RECEIVED  
JAN 23 1982  
LAW DEPARTMENT

We have received the attached research proposal from Drs. Duncan Hutcheon and Peter Regna that requests support for one year in the amount of \$99,250.00. The proposed study involves research on the physiological effects of carbon monoxide and would be funded as a CTR Special Project.

Dr. Hutcheon is Professor of Medicine and Pharmacology at the New Jersey College of Medicine and Dentistry and is Editor-in-Chief of the Journal of Clinical Pharmacology. He has received previous funding under a CTR Special Project for his research on the relationship between environmental exposures and chronic disease. Some of this work led to the formation of the Princeton Institute of Environmental Medicine in 1980.

Dr. Peter Regna is a scientist with a distinguished career in industrial pharmacology who now serves as an independent consultant to various research organizations. Recently, he has been working with Dr. Hutcheon at the Princeton Institute of Environmental Medicine on the physiological effects of various substances.

We have discussed the proposal with Dr. Sommers and he

believes it is worthy of support. We recommend that the research be approved and funded as a CTR Special Project.

Sincerely,

*Patrick M. Sirridge*
