Little

Maurland

Eleanor McDonald

Shmeck Little can be deferred until Ad Hoc study is completed.

Think on a bad idea at present - will get 50% disagreement & further lack of cooperation.

Little peculiarly in good position to have genetics, const. factors

McCusick etc

Yerushalmy.

Covalli in Italy.

Can't duplicate existing studies — Lombard just did so.

Would like to talk to Dr Little — Drs listed just in disagreement, but get focus on twin studies. Israel population. Genetics — meet to dig into the smoker, not the smoke.

Sterling, Rowlee, Sagan, Katz all voted like to go deeper — whole health

Initial Conf not a good idea despite
fact stud to date are largely
consistent. Get committed in
depth & then analyze pooled +
get them together. Maybe not.

Have to assume they need staff.
Each take several studies
& give them staff. Each one works
on given phase.

individually
1) Short term project — not just d.c. but cardio
2) long — emphysema, etc
