

CTR - Vol. 1  
2. 1974  
Seltzer, Carl  
SR

February 11, 1974

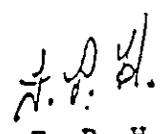

Mr. Sloat:

Re: CTR Special Project -  
Dr. Carl Seltzer

Attached is a self-explanatory memorandum from Bill Shinn concerning continued support for Dr. Seltzer for one year.

Dr. Seltzer has been in the forefront in criticism of statistical studies associating smoking to coronary heart disease. His critiques have been published in leading scientific and medical publications over a number of years.

I endorse Dave Hardy's and Bill Shinn's recommendation to continue support at an aggregate figure of \$50,000. for one year commencing July 1, with the understanding our participation will not exceed our market share.

  
F. P. H.
