BdR memo re " + then Waterbury inventor re Vitamin A. Watts' position / the case is [illegible] + Should we use a Committee to test as suggested by Yeaman? No - indiv & indep. lab.

Hudson told Cng. Watts that if he answered our questions he'd have no secrets.

Ramm produced release for all to sign - & on basis of evaluation each Co make its own decision what it wants to do. Use lab with end payment bill - cheaper? Earle believes ~~but~~ lab service all would be preferable. Watts doesn't want individual approaches - but Goddard may have done so.

OK

Earle would talk & find out if we were willing to go ahead on Rawlin's indep lab test - would they do so. Earle

Paul will call Cy & Grant & obtain their attitude.

~~###~~

Stephano ltr re their resignations from Institute. Orig set up as release of 5 cos — then L. resigned & we agreed to release by T.I. (pressures from Sweeney FTC & press, etc). Ltr approved. Stephano vowed have resigned because of attack on rpt (~~not~~ whether published or not) on which its marketing plans are based (Connie to do that) & used ~~its~~ the release as basis for resignation.

What is the T.I. policy on releases? Matter of Earle's jdt. Selenium one thing — and if public'st by someone else may not be.

Ltr approved

Chemosol - Hudson - has had talks at Johns Hopkins (re Dir Res in Urology?). Highly intelligence & well regarded as urologist.

Dialogue available with Kolen -
Ed talked to Kolen re Selenium -
reddest of red herrings. Feels Harris
methodology poor & if applied to
physical Sciences would get nowhere
Feels to share our views re tar
& nicotine & is on record in HEW to
this effect.

Bates We won't follow up on Kolin until
get ans from Gardner. We want
more dialogue than just with Kolin

Hornaut by Hse Subc. $38,000 - Sen Com
$2,055,000.
Kolen - asked for $20,000,000 - got $17,000,000
