

January 4, 1955

TO: LEGAL COUNSEL

We are enclosing herewith complete articles; one from the BRITISH JOURNAL OF CHEMISTRY AND INDUSTRY, dated November 13, 1954, concerning the presence of benzo(a)pyrene in cigarette smoke and a subsequent comment from the BRITISH MEDICAL JOURNAL of November 20th, on the same subject.

In view of some of the current comments in the American press, we thought that it would be of interest to have these complete articles rather than abstracts.

Will you please insert these articles in Volume I.
