Addison Yeaman, Esq.

Because of the importance in our work of getting a comprehensive analysis of the Morbidity Study, I am enclosing a copy of the analysis prepared by Professor Theodor Sterling. You will note that he lists at the end the "Relevant Bibliography" which I have now asked Toney File to get for me.

Professor Sterling has emphasized that his analysis is by no means exhaustive since a large number of publications and reports are germane to the specific analysis on cigarette smokers which would "require simply too much of my time". I am hopeful of having Professor Sterling take the additional time necessary in this regard, but before doing so, it is important that I have your comments and observations. Because of Tommy Austern's previous study and intense interest in the subject, I would also hope to hear from him as soon as possible.

Sincerely,

David R. Hardy
