Mr. Francis H. Horan
Liggett and Myers Tobacco Company
630 Fifth Avenue
New York, New York

Dear Mr. Horan:

We are enclosing herewith two pamphlets published under the auspices of the British Ministry of Health by Her Majesty's Stationery Office, London. One is entitled "Mortality and Morbidity During the London Fog of December 1952," and the other is entitled "Interim Report Committee on Air Pollution."

These pamphlets constitute a complete report on the work of the Beaver Committee for the study of air pollution in Great Britain. This committee was set up following the disastrous mortality which occurred during the London fog of December 1952. All of our attempts to abstract and summarize this material have been so incomplete that it occurred to me that the full reports should be available to you for such use as you may deem to be valuable.

We show below a list of the people to whom similar sets are being forwarded.

With best regards.

Yours very truly,
