

TOBACCO RESEARCH COUNCIL

Research Publications

Counsel is sent herewith:-

Draft Report

INSTRUCTIONS TO COUNSEL TO ADVISE

The results of the first main experiment at the Harrogate Laboratories of the Tobacco Research Council are to be published and the draft report is being examined by scientists on its suitability for publication. Counsel is desired to advise the Council whether the report is likely to increase the risk of proceedings against the tobacco manufacturers in the U.K. The report is expected to be submitted to the executive committee of the Council on 6th October before which date Counsel's views would be appreciated. A copy of the final version of the paper would, of course, be submitted to Counsel before publication.

Counsel is desired to advise accordingly.
