treatment resources provide a sense of community for those in recovery to share their experiences.

- **SAMHSA’s National Helpline** – Accessed by calling 1-800-662-HELP, or 1-800-487-4889 (TDD), this Helpline provides 24-hour free and confidential information and treatment referrals in English and Spanish.

Alcoholics Anonymous and Narcotics Anonymous – Accessed at http://www.aa.org and http://www.na.org, respectively, these Web sites offer a variety of resources for individuals suffering from alcohol or drug dependence, and allow them to locate and join a local support group.

Al-Anon, Alateen, and Nar-Anon – Accessed at http://www.al-anon.alateen.org and http://www.nar-anon.org, respectively, these groups provide a community for family members and young people to share experiences and learn ways to cope with their problems related to substance use disorders.

SoberRecovery – Accessed at http://www.soberrecovery.com, this Web site offers support forums for people in recovery, as well as friends and family members affected by someone’s substance use.

About Recovery – Accessed at http://aboutrecovery.com, this Web site offers addiction and recovery resources and provides a national helpline that is available 24 hours a day.

For a longer version of this guide, please visit http://www.recoverymonth.gov, locate the “Recovery Month Kit,” and click on the “Targeted Outreach” link. Information about treatment options and special services in your area can be found by calling 1-800-662-HELP or 1-800-487-4889 (TDD), as well as at http://www.samhsa.gov/treatment.

Inclusion of Web sites and other resources mentioned in this document and on the Recovery Month Web site does not constitute official endorsement by the U.S. Department of Health and Human Services or the Substance Abuse and Mental Health Services Administration.

The life I live today is only because of my commitment to recovery and my belief in the power of the 12 steps.

Nancy Schenck

Individuals can choose a customized treatment and recovery program that addresses their everyday needs as well as their personal schedules.

Treatment and Recovery: Finding Specialized Help for Substance Use Disorders

Most Americans face varying levels of stress throughout their lives—at work, in their families, and in their communities. Stress can contribute to the use of alcohol and/or drugs, and it may trigger some people to return to substance use after periods of abstinence. Treatment and recovery support services are effective, but of the 23.1 million people who needed treatment for a substance use disorder in 2008, approximately 20.8 million did not receive it.

To promote recovery, the Substance Abuse and Mental Health Services Administration’s (SAMHSA’s) Center for Substance Abuse Treatment (CSAT), within the U.S. Department of Health and Human Services, sponsors National Alcohol and Drug Addiction Recovery Month (Recovery Month) each September. This year’s theme is designed to reach people who in times of stress are susceptible to alcohol and/or drug use. This document provides an overview of treatment and recovery options and outlines how people can use these resources during times of stress to begin to heal.

Overview of Treatment and Recovery Options

To understand addiction, it is important to understand the complexity of the disease and its influence on the brain. Addiction is a chronic illness, like diabetes or asthma. Choices for treatment help individuals with stress, because they can choose a customized recovery method that addresses their everyday needs and fits into their busy schedules. For example, medications help suppress drug cravings and are often used in conjunction with counseling and other outpatient behavioral therapies. Additional treatment options include:

<table>
<thead>
<tr>
<th>Intervention, Treatment, or Recovery Support Options</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Hospital-based rehabilitation units</td>
<td>Located in a unit at a general hospital, these programs are best suited for people who have developed chronic or acute medical or psychiatric problems along with their addiction.</td>
</tr>
<tr>
<td>Short-term residential treatment centers</td>
<td>These are stand-alone, live-in facilities that specialize in the treatment of drug addiction, alcoholism, and dual diagnosis of multiple issues.</td>
</tr>
<tr>
<td>Long-term residential treatment centers</td>
<td>These centers consist of highly structured programs that offer care 24 hours a day, with an average stay of 6 to 12 months. They help people return to a drug-free lifestyle. They sometimes are transitional facilities used before a person re-integrates into society.</td>
</tr>
<tr>
<td>Outpatient treatment programs</td>
<td>These are a range of programs that typically emphasize individual or group counseling and family therapy. They are convenient for individuals who are employed, have extensive social support systems, and live at home or another structured setting.</td>
</tr>
<tr>
<td>Self-help, mutual support groups, and peer-to-peer recovery services</td>
<td>These are recovery support programs, such as SMART Recovery®, Nar-Anon, Alchoholics Anonymous, Narcotics Anonymous, and the Association of Persons Affected by Addiction. These services include 12-step programs, other regular support meetings, self-help groups, and peer counseling.</td>
</tr>
</tbody>
</table>
Intervention, Treatment, or Recovery Support Options | Description
--- | ---
Online support groups and meetings | These groups provide individuals the opportunity to receive support and attend meetings from anywhere. The Recovery Group, In The Rooms, and The Second Road are resources that offer online meetings.

Faith-based support groups | People who attend spiritually based recovery support programs, such as Catholic Charities, the General Board of Church and Society of the United Methodist Church, and the Shinnyo-en Foundation, have the added support that is needed for any type of chosen treatment. Faith-based support is also available at many churches, synagogues, or other religious worship sites.

Recovery support services | These are supplemental programs to help individuals and their families address other needs. They include employee-based support services and health care support.\(^{13,14}\)

For more information and contact information for any resources listed in the above chart, refer to the “Recovery Month Resources” booklet in this toolkit.

**Customized Treatment and Recovery**

No single treatment is appropriate for everyone.\(^{15}\) Several groups consistently face stressful situations, and each has unique needs that are important to consider in treatment and recovery:

- **Public safety officials** have stressful careers in which they frequently put their lives at risk for the safety of others. Many units offer anonymous counseling and resources for individuals. One of SAMHSA’s 10 Strategic Initiatives, which can be found at [http://www.samhsa.gov](http://www.samhsa.gov) by clicking on “About Us,” is to support service men and women, as well as their families and communities. If people feel they cannot use workplace programs, anonymous in-person support groups and online resources specific for public safety officials exist, such as Battle Mind, accessible at [http://www.battlemind.org](http://www.battlemind.org).\(^{16}\)

- **People in the workforce** also can feel tremendously stressed, especially during turbulent economic times. Outpatient treatment, mutual support meetings, or online treatment options might be valuable to this group because they are likely concerned about the cost and taking time away from work for treatment.\(^{17}\) The Employee Assistance Directory, accessible at [http://www.eap-sap.com/eap/index.html](http://www.eap-sap.com/eap/index.html), offers addiction and treatment resources by State, and one of SAMHSA’s 10 Strategic Initiatives is to promote help for people affected by financial problems.

- **Older adults** face a number of challenges that include losing a spouse or facing financial hurdles in retirement. In-patient treatment plans, mutual support groups, or partial hospital or day treatment programs might be appropriate for this group so they have additional human interaction.\(^{18}\) The Web site Aging and Addiction, accessible at [http://www.agingandaddiction.net](http://www.agingandaddiction.net), provides resources for older adults who need help for addiction.

- **Families** may encounter illness, marital strain, and work problems that reverberate at home. An inclusive treatment program that includes family therapy might be necessary.\(^{19}\) Additionally, Nar-Anon and Al-Anon/Alateen, accessed at [http://www.nar-anon.org](http://www.nar-anon.org) and [http://www.al-anon.alateen.org](http://www.al-anon.alateen.org), respectively, offer a variety of addiction and recovery resources for families of individuals suffering from alcohol or drug dependence. These services allow them to locate and join a local support group.
Resources

Visit http://www.recoverymonth.gov for a comprehensive list of resources. Following are a handful of additional key resources:

- **SAMHSA's National Helpline** – Accessed by calling 1-800-662-HELP, or 1-800-487-4889 (TDD), this Helpline provides 24-hour free and confidential information and treatment referrals in English and Spanish.

- **SoberRecovery** – Accessed at http://www.soberrecovery.com, this Web site offers support forums for people in recovery, as well as friends and family members affected by someone’s substance use.

- **Alcohol and Drug Rehab Treatment Resource Center** – Accessed at http://www.addict-help.com, this resource center provides information on key issues about alcohol and drug abuse, including interventions, rehab, and treatment. Visitors must enter identifying information to participate in this Web site.

For a longer version of this guide for treatment, please visit http://www.recoverymonth.gov, locate the “Recovery Month Kit,” and click on the “Targeted Outreach” link. Information about treatment options and special services in your area can be found by calling 1-800-662-HELP or 1-800-487-4889 (TDD), as well as at http://www.samhsa.gov/treatment.

Inclusion of Web sites and other resources mentioned in this document and on the Recovery Month Web site does not constitute official endorsement by the U.S. Department of Health and Human Services or the Substance Abuse and Mental Health Services Administration.

I am a survivor of physical, emotional, and sexual abuse and the post-traumatic stress that it produced in me and my siblings.

Brenda Mayer

Public safety officials who suffer from a substance use disorder or co-occurring disorder are seeking help. Approximately 60 percent of veterans have an alcohol dependence.

Addressing Substance Use Disorders and Stress Among Public Safety Officials

Every day, public safety officials such as military personnel, police, probation, correction officers, firefighters, and emergency medical technicians put their lives on the line to protect the public in both domestic and foreign areas. This document outlines how their jobs cause stress, which can lead to alcohol and/or drug use, and offers resources to help. Every September, the Substance Abuse and Mental Health Services Administration’s (SAMHSA’s) Center for Substance Abuse Treatment (CSAT), within the U.S. Department of Health and Human Services, observes National Alcohol and Drug Addiction Recovery Month (Recovery Month). This year’s theme, “Join the Voices for Recovery: Now More Than Ever!,” emphasizes that treatment and recovery programs and services are essential for officials facing increased stress on the job and turning to alcohol and/or drugs to cope. It also celebrates individuals and families in long-term recovery and acknowledges those working in the field who provide recovery services.

The Stress of Serving the Public

Many public safety sectors work to protect people in the United States. Each sector faces exposure to incidents that cause stress and may play a part in alcohol and/or drug abuse. Each job presents unique challenges:

- **Military officials** face physical and mental health challenges that include exposure to violent combat, trauma, injury to themselves, or survivors’ guilt when a fellow soldier is killed. They also must juggle both military and family responsibilities. One of SAMHSA’s 10 Strategic Initiatives, which can be found at [http://www.samhsa.gov](http://www.samhsa.gov) by clicking on “About Us,” is to support military service men and women, and their families and communities, by leading efforts to ensure needed behavioral health services are accessible and outcomes are successful.
  - Approximately 60 percent of veterans have an alcohol dependence.

- **Firefighters and emergency medical technicians** frequently respond first to 911 calls, arrive first at an accident scene, and risk their lives by entering directly into high-danger situations.
  - Studies show that 29 percent of active duty firefighters have possible or probable problems with alcohol use.

- **Police, probation, and correction officers** deal with high-stress situations on duty, such as fatal shootings and robberies, which statistically increase their likelihood of alcohol and/or drug abuse.
  - According to a recent study, one-quarter of law enforcement officers in the United States report alcohol dependence as a result of stress on the job.

Prevalence of Co-Occurring Disorders

Individuals with both an addiction and an emotional or psychiatric problem are diagnosed with a co-occurring disorder. Public safety officials are vulnerable to these disorders due to their high-stress jobs. In 2008 alone, 2.5 million adults suffered from both serious mental illness and substance dependence or abuse. It is estimated that:

- **53 percent** of people who use drugs also have at least one serious mental illness.
- **29 percent** of all people who are diagnosed as mentally ill abuse alcohol and/or drugs.
- **50 percent** of adults who misuse alcohol and suffer from post-traumatic stress disorder (PTSD) have other serious psychological or physical problems.
Where to Find Confidential Help

Public safety officials who suffer from a substance use disorder or co-occurring disorders should reach out to the following contacts for confidential guidance and support:

- **Government resources** such as SAMHSA’s National Helpline, accessed by calling 1-800-662-HELP or 1-800-487-4889 (TDD), or SAMHSA’s Treatment Web site, accessed at http://www.samhsa.gov/treatment, provide an abundant number of treatment and recovery options in your area.

- **Doctors** answer medical and health questions, refer people to addiction treatment programs, and refer people to medication if appropriate.

- **Clergy members** provide spiritual direction and serve as a nonjudgmental resource. They also can refer people to local resources for treatment.

- **Local mental health associations** can help find a social worker, psychologist, psychiatrist, or other mental health professional in your community.

- **Health insurers** aid in the cost of treatment and help individuals or their families who are seeking treatment options.

What Can I Do?

If you notice that family members, colleagues, or friends who serve as public safety officials may have a substance use disorder, help them find treatment. To aid the person’s path to recovery, keep in mind the following tips:

- **Remember** that substance use disorders can be treated and recovery is possible.

- **Educate** colleagues and peers about the disease of addiction, which will reduce the misconceptions and myths associated with treatment and recovery.

- **Use** national helplines, e-therapy and online services, and Web sites, which are found at the end of this document, that offer free and confidential treatment and recovery services. Public safety officials may be more likely to participate in programs that are private and “off the record.”

- **Be open** and share stories. Discuss your own experiences and feelings with others who have a substance use, mental health, or co-occurring disorder.

- **Reach out** to the person who uses alcohol and/or drugs. Casually approach the person to discuss the possibility of treatment. If a casual setting does not work, organize a formal intervention to urge the person to receive help. To learn more about organizing an intervention, visit http://www.addictioncareoptions.com.

- **Separate** yourself emotionally from the situation. If you allow yourself to detach from the circumstances, you are less likely to damage your relationship with the person you are trying to help.

- **Don’t forget** that it takes tremendous courage for individuals to admit they have an alcohol and/or drug problem.

- **Remember** that recovery is a process and there are many paths to recovery. Encourage continued participation in peer-support programs and therapy to sustain long-term recovery.
Resources for Public Safety Officials

In addition to the information and resources found on the Recovery Month Web site at http://www.recoverymonth.gov and the SAMHSA Web site at http://www.samhsa.gov, public safety officials can find treatment and recovery information through the following resources:

- **U.S. Department of Veterans Affairs National Center for Post-Traumatic Stress Disorder** – Accessed at http://www.ptsd.va.gov, this center advances the clinical care and social welfare of U.S. veterans through research, education, and training on PTSD and stress-related disorders.

- **Military Pathways** – Accessed at http://www.militarymentalhealth.org, this resource helps families and service members who need a private and confidential assessment for conditions including depression, post-traumatic stress disorder, anxiety disorder, bipolar disorder, and alcohol abuse.

- **Battle Mind** – Accessed at http://www.battlemind.org, this Web site assists soldiers and families with making the transition from the combat zone to home.

For a longer version of this guide for public safety officials, please visit http://www.recoverymonth.gov, locate the “Recovery Month Kit,” and click on the “Targeted Outreach” link. Information about treatment options and special services in your area can be found by calling 1-800-662-HELP or 1-800-487-4889 (TDD), as well as at http://www.samhsa.gov/treatment.

Inclusion of Web sites and other resources mentioned in this document and on the Recovery Month Web site does not constitute official endorsement by the U.S. Department of Health and Human Services or the Substance Abuse and Mental Health Services Administration.

I found renewed motivation and a desire to bring about changes in the treatment delivery system by removing barriers that exist in providing care to all who need it.

Dave Seward

There are many productive ways for you and your colleagues to control and reduce stress and ultimately help combat the development of substance use disorders. You can take responsibility for improving your physical and emotional well-being and learn better communication skills to ease and improve your relationships with management and co-workers.

Addressing Substance Use Disorders and Stress in the Workplace

Everyone in the workforce, regardless of career or current employment status, can encounter work-related stress at some point. According to one report, 25 percent of people surveyed viewed their job as the top stressor in their lives. Job stress and related health issues, along with a variety of genetic and environmental influences, can cause some individuals to begin to use alcohol and/or drugs to relieve their stress, while putting others who have recovered from addiction at risk of relapse. This document outlines the impact of workplace stress and substance use disorders, and provides tips and resources for getting help. Of the 20.3 million adults classified with substance use disorders in 2008, 15.8 million were employed either full- or part-time, indicating that a significant portion of the workforce is vulnerable to this disease.

This September, the Substance Abuse and Mental Health Services Administration’s (SAMHSA’s) Center for Substance Abuse Treatment (CSAT), within the U.S. Department of Health and Human Services, celebrates National Alcohol and Drug Addiction Recovery Month (Recovery Month). This year’s theme, “Join the Voices for Recovery: Now More Than Ever!,” emphasizes that treatment and recovery programs are as vital as ever, as the workforce faces increased levels of stress.

Substance Use Disorders—An Important Workplace Issue

Stress in the workplace, which can contribute to increased substance use, has amplified in recent years due to job insecurity and a trend of working longer hours. Substance use disorders can develop as a result, and unemployment is a risk factor. The rate of drug use in 2008 was higher for those who were unemployed, at 19.6 percent, than for those who were employed full time, at 8 percent, among adults 18 or older. Two of SAMHSA’s 10 Strategic Initiatives, which can be found at http://www.samhsa.gov by clicking on “About Us,” are to promote the overall well-being and health of individuals, families, and communities and to boost employment opportunities for individuals, including those with mental illnesses and substance use disorders.

Studies identify specific sectors as “high risk” for addiction, including:
- The restaurant, food, and catering industry;
- Transportation and construction workers; and
- High-status occupations, such as company directors, lawyers, and doctors.

Addressing substance use disorders is important because of their many consequences:
- For workers, substance use disorders result in deteriorating health, injury, disciplinary action at work, family problems, job loss, missing work, and/or on-the-job accidents.
- For employers, substance use contributes to increased costs, lower productivity, absenteeism, and loss of an advantage over the competition.
- For the unemployed, substance use disorders can prohibit them from finding a new job by distracting them from their job search.
Tips for Managing Employment-Related Stress

While some stress is normal, extreme stress interferes with your productivity and diminishes your physical and emotional health. It’s imperative to find ways to keep your stress manageable. Fortunately, there are many productive ways for you and your colleagues to control and reduce stress and ultimately help combat the development of substance use disorders. These tips include:

- Taking responsibility for improving your physical and emotional well-being;
- Identifying habits and negative attitudes that add to the stress you experience at work; and
- Learning better communication skills to ease and improve your relationships with management and co-workers.

Resources for the Workplace

Employers and employees can also consult the following resources for additional treatment and recovery information:

- **SAMHSA’s National Helpline** – Accessed by calling 1-800-662-HELP, or 1-800-487-4889 (TDD), the Helpline provides 24-hour free and confidential information and treatment referrals in English and Spanish.

- **SAMHSA’s Division of Workplace Programs** – Accessed at http://www.workplace.samhsa.gov or 1-800-Workplace (976-5752), this Web site provides guidance for employers on workplace drug-testing issues.

- **SAMHSA’s GetFit.SAMHSA.gov Web site** – Accessed at http://getfit.samhsa.gov, this Web site offers a range of information on workplace wellness issues, including combating problems with alcohol and drugs.

- **The National Institute on Drug Abuse (Drug Free Workplace Programs)** – Accessed at http://www.drugabuse.gov/infofacts/workplace.html, this Web site provides information on research to significantly improve prevention, treatment, and policy as it relates to drug abuse and addiction.
For a longer version of this guide for the workforce, please visit http://www.recoverymonth.gov, locate the “Recovery Month Kit,” and click on the “Targeted Outreach” link. Information about treatment options and special services in your area can be found by calling 1-800-662-HELP or 1-800-487-4889 (TDD), as well as at http://www.samhsa.gov/treatment.

The cycle of addiction in my family has been broken.

Irene Garza

In one study, 82 percent of individuals who participated in family treatment programs reported much improved mental health and well-being.

Stress and Substance Use Disorders in Families

All families face challenges at some point. Common troubles include illness, death in the family, marital strain, financial problems, internal conflicts, and emotional or physical abuse. These obstacles create stress that can contribute to increased alcohol and/or drug use. If sustained, this may contribute to an addiction. Alcohol and/or drug addiction is often a perpetual cycle among families, and this document discusses addiction’s effects on families, the benefits of recovery, and resources that can help.

Children of parents who suffer from alcohol or drug addiction are four times more likely to develop a substance use disorder than those who weren’t raised in that environment. Additionally, 1 in 4 children under 18 live in a home where alcohol misuse or alcohol addiction is hurting the family. Many thousands more live with parental drug abuse. To draw attention to this issue, the Substance Abuse and Mental Health Services Administration’s (SAMHSA’s) Center for Substance Abuse Treatment (CSAT), within the U.S. Department of Health and Human Services, celebrates National Alcohol and Drug Addiction Recovery Month (Recovery Month) every September. Recovery Month celebrates individuals and families in long-term recovery and acknowledges those who provide recovery services. This year’s theme, “Join the Voices for Recovery: Now More Than Ever!,” emphasizes the need to reach all people who are susceptible to alcohol and/or drug use and relapse during times of stress.

Effects of Substance Use Disorders on the Family and the Benefits of Recovery

The stress triggered by substance use disorders can have physical, emotional, social, and spiritual consequences on individuals and their families. Specifically, a parental substance use disorder greatly affects his or her children. Children who grow up in this environment often experience feelings of guilt, shame, anger, or isolation throughout their lives. Additionally, parents with a family history of addiction may have trouble establishing healthy and productive habits within their own families.

If highly stressful family situations persist, they can have an adverse impact on a child’s development and dangerous health consequences for the family and friends of the person with the substance use disorder. This emotional stress can affect a person’s mood, appetite, and sleep cycles. In addition, it may ultimately lead family members to develop chronic anxiety, depression, or their own substance use disorder. Creating communities that focus on the prevention of mental illness and substance abuse for children, youth, families, and other community members is one of SAMHSA’s 10 Strategic Initiatives, which can be found at http://www.samhsa.gov by clicking on “About Us.”

Fortunately, family therapy helps those affected by a loved one’s addiction to identify and resolve their problems. Through education and guidance, participants learn they can’t control their loved one’s addiction, but they can take accountability for their own health. Family-oriented treatment programs and support groups are widely available and effective. In two recent surveys of individuals who had participated in family treatment programs:

- **82 percent** reported much improved mental health and well-being.
- **73 percent** reported a greater ability to function at home, school, or work.
- **68 percent** of women who stayed in comprehensive treatment longer than 3 months were able to remain alcohol and drug free, compared with 48 percent who left treatment within the first 3 months and did not remain alcohol and drug free.
How to Get Help for Yourself, Your Family, and Others

Family members and friends can find supplementary treatment and recovery information through the following resources:

- **SAMHSA’s National Helpline** – Accessed by calling 1-800-662-HELP, or 1-800-487-4889 (TDD), the Helpline provides 24-hour free and confidential information and treatment referrals in English and Spanish.

- **Al-Anon/Alateen Family Groups** – Accessed at http://www.al-anon.alateen.org, this Web site provides support groups for families and friends of people with alcohol problems.

- **Nar-Anon** – Accessed at http://www.nar-anon.org, this group provides a community for family members to share experiences related to substance use disorders.

- **National Association for Children of Alcoholics** – Accessed at http://www.nacoa.org, this organization provides information and educational materials for children and families of people with alcohol or drug problems, as well as for treatment professionals.

For a longer version of this guide for families, please visit http://www.recoverymonth.gov, locate the “Recovery Month Kit,” and click on the “Targeted Outreach” link. Information about treatment options and special services in your area can be found by calling 1-800-662-HELP or 1-800-487-4889 (TDD), as well as at http://www.samhsa.gov/treatment.

After a decade of abuse, isolation, and pain, I found a community that was unlike any I had experienced at any time in my life. That community gave me acceptance, accountability, and ultimately salvation.

Dan Cain

The initial treatment of addiction in older adults may require more intensive medical support than younger patients need, but ultimately older adults succeed in treatment more than any other age group.

Development of Substance Use Disorders in Older Adults

Although stress occurs at any age, older adults face distinct challenges as they transition to new stages in life, such as retirement or an empty nest. For some, this stress may contribute to a substance use disorder or a relapse in substance use after periods of abstinence, and this document examines the impact and ways to help older adults with substance use disorders.¹

For more than 20 years, National Alcohol and Drug Addiction Recovery Month (Recovery Month), sponsored by the Substance Abuse and Mental Health Services Administration’s (SAMHSA’s) Center for Substance Abuse Treatment (CSAT), within the U.S. Department of Health and Human Services, has educated the public about addiction and recovery issues. The celebration encourages all people to seek treatment for substance use disorders, celebrates individuals and families in long-term recovery, and acknowledges those working in the field who provide recovery services. This year’s theme, “Join the Voices for Recovery: Now More Than Ever!,” emphasizes the elevated levels of stress that individuals face today due to an array of circumstances, and how this stress can contribute to substance use disorders or relapse.

Prevalence and Effects of Substance Use Disorders Among Older Adults

Substance use disorders have become more prevalent among middle aged and older adults and continue to become a greater public health issue as the baby boomers reach retirement age. Among people ages 50 to 59, reported use of illicit drugs has nearly doubled since 2002.²

Older adults are more sensitive to the effects of substance use as they age for the following reasons:

- Due to physiological changes associated with aging, 3 drinks may affect them more heavily than people in their early twenties.³
- They may misuse substances both deliberately, due to increased stress and pain, and inadvertently by mixing medications or taking them with alcohol or for purposes not originally prescribed by a doctor.⁴
- The medications they are taking and their general health affect how they respond to alcohol and drugs.⁵

Many older adults experience addiction:

- 50 percent of those in assisted living homes have an alcohol problem.⁶
- 26 percent of assisted living residents have misused prescription drugs.⁷

Avoiding the misuse of alcohol and medications contributes to lower rates of illness and disability among older adults.⁸

Medication Tips for Older Adults

- Keep track of what medications you take on a daily basis and when you take them.
- Ask your doctor if you can safely drink alcohol while taking your medication.
- Read and follow the directions for your medication. Be careful not to take more than the recommended dose.
- Talk to a friend, family member, or health care professional if you are concerned.
- Do not take medication for other purposes than intended.
Symptoms to Look for in Older Adults

Addiction in older adults may be difficult to detect when they live alone. Friends and family may not consider substance use problems as the issue, and may think that their loved one suffers from depression, memory or thinking problems, or anxiety. Look for symptoms such as slurred speech, poor hygiene and self-neglect, and unexplained nausea or vomiting. If these symptoms are present, encourage the person to seek help—or in some cases, you may need to broach the topic with the person’s health care provider yourself.

Getting Help for an Older Adult

Use the following tips when speaking with older adults regarding specific addiction and treatment options:

- **Talk about your worries** about their substance use when they are lucid.
- **Share information** regarding the effects of alcohol and drugs on their health.
- **Ask to go to doctor’s visits** with them or contact the doctor yourself, if appropriate.
- **Suggest** alcohol- and drug-free activities.
- **Encourage counseling** and offer to drive them to and from these meetings.
- **Be supportive** and encourage them to make time for grandchildren, family gatherings, friends, and extracurricular activities.

The initial treatment of addiction in older adults may require more intensive medical support than younger patients need, but ultimately older adults succeed in treatment more than any other age group.

There are a variety of resources available on the Recovery Month Web site at [http://www.recoverymonth.gov](http://www.recoverymonth.gov) and the SAMHSA Web site at [http://www.samhsa.gov](http://www.samhsa.gov) for individuals seeking treatment and recovery. In addition, refer to the following resources geared toward older adults, including:

- **SAMHSA’s National Helpline** – Accessed by calling 1-800-662-HELP, or 1-800-487-4889 (TDD), the Helpline provides 24-hour free and confidential information and treatment referrals in English and Spanish.
- **SAMHSA’s “As You Age” Web site** – Accessed at [http://www.asyouage.samhsa.gov](http://www.asyouage.samhsa.gov), this SAMHSA-sponsored site provides information and resources on medications and alcohol misuse for older adults.
- **National Institute on Aging Information Center** – Accessed at [http://www.nia.nih.gov/AboutNIA](http://www.nia.nih.gov/AboutNIA) or 1-800-222-4225, this center provides research, training, health information, and programs relevant to aging and older adults.
- **Eldercare Locator** – Accessed at [http://www.eldercare.gov](http://www.eldercare.gov) or 1-800-677-1116, this resource helps older individuals and their families access an array of home and community-based services.
- **National Council on Patient Information and Education** – Accessed at [http://www.talkaboutrx.org](http://www.talkaboutrx.org), this coalition works to improve communication of information on appropriate medicine use to consumers.

1-800-662-HELP
1-800-487-4889 (TDD)
Overview: Now More Than Ever!

Most Americans face varying levels of stress—at work, at home, in our families, and in our communities. According to the American Institute of Stress, an estimated 75 to 90 percent of all visits to primary care physicians are for stress-related problems. The degree of stress we feel is sometimes mild and other times severe. It varies based on several factors, including physical health, the quality of interpersonal relationships, economic factors, employment, other responsibilities, and traumatic events.

Generally, people understand the need to manage stress in daily life: 76 percent of individuals polled in a national survey said they participate in more constructive activities than they did 6 months ago—including spending time with family and friends, attending religious services, exercising, watching television, reading, or listening to music. Finding positive outlets for dealing with stress is more important than ever, given that stress can be the result of an existing addiction and serve as a contributor to increased use of alcohol and/or drugs. In some people, stress also may contribute to a relapse, or return to substance use after periods of abstinence. That said, stress is not the only factor responsible for substance use disorders. Addiction is extremely complex, and can be influenced by several genetic and environmental factors.

Millions of people and their families suffer from addiction. In the past year, an estimated 23.1 million people needed treatment for a substance use disorder in the United States. Although this number is staggering and addiction’s negative effects ripple throughout communities nationwide, recovery is possible through a variety of treatment resources and recovery support programs. For more than 20 years, National Alcohol and Drug Addiction Recovery Month (Recovery Month) has worked to improve the lives of those suffering from this disease, celebrate individuals and families in long-term recovery, and acknowledge those working in the field who provide recovery services.

Millions of Americans of every age, race, gender, ethnicity, socio-economic status, and community suffer from substance use disorders. This includes the dependence on or abuse of alcohol and/or drugs, including prescription drugs. The Substance Abuse and Mental Health Services Administration (SAMHSA) is working on 10 Strategic Initiatives related to the prevention and treatment of mental illnesses and substance use disorders, and to ensure the equality of treatment and recovery services to other health conditions. Sponsored by SAMHSA’s Center for Substance Abuse Treatment (CSAT), within the U.S. Department of Health and Human Services, this year’s Recovery Month campaign is designed to reach audiences that may be susceptible to alcohol and/or drug use during times of stress. In this document, you will read about substance use in our society as it relates to stress, the various challenges in obtaining treatment, and tips for living a positive life in long-term recovery. The final section outlines resources valuable to those suffering from substance use disorders, as well as to families and friends dedicated to the recovery process.
targeted outreach

Recovery has given my life great purpose and value—something I sought but never found with drugs. I’m so proud of where I am today. Five years ago, my husband and I founded a recovery community organization in our hometown: the McShin Foundation in Richmond, VA. This helps us share the gift of recovery with others, while sustaining our own. This is how recovery works—you have to give it away to keep it.

Here’s my story. I started young: by age 12, I was drinking alcohol and smoking pot every day. Like so many others, I progressed and used the whole spectrum of drugs. Ashamed of the quantities I used by myself, I knew inside I was an addict.

By age 29, I was one of the millions of people who used drugs and still went to work every day. Ultimately, my sister and employer joined forces for an intervention. Because I was already demoralized and desperate, it wasn’t a struggle to get me to agree to attend a residential addiction treatment center. My health plan did not cover my treatment, but I am grateful that I had loved ones who could.

In treatment, I was introduced to the 12 steps and continue to use them as the foundation of my ongoing recovery. I lived in a recovery house with other women at first and stayed clean for 6 years. During that time, my relationships with my family, my employer, and much of my past were healed. All areas of my life seemed to flourish except the area of intimate relationships, and after a particularly painful breakup, I relapsed. After a second treatment stay, and with the support of a large recovery community, my recovery now feels solid. I have been alcohol and drug free for 12 years.

My recovery has allowed me to become a wife, a stepmom, a small-business owner, and a recovery advocate in Washington, DC. Every day in my professional life, I am able to use my advocacy skills to bring recovery to individuals and families who need it. I now serve on the Board of Faces and Voices of Recovery, an organization that brings the hope and reality to the public, so that I can keep sharing the gift of recovery.

Stress in Today’s World

This year’s theme, “Join the Voices for Recovery: Now More Than Ever!” emphasizes the ever-present amount of stress in our society. Stress and other external circumstances can potentially contribute to the onset and relapse of substance use disorders, particularly among specific groups that face stressful life situations, such as public safety officials, older adults, and even families. Nearly half of Americans reported in 2008 that their stress level increased over the past year, with as many as 30 percent rating their average stress level as extreme.7

Stress, which is defined as the body’s reaction to a change that requires a physical, mental, or emotional adjustment, has been a health issue in the United States for decades. The events that trigger this are called stressors and include a broad range of situations. People can face the following short-term and long-term stressors, which can be exacerbated by alcohol and/or drug use and addiction.8, 9
The human body responds to stress by activating the nervous system and specific hormones, known as the stress response. When working properly, this response enhances a person’s ability to perform well under pressure. When mild stress becomes more severe, however, it can negatively affect your health, mood, productivity, and quality of life.10

Over the last two decades, people have faced experiences such as terrorism and increased unemployment rates that have placed high levels of strain on them and their families. Stressful experiences increase the vulnerability of some to turn to addictive substances for relief or to relapse, even after a prolonged abstinence.11 Several groups, including public safety officials, the workforce, older adults, and families, often face a variety of these stressors. These and other individuals will benefit from understanding the relationship between achieving successful treatment and long-term recovery and developing resiliency and coping tactics to manage daily stress.

Public safety officials, including police and fire personnel, as well as people in all branches of the military, have careers in which they frequently put their lives at risk for the safety of others. This immense pressure can correlate with the potential for substance use and relapse, as well as increase the likelihood of having both a mental illness and substance use disorder (also known as a co-occurring disorder).

Public safety officials may develop post-traumatic stress disorder (PTSD), an anxiety disorder that may develop after exposure to a traumatic event, which can result in increased alcohol and/or drug use.12 Up to 20 percent of service members returning from the Global War on Terror in Iraq and Afghanistan disclose symptoms that are consistent with emotional problems or depression.13 These officials have faced the following obstacles:

- **Terrorism** and emergency situations can be stressful events for first responders, such as the Oklahoma City bombing (1995), September 11 attacks and the anthrax mailings (2001), and the Virginia Tech massacre (2007). The stress from these events affects alcohol and drug use. In a narrative written by a first responder on September 11, one author describes how he developed PTSD and “indulged in an excess of alcohol and drugs in order to make me believe my life was okay.” The author states that this reaction was a result of the guilt he had for surviving, and for his inability to rescue everyone.14

The following chart outlines short-term and long-term stressors:

<table>
<thead>
<tr>
<th>Short-term stressors</th>
<th>Long-term stressors</th>
</tr>
</thead>
<tbody>
<tr>
<td>Isolation</td>
<td>Difficult work or personal situations</td>

<tr>
<td>Danger</td>
<td>Death of a close family member or loved one</td>
</tr>
<tr>
<td>Noise</td>
<td>Loss of job due to termination</td>
</tr>
</tbody>
</table>

10 The human body responds to stress by activating the nervous system and specific hormones, known as the stress response. When working properly, this response enhances a person’s ability to perform well under pressure. When mild stress becomes more severe, however, it can negatively affect your health, mood, productivity, and quality of life.

11 Over the last two decades, people have faced experiences such as terrorism and increased unemployment rates that have placed high levels of strain on them and their families. Stressful experiences increase the vulnerability of some to turn to addictive substances for relief or to relapse, even after a prolonged abstinence.

12 Public safety officials, including police and fire personnel, as well as people in all branches of the military, have careers in which they frequently put their lives at risk for the safety of others. This immense pressure can correlate with the potential for substance use and relapse, as well as increase the likelihood of having both a mental illness and substance use disorder (also known as a co-occurring disorder).

13 Public safety officials may develop post-traumatic stress disorder (PTSD), an anxiety disorder that may develop after exposure to a traumatic event, which can result in increased alcohol and/or drug use. Up to 20 percent of service members returning from the Global War on Terror in Iraq and Afghanistan disclose symptoms that are consistent with emotional problems or depression. These officials have faced the following obstacles:

- **Terrorism** and emergency situations can be stressful events for first responders, such as the Oklahoma City bombing (1995), September 11 attacks and the anthrax mailings (2001), and the Virginia Tech massacre (2007). The stress from these events affects alcohol and drug use.
targeted outreach

- Natural or man-made disasters, such as hurricanes, earthquakes, floods, tsunamis, or airline accidents, often cause stress for public safety officials as well. For example, volunteer responders to the 1998 Swiss Air Flight 111 airline disaster who experienced severe symptoms of PTSD related to their jobs had an increased risk of alcohol and/or drug abuse after the event.15 Also, following Hurricanes Katrina and Rita in 2005, adults aged 18 or older who were displaced from their homes for two or more weeks had higher rates of illicit drug, marijuana, and cigarette use, and had higher rates of mental illness.16

The National Center for Trauma-Informed Care, part of SAMHSA’s Center for Mental Health Services, can be accessed at 1-866-254-4819 and serves as a reliable resource offering consultation, technical assistance, education, outreach, and resources to support those in need of care.

People in the traditional workforce also experience tremendous stress, especially during turbulent economic times. Increased unemployment rates, foreclosures, loss of investments, and other financial distress can cause multiple negative effects, increasing stress.17 In fact, according to an annual survey conducted by the American Psychological Association, as many as 80 percent of Americans are stressed about their personal finances and the economy.18 Such stress puts people who have recovered from substance use disorders at risk for relapse, while causing others to begin to use alcohol and/or drugs to relieve stress.19 However, employers play a major role in the recovery from substance use disorders by ensuring that employees with substance use disorders have access to the support they need while maintaining their careers. In addition, employers need to continue to encourage employees in long-term recovery.

Older adults face a number of challenges that can increase their stress levels. They can encounter a sudden change of pace upon retirement, loss of a spouse or child, financial worries, health concerns, or poor social support networks, and may feel lonely or depressed.20 Additionally, retirement patterns have drastically shifted due to the recent economic recession, frequently causing stress for older generations.21 As stress increases, substance use disorders become more prevalent among older adults and will continue to be a greater public health issue as the baby boomers reach retirement age. Substance use among this age group—whether deliberate or inadvertent—has increased. Among people aged 50 to 59, the rate of current illicit drug use increased from 2.7 percent in 2002 to 5.0 percent in 2007.22 Additionally, in 2009, 2.5 million older adults and 21 percent of hospital patients older than age 65 had alcohol-related problems.23

Families may encounter illness, marital strain, financial problems, family conflicts, emotional or physical violence, and work problems that reverberate at home, which all can increase stress and substance use.24,25 Alcohol and/or drug addiction is often a perpetual cycle among families. In one study, people who experienced 4 or more adverse childhood events, such as growing up in the home of someone who abused alcohol, had 4- to 12-fold increased risks for alcoholism and drug abuse, compared with those who experienced none.26
Recovery is Possible

Many people who misuse alcohol and/or drugs do have the chance to recover through family or friends’ urging, a personal crisis (sometimes referred to as hitting “rock bottom”), or simply deciding that they want to work toward recovery. Doctors and other professionals have determined that addiction is a disease and that many can recover from with proper treatment. Accepting addiction as a disease reduces the stigma that people feel, helps their families understand, and ultimately, helps more people recover.27

It is vital for public safety officials, people in the workforce, older adults, and families who have encountered high levels of stress along with substance use disorders to seek treatment for addiction. They also must address the stressors that provoked the alcohol and/or drug misuse. Finding the most appropriate treatment option is equally important, and individuals can turn to 12-step support programs to maintain their own recovery. For more information on treatment and recovery, visit the “Treatment and Recovery: Finding Specialized Help for Substance Use Disorders” document on the Recovery Month Web site. SAMHSA has identified 10 Strategic Initiatives that focus on improving the delivery of recovery support for many of these groups, including: military families—active, guard, reserve, and veterans, people affected by changes in their job status and financial problems, as well as individuals who have experienced trauma and violence.

If you or someone you know is suffering from a substance use disorder, a variety of options exist to help facilitate recovery. While some people are able to recover on their own or with the help of mutual support groups, some require the assistance of medical professionals. Treatment and recovery programs often offer specific age, gender, drug, faith, and culture-related services depending on the particular needs of the individual.28 The ultimate goals of treatment and recovery programs are to:29

- Address medical and mental health needs;
- Provide nutritional and medical counseling;
- Work on the development of interpersonal skills;
- Improve daily living proficiency; and
- Attain and maintain sobriety.
Recovery requires hard work and is a continuous process that extends long after one has stopped using alcohol and/or drugs. It is critical that family members participate in their own age-appropriate recovery work so that the whole family can heal and break the intergenerational cycle of addiction. No single treatment is appropriate for everyone, and treatment plans may need assessment and modification to meet people’s changing needs. Although everyone’s journey through recovery differs, positive changes stemming from the process include:

- **Optimism and hope**, which emerge as the person develops a willingness to persevere despite setbacks
- **Loyal relationships** with people who share similar values and outlooks on life, which can include groups or close friends who have been through similar experiences
- **Empowerment** and **self-determination**—positive attitudes that contribute to independent decision-making—and helping others in need
- **Developing an overall purpose** in one’s life by recovering a social or work role and exploring a new religion or culture

During treatment and throughout life-long recovery, stress may again become an issue and begin to have a negative impact. Stressful events can correlate with substance use and contribute to substance abuse relapse after periods of abstinence. Warning signs of relapse include not attending support groups, associating with friends who are a poor influence, and setting unrealistic goals. If you learn to identify stress triggers and develop techniques to cope with stress, managing stressful situations will become easier.

Depending on the severity of your stress levels, you can manage stress and stay on a path to recovery by incorporating the following recommendations into your daily routines:

- **Simplify your life** – Figure out which activities are really important in your life and manage the time you have allotted to these activities wisely. Learn to say “no” to activities that are not necessary.
- **Be prepared** – Anticipate challenges that may arise at work or with your immediate family, learn to delegate your responsibilities, and, if necessary, allot extra time for projects so they are manageable and not overwhelming.
- **Live a healthy lifestyle** – Exercise regularly to reduce tension and eat a diet rich in fruits, vegetables, and whole grains to increase energy and keep stress under control.
- **Take a break** – If you begin feeling overwhelmed, take a break to relax and then return to your task once you have cleared your mind. Set aside time for yourself to decompress.

Experts suggest the following techniques to help identify causes of stress and alter the conditions behind it:

- Keep a stress journal to record events and situations that cause a negative physical, mental, or emotional response.
- Keep an ongoing list of all the demands on your time and energy.

targeted outreach

- **Change your attitude** – Don’t worry about things you can’t control. Try to point out the positive thoughts rather than thinking negatively. Learn to remove the source of your stress, change how you see the stressful event, or learn alternative ways of coping.

- **Keep open communication** – Let others know when you have trouble and ask for assistance.

- **Join mutual support or peer-to-peer groups** – By joining these groups, you will have the opportunity to interact with individuals who are experiencing similar struggles and get ideas on how to heal.

- **Visit a doctor** – Stress-relieving medication can be prescribed in extreme circumstances. Health professionals recommend that you also make lifestyle changes to cope with your stressors while taking medication.

### Challenges in Seeking Treatment

While recovery is accessible and possible for many, some people with substance use disorders may feel hopeless. Entering treatment can be stressful, and it is important for families and friends to remain supportive and encourage their loved ones. In 2008, 23.1 million people aged 12 or older needed treatment for an illicit drug or alcohol use problem. Of this group, only 2.3 million received treatment at a specialty facility. A staggering **20.8 million people needed but did not receive treatment** that year.36

People with addiction encounter multiple obstacles that prohibit them from receiving treatment, including:

- **Cost** – The recently passed *Paul Wellstone and Pete Domenici Mental Health Parity and Addiction Equity Act* expands insurance coverage for treatment and recovery services. However, the cost of treatment continues to be a barrier for many Americans. This bill requires coverage of mental health and substance use disorders in line with traditional medical coverage.37 Yet, based on combined data between 2005 and 2008, 37.4 percent of people who needed but did not receive treatment stated they did not have health care coverage or they couldn’t afford the cost.38 Many facilities today will provide payment assistance, offering free or reduced treatment to individuals who cannot afford it. One of SAMHSA’s 10 Strategic Initiatives is to achieve equality in the prevention and treatment of mental illnesses and substance use disorders with all other health conditions. Search SAMHSA’s “Find Substance Abuse and Mental Health Treatment” Web site to find facilities that offer payment assistance options.

---

Of those who depended on substances in the United States in 2008:

- 3.1 million were classified with dependence on both alcohol and illicit drugs.
- 3.9 million were dependent solely on illicit drugs, with the most common being marijuana, used by 15.2 million people over a month time period.
- 15.2 million were dependent on alcohol.

targeted outreach

- **Stigma** – People who use alcohol and drugs often feel that their community, including families, friends, bosses, and colleagues, may perceive them negatively for entering a treatment facility. Between 2005 and 2008, 7.7 percent of people who needed but did not receive treatment at a specialty facility worried that their community may negatively judge them, and 7.4 percent believed that entering treatment would negatively affect their job. In reality, fewer than 20 percent of people in America actually would think less of a loved one who is in recovery. It is important for peers in the community to be supportive and open-minded about treatment and for the workforce to provide resources necessary for recovery. Online treatment options are sometimes thought to be less threatening than face-to-face counseling because a person’s identity remains anonymous. Many e-therapy participants felt they would not have initially sought face-to-face therapy, according to a survey conducted by Metanoia, a nonprofit clearinghouse for mental health Web sites.

- **Denial** – Denial is a defining characteristic of addiction, and refers to when people with substance use disorders pretend (even to themselves) that they do not have a habit or that their behavior is not problematic. In 2008, an estimated 8.2 percent of people with substance use disorders who did not receive treatment felt they didn’t need it, and 42.3 percent felt they could handle their problem without receiving treatment or weren’t ready to stop using.

- **Education** – Those with substance use disorders and their families may have various questions prior to entering a treatment facility. They are often unsure of the cost of treatment, the programs offered, what can be treated, and the process for enrolling in a program. Of those who needed but did not receive treatment between 2005 and 2008, 8.1 percent stated they were unsure where to go for treatment, 8.3 percent felt there was no program for the treatment they needed, and 10.6 percent believed that treatment was inconvenient or had no available transportation. It is important that people who need help for alcohol and/or drug use understand there are a wide array of treatment programs and services for adults and youth.

Everyone has a stake in overcoming all of these barriers. The cost to society of illicit drug, alcohol, and tobacco abuse exceeds $500 billion, including health care costs, criminal justice expenses, and lost productivity. Finding a path to recovery will help diminish these costs and bring healing to families and communities.

**Recovery Resources**

A variety of recovery and treatment resources, including mutual support groups, toll-free telephone lines and Web sites, provide a sense of community for those in recovery to share their experiences, complications, and inquiries with others who have gone through similar journeys. People can now receive guidance conveniently on an as-needed basis rather than through weekly sessions with a counselor, if they desire. Online resources allow people to understand that they are not alone in their journey to overcome addiction. Visit [http://www.recoverymonth.gov](http://www.recoverymonth.gov) for a comprehensive list of resources. Following are a handful of additional key resources:

- **SAMHSA’s National Helpline** – Provides 24-hour free and confidential information and treatment referrals in English and Spanish by calling 1-800-662-HELP, or 1-800-487-4889 (TDD).

- **SAMHSA’s “Find Substance Abuse and Mental Health Treatment” Web site** – Contains resources about mental health, substance abuse, and treatment.
targeted outreach

- **SAMHSA’s “Considerations for the Provision of E-Therapy” Report** – Provides extensive information on the benefits, challenges, and effectiveness of e-therapy.

- **Alcoholics Anonymous and Narcotics Anonymous** – Offers a variety of addiction and recovery resources for individuals suffering from alcohol or drug dependence, respectively, and allows them to locate and join a local support group.

- **Al-Anon/Alateen, and Nar-Anon** – Provides a community for family members and young people to share experiences and learn ways to cope with their problems related to substance use disorders.

- **SMART Recovery® (Self-Management And Recovery Training)** – Offers free, self-empowering, science-based mutual help groups for abstaining from any substance or activity addiction.

- **SoberRecovery** – Offers support forums for people in recovery as well as friends and family members affected by someone’s substance use.

- **About Recovery** – Offers addiction and recovery resources and provides a national helpline that is available 24 hours a day.

- **Alcohol and Drug Rehab Treatment Resource Center** – Provides information on key issues about alcohol and drug abuse, including interventions, rehab, and treatment. Visitors must enter identifying information to participate in this Web site.

There are also several issue-specific resources, including:

- **Military Pathways** – Dedicated to families and service members who need a private and confidential assessment for conditions such as depression, post-traumatic stress disorder, anxiety disorder, bipolar disorder, and alcohol abuse.

- **U.S. Department of Veteran Affairs Center for Post-Traumatic Stress Disorder** – Advances the clinical care and social welfare of U.S. veterans through research, education, and training on PTSD and stress-related disorders.

- **SAMHSA’s Division of Workplace Programs** – Provides guidance for employers on workplace drug-testing issues by calling 1-800-Workplace, or 1-800-967-5752.

- **SAMHSA’s “As You Age Web” site** – Provides information and resources on medications and alcohol misuse for older adults.

- **The National Institute on Aging** – Provides research, training, health information, and programs relevant to aging and older adults, and includes an “Older Adults and Alcohol” brochure, coauthored by the National Institute on Alcohol Abuse and Alcoholism (NIAAA), with information on substance use.
Join the Voices for Recovery: Now More Than Ever!

As we are facing increased levels of stress, it is now more important than ever to join together as a community to celebrate Recovery Month this September. With your help, we can work together to save lives, support each other during times of stress, and alter our society’s perceptions of those who take a commendable step by entering treatment to recover from substance use disorders. Inform your community about how addiction can suddenly affect people and their loved ones during rough times, and the resources that exist to facilitate and maintain healthy and productive lives.

For more information and organizations that can help provide treatment and other resources nationally or in your area, call 1-800-662-HELP or 1-800-487-4889 (TDD), or visit http://www.samhsa.gov/treatment. For additional Recovery Month materials, visit http://www.recoverymonth.gov.

Inclusion of Web sites and other resources mentioned in this document and on the Recovery Month Web site does not constitute official endorsement by the U.S. Department of Health and Human Services or the Substance Abuse and Mental Health Services Administration.

commonly misused substances

The Current Landscape of Alcohol and Drug Misuse

Substance use disorders affect families of every race, ethnicity, socio-economic status, and location. Additionally, substance use disorders are a major health problem that impacts a variety of sectors in our society, including public safety officials, older adults, families, and the workforce. In 2008, an estimated 23.1 million people needed treatment for a substance use disorder in the United States. Just like cancer, diabetes, or heart disease, addiction is a disease that can be treated effectively.2

Every September, the Substance Abuse and Mental Health Services Administration’s (SAMHSA’s) Center for Substance Abuse Treatment (CSAT), within the U.S. Department of Health and Human Services, celebrates National Alcohol and Drug Addiction Recovery Month (Recovery Month). Recovery Month recognizes individuals and families in long-term recovery and acknowledges those who provide recovery services. This year’s theme, “Join the Voices for Recovery: Now More Than Ever!,” emphasizes that treatment and recovery programs are as vital as ever, due to the ever-present level of stress that many people face. Stress, along with a variety of other factors, can be a contributor to people’s alcohol and/or drug use. It also may cause some people to return to substance use, so it is important to manage stress appropriately.3

Substance misuse occurs when an individual regularly uses alcohol and/or drugs to change his or her mood, emotions, or state of consciousness. Severe stress negatively impacts an individual’s personal health. When stress is combined with substance misuse, it potentially compounds the problem, and negatively affects the quality of an individual’s relationship with family members, friends, and colleagues.

While the rate of abuse of many substances, such as crack cocaine and methamphetamine, has declined in recent years, a large number of people still use other illegal substances, including marijuana and hallucinogens. Alcohol misuse remains a problem among the younger generation—the mean age of individuals who first used alcohol prior to the age of 21 was 15.9 years in 2008. While prescription drugs should only be taken as directed by a medical professional, people do misuse prescription and over-the-counter remedies. Individuals should follow the directions closely and adhere to the warning label and indications for use on all over-the-counter medicines. Some of these drugs are ultimately as addictive and dangerous as illegal substances.

The following chart outlines the most commonly misused substances in the United States and should serve as a resource to raise awareness about the prevalence of substance use disorders and need for treatment throughout our Nation.

</table>
Additionally, the misuse of alcohol and drugs, both illicit and prescription, was responsible for an estimated 4.4 million emergency room visits in 2008. In almost all instances, the highest rates of drug misuse were in patients less than 30 years of age with the exception of cocaine, where the highest rate was found in the 35-44 year age group. The following outlines the total estimated emergency room visits, as a result of the most commonly misused illicit and pharmaceutical drugs:

- Alcohol – 656,892 visits
- Cocaine – 482,188 visits
- Opiate/Opiods – 419,762 visits
- Marijuana – 374,435 visits
- Benzodiazepines – 330,234 visits
- Heroin – 200,666 visits
- Psychotherapeutic agents – 150,506 visits
- Stimulants – 91,939 visits
- PCP – 37,266 visits
- Ecstasy – 17,865 visits

Although no single treatment course is appropriate for everyone, treatment is effective. There are a variety of treatment and recovery resources that allow individuals to share their experiences and questions with others who have gone through similar journeys. Following are a handful of key resources:

- **SAMHSA’s National Helpline** – Provides 24-hour free and confidential information and treatment referrals in English and Spanish by calling 1-800-662-HELP, or 1-800-487-4889 (TDD).

- **SAMHSA’s “Find Substance Abuse and Mental Health Treatment” Web site** – Contains resources about mental health, substance abuse, and treatment.

- **Treatment 101: Recovery Today** – A SAMHSA television and radio program that examines the many aspects of treatment and recovery.

- **SoberRecovery** – Offers support forums for people in recovery as well as friends and family members affected by someone’s substance use.

- **Alcohol and Drug Rehab Treatment Resource Center** – Provides information on key issues about alcohol and drug abuse, including interventions, rehab, and treatment. Visitors must enter identifying information to participate in this Web site.

For more information and organizations that can help provide treatment and other resources nationally or in your area, call 1-800-662-HELP or 1-800-487-4889 (TDD), or visit [http://www.samhsa.gov/treatment](http://www.samhsa.gov/treatment). For additional Recovery Month materials, visit [http://www.recoverymonth.gov](http://www.recoverymonth.gov).

Treatmen and recovery

Treatment and Recovery: Finding Specialized Help for Substance Use Disorders

Most Americans face varying levels of stress throughout their lives—at work, in their families, and in their communities. Stress can be a contributing factor to the use of alcohol and/or drugs and also may cause some people to relapse or return to substance use after periods of abstinence. An estimated 23.1 million needed treatment for substance dependence or abuse in 2008 in the United States.

Generally, people understand the need to manage stress in daily life: 76 percent of people polled in a national survey said they participated in more constructive activities than they did 6 months before. This includes spending time with family and friends, attending religious services, exercising, watching television, reading, or listening to music. For some individuals, a more structured approach to handling stress, especially when substance use disorders are present, is required.

Of those who needed treatment for a substance use disorder in 2008, approximately 20.8 million did not receive it. Although these numbers are staggering, recovery is possible through a variety of treatment and recovery resources. For this reason, the Substance Abuse and Mental Health Services Administration’s (SAMHSA’s) Center for Substance Abuse Treatment (CSAT), within the U.S. Department of Health and Human Services, sponsors National Alcohol and Drug Addiction Recovery Month (Recovery Month) each September. The celebration encourages all people to seek treatment for substance use disorders, celebrates individuals and families in long-term recovery, and acknowledges those working in the field who provide recovery services. This year’s theme, “Join the Voices for Recovery: Now More Than Ever!,” is designed to reach people who in times of stress are susceptible to alcohol and/or drug use and relapse. This document provides an overview of treatment and recovery options and outlines how people can use these resources during times of stress to achieve relief from substance use disorders.

Overview of Treatment and Recovery Options

To understand addiction, it is important to understand the complexity of the disease and its influence on the brain. Addiction is a chronic illness, like diabetes or asthma. Living a life free from alcohol and drugs is not just a matter of willpower—it often requires help. As with other chronic diseases, treatment is effective; studies indicate that over the past 25 years, treatment and recovery services have worked to reduce drug use, and new treatments have emerged. SAMHSA is supporting 10 Strategic Initiatives, including the use of data to help develop policy and improve outcomes for treatment and recovery services.
People can choose from many treatment options, depending on what works best for them. Options include inpatient and outpatient programs, medication-assisted therapies, mutual and peer-support groups, faith-based support, and Internet resources. Choices help individuals with stress, because they can choose a customized recovery method that addresses their everyday needs and fits into their busy schedules. For example, medications help suppress drug cravings and are often used in conjunction with counseling and other outpatient behavioral therapies. Other treatment options include:

### Intervention, Treatment, or Recovery Support Options

<tbody>
<tr>
<td>Hospital-based rehabilitation units</td>
</tr>
</tbody>
</table>
| Located in a unit at a general hospital, these programs are best suited for people who have developed chronic or acute medical or psychiatric problems along with their addiction.  
In 2008, 16.8 percent of people who received treatment for substance use participated in a hospital-based rehabilitation unit program. |
| Short-term residential treatment centers |
| These are stand-alone facilities that specialize in the treatment of alcohol and drug addiction and dual diagnosis of multiple issues. People generally reside within the facility 24 hours a day under the care of a team of addiction professionals.  
The average length of stay at these facilities is 20 days. |
| Long-term residential treatment centers |
| Similar to free-standing centers but with longer stays, these centers offer highly structured programs that offer care 24 hours a day, with an average stay of 6 to 12 months. They help people return to a substance-free lifestyle. They sometimes are transitional facilities used before a person re-integrates into society.  
In 2008, 18.6 percent of people who received treatment for substance use were in a long-term residential treatment center. |

<th>Description</th>
</tr>
</thead>
</table>
| Outpatient treatment programs                       | - These are a range of programs that typically emphasize individual or group counseling and family therapy. They are convenient for individuals who are employed, have extensive social support systems, and live at home or another structured setting. They are designed for people who can visit a clinic at least three to five days a week.\(^\text{16}\)  
- In 2008, 1.5 million people received treatment through an outpatient program.\(^\text{17}\) |
| Self-help, mutual support groups, and peer-to-peer recovery services | - These are recovery support programs, such as SMART Recovery®, Nar-Anon, Alcoholics Anonymous, Narcotics Anonymous, and the Association of Persons Affected by Addictions (APAA). These services include 12-step programs, other regular support meetings, self-help groups, and peer counseling.\(^\text{18, 19}\)  
- One-third of people who attended a self-help group for their substance use in 2008 received additional specialty treatment services during that time.\(^\text{20}\) However, many achieve successful recovery through self-help alone. |
| Online support groups and meetings                   | - These groups provide individuals the opportunity to receive support and attend meetings from anywhere. This is an example of a stress-free approach to recovery – people can attend these meetings when their schedule permits and do not have to worry about the cost, transportation, or childcare.  
- The Recovery Group, In The Rooms, and The Second Road, Inc. are resources that offer online meetings. Additionally, Alcoholics Anonymous and Narcotics Anonymous offer online meeting support options. |

<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>E-therapy services</strong></td>
<td>- These services use electronic media and information technologies to provide treatment services for participants in different locations. E-therapy can be administered through text-based communication methods (e.g., email, Internet chats, text messaging) or non-text-based communication methods (e.g., telephone, videoconferencing).&lt;br&gt;- According to a survey, 90 percent of people who participated in these online services felt that e-therapy helped them.</td>
</tr>
<tr>
<td><strong>Recovery chat rooms</strong></td>
<td>- Online venues also offer less structured ways for people to share their stories with fellow members of the recovery community. Conversations in chat rooms, such as Recovery Chat, include people in every stage of recovery.&lt;br&gt;- Most chat rooms have moderators, and some focus on specific topics, including morning meditation and dual recovery from substance use and other disorders.</td>
</tr>
<tr>
<td><strong>Faith-based support groups</strong></td>
<td>- People who attend spiritually based recovery support programs, such as Catholic Charities, the General Board of Church and Society of the United Methodist Church, and the Shinnyo-en Foundation, have the added support that is needed for any type of chosen treatment. Faith-based support is also available at many churches, synagogues, or other religious worship sites.&lt;br&gt;- In 2008, 2.2 million people received treatment at a self-help group, which includes faith-based support groups.</td>
</tr>
<tr>
<td><strong>Recovery support services</strong></td>
<td>- These supplemental programs help individuals and their families address other needs. They include employee-based support services and health care support.&lt;br&gt;- The Employee Assistance Program Directory, for example, provides more than 550 programs that can be searched by State or nationally and can locate substance abuse professionals.</td>
</tr>
</tbody>
</table>
Treatment and recovery require commitment and courage by the person with a substance use disorder, as well as his or her family, friends, and loved ones. Misconceptions that surround addiction cause stress for many people, including the fear of disappointing loved ones. However, fewer than 20 percent of people in the United States actually would think less of a loved one who is in recovery from addiction. The recovery process happens over a period of time. It requires a range of services and support to address the unique needs of each person and his or her loved ones.

Who am I today? I’ve been in the publishing field for more than 21 years. I am executive editor of a small independent publisher that publishes books on addiction treatment, recovery, and behavioral health care topics. I could not be doing what I’m doing today without being in recovery.

I’ve come a long way from where I was. After a series of tragic losses during my teenage years, I sought the empty darkness alcohol and other drugs provided. My drugs were all that I had left after 15 years of blackouts.

When I woke up in restraints after my third and last overdose, I knew I could no longer continue using. I have not used alcohol or other drugs since November 30, 1982. I completed inpatient treatment, where I was introduced to recovery and the 12 steps. Then, I embarked on a remarkable journey that unfolded beyond anything I had ever dreamed of before. I was working as a nurse when I achieved recovery, and after some time in recovery, I realized I didn’t want to be a nurse when I grew up. I wanted to write, so I went back to school and got a degree in creative writing.

Working the 12 steps helped me repair my damaged relationship with my parents, who are now deceased, but each lived long enough to see me in recovery. I still attend 12-step meetings on a regular basis, sponsor women, and volunteer at a nonprofit recovery advocacy organization. The life I live today is only because of my commitment to recovery and my belief in the power of the 12 steps.

Customized Treatment and Recovery

Treatment programs are designed to help people and their families cope with the physical and psychological pressures of their dependency. No single treatment is appropriate for everyone. Options are important, and some may need to incorporate mental health services for successful treatment. Several groups consistently face stressful situations, and each has unique needs that are important to consider in treatment and recovery:

- **Public safety officials**, including police and fire personnel, as well as people in all branches of the military, have stressful careers in which they frequently put their lives at risk for the safety of others, which can contribute to substance use. One of SAMHSA’s 10 Strategic Initiatives is to support military service men and women, their families, and communities, by leading efforts to ensure needed behavioral health services are accessible and outcomes are successful. Many public safety units offer anonymous counseling and resources for individuals; however, the fear of being discovered may preclude people from turning to their unit’s resources. If people feel they cannot use workplace programs, other options are available such as anonymous in-person support groups. These groups include Alcoholics Anonymous and Narcotics Anonymous, and online resources specific to public safety officials, such as Battle Mind and Police Stressline.
■ People in the workforce also can feel tremendously stressed, especially during turbulent economic times, which puts them at risk for substance abuse. Outpatient treatment, mutual support meetings, or online treatment options, such as recovery meetings and chat rooms, might be valuable to this group because they are likely concerned about the cost and taking time away from work for treatment.39 The Employee Assistance Directory offers addiction and treatment resources by State, and one of SAMHSA’s 10 Strategic Initiatives is to promote employment opportunities for individuals affected by financial problems.

■ Older adults face a number of challenges that can increase their stress levels and put them at risk for substance abuse. They can encounter a sudden change of pace upon retirement, loss of a spouse or child, financial worries, health concerns, or poor social support networks, and may feel lonely or depressed.30 Older adults are particularly at risk for prescription drug abuse, even inadvertently. People aged 65 and older consume one-third of all medications and are more likely to be prescribed long-term and multiple prescriptions, which could lead to unintentional misuse or dependence.31 In-patient treatment plans, mutual support groups, or partial hospital or day treatment programs might be appropriate for this group so that they have additional human interaction they might be lacking.32 The Web site Aging and Addiction provides resources for older adults who need help for addiction.

■ Families may encounter illness, marital strain, financial problems, family conflicts, emotional or physical abuse, and work problems that reverberate at home, which can all increase stress and substance use.33, 34 For families, an inclusive treatment program that includes family therapy might be necessary.35 Additionally, Nar-Anon and Al-Anon/Alateen offer a variety of addiction and recovery resources for families of individuals suffering from alcohol or drug dependence, respectively.

Resources

A variety of recovery and treatment resources provide a sense of community for those in recovery. These resources allow individuals to share their experiences and questions with others who have gone through similar journeys. Visit the Recovery Month Web site at http://www.recoverymonth.gov, for a comprehensive list of resources. Following are a handful of additional key resources:

■ SAMHSA’s National Helpline – Provides 24-hour free and confidential information and treatment referrals in English and Spanish by calling 1-800-662-HELP, or 1-800-487-4889 (TDD).

■ SAMHSA’s “Find Substance Abuse and Mental Health Treatment” Web site – Contains resources about mental health, substance abuse, and treatment.

■ Treatment 101: Recovery Today – A SAMHSA television and radio program that examines the many aspects of treatment and recovery.
targeted outreach

- **SoberRecovery** – Offers support forums for people in recovery as well as friends and family members affected by someone’s substance use.

- **Alcohol and Drug Rehab Treatment Resource Center** – Provides information on key issues about alcohol and drug abuse, including interventions, rehab, and treatment. Visitors must enter identifying information to participate in this Web site.

There are also several issue-specific resources, including:

- **Mental Health Self-Assessment** – This Web site and toll-free number, 1-877-877-3647, is a resource dedicated to families and service members who need a private and confidential assessment for conditions such as depression, post-traumatic stress disorder, anxiety disorder, bipolar disorder, and alcohol abuse.

- **SAMHSA’s Division of Workplace Programs** – This program provides guidance for employers on workplace drug-testing issues by calling 1-800-Workplace, or 1-800-967-5752.

- **The National Institute on Aging** – A division of the National Institutes of Health, this agency provides research, training, health information, and programs relevant to aging and older adults. The toll-free service, 1-800-222-4225, and Web site provides information such as an “Older Adults and Alcohol” brochure, coauthored by the National Institute on Alcohol Abuse and Alcoholism (NIAAA), with information on substance use.

For more information and organizations that can help provide treatment and other resources nationally or in your area, call 1-800-662-HELP or 1-800-487-4889 (TDD), or visit [http://www.samhsa.gov/treatment](http://www.samhsa.gov/treatment). For additional Recovery Month materials, visit [http://www.recoverymonth.gov](http://www.recoverymonth.gov).

Inclusion of Web sites and other resources mentioned in this document and on the Recovery Month Web site does not constitute official endorsement by the U.S. Department of Health and Human Services or the Substance Abuse and Mental Health Services Administration.

join the voices for recovery

Each September during National Alcohol and Drug Addiction Recovery Month (Recovery Month), the Substance Abuse and Mental Health Services Administration’s (SAMHSA’s) Center for Substance Abuse Treatment (CSAT) celebrates the successes of those who have achieved long-term recovery from substance use disorders, and highlights individuals who want to help others by sharing their personal journeys of addiction, treatment, and recovery.

This year’s Recovery Month theme, “Join the Voices for Recovery: Now More Than Ever!,” is designed to reach audiences that are susceptible to alcohol and/or drug use during times of stress. The observance also highlights the societal benefits of substance abuse treatment, recognizes the contributions of treatment providers, and promotes the message that recovery from substance use disorders is possible.

The following narratives are unique and personal. They highlight the positive effects of treatment and recovery, and how substance use disorders can negatively impact an individual as well as those surrounding that person. Learn from these stories, share their voices, and take action to help expand and improve the availability of effective treatment for those in need.

Carol McDaid
Principal of a Public Affairs Firm
Washington, DC

Recovery has given my life great purpose and value—something I sought but never found with drugs. I’m so proud of where I am today. Five years ago, my husband and I founded a recovery community organization in our hometown: the McShin Foundation in Richmond, VA. This helps us share the gift of recovery with others, while sustaining our own. This is how recovery works—you have to give it away to keep it.

Here’s my story. I started young: by age 12, I was drinking alcohol and smoking pot every day. Like so many others, I progressed and used the whole spectrum of drugs. Ashamed of the quantities I used by myself, I knew inside I was an addict.

By age 29, I was one of the millions of people who used drugs and still went to work every day. Ultimately, my sister and employer joined forces for an intervention. Because I was already demoralized and desperate, it wasn’t a struggle to get me to agree to attend a residential addiction treatment center. My health plan did not cover my treatment, but I am grateful that I had loved ones who could.
targeted outreach

In treatment, I was introduced to the 12 steps and continue to use them as the foundation of my ongoing recovery. I lived in a recovery house with other women at first and stayed clean for 6 years. During that time, my relationships with my family, my employer, and much of my past were healed. All areas of my life seemed to flourish except the area of intimate relationships, and after a particularly painful breakup, I relapsed. After a second treatment stay, and with the support of a large recovery community, my recovery now feels solid. I have been alcohol and drug free for 12 years.

My recovery has allowed me to become a wife, a stepmom, a small-business owner, and a recovery advocate in Washington, DC. Every day in my professional life, I am able to use my advocacy skills to bring recovery to individuals and families who need it. I now serve on the Board of Faces and Voices of Recovery, an organization that brings the hope and reality to the public, so that I can keep sharing the gift of recovery.

Dan Cain
President of a Therapeutic Community
Minneapolis, MN

After my wife and children, preserving the gift of recovery for those who continue to struggle is the number one priority in my life. I am lucky that I’ve been able to give back since I first found a path to recovery after being paroled from prison in 1972.

Prior to that, I had spent the better part of 10 years progressing along a continuum that began with alcohol abuse, and culminated with heroin addiction. At 24 years old, I did not find recovery, recovery found me. After five previous treatment attempts, I entered a long-term therapeutic community.

After a decade of abuse, isolation and pain, I found a community that was unlike any I had experienced at any time in my life. That community gave me acceptance, accountability, and ultimately salvation. It allowed me to become someone I actually like most of the time. It allowed me to find a beautiful wife and father three beautiful, healthy children. And it allowed me to give back some of what I have been given.

Since 1985, I have been the director of that same program that helped me. In that time it has grown exponentially, and we now serve some 1,200 people per day in addiction treatment housing and community corrections programs.
Irene Garza, M.S.W.
Theft and Group Facilitator at a Community Health Organization
Detroit, MI

My problem was not any specific substance—it was the disease of addiction. I began using at the young age of 11 to escape the pain of long-term abuse. My life was painful; addiction and violence were rampant in my family. But today I am so grateful to have been given the gift of recovery. I have not used any mind- or mood-altering chemicals for the past 24 years.

I was in and out of treatment centers for several years before I came into contact with others who were “just like me” and was finally able to hear the message of recovery. I began attending 12-step groups and have never looked back. Recovery for me means that I have a life that was not even imagined while I was using. The cycle of addiction in my family has been broken. What this means is that my children, ages 18 and 11, have never known me as a mom with a substance use disorder. They know me as a loving, caring, and compassionate person.

I have had so many wonderful experiences on this journey and I could not possibly mention them all. I will say that I have obtained my master’s in social work and have worked in this field for many years. I am involved in the community and take the responsibility to relay the message of recovery to individuals suffering from substance use disorders very seriously. I am a homeowner, have traveled, and have done many other things that I couldn’t have done if I wasn’t in recovery. However, the most important gifts to me are the internal ones: my self esteem, self worth, integrity, self respect, and acceptance of self. This was unimaginable in my “other life.”
Nancy Schenck
Executive Editor for Independent Publisher
Las Vegas, NV

Who am I today? I’ve been in the publishing field for more than 21 years. I am executive editor of a small independent publisher that publishes books on addiction treatment, recovery, and behavioral health care topics. I could not be doing what I’m doing today without being in recovery.

I’ve come a long way from where I was. After a series of tragic losses during my teenage years, I sought the empty darkness alcohol and other drugs provided. My drugs were all that I had left after 15 years of blackouts.

When I woke up in restraints after my third and last overdose, I knew I could no longer continue using. I have not used alcohol or other drugs since November 30, 1982. I completed inpatient treatment, where I was introduced to recovery and the 12 steps. Then, I embarked on a remarkable journey that unfolded beyond anything I had ever dreamed of before. I was working as a nurse when I achieved recovery, and after some time in recovery, I realized I didn’t want to be a nurse when I grew up. I wanted to write, so I went back to school and got a degree in creative writing.

Working the 12 steps helped me repair my damaged relationship with my parents, who are now deceased, but each lived long enough to see me in recovery. I still attend 12-step meetings on a regular basis, sponsor women, and volunteer at a nonprofit recovery advocacy organization. The life I live today is only because of my commitment to recovery and my belief in the power of the 12 steps.

Brenda Mayer
Chemical Dependency Specialist
Tacoma, WA

The tired old adage “Once an addict, always an addict” is simply not true, and I am proof of that. I believe that an addict, any addict, can lose the desire to use and find a new way to live.

It wasn’t easy for me, though. I began using drugs when I was 13 years old. The early years of my life were marked by my father’s addiction to alcohol and all the pain and chaos that it engendered. I am a survivor of physical, emotional, and sexual abuse, and the post-traumatic stress that it produced in me and my siblings.

By the fall of 1981, the only thing that had ever made my life bearable, drugs, had become the problem. I was physically addicted, mentally ill, emotionally unstable, and spiritually bankrupt. I was filled with despair, self-hatred, and hopelessness. As a last resort, I decided to try abstinence and recovery. Treatment and 12-step support was very hard to find in the Greater Seattle area, especially with no money or insurance. But I found help, and today I can say that I have not used alcohol or illicit drugs for more than 28 years, nor do I misuse prescribed medications.
When my recovery started on September 15, 1981, I had a 9th-grade education. I was unemployed and unemployable. Since then, I have educated myself and dedicated my career to working with people who are addicted to alcohol and drugs in the largest urban area of Washington State. I have learned to live life on life’s terms even though it has, at times, been very painful. In 2003, my only brother relapsed after 10 years of abstinence from alcohol. Within 30 days he drove drunk and died in a car accident.

I thrive today when I carry the message of recovery to others. I have personally witnessed the recovery of hundreds of people. They are just like me and have turned their lives around and are making a difference in their communities. Together we are the faces and voices of recovery.

Albert Bryan
Licensed Addiction Counselor, Social Worker, Treatment Center Co-Founder
New Orleans, LA

My troubles with addiction started with using alcohol when I was 9. As my addiction grew, I graduated from alcohol to heroin and cocaine, using whatever could get me high. My biggest obstacle was accepting the fact that I had a problem. I received my help at an inpatient facility. I have now been in recovery for more than 20 years. Within my recovery process, I have obtained a bachelor’s and master’s degree. I am personally involved in the community and in the recovery and treatment of people who need it.

I am a licensed addiction counselor and social worker; co-founder of a substance abuse treatment organization, and a strong advocate for treatment in my community. We are struggling to rebuild here, because of the damage Hurricane Katrina caused, along with the influx of opiates. The treatment for opiates is expensive and everyone addicted to opiates does not have the opportunity to receive treatment. I would like for everyone to have the opportunity to seek help.

I have experienced many “highs” in my recovery, including graduation, my children getting married, purchasing a home, and witnessing the birth of grandchildren. I also had the honor of being a delegate from Louisiana at the 2009 Recovery Rally. There isn’t much that surprises me because I have learned that recovery is an ongoing process. While challenging, recovery is an opportunity waiting to happen.
Neil Kaltenecker  
**Executive Director of a Substance Abuse Advocacy Organization**  
Atlanta, GA

My professional career began in the field of criminal justice more than 25 years ago, and at work I have witnessed the devastation that addiction brings to individuals, families, and communities. Because of my own problems with alcohol, there is very little that separates me from the people I have arrested, monitored in a county jail or a maximum-security women’s penitentiary, or supervised on probation and parole. Like me, many started drinking at an early age, made poor choices in personal relationships, and continued to use alcohol and drugs in spite of the shameful and damaging consequences.

I drank through high school and college. By the time I reached age 30, my health had deteriorated to a critical point, and my life was a version of hell on earth. When I had the brief, yet intense, conscious awakening that I did not want to live this way anymore, I discovered a strong and incredibly caring community of recovery that was there to support me. Alongside them, I began a period of renewal that healed my body, my heart, and my mind.

I have been in long-term recovery since 1990 and am grateful every day for the incredible opportunities I have had and continue to have since then as a result of recovery. I am a responsible and caring spouse, stepmother, daughter, sister, friend, and colleague. My recovery is at the very core of who I am.

Opportunities for recovery should exist for each and every person. That belief has fueled my passion to bring a message of hope to anyone who will listen. It is also why I am working at an advocacy agency whose mission is to reduce the impact of alcohol and other drug problems in our communities, and why I humbly speak out about my recovery and let others know that they, too, can get well.

Ronnie Katz  
**Substance Abuse Prevention Program Coordinator for a City's Public Health Division**  
Portland, ME

In 1969 during my senior year in high school, I was constantly surrounded by friends who were getting high. Whenever I was offered drugs, I would decline and say that I wasn’t ready yet. I graduated that June, and by summer I apparently decided that I was ready and began my 28-year journey into active addiction. By sophomore year of college, I was a daily user and continued down that path for the next 20 years, rarely spending a day without being high.

During those two decades, I watched my great “potential” turn into a “what could have been.” It took 5 years to complete college and after graduating, I had no idea what to do with my English degree. I managed to find teaching jobs in private schools, but they never lasted long. It wasn’t until I started a job as a drug counselor in a New York City high school that I started to question my own use and the hypocrisy that defined my life.
targeted outreach

Also, throughout this time, I was incredibly lonely and wondered why I could not have a romantic relationship. After an illness in 1990, I spent 3 weeks without getting high and realized that I actually liked the way I felt. It took another 7 years for me to find my way into 12-step recovery, following a move to Nashville and a connection on the Internet with a person in recovery.

Twelve years later, my life is amazingly full and happy, with a loving relationship, a successful career, and an acoustic duo called Broadband. I continue to stay involved in a recovery program, and believe that we need to make recovery visible, so that it is accessible to all who need and desire it. And I feel like I am finally becoming the person that I originally set out to be.

Pat Guerin
Coordinator at a Recovery Alliance
El Paso, TX

Sometimes I have to pinch myself to believe that I have been in recovery for 39 years. For me, long-term recovery means I am free from the obsession of alcohol, that I contribute to the well-being of my family and my community, and that I am self-supporting through my own contributions. My friends and family have regained their trust in me, and we now thoroughly enjoy each others’ company.

I have so much to be grateful for, beginning with the late great Gert Behanna, a woman who published her own recovery story under a pseudonym “Liz Burns.” Her story made it possible for me to admit that I was hopelessly addicted to alcohol, and that a sober life could be a beautiful and rewarding adventure.

I entered recovery through a 12-step program, where I encountered people just like me. I firmly believe that God works through people to carry a message of recovery, and that “gratitude” is an action word. I have been graced with countless opportunities to practice gratitude, resulting in wonderful experiences I could have once only imagined!

My interests have evolved as I grow in recovery. I have always had a special concern for women-specific services, and one day would like to author recovery materials for them. Recently, I am interested in supporting a grassroots movement to restore rights to felons who now embrace long-term recovery and are productive members of society. Presently, I provide peer-to-peer recovery services, serve as an advocate in three drug courts, and actively participate in my church and 12-step programs.

I aspire to remain teachable and keep my recovery “green,” to enjoy life, and to share the joy of recovery with others.
Donald Greegrass, Sr.
Certified Alcohol Drug Counselor
La Crosse, WI

I have escaped death three times in my life, and I know if it wasn’t for recovery, I might not be here today. I have been in recovery for 14 years, after nearly a 40-year battle with alcohol and drugs, either my own or a family member’s.

Growing up, my parents’ drinking progressed to the point that it became more important than my siblings and me. I was 4 years old the first time I turned to alcohol, and again at 5 years old. In middle school, while other kids went to the movies and roller skating, I got drunk at parties with older friends. I tried marijuana for the first time the summer before my sophomore year of high school, the path that led to my years of addiction.

I joined the Marine Corps after my first visit to a halfway house, and during my 3-year career, I went through alcohol treatment and received an honorable discharge. I was unable to hold a job, and any stipends I did earn, I used to support my addiction. At the age of 30, a doctor told me that if I didn’t receive treatment, I would end up in the hospital, or worse.

It was my third near-death experience and it made me realize I needed treatment. I received help from a state vocational rehabilitation program and graduated from the University of La Crosse. Because of my recovery, today I now enjoy spending time with my wife and kids, golfing, jogging, and working as a certified alcohol drug counselor.
Addressing Substance Use Disorders and Stress Among Public Safety Officials

Every day, public safety officials put their lives on the line to protect people within the United States, as well as in other countries. Public safety officials encompass a variety of professions. They include all branches of the military, such as Army, Navy, Air Force, Marines, and Coast Guard, as well as police, probation and correction officers, firefighters, emergency medical technicians, and other first responders.

Each group’s stress can manifest in different ways, ranging from mild to severe levels. Some are able to cope with the emotional and physical effects of stressful experiences by using their existing support systems. In some cases, individuals turn to alcohol or drugs to help cope with their stress and can develop substance use disorders. Those who experience prolonged reactions to stress and, subsequently, substance use disorders may require more intensive treatment by professionals.

Each September, the Substance Abuse and Mental Health Services Administration’s (SAMHSA’s) Center for Substance Abuse Treatment (CSAT), within the U.S. Department of Health and Human Services, celebrates National Alcohol and Drug Addiction Recovery Month (Recovery Month). This celebration is a call to action for all public safety officials to look out for their colleagues who may have a substance use and/or mental health disorder. It encourages them to seek help from a counselor or treatment program, the sooner the better. As emphasized in this year’s theme, “Join the Voices for Recovery: Now More Than Ever!,” treatment and recovery programs and services are as essential as ever for officials facing increased stress on the job and turning to alcohol and/or drugs to cope.

This document outlines how the stressful careers of public safety officials can contribute to substance use disorders or relapse, the types of stress they may feel, and guidance for individuals with a substance use disorder or who think a colleague, friend, or family member may be affected. It also includes treatment and recovery resources available for public safety officials.

The Stress of Serving the Public

Public safety sectors work to protect people in the United States. Each sector faces repeated exposure to unique incidents that cause stress, which may play a part in alcohol and/or drug abuse. SAHMSA has identified 10 Strategic Initiatives, with one created to address the root causes of pervasive, harmful, and costly public health problems related to exposure to violence and trauma. Public safety officials witness:

- Officer-involved shootings
- Death of co-workers
- Serious injury while on duty
- Hostage situations or negotiations
- Exposure to intense crime scenes
- Suicide of co-workers or victims
targeted outreach

The following elaborates on the unique challenges they face.

**Firefighters and emergency medical technicians** frequently respond first to 911 calls, arrive first at an accident scene, and risk their lives by entering directly into high-danger situations. First responders must make quick decisions, often with unclear information, and face serious consequences for a wrong decision—a very high stressor. First responders also assume the added stressful role of counselor or treatment provider for those in need. This role, combined with exposure to distressing situations, can cause them to turn to alcohol and/or drugs. Studies show that 29 percent of active duty firefighters have possible or probable problems with alcohol use. Additionally, more than 80 percent of fire and emergency personnel responding to large-scale disasters experience moderate to severe symptoms of critical incident stress reactions (CISR) after the incident, a typical response to dangerous situations. This may contribute to substance use disorders in extreme cases.

**Police, probation, and correction officers** deal with high-stress situations that statistically increase their likelihood of alcohol and/or drug use. Specific stressors include interaction with armed criminals, high-speed car chases, facing weapons, and patrolling high-risk areas to prevent crime—all extremely dangerous circumstances. In addition, these officers often direct individuals that they help to recovery and treatment services, making it a necessity for public officials to be knowledgeable about substance use disorders and treatment options. A study conducted by the U.S. Department of Justice's National Institute for Justice revealed that police are at higher risk than other emergency workers for alcohol abuse, hypertension, migraines, and insomnia. One-quarter of law enforcement officers in the United States report alcohol dependence as a result of stress on the job. Yet police may be less likely than the general public to seek professional help due to concerns about image or that their records will become public.

**Military officials**, including those from the Army, Marines, Air Force, Navy, National Guard, and Coast Guard, face physical and mental challenges. These challenges include exposure to combat and difficulty juggling both career and family responsibilities. There are approximately 1.4 million active-duty military workers, many of whom are at high risk of developing alcohol and/or drug abuse due to the pressures they face. Even after their military service ends, veterans can be susceptible to substance use disorders and relapse of pre-existing problems, as they recall distressing experiences faced during combat. For example, one study found that 19 percent of Vietnam veterans experienced post-traumatic stress disorder (PTSD), a disorder that can occur after exposure to a traumatic event, at some point after the war. Approximately 60 percent of veterans also have alcohol dependence.

To combat this issue, the U.S. Department of Defense this year established the Defense Center of Excellence for Psychological Health and Traumatic Brain Injury. This center provides treatment, education, and research related to these behavioral health issues.
Addiction is complex and is affected by a variety of factors. Individuals exposed to stress are known to also be more likely to abuse alcohol and other drugs or relapse.\textsuperscript{16} Military families experience additional stress when a parent or spouse deploys and often suffer serious adverse consequences when their loved one returns home with a substance use disorder or PTSD.\textsuperscript{17} If you or someone you know is in the military or is a family member of someone in the military, visit \textit{After Deployment} for tips on combating substance use disorders, adjusting to war memories, coping with mental health disorders, handling stress, and improving relationships. Also, one of SAMHSA’s 10 Strategic Initiatives is to support military service men and women, and their families and communities, by leading efforts to ensure needed behavioral health services are accessible and outcomes are successful.

The tired old adage “Once an addict, always an addict” is simply not true, and I am proof of that. I believe that an addict, any addict, can lose the desire to use and find a new way to live.

It wasn’t easy for me, though. I began using drugs when I was 13 years old. The early years of my life were marked by my father’s addiction to alcohol and all the pain and chaos that it engendered. I am a survivor of physical, emotional, and sexual abuse, and the post-traumatic stress that it produced in me and my siblings.

By the fall of 1981, the only thing that had ever made my life bearable, drugs, had become the problem. I was physically addicted, mentally ill, emotionally unstable, and spiritually bankrupt. I was filled with despair, self-hatred, and hopelessness. As a last resort, I decided to try abstinence and recovery. Treatment and 12-step support was very hard to find in the Greater Seattle area, especially with no money or insurance. But I found help, and today I can say that I have not used alcohol or illicit drugs for more than 28 years, nor do I misuse prescribed medications.

When my recovery started on September 15, 1981, I had a 9th-grade education. I was unemployed and unemployable. Since then, I have educated myself and dedicated my career to working with people who are addicted to alcohol and drugs in the largest urban area of Washington State. Within 30 days he drove drunk and died in a car accident.

I thrive today when I carry the message of recovery to others. I have personally witnessed the recovery of hundreds of people. They are just like me and have turned their lives around and are making a difference in their communities. Together we are the faces and voices of recovery.
Varying Amounts of Stress, Varying Impacts

Because of challenging experiences in their work lives, public safety professionals face varying levels of stress, ranging from mild to more severe. What causes stress for one person may have little effect on others, and each reacts differently. Individuals in high-risk jobs may face three types of stress—acute, episodic acute, and chronic—each with its own symptoms and treatment approaches.

- **Acute stress** is the most common form and, because it is short term, does not cause extensive damage. Common symptoms include emotional distress or anxiety, stomach problems such as heartburn, and muscular problems such as a tension headache.

- **Episodic acute stress** refers to the stress experienced by those who suffer acute stress frequently. They are often in a rush and take on too much responsibility, resulting in deteriorating relationships and hostility. Common symptoms include persistent tension headaches, hypertension, and heart disease. People with episodic acute stress are resistant to change and frequently require professional help to recover.

- **Chronic stress** describes long-term perpetual problems that a person faces—a potential problem for public safety officials in long-term careers that involve witnessing traumatic events. Symptoms of chronic stress are manageable, but may require medical and behavioral treatment. If left untreated, individuals may misuse alcohol and/or drugs, suffer from a heart attack or stroke, exhibit violent behavior, or commit suicide.

Public safety officials also are known to develop the following conditions from their on-the-job experiences:

- **Compassion fatigue** is experienced by officials who work closely with people who have been traumatized by an event. Public safety officials and other caregivers, including nurses, doctors, chaplains, and volunteers, may develop compassion fatigue as a direct result of being concerned about their patients’ well-being. In extreme cases, this fatigue contributes to an increased use of alcohol and/or drugs.

- **Serious psychological distress (SPD)** includes symptoms of emotional distress, including depression, anxiety, restlessness, and hopelessness. In 2008, an estimated 24.6 million adults in the United States, or about 11.3 percent of all adults, suffered from SPD. Adults suffering from SPD in the past year were 12.3 percent more likely than those without SPD to have engaged in illicit drug use.

- **Critical incident stress reactions (CISR)** are the physical, emotional, or behavioral symptoms exhibited by people within 6 to 12 weeks after a critical incident occurs. CISR differs from post-traumatic stress disorder (PTSD) because people can improve without receiving treatment in 70 percent of CISR cases, whereas PTSD sufferers often require treatment. Long-term substance use is not heavily associated with those who suffer from CISR.

- **Post-traumatic stress disorder (PTSD)** is an anxiety disorder. Some people develop it after exposure to a traumatic event where physical harm occurred or their lives were threatened. Although PTSD does not automatically cause substance use disorders, individuals with PTSD are more likely than others with similar backgrounds to have substance use disorders. Of people with substance use disorders, 30 to 60 percent meet the criterion for PTSD.
targeted outreach

Individuals with PTSD may use alcohol and/or drugs to self-medicate and avoid their root problems, may not remember the specific traumatic experience they faced, and often do not know they have a disorder, unless they have already been diagnosed. Symptoms of PTSD include:28

- Nightmares
- Paranoia
- Sense of shortened future
- Depression
- Avoiding work
- Avoiding certain locations that were previously favorites
- Loss of faith
- Obsessive behavior
- Memory loss
- Irritability
- Exaggerated startle response
- Addiction to alcohol, drugs, sex, or gambling

Prevalence of Co-Occurring Disorders

Individuals with both an addiction and an emotional or psychiatric problem are diagnosed with a co-occurring disorder. In 2008 alone, 2.5 million adults suffered from both serious mental illness and substance dependence or abuse.29 It is estimated that:

- 53 percent of people who use drugs also have at least one serious mental illness.30
- 29 percent of all people who are diagnosed as mentally ill abuse alcohol and/or drugs.31
- 50 percent of adults who misuse alcohol and suffer from PTSD have other serious psychological or physical problems.32

Public safety officials are vulnerable to several co-occurring disorders due to high-stress daily encounters, including:

- Anxiety disorders: panic attacks, phobias, compulsions
- Mood disorders: depression
- Multiple addictive behaviors: alcohol misuse, use of illicit drugs, misuse of prescription medications
- Physical health problems: diabetes, heart disease, liver disease
Misconceptions About Addiction Among Public Safety Officials

Misconceptions surrounding addiction comprise one of the greatest obstacles for a person struggling with substance use disorders, especially among public safety officials. This type of stigma includes using labels to describe people with substance use or mental health issues, such as “addict,” “alcoholic,” “user,” and “abuser,” despite how they self-identify. Fight this in your community by terminating the use of terms that have negative connotations. Stigma is most likely to diminish as a result of education and broader acceptance of addiction as a treatable disease.

The Defense Department recently launched a $2.7 million service-wide anti-stigma campaign, Real Warriors. Real Battles. Real Strength. that allows service members to tell their experiences of seeking help for mental illnesses and substance use disorders. The campaign uses public service announcements to highlight that seeking treatment will not harm a soldier’s military career.

Although many soldiers experience problems from the stressors faced during war, very few seek help:

- In a study administered to more than 7,000 soldiers and Marines after returning from war, approximately 42 percent who were diagnosed with a mental health problem indicated an interest in receiving treatment. However, only around 31 percent of them actually received professional help due to the stigma associated with treatment.
- In 2008, 20.8 million people felt they needed treatment for a substance use disorder, but 15.1 percent of these individuals did not receive it due to reasons related to stigma.
- In 2007, nearly 29 percent of Army soldiers in Iraq said it would harm their career to seek treatment for a mental health disorder.

Misconceptions about addiction exist. These groups must learn they can receive confidential help. If you suffer from a substance use disorder, know that you are not alone and that recovery is possible. Additionally, if you know a public safety official who is suffering, encourage him or her to seek help. Knowing the signs to look for is an essential way to help.
Signs and Symptoms of Addiction

Alcohol and drugs have varying effects on a person’s overall physical, emotional, and behavioral health. A person may possess one or more of the following signs and symptoms of addiction. Be aware that people with these qualities don’t always have a substance use disorder. If you suspect that your colleague, friend, or family member has an addiction, be supportive of that person’s journey through treatment and recovery.

Where to Find Confidential Help

Public safety officials who suffer from a substance use disorder should reach out to the following contacts for confidential guidance and support:

- **Government resources** such as SAMHSA’s National Helpline, accessed by calling 1-800-662-HELP or 1-800-487-4889 (TDD), or SAMHSA’s Treatment Web site, provide an abundant number of treatment and recovery options in your area.

- **Doctors** answer medical and health questions, refer people to addiction treatment programs, and refer people to medication if appropriate. Under the Health Insurance Portability and Accountability Act (HIPAA), private health information is protected by Federal law.
- **Clergy members** provide spiritual direction and serve as a nonjudgmental resource. They also can refer people to local resources to treatment.

- **Local mental health associations** can help find a social worker, psychologist, psychiatrist, or other mental health professional in your community.

- **Health insurers** aid in the cost of treatment and help individuals or their families who are seeking treatment options.

### What Can I Do?

If you notice that family members, colleagues, or friends who serve as public safety officials may have a substance use disorder, help them find treatment. To aid the person’s path to recovery, keep in mind the following tips:

- **Remember** that substance use disorders can be treated and recovery is possible.

- **Educate** colleagues and peers about the disease of addiction, which will reduce the misconceptions and myths associated with treatment and recovery.

- **Use** national toll-free, e-therapy, or online services that offer free and confidential treatment and recovery services. Public safety officials may be more likely to agree to programs that are private and “off the record.” For additional resources, please refer to the resources provided at the end of this document.

- **Be open** and share stories. Discuss your own experiences and feelings with others who have a substance use, mental health, or co-occurring disorder. This will encourage them to seek treatment.

- **Reach out to** the person who uses alcohol and/or drugs. Casually approach the person to discuss the possibility of treatment. If a casual setting does not work, organizing a formal intervention may urge the person to receive help. To learn more about organizing an intervention, visit the National Alcohol Substance Abuse Information Center.

- **Separate** yourself emotionally from the situation. If you allow yourself to detach from the circumstances, you are less likely to damage your relationship with the person you want to help.

- **Don’t forget** that it takes tremendous courage for individuals to admit they have an alcohol and/or drug problem. Remind others of this if you hear negative conversation surrounding the situation.

- **Remember** that recovery is a process and there are many paths to recovery. Encourage continued participation in peer support programs and therapy to sustain long-term recovery.
If you or someone you know is suffering from a substance use disorder, remember that treatment programs are available and recovery is possible. Talk to your family members, friends, and colleagues about addiction. Their support is essential to those in recovery.

Resources for Public Safety Officials

In addition to the information and resources found on the Recovery Month Web site at http://www.recoverymonth.gov and the SAMHSA Web site at http://www.samhsa.gov, public safety officials can find treatment and recovery information through the following resources:

- **Addiction and PTSD: Combating Co-occurring Disorders** – A SAMHSA television and radio program that examines PTSD’s connection to substance use disorders and provides information on where people can find treatment.

- **Recovery and the Military: Treating Veterans and Their Families** – A SAMHSA television program that addresses trends and the prevalence of substance use disorders among veterans and discusses treatment issues that veterans and their families face.

- **United States Army Substance Abuse Program (ASAP)** – Provides information on the health risks posed by substance use disorders and works to restore individuals to full productive performance.

- **United States Navy Alcohol & Drug Abuse Prevention Program (NADAP)** – Offers information and assistance to support individual and command alcohol abuse and drug use prevention efforts.

- **United States Air Force, Drug Demand Reduction Program (DDRP) at Bolling Air Force Base** – Focuses on preventing the use and abuse of illicit and legal drugs within the Air Force community through educational briefings, presentations, fairs, and other community-wide programs.

- **Marine Corp’s Combat Operational Stress Control (COSC) Branch** – Provides resources for a healthy life at home and work.

- **U.S. Department of Veterans Affairs National Center for Post-Traumatic Stress Disorder** – Advances the clinical care and social welfare of U.S. veterans through research, education, and training on PTSD and stress-related disorders.

- **The Sweeney Alliance’s Grieving Behind the Badge Program** – Offers help to emergency response and public safety personnel.

Refer to the “Resources” section of this toolkit for a full listing of available treatment and recovery resources.
For more information and organizations that can help provide treatment and other resources nationally or in your area, call 1-800-662-HELP or 1-800-487-4889 (TDD), or visit http://www.samhsa.gov/treatment. For additional Recovery Month materials, visit http://www.recoverymonth.gov.

workforce

Addressing Substance Use Disorders and Stress in the Workplace

Everyone in the workforce, regardless of career or current employment status, can encounter work-related stress at some point. According to one report, 25 percent of people surveyed viewed their job as the top stressor in their lives. Managing workplace stress is important, as it has detrimental effects on a person’s family, career, and well-being. Job stress also is strongly associated with health complaints, including aching muscles, migraine headaches, and a sense of exhaustion.

In addition to a variety of genetic and other environmental factors, job stress and related health issues can cause some individuals to begin to use alcohol and/or drugs to relieve their stress and put those in recovery from addiction at risk of relapse. Of the 20.3 million adults classified with substance use disorders in 2008, 15.8 million were employed either full or part time, indicating that a significant portion of the workforce is vulnerable to this disease.

Each September, the Substance Abuse and Mental Health Services Administration’s (SAMHSA’s) Center for Substance Abuse Treatment (CSAT), within the U.S. Department of Health and Human Services, celebrates National Alcohol and Drug Addiction Recovery Month (Recovery Month). This celebration is a call to action for people in every community to look out for themselves, a family member, friend, or their colleagues, who may have a substance use or mental health disorder, and encourage them to seek help.

This year’s theme, “Join the Voices for Recovery: Now More Than Ever!,” emphasizes that treatment and recovery programs are as vital as ever, as the workforce faces increased levels of stress. Individuals are stressed by a variety of circumstances, including turbulent economic times and increased unemployment rates. This document discusses common causes of stress at work and tips to combat it, information on encouraging your employer to develop a substance-free workplace program, as well as treatment and recovery resources for you and your colleagues.

Causes of Stress at Work

Stress in the workplace, which can play a role in increased substance use, has amplified in recent years due to job insecurity and a trend of working longer hours. Increased responsibility, new work hours, or a disagreement with a co-worker or boss also increases stress at work. Specific factors that affect levels of stress among employees include:

- The demands of the job;
- The control (or lack of) that employees have over their own work;
- The support employees do or do not receive from colleagues; and
- Whether employee roles and responsibilities are clearly understood.
Since I found recovery in 1986, I have been motivated by a strong desire to give back what I had received. I joined the staff of a small, rural treatment center as a counselor. What I discovered was added strength for my own recovery, while I also bore witness to the struggles of others as they attempted recovery.

I’ve been able to sustain my passion and motivation to develop better methods for treating my clients. In 2005, I became executive director of the agency, and joined the beginning chapter of Faces and Voices of Recovery. After attending a national conference in Washington, DC, I found renewed motivation and a desire to bring about changes in the treatment delivery system by removing barriers that exist in providing care to all who need it.

At a Recovery Month celebration in 2009, I was privileged to hear speeches by several of the people in whose recovery I had played a small role. The inspiration of their stories of addiction and recovery and what it has meant to them and to their families will sustain me in the weeks and months ahead. And at the end of my career, I am sure I will be able to look back and take satisfaction in knowing that I made a difference. My journey of personal recovery from addiction continues to this day.

Substance Use Disorders—An Important Workplace Issue

Substance use disorders can develop as a result of workplace stress and harm both companies and their workers, with 15.8 million people who work and also have an addiction.9

Studies identify specific sectors as “high risk” for addiction, including the restaurant, food, and catering industry; transportation sector; and construction fields. Occupations of high status, including company directors, lawyers, and doctors, also have high alcohol and drug consumption rates.10

Signs of Substance Use Disorders

- Lack of attention to job tasks due to preoccupation with obtaining and/or using alcohol and drugs
- Increased accidents during the work week
- Cycles of increased energy, restlessness, and inability to sleep
- Abnormally slow movements, speech, or reaction time
- Increased irritability and agitation
- Unusual calmness or unresponsiveness
- Loss of interest in activities that were previously important
- Increased work absences or on-the-job accidents

Another big factor is losing a job or even the fear of possible job loss. Employment status appears to have an effect on drug use, as the rate of drug use was higher for those who were unemployed—at 19.6 percent—than for those who were employed full time—at 8 percent—among adults 18 or older.11 Two of SAMHSA’s 10 Strategic Initiatives are to promote the overall well-being and health of individuals, families, and communities and to boost employment opportunities for individuals, including those with mental illnesses and substance use disorders.

The resources at the end of this document will help anyone find information about recovery from substance use disorders. Those who are unemployed also should check their local newspapers and community job boards, as well as consult some recovery support services that are geared to people re-entering the workforce.

Addressing substance use disorders is important because of their many consequences:12, 13

- **For workers**, substance use disorders result in deteriorating health, injury, disciplinary action at work, family problems, job loss, missing work, and/or on-the-job accidents.

- **For employers**, substance use contributes to increased costs, lower productivity, absenteeism, and loss of an advantage over the competition.

- **For the unemployed**, substance use disorders can prohibit them from finding a new job by distracting them from their job search.

Yet research shows that savings from investing in substance use disorder treatment exceeds the cost of this investment by a ratio of 12 to 1.14 In addition, one company averaged $426,000 in savings each year on mental health and substance use disorder treatment as a result of employees’ participation in the company’s employee assistance program.15

Do your part by reaching out to your fellow employees and company leaders to emphasize positive ways to avoid substance use within the workplace.

**Tips for Managing Employment-Related Stress**

While some stress is normal, extreme stress interferes with your productivity and diminishes your physical and emotional health. It’s imperative to find ways to keep your stress manageable. Fortunately, there are many productive ways for you and your colleagues to control and reduce stress and ultimately help combat the development of substance use disorders. These tips include:16

- **Taking responsibility for improving your physical and emotional well-being.** Exercising regularly, eating small but frequent meals throughout the day, avoiding nicotine, and keeping consistent sleeping patterns will help you manage workplace stress.
Identifying habits and negative attitudes that add to the stress you experience at work. Resisting perfectionism, filing and throwing away clutter, making to-do lists, and thinking positively about your work, co-workers, and accomplishments will save you time and cut stress at work.

Learning better communication skills to ease and improve your relationships with management and co-workers. Creating a balanced schedule, not over-committing yourself, allowing extra time in your schedule so you aren’t rushing, taking regular breaks throughout the day, and delegating responsibility will aid you in letting go of unnecessary stress. Planning team-building exercises such as team meetings or brown-bag lunch seminars will improve communication among your colleagues.

Get Your Employer Involved

If you notice stressed individuals in your office, encourage co-workers to have outside interests and hobbies such as volunteering, exercise, or art classes. Fostering a work environment that supports these extra-curricular activities should result in increased productivity, through a better balance between work and free time. Your company also may decide to offer seminars on managing stress or exercise classes, such as yoga during the workday, to combat stress.

In addition, to discourage overall use of alcohol and drugs among your employees, encourage your human resources department to develop a substance-free workplace program if one is not already established. This will improve worker safety and health and will add immense value to the company.

Relay the following tips on how to set up a comprehensive program and help your employer get started. The program should include five components—a written policy, a supervisory training program, an employee education and awareness program, an employee assistance program, and, if desired, a drug-testing program. Remember that no company can set up all of these initiatives at once, and that it may take multiple steps to install a successful program. Convey to your employer that the following steps will aid in setting up an alcohol- and drug-free program:

- **Write a comprehensive policy.** The policy should outline where the company stands, what the company expects, and consequences that employees will face if the policy is violated. Companies should involve employees at all levels when developing this policy.

- **Train supervisors.** As they are in direct contact with workers, supervisors will be able to detect performance issues that may indicate substance misuse. Companies should train them to recognize the signs of addiction and what they should do if they suspect someone has a substance use disorder. Also evaluate insurance coverage for treatment, and discuss prevention and education strategies during training sessions.
targeted outreach

- **Educate employees.** After training supervisors, companies should educate all employees about the drug-free workplace policy, emphasizing the consequences of misusing alcohol and drugs. The program should tell employees how to get help for substance use problems and inform employees about how these disorders affect not just the company directly through lost productivity and other issues, but also their personal lives.

- **Provide an employee assistance program.** Employee assistance programs (EAPs) are set up by companies to help their employees deal with a variety of issues, including substance use disorders, family difficulties, financial troubles, and emotional problems. EAPs have been shown to reduce accidents and absenteeism and raise productivity among workers.20

- **Start a drug testing program,** if appropriate. As the final step of the process, consider whether the company should develop a drug testing program. If so, testing programs will need to meet legal or regulatory requirements, disability discrimination provisions, and collective bargaining agreements. Consulting a lawyer will ensure that the testing program is fair, accurate, and legally defensible. Also, review all federal regulations, as described under The Drug-Free Workplace Act of 1988.21

Company leaders should contact SAMHSA’s Drug-Free Workplace Helpline at 1-800-Workplace (967-5752) for model programs and guidance in setting up a new initiative. In addition, consult local telephone directories and other community resources for referral programs and services.

**Resources for the Workplace**

An extensive amount of information and resources can be found on the Recovery Month Web site at http://www.recoverymonth.gov and the SAMHSA Web site at http://www.samhsa.gov. Refer to the “Road to Recovery: Recovery in the Workplace” television and radio program to see the crucial role that employers play in the success of an individual’s recovery from substance use disorders.

Employers and employees also can consult the following resources for additional treatment and recovery information:

- **SAMHSA’s National Helpline** – Provides 24-hour free and confidential information and treatment referrals in English and Spanish by calling 1-800-662-HELP, or 1-800-487-4889 (TDD).

- **SAMHSA’s “Find Substance Abuse and Mental Health Treatment” Web site** – Contains resources about mental health, substance abuse, and treatment.
targeted outreach

- **SAMHSA's Division of Workplace Programs** – Provides guidance for employers on workplace drug-testing issues by calling 1-800-Workplace, or 1-800-967-5752.

- **SAMHSA's GetFit.SAMHSA.gov Web site** – Offers a range of information on workplace wellness issues, including combating problems with alcohol and drugs.

- **SAMHSA's Health Information Network (SHIN)** – Contains the latest information on the prevention and treatment of mental and substance use disorders.

- **The National Institute on Drug Abuse (Drug Free Workplace Programs)** – Provides information on research to significantly improve prevention, treatment, and policy as it relates to drug abuse and addiction.

For more information and organizations that can help provide treatment and other resources nationally or in your area, call 1-800-662-HELP or 1-800-487-4889 (TDD), or visit [http://www.samhsa.gov/treatment](http://www.samhsa.gov/treatment). For additional Recovery Month materials, visit [http://www.recoverymonth.gov](http://www.recoverymonth.gov).

now more than ever!
Stress and Substance Use Disorders in Families

All families face challenges at some point. Common troubles include illness, death in the family, marital strain, financial problems, internal conflicts, and emotional or physical abuse. These obstacles create stress that can contribute to increased alcohol and/or drug use. In addition, many families encounter problems at work or school that reverberate at home, compounding the problem.

To draw attention to this issue, the Substance Abuse and Mental Health Services Administration’s (SAMHSA’s) Center for Substance Abuse Treatment (CSAT), within the U.S. Department of Health and Human Services, celebrates National Alcohol and Drug Addiction Recovery Month (Recovery Month) every September. Recovery Month celebrates individuals and families in long-term recovery and acknowledges those who provide recovery services. This year’s theme, “Join the Voices for Recovery: Now More Than Ever!,” underscores how stress in our society may contribute to or exacerbate alcohol and/or drug use, which can contribute to substance use disorders or relapse. This document discusses the prevalence and causes of substance use disorders among families, the effects of stress and substance use disorders on each family member, the benefits of recovery, and the variety of treatment and recovery options available for families across the country.

Prevalence and Causes of Substance Use Disorders Among Families

Substance use disorders affect families of every race, ethnicity, socio-economic status, and location. In 2008, an estimated 23.1 million people needed treatment for a substance use disorder within the past year in the United States. These disorders affect not just one person, but also the person’s entire family and close friends.

Alcohol and/or drug addiction is often a perpetual cycle among families. Children of parents who suffer from alcohol or drug addiction are four times more likely to develop a substance use disorder than those who weren’t raised in that environment. Also, 1 in 4 children under age 18 live in a home where alcohol misuse or alcohol addiction is hurting the family. Many thousands more live with parental drug abuse.

Stress contributes to the use of alcohol and/or drugs. Chronic emotional stress also can be caused by the addiction of a family member, creating often serious health and developmental consequences for children. Stress may also cause some people to relapse or turn to substance use for the first time as a way to cope. Individuals face a variety of stressful situations that impact the entire family, including:

- **Youth stress** – As children transition from their youth to adolescent years, they may misuse alcohol and prescription drugs as a response to stresses at school and at home. A SAMHSA study that connects violent behavior to substance use found that girls between 12 and 17 who were in serious fights were more likely to have used alcohol and/or drugs. As described in its 10 Strategic Initiatives, SAMHSA is working to reduce the behavioral health impacts of violence and trauma among youth.
targeted outreach

- **Financial problems** – For families, not having enough money for necessities or neglecting to pay bills causes significant stress, which may contribute to increased alcohol and/or drug use.\(^{10}\) Another one of SAMHSA’s 10 Strategic Initiatives is to reduce the barriers that homeless individuals and families experience when accessing programs that sustain recovery.

- **Marital problems** – Tensions between married adults cause stress within the whole family and play a role in substance use disorders. In fact, in families with a member who suffers from addiction, divorce is seven times more likely.\(^{11}\)

- **Health problems** – Health issues such as eating disorders, cancer, or chronic diseases are stressful on individuals and their family members and are also the result of growing up in the chronic emotional stress of addiction in the family.\(^{12,13}\) People may develop substance use disorders as they cope with these stressful problems. For example, substance use disorders have been reported in up to 55 percent of people with bulimia and 23 percent of people with anorexia.\(^{14}\) In addition, among adults over age 18 with serious mental illness, 25.2 percent, or 2.5 million people, were dependent on alcohol or illicit drugs in 2008.\(^{15}\)

- **Emotional abuse or violence** – Abuse or violence within a family causes stress, and often contributes to alcohol and/or drug use either at the time of abuse, or later in an individual’s life. Additionally, more than 50 percent of spousal and child abuse stems from alcohol and/or drug use.\(^{16}\)

**Effects of Substance Use Disorders on the Family and the Benefits of Recovery**

The stress of substance use disorders can have physical, emotional, social, and spiritual consequences on individuals and their families. Specifically, a parental substance use disorder greatly affects his or her children. Children who grow up in this environment experience feelings of guilt, shame, anger, or isolation throughout their lives.\(^{17}\) Additionally, parents with a family history of addiction may have trouble establishing healthy and productive habits within their own families.\(^{18}\)

If highly stressful family situations persist, they can have an adverse impact on a child’s development and dangerous health consequences for the family and friends of the person with the substance use disorder.\(^{19}\) This emotional stress can affect their mood, appetite, and sleep cycles. In addition, it may ultimately lead family members to develop chronic anxiety, depression, or their own addiction.\(^{20}\)

In these situations, parents and children are encouraged to seek help. Call SAMHSA’s National Helpline at 1-800-662-HELP, or 1-800-487-4889 (TDD), for 24-hour free and confidential information and treatment referrals in English and Spanish, or visit SAMHSA’s “Find Substance Abuse and Mental Health Treatment” Web site at [http://www.samhsa.gov/treatment](http://www.samhsa.gov/treatment). Use the Psychology Today Web site and the National Board for Certified Counselors Web site to help find a certified counselor in your area. Children and youth can consult a school social worker or student assistance counselor who is trained to provide support to young people living with addiction in the family. Creating communities that focus on the prevention of mental illness and substance abuse for children, youth, families, and other community members is another of SAMHSA’s 10 Strategic Initiatives.
Fortunately, after treatment, individuals recognize that addiction is a chronic brain illness and they develop healthy coping skills to more effectively deal with stress.21 Seek help for your entire family if one person suffers from a substance use disorder, so that everyone can heal. Family therapy helps those affected by a loved one’s addiction identify and resolve their problems. Through education and guidance, participants learn they can’t control their loved one’s addiction, but they can take accountability for their own health.22

Family-oriented treatment programs and support groups are widely available and effective. In two surveys of individuals who participated in family treatment programs:

- **82 percent** reported much improved mental health and well-being.23
- **73 percent** reported a greater ability to function at home, school, or work.24
- **68 percent** of women who stayed in comprehensive treatment longer than 3 months were able to remain alcohol and drug free, compared with 48 percent who left treatment within the first 3 months and did not remain alcohol and drug free.25

In addition to treating the addiction, family therapy helps confront other stressful issues within the family, such as youth stress, marital problems, and health problems.26

My problem was not any specific substance—it was the disease of addiction. I began using at the young age of 11 to escape the pain of long-term abuse. My life was painful; addiction and violence were rampant in my family. But today I am so grateful to have been given the gift of recovery. I have not used any mind- or mood-altering chemicals for the past 24 years.

I was in and out of treatment centers for several years before I came into contact with others who were “just like me” and was finally able to hear the message of recovery. I began attending 12-step groups and have never looked back. Recovery for me means that I have a life that was not even imagined while I was using. The cycle of addiction in my family has been broken. What this means is that my children, ages 18 and 11, have never known me as a mom with a substance use disorder. They know me as a loving, caring, and compassionate person.

I have had so many wonderful experiences on this journey and I could not possibly mention them all. I will say that I have obtained my master’s in social work and have worked in this field for many years. I am involved in the community and take the responsibility to relay the message of recovery to individuals suffering from substance use disorders very seriously. I am a homeowner, have traveled, and have done many other things that I couldn’t have done if I wasn’t in recovery. However, the most important gifts to me are the internal ones: my self esteem, self worth, integrity, self respect, and acceptance of self. This was unimaginable in my “other life.”

---

**Stress Relief Tips for Family Members**

- Exercise regularly
- Learn to delegate responsibilities
- Allot extra time in your schedule
- Take periodic breaks
- Point out the positives

How to Get Help for Yourself, Your Family, and Others

A variety of options are available to help facilitate recovery. An abundant amount of information and resources exists on the Recovery Month Web site at http://www.recoverymonth.gov, including the “The Social Services System: Supporting Treatment and Recovery for Individuals and Families” television and radio program. This program examines ways in which social services effectively deliver assistance to those in need, including children and families with substance use disorders.

Family members and friends can find supplementary treatment and recovery information through the following resources:

- **SAMHSA's National Helpline** – Provides 24-hour free and confidential information and treatment referrals in English and Spanish by calling 1-800-662-HELP, or 1-800-487-4889 (TDD).

- **SAMHSA's “Find Substance Abuse and Mental Health Treatment” Web site** – Contains resources about mental health, substance abuse, and treatment.

- **Mental Health America** – Dedicated to preventing mental and substance use conditions through advocacy, education, research, and service.

- **Al-Anon/Alateen Family Groups** – Provides support groups for families and friends of people with alcohol problems.

- **Nar-Anon** – Provides a community for family members to share experiences related to substance use disorders.

- **National Association for Children of Alcoholics** – Provides information and educational materials for children and families of people with alcohol or drug problems, as well as for treatment professionals.

- **Adult Children of Alcoholics** – Offers a 12-step program for women and men who grew up in alcoholic or otherwise dysfunctional homes.

- **Alliance for Children and Families** – Provides services to the nonprofit child and family sectors, and economic empowerment organizations.

- **National Asian Pacific American Families Against Substance Abuse, Inc.** – Involves service providers, families, and youth to promote health and social justice and address the alcohol, tobacco, and other drug issues of Asian and Pacific Islander populations.
targeted outreach

- **National Association of Public Child Welfare Administrators** — Represents administrators of State and local public child welfare agencies, bringing an informed view of the problems facing families today to the formulation of child welfare policy.

- **Teen Challenge International** — Provides youth, adults, and families with effective and comprehensive faith-based solutions to life-controlling alcohol and drug problems.

- **White Bison** — Conducts education, training, and development focused on Native American recovery communities on reservations and in urban areas.

If you have lived through your own or a loved one’s addiction and have worked through recovery, help educate others about the risks of substance use disorders and the benefits of treatment and recovery. Throughout the year and this September during **Recovery Month**, join thousands of families across the Nation to celebrate those in recovery and endorse treatment for those in need by:

- **Finding** ways to lighten the mood when times are stressful. For example, go for a walk or bike ride, or schedule a family game night to spend quality time with your family.

- **Sharing** your personal experience with friends, extended family, colleagues, and the community. Explain how stress can take a heavy toll on the family, but those suffering from addiction can recover and lead productive lives.

- **Working** with a local organization to plan a **Recovery Month** event at your office, in your community, or in your school. Use the event to celebrate people in recovery and educate others about how to get help.

For more information and organizations that can help provide treatment and other resources nationally or in your area, call 1-800-662-HELP or 1-800-487-4889 (TDD), or visit [http://www.samhsa.gov/treatment](http://www.samhsa.gov/treatment). For additional **Recovery Month** materials, visit [http://www.recoverymonth.gov](http://www.recoverymonth.gov).

Development of Substance Use Disorders in Older Adults

From graduating high school, to landing your first job, to raising and supporting a family, life changes cause varying levels of stress. Although stress occurs at any age, older adults face distinct challenges as they transition to new stages in life. For some, this stress may contribute to a substance use disorder or a relapse in substance use after periods of abstinence.¹

For more than 20 years, National Alcohol and Drug Addiction Recovery Month (Recovery Month), sponsored by the Substance Abuse and Mental Health Services Administration’s (SAMHSA’s) Center for Substance Abuse Treatment (CSAT), within the U.S. Department of Health and Human Services, has educated the public about addiction and recovery issues. The celebration encourages all people to seek treatment for substance use disorders, lauds individuals and families in long-term recovery, and acknowledges those working in the field who provide recovery services. This year’s theme, “Join the Voices for Recovery: Now More Than Ever!,” emphasizes the elevated levels of stress that individuals face today due to an array of circumstances, and how this stress can contribute to alcohol and/or drug use, substance use disorders, or relapse.

This document outlines the rate of substance use disorders among older adults, the effects that substance use has on your loved ones, the symptoms to look for, and tips for helping older adults who suffer from addiction.

Prevalence of Substance Use Disorders Among Older Adults

Substance use disorders have become more prevalent among middle aged and older adults and continue to become a greater public health issue as the baby boomers reach retirement age. Among people ages 50 to 59, reported use of illicit drugs has nearly doubled since 2002.² The baby boomer generation is predicted to have substance use disorders at a higher rate than other groups because:³ ⁴

- It was the first generation to engage in widespread recreational use of illicit drugs.
- It was the first generation where a wide variety of prescription medications were readily available.
- It is one of the last generations for which treatment and recovery is not perceived as socially acceptable.

In addition, individuals face unique stressful situations as they age that can contribute to substance use. They may encounter a jolting change of pace upon retirement, loss of a spouse or child, financial worries, health concerns, loss of control and independence, or poor social support networks.⁵

People become more sensitive to the effects of substance use as they age. Due to physiological changes associated with aging, 3 drinks may affect an older adult more heavily than someone in his or her early twenties.⁶ Older adults have also been known to misuse substances both deliberately, due to increased stress and pain, and inadvertently, by mixing medications or taking them with alcohol or for purposes not originally prescribed by a doctor.
Older adults respond to alcohol and drugs differently depending on the medications they’re taking and their general health. This can cause significant problems. For example:

- **50 percent** of older adults in assisted living homes have an alcohol problem.\(^7\)
- **26 percent** of assisted living home residents have misused prescription drugs.\(^8\)
- **70 percent** of older adults’ hospital admissions are for illness and accidents related to alcohol.\(^9\)

When an older person visits a doctor or hospital, addiction problems are often overlooked. Only 1 percent of doctors correctly diagnose alcoholism in women over 60.\(^10\) In addition, 10 percent of patients over 60 who are diagnosed with Alzheimer’s disease are actually suffering from brain damage caused by alcoholism.\(^11\)

Substance use among older adults is a problem that needs to be addressed. Avoiding the misuse of alcohol and medications contributes to lower rates of illness and disability among older adults.\(^12\)

**Effects of Substance Use Disorders on Older Adults**

Older adults who suffer from addiction are more likely to have their health deteriorate at a greater rate than those who don’t have substance use disorders. Additionally, their mental health significantly declines, and they lose their ability to live independently much earlier than the average older adult.\(^13\)

Adults who drink excessive amounts of alcohol or use drugs put themselves at a greater risk of serious problems such as stroke, cardiovascular disease, liver disease, neurological disease, poor diabetes control, and osteoporosis. In addition, older adults are more likely to have health problems that are increased or exacerbated by alcohol, including high blood pressure, memory loss, and mood disorders.\(^14\)

**Medication Tips for Older Adults**

- Keep track of what medications you take on a daily basis and when you take them.
- Ask your doctor if you can safely drink alcohol while taking your medication.
- Read and follow the directions for your medication. Be careful not to take more than the recommended dose.
- Talk to a friend, family member, or health care professional if you are concerned.
- Do not take medication for other purposes than intended.
Symptoms to Look for in Older Adults

Addiction in older adults may be difficult to detect if they live alone. Friends and family may not consider substance use problems as the issue, and may think that their loved one suffers from depression, memory or thinking problems, or anxiety. Although alcohol and/or drugs have varied effects on an individual’s overall physical and mental health, the basic patterns are similar. Symptoms of a substance use disorder in older adults include:

- Observable changes in sleep patterns and unusual fatigue
- Changes in mood
- Jerky eye movements
- Seizures
- Unexplained complaints about chronic pain or vision problems
- Poor hygiene and self-neglect
- Unexplained nausea or vomiting
- Slurred speech

Fortunately, abstaining from substance use can improve many health conditions in older adults. If your loved one possesses several of these warning signs, encourage him or her to seek help from a doctor or treatment program. In some cases where the person is not capable, you may need to serve as the liaison between your loved one and his or her health care provider. Please refer to the next section for resources to help an older adult get treatment.

Getting Help for an Older Adult

Speak with your loved ones, young and old, if you think they may have a substance use disorder. Use the following tips when speaking with older adults regarding specific addiction and treatment options:

- Talk about your worries about their substance use when they are alert.
- Share information regarding the effects of alcohol and/or drugs on their health.
- Ask to go to doctor’s visits with them or contact the doctor yourself, if appropriate.
- Suggest alcohol- and drug-free activities.
- Encourage counseling and offer to drive them to and from these meetings.
- Be supportive, invite them, and encourage them to spend time with family and friends, attend family gatherings, and participate in extracurricular activities.
After my wife and children, preserving the gift of recovery for those who continue to struggle is the number one priority in my life. I am lucky that I’ve been able to give back since I first found a path to recovery after being paroled from prison in 1972.

Prior to that, I had spent the better part of 10 years progressing along a continuum that began with alcohol abuse, and culminated with heroin addiction. At 24 years old, I did not find recovery, recovery found me. After five previous treatment attempts, I entered a long-term therapeutic community.

After a decade of abuse, isolation and pain, I found a community that was unlike any I had experienced at any time in my life. That community gave me acceptance, accountability, and ultimately salvation. It allowed me to become someone I actually like most of the time. It allowed me to find a beautiful wife and father three beautiful, healthy children. And it allowed me to give back some of what I have been given.

Since 1985, I have been the director of that same program that helped me. In that time it has grown exponentially, and we now serve some 1,200 people per day in addiction treatment housing and community corrections programs.

The initial treatment of addiction in older adults may require more intensive medical support than younger patients need, but ultimately older adults succeed in treatment more than any other age group. In-patient treatment plans, mutual support groups, or partial hospital or day treatment programs might be appropriate for this group, especially because they encourage the interaction older adults may lack.

Although it may be difficult to confront your loved one, remember that recovery is possible. There are a variety of resources available on the Recovery Month Web site at http://www.recoverymonth.gov and the SAMHSA Web site at http://www.samhsa.gov for individuals seeking treatment and recovery. In addition, refer to the following resources geared toward older adults, including:

- **SAMHSA’s National Helpline** – Provides 24-hour free and confidential information and treatment referrals in English and Spanish by calling 1-800-662-HELP, or 1-800-487-4889 (TDD).

- **SAMHSA’s “Find Substance Abuse and Mental Health Treatment” Web site** – Contains resources about mental health, substance abuse, and treatment.

- **SAMHSA’s “As You Age” Web site** – Offers information and resources on medications and alcohol misuse for older adults.
targeted outreach

- **Administration on Aging** — Helps elderly individuals maintain their health and independence in their homes and communities.

- **National Institute on Aging Information Center** — Provides research, training, health information, and programs relevant to aging and older adults, and includes an “Older Adults and Alcohol” brochure, coauthored by the National Institute on Alcohol Abuse and Alcoholism (NIAAA), with information on substance use.

- **AARP** — Provides a wide range of unique benefits, special products, and services for the 50+ population, including the 76 million strong baby boom generation.

- **Eldercare Locator** — Helps older individuals and their families access an array of home and community-based services.

- **Aging and Addiction Web site** — Provides resources for older adults who need help for addiction.

- **National Council on Patient Information and Education** — Works to improve communication of information on appropriate medicine use to consumers.

If you know an older adult who previously suffered from a substance use disorder, help raise awareness of this little-known issue in your community. Educate people about the importance of treatment and recovery by:

- **Reminding** older adults to ask their doctors to review the warning labels, directions, and possible side effects of taking all drugs they are being prescribed.

- **Volunteering** at adult living facilities and sharing information with residents and staff regarding the effects of alcohol and drugs on seniors’ health.

- **Working** with a local organization to plan a *Recovery Month* event at a local mall, senior center, or retirement facility in your community. Use the event to celebrate people, especially older adults, in recovery and educate others about how to get help.

For more information and organizations that can help provide treatment and other resources nationally or in your area, call 1-800-662-HELP or 1-800-487-4889 (TDD), or visit [http://www.samhsa.gov/treatment](http://www.samhsa.gov/treatment). For additional *Recovery Month* materials, visit [http://www.recoverymonth.gov](http://www.recoverymonth.gov).

Inclusion of Web sites and other resources mentioned in this document and on the *Recovery Month* Web site does not constitute official endorsement by the U.S. Department of Health and Human Services or the Substance Abuse and Mental Health Services Administration.

New media, also known as social media, facilitates online communication, as well as idea and content sharing. New Web tools have made it easier for people with similar interests to interact with each other, and the recovery community should take advantage of these opportunities by learning how to use these tools.

The following glossary is offered to help you promote National Alcohol and Drug Addiction Recovery Month (Recovery Month), as well as the effectiveness of treatment and the possibility of recovery online. Sponsored by the Substance Abuse and Mental Health Services Administration’s (SAMHSA's) Center for Substance Abuse Treatment (CSAT), within the U.S. Department of Health and Human Services, Recovery Month reaches countless people in the recovery community and treatment and recovery field, including local organizations and individuals who participate online.

To help you reach these audiences and engage the online community, review the following glossary for background information on key online terms:

**Blogs** – User-generated Web sites, short for “Weblogs,” which give online users an opportunity to share news or opinions on a particular subject, such as a person’s success in achieving recovery as well as the hardships of untreated addiction.

**Discussion Board (or Forum or Message Board)** – Contains conversations, or threads, which are made up of multiple posts about specific topics. Members of the recovery community have started discussion board communities to find support, such as The Second Road, The Sober Recovery Community, and In the Rooms.

**Facebook** – A social networking site where people create an online profile and “friend” people based on similar interests, location, and other details. Join Recovery Month’s fan page and engage others in the ongoing dialogue. You also can create a group for your coalition and invite people to join.

**Flickr** – A popular site for photo sharing, storage, and searching. Search for photos of other events to post in your office, get ideas from other events’ visuals, or find members for your coalition.

**Google Blog Search** – Offers a continuously updated search index. Results include blog posts and can be viewed and filtered by date.

**Micro-blogs** – Brief text updates, photos, or audio clips from users. (See Twitter.)

**MySpace** – Allows users to create profiles and connect with people who have similar interests. Try searching for a local band and invite it to play at your Recovery Month event, or find others in recovery to speak at your event.

**Podcast** – A digital media file that can be downloaded through Web syndication and played back on a mobile device or computer. Recovery Month offers a large selection of audio and video podcasts that you can promote on your own Web site. A video podcast, or online delivery of a video clip, also can be referred to as a vodcast.
Really Simple Syndication (RSS) or Web Syndication – Enables users to avoid constantly refreshing their favorite Web pages to check for updates. An RSS reader, such as Google Reader, collects individual posts from blogs and news sites, and presents them as they arrive. Set up a feed to receive the latest news and blog posts from the recovery community in your inbox.

Social Network – Links individuals based on similar interests, beliefs, or relationships. Use these social networks to build a coalition that spans communities across the country. (See Facebook, Myspace, or Flickr.)

Technorati – Designed primarily for searching blogs and ranking their reach and influence. For example, if you search for “alcohol and drug recovery,” you’ll find more than 700 hits.

Twitter – Allows its users to send text-based posts of a maximum of 140 characters to their profiles. These posts are then sent to other Twitter members who have subscribed to a user’s feed. Search Twitter for other people who are “tweeting” about their Recovery Month events or talking about their personal recovery experiences.

Viral Marketing – Using the Internet to brand a campaign or product. Recovery Month is doing this through Facebook, Twitter, and YouTube.

Widget – An online tool added to Web sites that displays or shares information from various sources. Instructions for adding the Recovery Month widget to your blog or site are available at http://www.recoverymonth.gov.

Webcast – A file that streams over the Internet to allow people everywhere to tune into your coalition-building meeting or event. Recovery Month presents The Road to Recovery Television and Radio Series that features panels of nationwide experts in the field of treatment and recovery available for online viewing.

Wikipedia – A community-researched encyclopedia with over 10 million entries and 77 million monthly visitors. The site is community oriented and anyone can update entries. Organizations are discouraged from editing their own entries, as it is seen as counter to best practices.

YouTube – Promotes online video-sharing for users to post videos they’ve created. Users create their own channels that host all their videos and allow others to find them based on related interests. Check Recovery Month’s channel often and post a video of your own!

Inclusion of Web Sites and other resources in this document and on the Recovery Month Web site does not constitute official endorsement by the U.S. Department of Health and Human Services or the Substance Abuse and Mental Health Services Administration.
Online Voices for Recovery

People and organizations use the Web to communicate about addiction and recovery throughout the year, as well as during National Alcohol and Drug Addiction Recovery Month (Recovery Month) each September. During this year’s Recovery Month and beyond, learn how people discuss substance use disorders online so you can participate in the online conversation.

To complement other toolkit materials, this guide provides tools and resources to help you:

- Understand what online resources are available; and
- Determine the most effective ways you can contribute online.

Use these resources to promote this year’s Recovery Month campaign theme, “Join the Voices for Recovery: Now More than Ever!,” which aims to reach people who are susceptible to alcohol and/or drug use during times of stress.

Your online activities can support one of the Substance Abuse and Mental Health Services Administration’s (SAMHSA’s) 10 Strategic Initiatives to increase the understanding of mental illness and substance use disorder prevention and treatment services. (Visit http://www.samhsa.gov and click on “About Us.”)

Understand the Online Space

You may find three different types of information online about substance use:

- Current research and publications about substance use disorders, treatment, and recovery.

- News or discussion about prominent people with addiction or who are in recovery. You may even find coverage about Recovery Month events in your own community.

- Firsthand accounts from people who have (or know someone who has) successfully achieved long-term recovery, as well as others who have grown up with a parent with an addiction. These voices give realistic and honest perspectives about substance use disorders and the hope of recovery.

TOOLKIT TIP

To learn about specific social media Web sites, refer to the “New Media Glossary” on the Recovery Month Web site at http://www.recoverymonth.gov. For ways to reach out to your local community, refer to the Media Outreach section also on the Web site.
Addiction can be a sensitive issue for many, even for those who choose to discuss it in such a public forum as the Internet. Before you engage in any discussion online, please keep these tips in mind:

- **Respect privacy** – In some cases, you may know who is writing a piece online, especially if it is on a newspaper’s Web site or by a well-known blogger whose identity is public. But if it is a personal blog or a message board, you may not be able to identify the writer. The online world can reinforce the anonymity traditions of many mutual support groups and offer a familiar, comforting outlet for people in recovery and for their impacted family members. Keep this in mind when speaking about or to anyone online.

- **Analyze your contribution** – Many people use the Internet because it is non-confrontational and they can openly discuss their problems. Extensively review the forum or blog you want to contribute to before you weigh in. Identify your strengths as an organization or individual, such as strong knowledge of treatment and recovery options, and the resources you offer to ensure that your input is well received by other readers and participants.

## How to Engage

Many resources help locate sites where conversations occur. In addition to the many resources available at the *Recovery Month* Web site, [http://www.recoverymonth.gov](http://www.recoverymonth.gov), there are tools to help you locate specific conversations on blogs and message boards. Some blog search engines to try are:

- **Google Blog Search**, which you can search by date and relevance at [http://blogsearch.google.com](http://blogsearch.google.com). Use it to see what bloggers are discussing about a specific topic, such as addiction or recovery. Understanding what the blogger writes about, especially what is discussed in his or her latest blog post, is important if you want to develop a relationship with that writer.

- **Blog Pulse**, which you can search by date and relevance at [http://www.blogpulse.com](http://www.blogpulse.com). Use it to create a graph that plots the amount of online conversations taking place about a specific topic related to addiction. This will help you identify ways to positively contribute to this conversation.

Once you are ready to offer your input online, follow these steps:

**Connect on social networks.** Social networking Web sites, such as Facebook, accessible at [http://www.facebook.com](http://www.facebook.com), and Twitter, accessible at [http://www.twitter.com](http://www.twitter.com), are a great way to connect with people and are free to join. Use them to share your story and resources. Be sure to get permission from individuals before posting their names and/or photos online. *Recovery Month* has a strong online presence through its Facebook fan page at [http://www.facebook.com/RecoveryMonth](http://www.facebook.com/RecoveryMonth), YouTube channel at [http://www.youtube.com/RecoveryMonth](http://www.youtube.com/RecoveryMonth) and Twitter account at [http://www.twitter.com/RecoveryMonth](http://www.twitter.com/RecoveryMonth). Below are some additional tips for using social networks.
resources

- **Facebook** — In addition to actively participating in *Recovery Month’s* Facebook page, you can use the site in other ways. If you or your organization already has a Facebook page, make sure to post information about your event or activities on your wall and continue to update your page as *Recovery Month* gets closer. Also, create a separate event page to allow you to invite others to RSVP for your activities and see who else is attending.

- **YouTube** — A short video (two minutes maximum) is a fun and interactive way to promote your event or organization online. Be creative! Film your *Recovery Month* activities or discuss recovery or your organization. Be careful when using copyrighted materials including music; many songs and movie clips require gaining the rights to use them and it is illegal to use them without permission. When in doubt, stick to original material.

- **Twitter** — This real-time, short-messaging service allows you to spread the word about your event and organization in several ways. Using your organization’s Twitter account (create one by going to [http://www.twitter.com](http://www.twitter.com) and clicking “Sign Up Now”), you can send messages about your event in short messages (140 characters or less) that can be easily “retweeted” (or resent) by other users who forward something you have tweeted. Use the hashtag #RecoveryMonth or create another hashtag for your activities that will allow users to easily search for what you and others are saying about this. Hashtags, which use “#” and a key phrase, are used in messages to collect conversations about a specific topic. It’s also best to tweet frequently to keep the interest of those who follow your updates.

Connect on message boards and blogs using the following tips:

- **Comment on other people’s blog posts** and let them know that there are resources available to help them; direct people to [http://www.recoverymonth.gov](http://www.recoverymonth.gov).

- **Offer resources and support.** Treatment and recovery services are sometimes offered online, and anonymous users may post messages about how their recovery is going. Respond with words of encouragement or other helpful information and resources you may know. Let them know about *Recovery Month* activities and ways to get involved to further the campaign’s reach.

- **Participate regularly in message boards** about addiction and recovery and offer resources and tips from your own or your organization’s expertise.

- **Create your own blog** about your daily work, *Recovery Month* activities, any coalition work, or even your own experiences with alcohol and drug addiction, treatment, and recovery.

If you decide to start a blog, keep in mind that:

- **Blogging requires a large commitment.** Creating and maintaining a successful blog requires a considerable commitment. Coming up with fresh and new content and posting it at regular intervals is key to a blog’s success. If you don’t think you will be able to post a new entry on most days, your time might be better spent participating in other conversations, rather than starting your own.
Many similar blogs already exist. Many people or organizations start a blog because it is a well-known online communications tool. Before you embark on adding your point of view, do some research to make sure that your point of view will be unique and there is an audience for what you will discuss.

To help you start your own blog, there are many Web sites that you can consult, such as Wordpress, accessible at http://www.wordpress.com, or Blogger, accessible at http://www.blogger.com. Once you name your blog and start to post, use social networking Web sites to promote it. You can also add the Recovery Month Events Widget, accessible at http://www.recoverymonth.gov/Community-Events/Events-Widget.aspx, to promote your specific event or all Recovery Month events on your blog or Web site. A widget is an online tool added to Web sites that displays or shares information from various sources. Instructions on adding the widget to your blog and customizing it are available on the Recovery Month Web site.

The Next Step

Use the “New Media Glossary” located on the online version of this toolkit to find Web sites and resources that will help you educate people about Recovery Month and its many messages.

Continue to visit the Recovery Month Web site, http://www.recoverymonth.gov, to see what new resources are available to help you connect online. Keeping ahead of the trends will make you even more Web savvy as you promote your Recovery Month activities and raise awareness about addiction and recovery.

Inclusion of Web sites and other resources mentioned in this document and on the Recovery Month Web site does not constitute official endorsement by the U.S. Department of Health and Human Services or the Substance Abuse and Mental Health Services Administration.
Building Community Coalitions

Coalitions are an alliance of people representing diverse organizations who agree to work together to achieve a common goal. Bolster your National Alcohol and Drug Addiction Recovery Month (Recovery Month) campaign by creating a coalition to promote educational resources about addiction, treatment, and recovery. Conduct comprehensive research to find groups and individuals across the country who share your mission. To unite and educate more people, expand the reach of your coalition beyond just your local community through social networking tools.

Sponsored by the Substance Abuse and Mental Health Services Administration’s (SAMHSA’s) Center for Substance Abuse Treatment (CSAT), within the U.S. Department of Health and Human Services, this year’s Recovery Month campaign focuses on reaching audiences that are susceptible to alcohol and/or drug use in times of stress. Millions of Americans of every age, race, gender, ethnicity, socio-economic status, and community suffer from substance use disorders. With online and community support, you will reach these groups, faster, easily, and more conveniently.

How to Begin

Coalitions unite leaders who represent different constituencies, such as elected or appointed officials and business, educational, health services, social, and religious groups. They bring together organized grassroots groups and people with a shared interest in achieving a mutual goal or need.

Participate in coalition activities by:

- Building one on your own if there is no active coalition that meets your needs; and
- Joining and supporting the Recovery Month efforts with a community coalition that already exists.

Creating a new coalition provides you with more extensive control and the ability to implement your own vision. On the other hand, uniting with an existing coalition will save upfront planning time, allowing you to quickly enhance existing efforts to celebrate Recovery Month. Remember that joining coalitions that have different goals from your own may be useful. For example, partnering with a coalition focused on anti-drinking and driving offers a significant opportunity for your organization to branch out if this is not an area you currently address. It is beneficial to continue your coalition after your Recovery Month event concludes to build stronger resources and connect available services to those in need.

Refer to the following tips to create a coalition in line with the goals of Recovery Month:

- **Decide specifically what issues related to substance use disorders you want to address.** How are these problems being handled? For example, are there treatment and recovery resources in your community that address the specific needs of various populations, such as veterans, public safety officials, older adults, and families?
Determine what resources are already available and what groups are currently involved online, in your community, and nationwide. Compare that with your goals and resources. Consider people in the public and private sectors who might make influential and positive contributions to your Recovery Month coalition. Find organizations to partner with, such as prevention, treatment, and recovery services, law enforcement, and other social and educational agencies. Other organizations that have the resources and expertise needed to build a successful coalition around substance use disorders include:

- Adult independent living communities
- Alcohol and drug treatment centers and clinics
- Child welfare organizations
- Family therapist groups
- Foundations and volunteer groups
- Government officials and agencies
- Health-related organizations
- Mental health organizations
- National and local media outlets
- Post-traumatic stress disorder support groups
- Private companies/businesses
- Recovery bloggers
- Recovery support groups or people in recovery
- Schools, universities, and educational centers
- Unemployed support groups
- Veterans’ associations
- War support groups

For a coalition to be most effective, each member must be committed to the mission and work collaboratively—this is much easier with online collaboration tools. This way, people with similar goals can work together remotely, rather than at the same location. Research all organizations before you invite them to join your coalition to be sure their missions align with yours. It is important that the relationship is mutually beneficial, not one-sided.

Recruit members to the coalition. Contact your potential coalition allies and invite them to be a part of your coalition, or ask if they are already involved with one that you could join. Be sure to reference any existing connections you may have with members of their organizations. Use the following tools to build your coalition from the ground up:

- Social media, such as Facebook (http://www.facebook.com), MySpace (http://www.myspace.com), or Twitter (http://www.twitter.com)
- A Web site encouraging people to join
- Virtual meetings
- Online services that can organize meetings simultaneously across the country, such as http://www.meetup.com
When you recruit people to participate in your effort, have something substantive to show them, describe your mission, and ensure they have a specific role in the coalition.

- **Confirm the coalition participants** and evaluate whether you have included a diverse panel of organizations that work with different groups in the community. Participation commitments can be informal verbal agreements or formal written contracts among the members, depending on the scope of the collaboration. For the coalition to be successful, keep in mind these guidelines:
  - Be respectful of time commitments.
  - Allow all members to have an active role in decision making.
  - Set priorities and goals.
  - Agree on a communication process, and who will be responsible for maintaining it.
  - Communicate and meet regularly.

A solid leadership team needs to oversee the coalition and ensure the efficient and timely execution of the coalition’s plan, while fostering communication and a clear sense of the coalition’s direction.

- **Grade your coalition and celebrate its successes.** See [http://www.cadca.org/resources/detail/evaluation-primer](http://www.cadca.org/resources/detail/evaluation-primer) for tools to assess the effectiveness of your collaborative partnership efforts.

**Successful Partnerships to Model**

Community coalitions have helped combat addiction for years. The *Recovery Month* observance has its own coalition made up of the *Recovery Month* Planning Partners. Organized in 1997, the Planning Partners are a coalition of more than 130 groups in the addiction, treatment, and recovery field. The group meets quarterly to determine goals and set priorities for *Recovery Month* every year. For a list of the Planning Partners, refer to the “Resources” section of this toolkit.

Additionally, the Office of National Drug Control Policy (ONDCP) and the U.S. Department of Justice fund hundreds of community partnerships throughout the country. In 2007, the *Community Anti-Drug Coalitions of America* (CADCA) estimated that there were more than 5,000 operational anti-drug coalitions in the United States.
resources

The following are addiction and other health-related coalition examples that will help guide you in the coalition-building process:

- **Mental Health America of Indiana** – Accessed at [http://www.mhai.net/MHAL_page.htm](http://www.mhai.net/MHAL_page.htm), this organization promotes the mental health and recovery of all Indiana citizens through educational programs to increase public understanding and acceptance of people with a mental illness and addiction.

- **Addiction Coalition** – Accessed at [http://www.addictioncoalition.org](http://www.addictioncoalition.org), this coalition is committed to stopping addiction in Central Alabama by raising community awareness and accelerating communication among professionals fighting addiction.

- **Ohio Citizen Advocates** – Accessed at [http://www.oca-ohio.org/MailingList.asp](http://www.oca-ohio.org/MailingList.asp), this group works to eliminate the stigma and discrimination associated with alcohol and other drug addiction by educating the public that addiction is a preventable, treatable medical illness.
Recovery Month Coalition Resources

Alcoholism and Substance Abuse Providers of New York State
This nonprofit membership association consists of coalitions, programs, and agencies throughout New York State that provide substance use disorder prevention, treatment, and research.
518-426-3122
http://www.asapnys.org

Community Anti-Drug Coalitions of America (CADCA)
This national organization builds and strengthens the capacity of community coalitions to create safe, healthy, and drug-free communities. The organization supports its members with technical assistance and training, public policy, media strategies, conferences, and special events.
800-542-2322
http://www.cadca.org

Faces & Voices of Recovery
This national recovery advocacy organization mobilizes people in recovery from addiction to alcohol and other drugs, families, friends, and allies in campaigns to end discrimination and make recovery a reality for even more Americans.
202-737-0690
http://www.facesandvoicesofrecovery.org

National Association for Children of Alcoholics (NACoA)
This national family recovery organization has members and affiliate organizations throughout the country who initiate or support Recovery Month activities in their local communities. NACoA provides its members with information, tools, and strategies to support recovery for children and families impacted by addiction.
888-55-4COAS (2627)
301-468-0985
http://www.nacoa.org

National Council on Alcoholism and Drug Dependence, Inc. (NCADD)
Founded in 1944, this organization is dedicated to increasing public awareness and understanding of the disease of alcoholism and drug dependence. NCADD and its national network of State and local affiliates provide education, prevention, information/referral, intervention, treatment services, and advocacy, and have helped hundreds of thousands of individuals and families into recovery.
800-NCA-CALL (622-2255) (Hope Line)
212-269-7797
http://www.ncadd.org

National Inhalant Prevention Coalition (NIPC)
This public-private effort promotes awareness and recognition of the under-publicized problem of inhalant use. The coalition serves as an inhalant referral and information clearinghouse, stimulates media coverage about inhalant issues, develops informational materials and a newsletter, provides training and technical assistance, and leads a week-long national grassroots education and awareness campaign.
800-269-4237
423-265-4662
http://www.inhalants.org
Planning Partners

The following organizations are partners involved in planning National Alcohol and Drug Addiction Recovery Month (Recovery Month) activities in conjunction with the U.S. Department of Health and Human Services’ Substance Abuse and Mental Health Services Administration’s (SAMHSA’s) Center for Substance Abuse Treatment. You are encouraged to ask local and national organizations to collaborate with your organization on Recovery Month planning; please refer to the “Building Community Coalitions” document for tips. You can find local affiliates or chapters by contacting the national organizations directly. Full listings with addresses are included in the “Recovery Month Resources” brochure.

A&E Network
Inspired by the overwhelming response to its Emmy-nominated series Intervention, A&E created The Recovery Project, a multi-year campaign designed to generate widespread awareness that addiction is a treatable disease and recovery is possible.
http://www.therecoveryproject.com

Addiction Survivors
This group is dedicated to providing online peer support communities for those with addiction disorders, their families, and friends.
http://www.addictionsurvivors.org

Addiction Technology Transfer Center
Network National Office (ATTC)
This SAMHSA-funded network is comprised of 14 regional centers and a national office that serves the 50 States, Washington, DC, Puerto Rico, the U.S. Virgin Islands, and the Pacific Territories. The ATTC provides training, education, resource materials, and technical assistance to the addiction treatment workforce to advance the adoption of evidence-based practices. A list of ATTC regional centers, the States they serve, and contact information can be found on the ATTC Network Web site.
816-235-6888
http://www.ATTCnetwork.org

Adult Children of Alcoholics WSO
This is a 12-step, 12-tradition program of women and men who grew up in alcoholic or otherwise dysfunctional homes. Members meet with each other in a mutually respectful, safe environment and acknowledge common experiences.
562-595-7831
http://www.adultchildren.org

Advocates for Recovery Through Medicine (ARM)
This organization’s goals are to end stigma and discrimination against people who use medications to treat addictions and to move addiction treatment, especially opiate addiction treatment, into mainstream medicine.

PRO-ACT
This grassroots recovery support initiative in southeastern Pennsylvania (Bucks, Chester, Delaware, Montgomery, and Philadelphia Counties) has provided prevention, intervention and recovery support services, as well as education and advocacy, to the community for 11 years. It has been providing a growing matrix of peer-to-peer support services, which has led to the opening of three Recovery Community Centers, now a hub for all recovery services.
800-221-6333
http://www.proact.org

Providence Center, The
This organization is the largest community mental health center in Rhode Island providing comprehensive services to adults, adolescents and children experiencing mental health, substance use, emotional and behavioral difficulties.
401-276-4000
http://www.providencecenter.org

Psychology Today
This organization is dedicated to helping people understand their addiction, the issues behind it, and how to overcome the challenge.
212-260-7210
http://www.psychologytoday.com

RASE Project, The
This project in south central Pennsylvania provides recovery support services, events, training and education, supportive housing, and intervention services. The RASE Project also offers the Buprenorphine Coordinator Program, providing recovery support for those in medication-assisted treatment for opioid addiction.
717-232-8535
http://www.raseproject.org

Recovery Alliance of El Paso
The alliance was organized in 1998 to fight stigma and discrimination for people in recovery from substance use disorders, and is now dedicated to providing peer-to-peer recovery support services.
915-594-7000
http://www.recoveryalliance.net

Recovery Connection
This is a comprehensive addiction treatment resource and drug rehabilitation referral service. The organization has staff across the country available 24 hours a day to answer all concerns about substance use, addiction treatment, and rehabilitation.
800-993-3869
954-491-1771
http://www.recoveryconnection.org
Recovery Consultants of Atlanta, Inc. (RCA)
This is a nonprofit, faith-based organization founded by concerned, committed, and spiritually centered members of metro-Atlanta’s recovery community. It collaborates with faith (primarily churches) and community-based organizations, develops peer-to-peer support services and programs, and works to build a network of recovering individuals.
404-289-0313
http://www.recoveryconsultants.org

Recovery Living Network
This global communications network focuses on addiction recovery and prevention, using the power of personal experience, celebrity influence, and mass media communication to help individuals when alcohol, drugs, or other excessive behaviors have become a problem in their life. Its mission is to remove stigma from the public psyche to change the perception and image of addiction by talking about it openly and honestly, and by sharing personal stories of hope and inspiration.
949-887-0242
310-600-3079

RecoveryNC
Initiated in September of 2008, to coincide with the celebration of National Recovery Month, this campaign allows North Carolinians in recovery to emerge together, along with their families, friends, advocates, and the treatment and recovery provider community.
919-802-7972
http://www.recoverync.org

Recovery Network Foundation (RNF)
This foundation develops recovery-dedicated projects in print, radio, TV, film, and video formats. “Under the Influence: The Film Series” is a national touring festival that showcases films in which addiction and recovery play leading roles.
914-941-2863
http://www.recoverynetworkfoundation.org

ReStart, Inc.
This nationally accredited, full-service behavioral healthcare provider offers a wide range of diagnostic and treatment services tailored to meet individual needs, including community support services for adults, children, and adolescents. It offers diagnostic assessments, child and adult therapy, families and group sessions, assessments and counseling, residential treatment for girls, behavioral therapy, assertive community treatment teams, psychological evaluations, intensive in-home services, and community support teams.

RECOVERY MONTH RESOURCES

The following is a list of substance use disorder resources that can help you during National Alcohol and Drug Addiction Recovery Month (Recovery Month) and throughout the year. The organizations are listed by category to help you quickly identify the resource(s) most closely aligned with your needs. Resources cover a variety of subject areas, including culture, policy, education, recovery, mental health, mutual support groups, prevention, and more. The referenced organizations represent a broad sampling of what is available nationwide. Organizations in green are Recovery Month Planning Partners and are heavily involved in planning activities.

Please note: This list is not exhaustive of all available resources. Inclusion does not constitute endorsement by the U.S. Department of Health and Human Services, the Substance Abuse and Mental Health Services Administration, or its Center for Substance Abuse Treatment.

Children's Health Initiative (CHI)
This program produces innovative digital media projects combining
television and internet technologies. CHI focuses on issues affecting
the health of at-risk groups such as those living in poverty, families that
don’t typically graduate from high school, teen parents, families with high
incidence of substance abuse and adults who grew up in violent homes.
It is their belief that the health of a community can only be measured by
the health of its children. The initiative’s purpose is to help families create
and sustain stable, wholly healthy (physical, mental, emotional and social
well-being) homes for children.

This organization is dedicated to empowering disadvantaged people, especially youth, to improve their lives, thus enabling them to improve their communities and ultimately society.
306 Turner Road, Suite P
Richmond, VA 23225
804-762-4445
Each U.S. State and territory offers information and support regarding substance use disorders through the local government offices listed below. The following facilities are licensed, certified, or otherwise approved for inclusion by their state’s substance use treatment authority. Their role is to plan, carry out, and evaluate substance use disorder prevention and treatment services provided to individuals and families. During disasters, these offices can play a critical role in directing resources where they are most needed. Specifically, they oversee treatment centers and counselors in their respective States and, in many cases, supply funding to providers, track State trends, and ensure that residents receive the services to which they are entitled.

National Alcohol and Drug Addiction Recovery Month Customer Satisfaction Form

The Substance Abuse and Mental Health Services Administration (SAMHSA) would like to know about your National Alcohol and Drug Addiction Recovery Month (Recovery Month) efforts this September and how useful you found this year’s toolkit for planning your activities. This information will be used in the development of future materials distributed by SAMHSA’s Center for Substance Abuse Treatment (CSAT), within the U.S. Department of Health and Human Services.

Your response is voluntary, but your input is essential so that future Recovery Month materials will meet your needs. Please complete this form and return it by mail or fax to the address below by Friday, October 29, 2010. SAMHSA encourages you to include photographs and/or samples of supporting materials from your Recovery Month activities.

This customer satisfaction form can be found online at http://www.recoverymonth.gov.

Name: 
Title: 

Organization name & mailing address: 
Phone & fax numbers: 

Organization Web site address: 
Email address: 

Please provide a brief description of your event or major activities. (Please attach additional sheets, if necessary.) 

Did you receive media coverage? If yes, who covered your event? (Please attach a brief summary or copies of articles.)
Please tell us which printed kit materials listed below you used and provide suggestions for improving them.

Please send your response to:

SUBSTANCE ABUSE AND MENTAL HEALTH SERVICES ADMINISTRATION  
Center for Substance Abuse Treatment  
Office of the Director, Consumer Affairs  
1 Choke Cherry Road, Second Floor  
Rockville, MD 20857  
Fax: 240-276-2710 (ATTENTION: Consumer Affairs)

Thank you for sharing your **Recovery Month** story with us.

**NOTE:** Public reporting for this collection of information is estimated to average 10 minutes per response. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to: SAMHSA Reports Clearance Officer, Paperwork Reduction Project (0930-0197); Room 5-1039, 1 Choke Cherry Road, Second Floor, Rockville, MD 20857. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control number for this project is 0930-0197 and the expiration date is 1/31/2011.
