

December 27, 1955

TO: LEGAL COUNSEL

Enclosed herewith is an editorial which appeared on Page 1318 of the British Medical Journal dated November 26, 1955, entitled "Bronchitis and Cancer." Please insert this in Volume V under the section headed "Cancer Theories" as Page 26.

Also enclosed is an abstract of an article by Drs. Oswald and Medvei, printed in the Lancet, Volume 2, Pages 843-847, 1955 - and then appearing in abstract form in the Journal of the American Medical Association, Foreign Letters Section, Volume 159, Number 15, Page 1474 under the heading "Effects of Smoking." Please place this in Volume V, "Cancer Theories" as Page 27.

Abstract of an article entitled "Relations of Type of Tumor and Localisation of Bronchial Carcinoma to Pulmonary Ventilation and Changes in Their Relationship by Exogenous Influences (Chronic Bronchitis, Pneumonia, Smoking)" printed in German in the Arch. klin. Chir., 280:592-608, 1955 - and summarized in the December 10th, 1955 issue of the Journal of the American Medical Association, Volume 159, Number 15, Page 1483 is also enclosed. This should be placed in Volume V, "Cancer Theories" as Page 28.

We believe that you will find these three items of interest, because they all pertain to bronchitis and its potential association to smoking.
