Re: Lauterstein & Lauterstein

Services are rendered and bills received from this firm basically in connection with centralization of medical files which relate to the alleged health hazards of smoking, litigation involving allegations of that nature and legislation founded in a presumption that the allegations have a bases in fact.

Special Account 3 was established with respect to the creation of a Central File known as a lawyer medical file for litigation purposes. It is now referred to as the Tobacco Litigation File.

Special Account 4 includes funds required to defray expenses in connection with attendance, keeping track of the progress of and advising interested parties about Congressional, FTC and similar Governmental inquires, etc.

Mr. Ed Jacobs, a member of the above firm, is in charge of this industry operation and his secretary at this writing is Mrs. Cascio. Mrs. Cascio requested that when each check is sent some indication be clearly made as to the account which is covers. This will assist her in keeping her records in order.
