TO: LEGAL COUNSEL

We are enclosing herewith a volume published under the sponsorship of the United States Department of Health, Education and Welfare of the Public Health Service, entitled "A Quest into the Environmental Causes of Cancer of the Lung." This volume was written by Dr. Hueper and has been reviewed by the editorial board of the Public Health Service. Printed by the Government Printing Office and with this particular sponsorship, it has at least a semi-official standing making it quite important as a documentary for your use. We suggest that this be placed by you in the "Hueper Volume" you now have. Please note that while much of the material contained in this booklet is repetitious, Dr. Hueper's charts have been greatly improved in this printing and he has carried his material completely up to date.

Also included in this mailing is a new volume labeled Volume VIII, devoted exclusively to oral cancer. This volume is of primary importance in the case of N. B. Mitchell versus Philip Morris and Company, Ltd., County of Tate, Senatobia, Mississippi, Chancery Court Cause No. 6430 - but we are sending it to everybody so that the files will be complete.

Index cards for Dr. Hueper's article and for the series of abstracts in Volume VIII will follow later in the week, just as soon as we have received additional blanks.

A. GRANT CLARKE
