Winter/Spring 1997

About This Guide

Today, many software manufacturers and businesses are recognizing the tremendous value of Adobe Acrobat software. They are rapidly developing products and services that support this innovative, platform-independent, software-independent electronic document technology.

- ▶ **Table of Contents**
- ▶ **Index**

In this guide, you will find products and services grouped in categories for a variety of uses—from document management to consulting services to internet services. Of special interest in this Winter/Spring 1997 issue is a list of international third-party vendors. This guide will help you explore all the available products and services compatible with Acrobat software.

Use the Acrobat navigation tools in the menu bar and pull-down menus to help you navigate through this guide's many pages. Or explore the "links" embedded in this guide by using the **red arrows** or red symbols "↗" to go directly to the items that might interest you or to turn the page. To visit a company's Web site, simply click on the URL.

Adobe® Acrobat® 3.0

Adobe Systems Incorporated

345 Park Avenue
San Jose, CA 95110-2704 USA

Adobe Systems Europe Limited

Adobe House, Mid New Cultins
Edinburgh EH11 4DU
Scotland, United Kingdom

Adobe Systems Co., Ltd.

Yebisu Garden Place Tower
4-20-3 Ebisu, Shibuya-ku
Tokyo 150 Japan
<http://www.adobe.com>

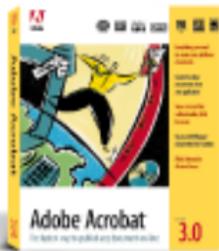

▶ Adobe Acrobat 3.0 software is the fastest way to publish any document on your corporate intranet, the Web, or CD-ROM. Acrobat 3.0 gives you everything you need—Acrobat Exchange™, Acrobat Distiller®, Acrobat Catalog, and the new Acrobat Capture™ Plug-in—to create and distribute electronic documents that can be searched, hypertext linked, and even animated with QuickTime® movies. Acrobat 3.0 lets you view and browse Adobe Portable Document Format (PDF) files seamlessly within the leading Web browsers and even fill in visually rich interactive PDF forms. And with the Acrobat Capture Plug-in, you can instantly scan and convert any printed document or TIFF image to PDF.

For more information about Acrobat Software, visit the Adobe Web site at <http://www.adobe.com>

Suggested retail price: \$295 (Macintosh®, Windows®, and UNIX®—some features not available on UNIX)

Adobe® Acrobat® - Ten User License Pak

Adobe Acrobat Ten User License Pak includes a ten-user license for everything in the Acrobat 3.0 package.

For more information about Acrobat Software, visit the Adobe Web site at <http://www.adobe.com>

Suggested retail price: \$1,595 (Macintosh and Windows, and UNIX)

Adobe Acrobat Capture software for Windows turns everyday paper documents into accurate Adobe Portable Document Format (PDF) files ready for distributing on the World Wide Web, corporate intranets, CD-ROM, or e-mail. Acrobat Capture makes it fast and easy to scan and OCR any paper document—contracts, reports, technical manuals, news clippings, and correspondence. PDF files are fully searchable and maintain their original look, including fonts, images, and multi-column layouts. Acrobat Capture works with popular TWAIN and ISIS scanners, and runs on your desktop or over your network. Powerful reviewing features let you edit documents, and in batch-processing mode, your system can convert hundreds of pages unattended.

For more information about Acrobat Capture, visit the Adobe Web site at <http://www.adobe.com>

Suggested retail price: \$895

Where to find Adobe® Acrobat® Reader

Adobe Systems Incorporated

▶ Adobe FrameMaker software gives you the power to publish the most challenging documents. Now you can handle the entire publishing process, from word processing and page layout to printing and on-line distribution, with a single easy-to-use package. Productivity and book-building features let you quickly author and format even the largest documents.

FrameMaker works the same on all computing platforms to maximize workgroup collaboration. It offers powerful options for publishing on CD-ROM, in Adobe Portable Document Format (PDF), and in HTML on the Web. FrameMaker is the ideal tool for long, complex works such as books, manuals, and catalogs. Publishing has never been so efficient!

Adobe® Illustrator® 6.0

Adobe Systems Incorporated

345 Park Avenue
San Jose, CA 95110-2704 USA

Adobe Systems Europe Limited

Adobe House, Mid New Cultins
Edinburgh EH11 4DU
Scotland, United Kingdom

Adobe Systems Co., Ltd.

Yebisu Garden Place Tower
4-20-3 Ebisu, Shibuya-ku
Tokyo 150 Japan
<http://www.adobe.com>

▶ Adobe Illustrator 6.0 software for Macintosh, the industry's leading illustration and page design tool, features an import/export capability that lets users open and edit single pages of PDF files. This capability, along with the program's editing tools, provides the fastest way to edit PDF files. Now you can change text characters, adjust curves, add color or gradients, and then export the edited page back to the original PDF file while maintaining links, bookmarks, and annotations.

With Adobe Illustrator, you can not only edit vector-based artwork, but you can also create new artwork to place into PDF files. In addition, PDF files that contain photographs (raster or bitmapped images) are automatically tagged with an Adobe Photoshop® program identification when imported into Adobe Illustrator. This lets you open Photoshop from within Adobe Illustrator and use all Photoshop tools to manipulate the image. You can then insert edited elements back into the original PDF file.

Adobe® PageMaker® 6.5

Adobe Systems Incorporated

345 Park Avenue
San Jose, CA 95110-2704 USA

Adobe Systems Europe Limited

Adobe House, Mid New Cultins
Edinburgh EH11 4DU
Scotland, United Kingdom

Adobe Systems Co., Ltd.

Yebisu Garden Place Tower
4-20-3 Ebisu, Shibuya-ku
Tokyo 150 Japan
<http://www.adobe.com>

▶ Designed for all of your layout needs, Adobe PageMaker 6.5 is the best professional publishing software for printed and on-line pages. Expand your design possibilities with exceptional new page layout features, including document-wide layers, automatic reformatting of publications, text and graphics frames, and other breakthrough capabilities. Take advantage of a newly redesigned interface that looks and feels even more like those in Adobe Photoshop and Adobe Illustrator software, with interactive tabbed palettes and new menus and keyboard shortcuts. You can even import Adobe Illustrator files directly in PageMaker. When you're ready for Internet publishing, simply export pages to Adobe Portable Document Format (PDF) or HTML format.

PageMaker 6.5 also delivers leading-edge color capabilities, including a complete hi-fi color solution, and extraordinary compatibility with products from other vendors. No other software makes it so easy to produce sophisticated pages in any medium using Macintosh, Power Macintosh®, Windows 95 compatible, and Windows NT® 4.0 workstation-compatible personal computers.

▶ Now you can create full-featured Web pages without having to know a thing about HTML or URLs. That's because Adobe PageMill software makes building your Web pages a simple, drag-and-drop operation! Just type in text or import it directly from standard office applications. Do the same with images—PageMill automatically converts them to the appropriate format. Then, resize your images easily and align your text any way you want. What you see is truly what you get!

PageMill also lets you quickly add easily editable frames and tables to your Web page. You can create image maps or linked hot spots. Include audio, video, animated GIFs, and Adobe Portable Document Format (PDF) files. Create links by simply dragging a page icon from one document and dropping it into another. There's a spelling checker, a Find-and-Replace tool, and even a powerful, yet easy-to-use, integrated source code editor.

▶

It's never been easier to create and deliver stunning, graphically rich presentations for screen, print, and the Internet. Adobe Persuasion 4.0 software provides a complete presentation authoring environment, with robust Web authoring capabilities, drag and drop of URLs, a handy Layers palette, and Links and Font management dialog boxes. Seamless integration with other Adobe software lets you drag and drop graphics files from Adobe Photoshop and Adobe Illustrator in their original formats. Plus you can publish presentations on the Internet by exporting them as Adobe Portable Document Format (PDF) files. Extended integration with Adobe Acrobat 3.0 software also provides crisp anti-aliasing of text in PDF files used for Web and on-screen presentations. With enhanced cross-platform support, transferring files between Macintosh and Windows systems is even more seamless. And only Persuasion gives you software for two platforms—Macintosh/Power Macintosh and Windows 3.1/Windows 95—for the price of one. It's the best buy in professional presentation graphics software.

▶ Easily modify and personalize your own photos. Adobe PhotoDeluxe software on CD-ROM for Macintosh and Windows, including Power Macintosh and Windows 95, helps you customize your photos with amazing special effects and step-by-step simplicity. Now you and your family can put your photos to use in hundreds of ways. Adobe PhotoDeluxe software guides you through projects, explaining how to remove red eye, combine photos, add special effects, and more! Built-in templates let you add your photos to greeting cards, or create calendars decorated with friends, pets, and family members. When you're ready to experiment on your own, you can access the same easy-to-use tools and customize your photos any way you'd like. And because Adobe PhotoDeluxe complements word processing and desktop publishing software, you can add your photos to newsletters, flyers, and other printed materials. Adobe PhotoDeluxe comes complete with more than 500 free photos, clip-art images, and templates. Photos on the internet can be shared using JPEG, GIF or Adobe Portable Document Format (PDF) options.

Now you can maintain and correct links for your entire Web site. Automatically. With Adobe SiteMill software, whenever you paste a link, rename a file, or move a file between folders, the program automatically repairs links—including those to external sites—so they point to the correct location.

In the program's Site view, you can see all of your resources at a glance, making operations fast and efficient. You open pages and images, for example, simply by double-clicking. Name and move resources between folders without hassle; links are automatically updated. Create links—even to Adobe Portable Document Format (PDF) files—by dragging and dropping icons into Page views. The Site view also includes link pop-ups, which display all incoming and outgoing links among your pages, allowing you to see which pages point where. There's even a visual warning for files that have no links pointing to them.

In addition, Adobe SiteMill lets you create new links by opening a file or an image in the Page view. There, you get all the functionality of Adobe PageMill software, including true, WYSIWYG page editing and integrated image manipulation and image format conversion.

▶ PreVIEW is a high-performance application that lets users access, view, mark up, and analyze product design data. PreVIEW provides users with a single point of access for design graphics and documents, supporting a wide range of raster, vector, CGM, and 3D CAD data. PreVIEW is now integrated with embedded Adobe Acrobat software.

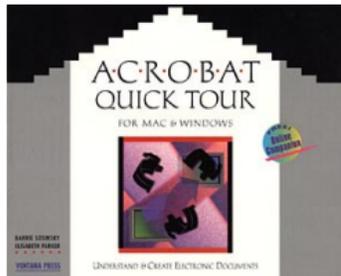

Users can initiate a PreVIEW session and view multiple document types concurrently, create composite assembly views, and compare drawing revisions. Annotation capabilities, including support for lines, circles, arcs, text, pointers, multiple line fonts, ANSI drafting symbols, and template libraries allow users to create multiple transparent markups without modifying the original document. In addition, the PreVIEW measurement function lets users extract exact distance and angular and radial measurements, in English or metric units, from intelligent vector data, and visual measurements from raster data. PreVIEW supports Windows, Macintosh, and UNIX platforms.

In the three-ring circus of electronic publishing, Adobe Acrobat turns cartwheels around the competition. Discover how Acrobat software's high-flying features let you glide over the barriers between platforms and create materials that soar!

Learn how to:

- Set yourself up to read PDF
- Transform limited formats to a format with unlimited possibilities
- Create portable and compound documents
- Sample a cross-section of Acrobat presentations

By Barrie Sosinsky and Elisabeth Parker. Published by Ventana Press and available at your nearest bookseller.

Suggested retail price: \$14 U.S.

ISBN: N-1-56604-255-0

This easy-to-follow book is for designers, managers, teachers, and students who plan and design interactive products on all computing platforms.

Subtitled “Creating and Communicating with New Media,” *Interactivity by Design* focuses on real-world scenarios. In everyday language, the authors present the process of interface design as the sum of clearly defined parts—tasks and decisions lead to interfaces that work.

By concentrating on the unique challenge of designing for the computer screen, the authors give communicators—with or without experience in new media—a foundation for designing interactive products. By Ray Kristof and Amy Satran. Published by Adobe Press. Published and distributed to the trade by Hayden Books, a division of Macmillan Computer Publishing.

▶ At last, a reference book on Adobe Acrobat for internet publishers. Adobe Acrobat's internet capabilities have opened a whole new world for internet publishing by allowing a choice of file formats for certain kinds of content. With Acrobat 3.0 and its native file format, PDF, internet publishers now have a range of options available for their publishing program. From in-line PDF's, to book-length files, to the amazing PDF-saavy Web browsers, Acrobat 3.0 is unique in its ability to work alongside of HTML to provide value to any Internet project. *Internet Publishing with Acrobat* is your key to this world.

\$40 U.S., \$25 CAN, £16.50 Net U.K.

ISBN: 1-56830-300-9

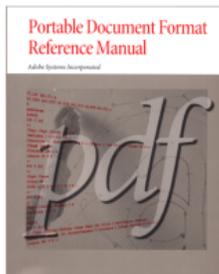

Written and reviewed by the engineering staff of Adobe Systems, this reference book offers comprehensive coverage of the Adobe Portable Document Format (PDF) by describing the syntax and structure of a PDF file, the objects used in PDF files, and the PDF page-description operators. The book also offers optimization techniques for reducing the size of PDF files, improving the speed at which they are drawn, and improving the appearance of the page. By Tim Bienz and Richard Cohn. Published by Addison-Wesley Publishing Company, and available at your nearest computer bookseller.

Production Essentials explores the complex world of the digital production process with all the clarity and precision readers expect from the Professional Studio Techniques series from Adobe Press. In the tradition of award-winning *Design Essentials* and *Imaging Essentials*, *Production Essentials* covers electronic production for graphic designers and production artists who use the tools in Adobe's software applications.

More than 20 industry experts have contributed their expertise, including artists, photographers, professional consultants, engineers, and digital prepress specialists who work with digital files. Additionally, each topic has been tested by Adobe's technical staff and used with the most recent versions of Adobe's applications and advanced technologies, including Adobe Illustrator, Adobe Photoshop, and Adobe Acrobat.

Published and distributed by Hayden Books, a division of Macmillan Computer Publishing.

▶ Visitronics assists prospective users in organizing their documents, defining access rights, converting documents to PDF, setting up documents for on-screen readability, making documents available on the network, implementing hyperlink systems, and preparing documents for storage.

Visitronics can propose fully integrated Adobe Acrobat solutions that include all manner of hardware. Additionally, Visitronics offers all services needed for transforming documents into electronic files: scanning, file conversion, hyperlinking, indexing, and so on.

Also adept in building electronic catalogs, Visitronics can create manuals starting from drawings, price lists, CAD/CAM systems, or existing paper catalogs. We handle all types of still-image and video compression, which allows the combination of text and data with high-quality pictures. Using Adobe Acrobat, Visitronics helps produce practical, attractive, and efficient catalogs quickly and with a user-friendly interface.

Adobe's developer program for Acrobat gives application development partners the necessary tools to build products that take advantage of Acrobat's broad feature set. In addition, the developer program offers developers the know-how to effectively promote their Acrobat-related products to users.

To assist developers in supporting Acrobat software, Adobe offers the Acrobat Software Development Kit (SDK). The kit includes a set of Application Programmer's Interfaces (APIs), Acrobat software, technical documents, and examples. The SDK also includes the Adobe Acrobat Viewer Plug-in Specification and sample code.

Guidelines regarding Acrobat integration with third-party products and content details of the Acrobat SDKs are available through the Adobe Developers Association.

▶ Do you want to take advantage of Adobe Acrobat in your office? Is your enterprise strategy generally to print to PSF-managed AFP™ devices? Do you want to marry the technologies? Now you can! Capitalize on your investment in both technologies with AFP2PDF! AFP2PDF runs on workstations running several flavors of UNIX, OS/2®, Windows, and MS-DOS®, or even your mainframe running VM or MVS™. AFD2PDF translates the files you were sending through PSF to your AFP printer (line mode, conditioned line mode, mixed mode and full AFP) into Adobe PDF. AFP2PDF has no run-time library requirements and translates most MODCA objects. It even handles ACIL-generated encapsulated AFP.

AFP2PDF accepts AFCCU AFP supporting both external and embedded AFP objects, such as Page Segments, IOCA (FS 10 support including MMR compression), Overlays, and Mixed-modes line data. For font management, GenText translates fonts to raster using itsfont technology. Or, for more efficient handling, use one of the company's font correlation tables to map your AFP fonts to standard or custom fonts. GenText even handles color! ◀◀

▶ Corridor products deliver documents formatted in PDF to high-speed IPDS printers by converting PDF documents into IBM® AFPDS format. The output meets “light test” compatibility.

Now you can print large volume PDF files on appropriate high-speed printers, instead of on low-speed desktop printers. This is especially useful for documents originally in AFPDS format and converted to PDF for portability reasons, such as long-term archiving or electronic distribution. Without a method of printing in large volumes on an as-needed basis, the business reasons for converting to PDF may be overshadowed by technical considerations.

Corridor products are available on MVS, VM, RS/6000™ AIX® Windows/NT, Sun™ Solaris® and HP-UX. Corridor AFPDS to PDF is one of the Xenos Group’s strategic solutions, letting enterprises print or view documents anywhere, anytime.

<http://www.xenosgroup.com>

Present-Master delivers host-based reports to the desktop in PDF. Reports formatted in line mode, IBM AFPDS, Xerox® DJDE, or Metacode® are transparently supported. Present-Master transforms the reports into PDF for easy viewing and/or printing at the desktop. Adobe Acrobat Reader is automatically invoked at the desktop, providing WYSIWYG viewing (using Microsoft Windows) for AFP and Metacode reports.

Present-Master is easy to use. The end user selects the report(s) from a list of host jobs. The transformation and the transportation of the reports from the mainframe to the desktop are automatic, and Present-Master invokes a required transformation and performs it without specific instructions from the user.

Present-Master reduces printing and distribution costs and provides easy access to information, increases user efficiency, and improves customer service. It is one of the Xenos Group's strategic solutions, enabling enterprises to print or view data anywhere, anytime.

▶ Corridor products deliver Xerox documents (formatted in Metacode, line mode data conditioned with DJDEs and XES), to alternative media and platforms. The application converts Xerox documents into PDF files for total portability across hardware, distance, and time. The output meets “light test” compatibility.

The original Xerox documents, after conversion to PDF, can be distributed to network and desktop printers, to CD-ROM, to COLD, to a desktop screen for WYSIWYG viewing, and to Internet browsers. This means that Xerox documents, such as customer statements, can now be delivered electronically without loss of information or formatting. Your customers can access their customer statements on the Internet, and your customer service representatives can access information using either the Internet or an intranet. In any case, the customer statement has the same look and feel as the original.

Corridor products are available on MVS, VM, RS/6000 AIX, Windows NT, Sun Solaris, and HP-UX.

Corridor Xerox to PDF is one of the Xenos Group’s strategic solutions, letting enterprises print or view documents anywhere, anytime. ◀◀

<http://www.documedia.com>

▶ DocuMedia Technology, Inc. is an Adobe Premium Value Added Reseller with extensive experience in converting high volumes of paper, as well as electronic files produced on UNIX, Windows, and Macintosh platforms into Adobe Portable Document Format files for delivery on CD-ROM or the Internet. DocuMedia has worked extensively with semiconductor, financial service, pharmaceutical, and insurance companies.

DocuMedia can totally outsource a conversion, or perform an initial conversion and train the client staff to maintain the documents. DocuMedia has high-speed scanners that bring paper documents back to life by using Acrobat Capture for imaging, OCR, or a combination of the two.

Glyphica Solutions

4207 Pomona Avenue
Palo Alto, CA 94306
415 493-0620
info@glyphica.com
<http://www.glyphica.com>

▶ Glyphica Solutions specializes in document conversion services and systems; Acrobat is the technology cornerstone of our offerings. We sell and implement all Acrobat products and scanning hardware in law firms, municipal governments, boitech and hi-tech firms, and research organizations. In addition, we integrate Acrobat with database applications when customers require fielded data and complex queries.

Conversion Services—Glyphica Solutions converts documents using Capture and provides customers with fully indexed PDF files on CD or tape. We have several quality options available including 100% accurate replicas. Customers get fully searchable documents that also retain their visual integrity in a single file.

Document Management Systems—Because implementing Acrobat technologies often represents a major change in business processes, Glyphica Solutions helps clients quickly and effectively incorporate the technology into native processes and methods.

In addition to software/hardware sales, the company provides custom applications and integration work.

If your site is a Metacode shop but you also need to share on-line documents in a PC environment, you can capitalize on your investment with Meta2PDF. Meta2PDF runs on your mainframe, workstation, or PC to convert Xerox Metacode into PDF—used by Adobe Acrobat products. PDF and Acrobat allow you to share complete documents electronically, including layouts, typefaces, illustrations, photographs, and color.

Meta2PDF does not need a special box or additional hardware. GenText created it to meet customers' requests for a more versatile display environment for their host-generated documents.

Meta2PDF accepts Xerox Metacode and line data conditioned with DJDEs. It supports both external and embedded objects, such as IMGs and FRMs. Fonts are supported by using a correlation table that maps the Xerox fonts to PostScript language fonts. The correlation table can be tailored to handle your customized fonts. We'll even handle color!

Prepare is a data conversion tool that supports a wide range of standard graphics and data-exchange formats. Standard data in TIFF, MIL-R, C4, Sun Raster, HP-GL, CGM, IGES, DXF™ and Adobe PostScript language formats can now be converted to PDF files. File processing supports multipage documents, and there are no restrictions on raster image size or resolution. Prepare supports automatic file type detection, batch processing, drawing merge and assembly, and vector-to-raster conversion. Available in Windows and UNIX versions.

▶ Transverter Pro 3.0 delivers an extensive bundle of PDF and PostScript language solutions for commercial and desktop publishers, printers, and graphic designers.

Transverter Pro rasterizes complete (or user-specified portions of) PDF and PostScript language files to TIFF format, allowing for custom page sizes, CMYK output for color separations, and differing horizontal and vertical resolutions for high-quality fax output. Files can be anti-aliased for legibility and compressed for storage efficiency. Used with appropriate drawing software, Transverter Pro converts PDF, PS, and EPS files into editable paths, text, and bitmaps. It also saves PDF files as EPS graphics for use in page-layout programs.

Transverter Pro offers graphics users increased flexibility and control over their PDF and PostScript language files. A batch conversion feature converts an unlimited number of files quickly and accurately. Available for Macintosh, Power Macintosh, Windows, and Windows NT. Other output formats include PICT, TIFF (for Macintosh) and WMF, EMF, DCX, TIF, BMP, GIF, JPG, PCX, and TARGA (for Windows).

DataFlow is a workflow management system that handles all types of data, from text, graphics, and image files, to ads and complete pages. DataFlow tracks database elements and events, and provides customizable, comprehensive reports. The database provides instant access to all data through an easy-to-use graphical user interface. DataFlow's high-speed storage and retrieval of jobs and job elements results in shorter turnaround times, more efficient workflow, and reduced labor costs. DataFlow uses the Acrobat Distiller to create PDFs for electronic proofing.

docISO is a Windows-based document management system that helps to organize, manage, and distribute a company's knowledge base by creating an on-line library of cross-referenced ISO/QS 9000 quality manuals, forms, and related documents. By providing up-to-date documentation to all members of a quality team, docISO increases productivity for companies striving to meet or maintain ISO/QS 9000 and ISO 14000 compliance.

docISO provides an easy-to-use format for organizing documents, integrating OLE-compatible applications, and attaching files such as multimedia clips, blueprints, and flowcharts. Adobe Acrobat enhances the users' viewing capabilities of these documents without requiring them to launch the native application. By reducing stacks of paper and multiple files, and by providing features such as multilevel access control, automatic revision notification, and a powerful keyword search tool, docISO truly helps users get control of their documents.

DocPRO is a complete information system for the Windows environment, maintaining a database of documents, computer records, and word processor files in dBase format.

Scanned documents are held in compressed TIFF format with a Datapen option for OCR indexing. Computer records are stored as ASCII text with DocPRO extracting the index fields. All files originating from word processor sources are held as PDF files. DocPRO integrates with Adobe Acrobat to display PDF files, with routines for the indexing task. In addition to dBase, DocPRO supports FoxPro®, Paradox®, and SQL™ formats.

Archi-Tech's Electronic Document Generation Engine (EDGE) eliminates the need for expensive printed copies or microfiche archiving of large volumes of internal operating reports, customer statements, claims, policies, and more, by creating fully accessible, electronic PDF documents that are identical to computer-generated printed documents. PDF pages are created from the same data stream that drives high-speed line printers or Computer Output Microfiche (COM) machines. Millions of pages of documents can be instantly accessed from any PC using Instant Access Retrieval Technology™—our document front end that allows multiple users to conduct unlimited, multiple ad-hoc queries and searches across multiple user-defined indexed fields in order to retrieve the documents of interest instantly.

EDGE benefits are compact, platform- and storage-independent PDF files. EDGE also eliminates the chances of your archiving software or hardware becoming obsolete. And with the Instant Access Retrieval Technology front end, you transform millions of pages of PDF files into a complete, no-maintenance, document-management solution.

Latitude is the leading high-performance document retrieval system. It lets you retrieve precise, relevant information. This full-text database system indexes the widest variety of file formats (most files in word processors, spreadsheets, databases, and more), and gives you the latitude to view them. Latitude also takes advantage of native, indexed, structured documents in SGML.

Latitude Viewer offers you sophisticated and refined browsing and navigating capabilities for the native SGML as well as for the proprietary and WYSIWYG file format (from PDF) and the graphics, both raster (bitmap, CCITT GIV, TIFF, etc.) and vector (CGM, CAD, etc.). We have integrated Adobe's Acrobat Reader to allow you to include PDF files in the Latitude full-text database. Latitude can easily follow the growth of your database—the number of file formats, the number of databases, and the number of locations and concurrent users.

Open Text Livelihood Intranet is a comprehensive, integrated application suite that enables people to work collaboratively no matter where they are or what computer platforms they use. Livelihood brings powerful document management, workflow, searching, and project collaboration to intranets delivered through a standard Web browser.

Livelihood Intranet is modular software. The full text index module, Livelihood Search, is the most powerful text retrieval software available and the same software that powers the Open Text Index of the World Wide Web. Livelihood Intranet enables an organization to provide “power search” capabilities for users who need to find information in what may be huge collections of PDF, HTML, SGML and/or word processing documents.

With Livelihood Intranet, a workgroup of any size can use intranets to work together, taking advantage of full-scale document management (including support for compound, or “virtual,” documents and visual, drag-and-drop workflow). Because Livelihood Intranet is server-based software, no client software or licenses are required other than a standard Web browser. Livelihood Intranet truly “puts the Web to work.”

408-541-1600 fax
info@verity.com
<http://www.verity.com>

Information management is an ever-increasing challenge as the volume of information available within corporations grows. Verity's information server, the Topic Enterprise Server, manages all textual content within an organization, providing integrated search, retrieval, and publishing access to corporate information.

As part of a global architecture, the Topic Enterprise Server connects to the Verity Topic Client, providing a complete client-server information retrieval solution. The Topic Enterprise Server indexes information from any point in the network, so users can view and retrieve data, regardless of location, format, or platform.

Built for worldwide, real-time production environments, the Topic Enterprise Server offers performance, scalability, and administrative ease. Real-time document indexing makes information available up to the minute—data is accessible 24 hours a day, 7 days a week.

The Topic Enterprise Server has broad support for word-processing and office documents as well as graphics and Adobe PDF files.

Electronic Publishing and CD-ROM Services

70

Camino Electronic Publishing provides two-week-turn-around Adobe Acrobat publishing to businesses and government agencies in Northern California. Camino accepts documents in any form, including printed paper, and delivers converted Acrobat documents on a multi-platform CD-ROM that includes free Acrobat Reader for DOS, Windows, Macintosh, and UNIX platforms. Camino adds bookmarks and links to your documents and creates overview documents that link related documents.

Camino also offers the Camino Librarian, an Acrobat Exchange helper application that customizes and simplifies the Acrobat Exchange user interface. Your readers quickly locate information with the Browse window.

Using the Librarian Search window, your readers build complex search queries by selecting check boxes, clicking radio buttons, and selecting list items. Even if you have already converted your documents to the Acrobat format, the Camino Librarian makes browsing and searching for information much easier for your readers.

<http://www.camino.com>

Wouldn't it be nice if your Windows users could open your PDF documents by clicking an icon? With the Camino Icon Installer, they can.

The Camino Icon Installer creates a program group and places one or more document icons in that group. The program also checks to see if the user has the Acrobat Reader and offers to install the free Windows Reader if the user doesn't have a viewer. You can also set up the icon installer to install the Movie plug-in and start the QuickTime installer if your documents include movies. Included with the Camino Icon Installer CD-ROM is a generic Readme file that lists system requirements, provides installation instructions, and gives basic user instructions.

The Camino Icon Installer may be purchased as a tool kit that you use to create installers for your documents. Camino also creates icon installers as a service.

Canyon Interactive, LLC

31200 Via Colinas
Suite 203
Westlake Village, CA 91362

818-879-0533 fax
confoncd@aol.com

Canyon Interactive, formerly Multimedia Marketing, designs and produces easy-to-use, information-rich CD-ROMs for conferences, seminars, and trade shows with Adobe Acrobat software. Designed for business and professional users who need in-depth access to timely information, the CDs provide detailed reference material in a highly accessible format, including complete written transcripts, screen-oriented graphic design, extensive hypertext navigation, and in-depth indexing, as well as audio and video excerpts and direct interactive connections to the World Wide Web. Canyon Interactive currently publishes the Virtual Conference™ product line of complete conferences on CD-ROM.

Canyon Interactive can serve as a project consultant, act as a contract developer for in-house projects, or provide a full-service development and marketing organization for Windows and Macintosh environments.

desk@cdobe.nc

CD-One specializes in CD-ROM productions and technology. Every month, CD-One produces more than 12 titles for their customers. Concepts, mastering, installers, and interfaces are created at CD-One production facilities

Many CD-One retail titles use the Acrobat Reader. For product catalogs on CD-ROM, CD-One uses Acrobat Exchange with C++. As a developer we have full control over Acrobat functionality.

Banks, telecommunication, and insurance companies publish large amounts of documents every month on CD-ROM with Adobe products. CD-One consultants advise clients about how to safely archive documents and how the monthly productions can be smoothly processed. Programmers can integrate Adobe products seamlessly as part of a complete document publishing system for CD-ROM.

As a component for printing-on-demand systems and computer output on CD-ROM, CD-One implements the Adobe Acrobat line including: Acrobat Catalog, Acrobat Capture and Acrobat Exchange.

**Computer Multimedia
Productions Corporation**

4707 140th Avenue North
Suite 203

Clearwater, FL 34622

813-531-7279

813-531-7498 fax

Computer Multimedia Productions Corporation provides services for the creation of multimedia products that incorporate Adobe Acrobat software. This new approach to reproducing and distributing information can increase the profitability of new or existing publications.

Computer Multimedia Productions provides low start-up costs, easy transition from word-processed or desktop-published files, support of multiple computer platforms, and increased utility through the use of full-text search. Services include importing existing word-processed or desktop-published data; creating table of contents and full-text search indexes; embedding or linking audio and video; installing software; packaging; distribution; documentation; and cost/benefit analysis.

Computer Multimedia Productions will also convert conference proceedings to electronic form using Adobe Acrobat, enabling you to provide your professional association with valuable, easily accessed information.

<http://www.gentext.com>

▶ Is distributing information driving you crazy? GenText has the solution! ConferenceMaster for Electronic Information Delivery for your host, workstation, or PC!

GenText starts with your text files (from your word processor, mainframe, or PC text-editing system) and merge them with electronic images in a wide variety of formats and/or scanned images of hard-copy pages. We add hypertext links, full-text search capabilities, and fast-path access to specific points in the file through a master table of contents. Have only images? We can add indexing to make the images navigable in a logical manner as well as add keywords to aid in searching. ConferenceMaster is a service, not software, so we do most of the work.

ConferenceMaster is available to users through Adobe Acrobat, Windows Help, OS/2 Help, GenText's ViewMeta, or UView, IBM's AFP Viewer. Files can be delivered on diskette or GenText can work with your favorite CD-ROM publishing group to provide files on CD-ROM.

ConferenceMaster is perfect for internal or external distribution of class materials, technical manuals, user conference proceedings, or any other presentation material. ◀◀

D Soft provides a full range of services and support for CD-ROM projects from the earliest phase to the end. D Soft is an information publisher and is licensed to re-distribute Adobe Acrobat products. You can create fully integrated electronic pages from, for example, database or page-layout software. The information can be indexed for full-text search.

In addition to producing CD-ROMs for catalogs, reports, and the like, D Soft is especially active in the medical and paramedical markets. Recently, D Soft worked with another Belgian company, AMS, to create a number of CD projects in cooperation with Belgian universities. These CD-ROMs contain thousands of images and relevant information from different sources as well as Adobe Acrobat software.

<http://www.documedia.com>

DocuMedia Technology, Inc. is a Adobe Premium Value Added Reseller with extensive experience converting high volumes of paper into Acrobat format for delivery on CD-ROM or on the Internet access UNIX, Windows and Macintosh platforms. DocuMedia has worked extensively with semiconductor, financial services, pharmaceutical, and insurance companies to create and convert technical documentation and training development materials.

DocuMedia can use Acrobat products to single-source a fully indexed collection of documents on CD-ROM, and then populate a Web site with the same files. DocuMedia offers extensive CD-ROM services, including hypertext menuing systems, custom installation programs, and hybrid disk mastering.

Docu-Net offers a host of products and services, across all platforms, to help make technical documentation creation, maintenance, and distribution less complicated for Fortune 1000 clients.

We create operator, service, and technical manuals using popular software programs including Interleaf and FrameMaker. Using Acrobat's many functions, we'll help you decrease paper-use, streamline documentation, and convert lengthy paper documents to easy-to-read, on-line information.

In many cases Docu-Net can maintain the cross-references, table of contents, and indices from your source documentation to your on-line information. With on-line documentation, access to your source material lives at one location to ease your document control. And information updates to your on-line documentation are instantaneous.

Our CD-ROM and World Wide Web capabilities help you communicate internally and across markets. Whether you are trying to acclimate your field service technicians to new computer software or market new products to your customers, Docu-Net's expertise in electronic distribution offers a tremendous boost toward your success.

Emerge is a licensed reseller and service bureau for the Adobe Acrobat suite of products and has established itself as one of the first Acrobat Capture service bureaus in the country. The company uses Acrobat technology to convert traditional print documents for on-line or CD-ROM delivery, or Internet/World Wide Web site access, in a digital format that retains the original document's visual appeal and design and is also fully searchable.

Emerge offers a complete package of services for CD-ROM production, from front-end document conversion and preparation; to developing customized interfaces; to marking up PDF files with navigational aids such as bookmarks, hypertext links, indexes, notes, and thumbnails. Further, Emmerge is able to help secure the success of any digital publishing initiative based on Acrobat software by providing critically important, technical support services that ensure that all of the client's end users obtain well-informed responses to their installation, navigation, and printing inquiries.

<http://www.ivyintl.com>

▶ IVY International Communications has developed an electronic magazine application called IVY Binder. This electronic publishing tool is designed for publishers who offer, or will offer, Internet, CD-ROM, or on-line publications. IVY Binder allows information to be published in unique and logical groupings, enabling publishers to update previously released data or to create collections of information. Documents can even be protected using Binder's unique encryption tools, which allow electronic subscriptions. By using compelling illustrations, fonts, photos, and eye-catching layouts, IVY Binder allows publishers to communicate electronically in exciting new ways. Whether documents are created in PageMaker, QuarkXPress®, or any other Windows, Macintosh, or UNIX application, they can be presented in Binder format. Through a simple set of tools, information is embedded into Acrobat documents, allowing the information to be organized logically and accessed easily by users. With its "enabling technology," IVY Binder has become a leading electronic publishing product.

Magnetic Press

588 Broadway, Suite 1104

New York, NY 10012

info@acropolis.com

<http://www.acropolis.com>

Magnetic Press is an Adobe Acrobat publishing service bureau, software developer, and consultant. Since the beta period for Acrobat 1.0, Magnetic Press has helped major publishers create commercial-grade PDF publications for CD-ROM and the Internet. Magnetic Press customers include professional and academic publishers, market research firms, advertising agencies, and multimedia developers.

Magnetic Press has developed a suite of Acrobat production tools that auto-generate fully featured PDF document collections for commercial electronic products. They are experts in creating high-quality PDF from complex content, problematic source files, and archival paper documents. Magnetic Press also provides plug-in development for custom interfaces.

Magnetic Press takes PDF production services a step further by offering integration with advanced indexing, security, and electronic delivery technologies. For example, our Keychain encryption software protects your copyright by preventing users from passing on PDF documents to nonpaying or unauthorized users.

<http://www.hubcom.com/multijac>

MultiJac Ltd. produces highly featured interactive catalogs for product manufacturers using Acrobat technology. PDF catalogue pages can be integrated with relational and full-text databases, and on-screen ordering systems, and can include multimedia objects such as sound, video, and 3D animations. It also links to technical drawings that can be downloaded for use in many CAD systems, providing users with a powerful interactive means of selecting products and services. Interfaces are developed in Visual C++, Visual Basic, and Lingo.

MultiJac designs and builds electronic products for use on CD-ROM, diskette, and the World Wide Web and also produces technical manuals and multivolume works for distribution on CD-ROM and other media using Adobe Acrobat, which can also be enhanced with links to multimedia objects. MultiJac prides itself on offering a fast, efficient, and cost-effective solution to marketing and business problems in the areas of technical documentation and electronic publishing.

**PRAGMA**

Willemskade 14
8011 AD Zwolle
+31-38-422-9775
+31-38-422-9785

PRAGMA produces PDF documents of learning materials, handbooks, and technical manuals. These kinds of documents have the same characteristics: The information has to be up-to-date and accessible for the user. PRAGMA's document production system is an efficient tool for maintaining the contents of and references in the document and is able to produce hyperlinks automatically.

PRAGMA produces and maintains these PDF documents for third parties.

To manage and manipulate large quantities of information and produce PDF documents automatically, PRAGMA has developed an (electronic) document production system. The system uses in-house developed programs, the typographical language TEX, and Adobe Acrobat software.

The PRAGMA document production system is ideal when in-company production of PDF documents is required.

Manhattan Beach, CA 90267
310-379-8321
310-372-2943 fax
CompuServe: 73467,3220

 M G Harrington Co specializes in providing computerized information management for corporate legal departments and law firms. Lawyers and support staff should use M G Harrington's expertise to provide systems that reduce the effort in organizing and finding information. M G Harrington provides systems for full-text searching or managing files, expenses, diaries, or budgets.

Adobe Acrobat software lets users efficiently search documents for specified words or phrases, or insert comments or annotations in long documents. Statutory sections from various states can be compared or searched. If an office generates multipage documents, pages can be linked so users can quickly reach related sections or go from a table of contents to text.

M G Harrington prepares the information or documents, and then provides software for the customer to use. All software is menu operated.

MediaSphere is a dynamic, multimedia library and archive system. It was designed to meet the demand for a multiuser system that handles all types of digital objects: text, images, graphics, PDF files, sound, and video. The ability to use natural language queries make searching a quick and intuitive process. Filters and Boolean syntax can also be used. Acrobat Distiller and Acrobat Exchange provide fast, high-quality views of PDF page and image files. Acrobat is tightly integrated with MediaSphere and allows users to search the actual content of a PDF page, and then requery the database with highlighted text.

Dial-A-Book is a New York-based company developing applications for the sale and delivery of digital products over digital networks.

Dial-A-Book Download Bookstore currently offers many books for sale and downloading on the Internet. The books are delivered to the customer's hard disk as PDF files and can be viewed or printed for personal use, with original graphics, typefaces, and design. Hyperlink navigation and various levels of search are available. Books can be purchased and downloaded from anywhere in the world. Dial-A-Book's initial offering includes 12 computer titles from Ziff-Davis Press and Albion Books' guide to network manners, *Netiquette* by Virginia Shea. Books are sold at list price.

▶ Acrobat ICS gives Acrobat publishers a tool to control the interface their users will experience when they open a PDF collection under the control of the Integrated Command Set. ICS is a scripting language which supplements the standard Acrobat controls with custom navigation features. ICS tools can be presented to the user as a floating set of buttons using either bitmap artwork or default buttons. Button labels and actions can be configured to change from document to document. Buttons can be programmed for navigational actions—for example, return to a sectional table of contents or a main menu—or they can invoke any action from the Acrobat toolbar or menus.

ICS includes custom actions from DigiDox such as Print Alias, a tool that allows a secondary PDF file optimized for print output to be printed in lieu of a file optimized for screen display. Another function, PopUp PDF, allows a second PDF file to be displayed in a window on top of a background document. This is especially useful for sidebars and other layered information.

ICS has been engineered to work with both Acrobat Exchange and Acrobat Reader and is available for Windows and Macintosh. ◀◀

Alliant Library Manager software provides a means of retrieving Adobe Acrobat PDF files, using an indexed descriptive listing. The Listing allows the user to retrieve files by title instead of by the DOS filename. In addition, it allows executable links between PDF documents to be created using reconfigurable path statements.

Compose is a plug-in for Acrobat Exchange that streamlines document production tasks. Automate repetitive chores with these powerful, easy-to-use Compose tools: Bookmarks by Example creates bookmarks from chapter and section headings. Page Linker links table of contents and index pages. Copy Link copies hypertext links throughout a document. Batch Meister sets file open and security preferences in batch. Auditor checks for broken links and bookmarks, and fixes them on the spot. Chain Linker links all instances of a word or text string. Document Composer assembles and repaginates composite documents. Table of Contents Builder constructs a master table of contents linked to associated PDF documents. InfoFill populates the General Information Fields in groups of PDF documents. PDF Launcher launches documents by title or author instead of DOS file name.

DigiDox Data Scraper is an Acrobat plug-in used to quickly index PDF documents created by Acrobat Capture. Using Scraper, text can be lifted from PDF file pages and inserted into a data field displayed on the Scraper control panel. If text is not correctly recognized by Acrobat Capture or if the text is not available at all (as in an Image file), the fielded information can be edited directly in the Data Scraper dialog. When the necessary information has been assembled, the data can be posted directly to any ODBC-compliant database. A record is created, and the PDF pages are associated with the record.

Data Scraper streamlines the scanning process by allowing multiple documents to be processed as a single batch. Scraper then “bursts” the file into separate PDF files, which are then associated with a database record. Scraper can be used for any type of document by customizing the buttons and fields in the editing dialog. Examples include resumes, material safety data sheets, invoices, contracts, and leases.

Requires Acrobat Exchange. Available for Windows only.

A document library serves as a front-end to a collection of PDF files delivered on CD-ROM, network file server, or intranet server. Digidex is a collection of tools designed specifically for Acrobat publishing. Digidex offers a variety of methods to catalog and subsequently locate PDF files. The Filter view enables a publisher to define the criteria by which users can search for a document, or set of documents. For example, filters might be established for the type of document (brochure, instruction manual, CAD detail, etc.); product types; brand names; departments; markets; language, and so on.

A List view presents a hierarchy of directories, PDF titles, and bookmarks. As documents are added to the directory structure, their titles and bookmarks are automatically added to the list view. Users can open any PDF file within the Digidex database directly to a bookmark view. Another view allows for database queries based on document parameters. And a fourth view integrates full-text search.

The Digidex interface can be configured to display the filter outlines in either text or icon modes. Windows only. Works with Acrobat Exchange or Acrobat Reader.

DigiDox Stew is a tool for creating a single PDF file from multiple source documents—both existing PDF files and as-yet-unconverted source files. The application allows the document components to be easily reordered using an outline-style interface. Organizations looking to standardize the format of their proposals and other submissions can create proposal “recipes” or “templates” with predefined heading and/or footing styles, section definitions, and so on. Users (such as field sales people) simply fill in the missing parts of the template structure with new and existing content. The resulting file is automatically collated with proper page numbering and formatted heading, footings, sectional dividers, and table of contents. DigiDox Stew is particularly appropriate for creating of sales proposals, regulatory submissions, and other complex documents that combine published and ad hoc authored materials. Organizations using DigiDoxStew will have greater control over the content and appearance of their documents. And users will dramatically increase their productivity and professionalism.

Requires Acrobat Exchange. Uses Distiller, if available, for creation of PDF files. Windows only.

▶ If you had a CD-ROM with a collection of PDF files on it, wouldn't it be great if you could annotate the files? Add personal notes about the content? Create your own bookmarks? Do the same things you'd do with files on your own hard disk? How about updating? Wouldn't it be great if you could send out changes to files stored on a CD-ROM without remastering a new CD-ROM?

This is what DigiDox's Increment plug-in allows you to do. Annotate PDF files on CD-ROM. Update files on read-only disks. Place private notes on shared files.

Increment gives users access to a complete version history for a PDF file. By selecting from an "Open Version" dialog box, users can reconstruct the PDF file as it existed at any point in time. Increment also allows file changes to be exported by an authoring station. These can then be distributed to users by e-mail, on diskette, FTP server, or in some other file transfer mode. This approach minimizes redundant data transfers and enables users to retain their annotations, even through changes in the underlying document.

Increment requires Acrobat Exchange. Available for Windows only. ◀◀

InfoLinker, an Adobe Acrobat plug-in automatically builds hyperlinks and bookmarks for documents in the PDF format through user-specified rules. InfoLinker uses Adobe Acrobat technology to convert large amounts of information into PDF, automatically apply hyperlinks, and deliver PDF files with Acrobat software. When updates to PDF files are necessary, users simply reapply the rule set, and links are rebuilt automatically.

PDF NAVigator is a PageMaker 5.0 plug-in for Macintosh computers that automatically adds the navigational capabilities of Adobe Acrobat software to PageMaker documents. Bookmarks and links are generated for PageMaker Table of Contents and/or Index Stories. Once your PageMaker document has been processed by PDF NAVigator and converted to PDF by Acrobat Distiller software, click on a topic in the document's index or table of contents, and you immediately transfer to the associated text in the body of the PDF document. In addition, PDF NAVigator allows you to automatically generate thumbnails of each page, crop pages to a custom page size, compress text and graphics using LZW compression, and embed fonts in your Acrobat documents. All this is done automatically within PageMaker.

Quick Catalog addresses the needs of companies with print catalogs looking for an efficient way to leverage their existing price books, illustrated parts lists; and other complex marketing and technical manuals. Quick Catalog enables a publisher to quickly program intelligent links around product codes, part numbers, callouts; or other labels.

Unlike conventional Acrobat links, Quick Catalog links can be configured with many different action types. The viewer of a document can decide which link action to traverse. And these link actions can do much more than go to another page or link to another file. With Quick Catalog, you can query a database to find the price of a product. You can populate an electronic order form with data from the PDF file and a database. You can automatically copy files such as CAD details from a CD-ROM to a project directory simply by clicking a part number associated with the product illustration.

Quick Catalog consists of authoring and viewing plug-ins. Authoring plug-in requires Acrobat Exchange. Viewing plug-in works with Exchange or Reader. Currently Windows only. Macintosh version forthcoming.

Re:mark is an Acrobat Exchange plug-in product for document review and markup in a workgroup setting. Eliminate paper drafts completely. Now you can distribute documents for review and receive comments back electronically.

Markup—Write anywhere on the page using any mouse or pointing device. Highlight important passages in color. Attach any picture, bitmap, spreadsheet, or file to the document. Strike out text that should be removed. Annotate documents with pop-up comments. Call out text and reviewer comments with circle, line, and square symbols. Record voice annotations right in the document.

Review—Import annotations from multiple files. Filter annotations by author and type.

Content Extraction—Copy tables to the clipboard. Extract text and graphics to RTF files for easy data integration.

Available for Macintosh and Windows.

TickTOC is an Acrobat plug-in that automatically programs hypertext links for every entry in a document table of contents. At the same time, TickTOC creates corresponding entries in the bookmark window of the PDF file. TickTOC is a tremendous time saver. Tables of contents with hundreds of entries can be processed in seconds. Done manually, this same process might take hours to complete.

Because TickTOC works with PDF files as both input and output, there is no need to obtain separate link generators for all of your authoring applications. Whether your files originate in Microsoft Word, WordPerfect, or Word Pro; QuarkXPress, PageMaker, Interleaf, or FrameMaker; Windows, Macintosh, UNIX, or DOS, TickTOC can convert the document table of contents into a hypertext outline.

Requires Acrobat Exchange. Windows and Macintosh platforms.

TranZform, available as a two-part package (Definer and Fill-in), is the only Acrobat Exchange plug-in that actually converts a static PDF file to an interactive, fully functional electronic form. TranZform does this by embedding specifically defined, user-generated fields directly into the PDF file and outputting a useable form ready for immediate data input and storage across any platform or operating system, including the World Wide Web! Once the data has been filled-in on the form, it can be stored three ways: 1. Stored directly onto the transformed PDF file. 2. Saved as a TranZform trainer document (ASCII file) for calling up the data at a later time. 3. Submitted to your database as a bi-directional link via our upcoming ODBC connectivity function. This link is the key in sharing TranZform generated data between ODBC compliant databases such as Access, FoxPro, and DBase

Suggested retail price: Definer and Fillin bundle \$395, Fillin only; \$79, Fillin bundle with Acrobat Exchange and without PDF Writer and Acrobat Search.

VerZions is a plug-in to both Acrobat Capture and Acrobat Exchange that provides advance document workflow solutions in automating, managing and expediting the conversion of the printed page to an electronic format.

With VerZions, you can create a completely flexible, automated workflow environment to control each phase of the conversion process. As an enhancement tool, VerZions will take you from document breakdown and separation, through page scanning, PDF conversions and quality assurance, all the way to product reassembly, to include page numbering, indexing, hypertext linking and archiving.

After conversion, documents become even more interactive. Not only are they all in the same format, they can also be searched and retrieved based on information supplied by VerTec's job ticket including key words, date of origin, and final document destination. And, because they are PDF files, the documents are fully available to users on any computer system through out the organization.

BackTrak™ BackTrak is a navigation aid that allows an Acrobat user to revisit documents viewed earlier in a session. BackTrak records every document, page, and view in a list that can easily be retraced.

Plug-in Manager for Acrobat DigiDox's Plug-in Manager allows you to manage your Acrobat plug-ins by turning them on or off from an intuitive control panel. Information about each plug-in tells you the publisher's name, address, phone numbers, and e-mail address; gives a brief description of the plug-in; and provides a link to a help file in PDF form.

MakeRoom™ MakeRoom is a simple plug-in that compresses the Acrobat button bar to make room for the new icons associated with other plug-ins. On a monitor configured for 640 X 480 display, there simply isn't room for additional buttons. MakeRoom replaces the three view change buttons on the right and left edges of the Acrobat toolbar with single buttons. The new buttons cycle through three states. On the left, the view changes include Page Only, Page and Thumbnail, and Page and Bookmarks. On the right, the view changes include Fit Width, Fit Page, and Actual Size.

PageMark™ PageMark is a plug-in that allows you to tag frequently accessed pages. With PageMark, you can assign names to page locations in a PDF file. These names then appear in a scrolling list on a floating window. A yellow note appears in the upper-right corner of the page with the name of the PageMark. By clicking the PageMark name, users jump immediately to the page associated with the PageMark.

Crypt Keeper™ Crypt Keeper is a security plug-in that enables a document publisher to cause a PDF collection to expire after a configurable period of time. Information delivered on CD-ROM can be rendered inaccessible if the user does not obtain an updated security string. With Crypt Keeper, corporations can use their network access security or e-mail security to prevent unauthorized access to PDF files. Authorized users can receive security string updates in the normal course of logging onto the network or checking their e-mail. Crypt Keeper includes a viewing mode and an authoring module used to assign passwords and a viewing module. Authoring module requires Acrobat Exchange. Viewing module works with Acrobat Exchange or Acrobat Reader. Windows and Macintosh.

Adobe Instructor Certification Programs (AICP) are designed to identify and support expert instructors of Adobe application products. Through these programs, Adobe provides its software users with a pool of highly qualified technical instructors who are proficient both at using and teaching the application. Careful testing of candidates assures Adobe customers that each Adobe Certified Instructor has demonstrated current, expert product knowledge and instructional skill.

The Adobe Instructor Certification Programs were launched in 1995, beginning with certification for Adobe Photoshop For 1996, Adobe offers certification for Adobe PageMaker, Adobe Acrobat, and Adobe FrameMaker; Adobe Illustrator, Dynamic Media (Adobe After Effects® and Adobe Premiere®), and Adobe PageMill.

We recommend our end-user customers to our certified instructors experienced in teaching and supporting specific Adobe products.

Courseware Interactive: is an linked set of interactive tutorials (Mac/Windows) designed to get people up and running on Acrobat in the shortest period of time. Using screen displays of a real world project, Courseware Interactive: describes how the Acrobat Product line (Reader, Distiller, Catalog, Capture & Exchange) work together to generate PDF's that enable anyone to effectively communicate their message to their respective audience(s). Used separately or as an integrated set, the tutorials also show how to leverage the Acrobat technology for multimedia and Intranet/Internet use.

Other services Digital Constructs provides include Web site design, Intranet/Internet systems development and graphics/documentation consulting.

Emerge is a licensed reseller and service bureau for the Adobe Acrobat suite of software products. As of the fall of 1995, Emmerge offers a full schedule of Acrobat training classes in its Madison, Wisconsin, facility, based on the same materials used by Adobe personnel. On-site training opportunities are also welcomed, in which case Emmerge will gladly customize the training courses.

The training provided by Emmerge is perhaps the most comprehensive introduction to Acrobat now available, because each member of the senior staff is a leading Acrobat application expert, and all the trainers have had several years of experience in digital publishing for the Internet/World Wide Web. Moreover, Emmerge is actively working with many of the increasingly large number of third-party plug-ins for Acrobat that are now coming to the marketplace. Acrobat classes conducted by Emmerge have a breadth that is unlikely to be found anywhere else.

▶ Infodata Systems, Inc., a leading provider of electronic document solutions, offers you the best in Adobe Acrobat, Adobe FrameMaker, and Adobe FrameMaker+SGML™ training. Our first-class training facility, located on a scenic lake in Fairfax, Virginia, is equipped with state-of-the-art multimedia workstations. We also offer custom, on-site, and dedicated classes.

Learn From the Experts. Infodata instructors are excellent teachers. They are also experienced software engineers with many years of high-level experience in document management and electronic publishing. Because of this experience, they can help you work through your toughest challenges.

Bring Your Problems To Us. Infodata welcomes questions from students about their organization's specific issues, and encourages students to bring samples of their own documents to discuss in class.

Current Course Offerings: Discovering Adobe Acrobat; Advanced Adobe Acrobat; Basic FrameMaker 5; Advanced FrameMaker 5; Using FrameMaker+SGML; Programming FrameMaker+SGML.

Coming Soon: Acrobat SDK; Web Site Design

▶ An in-depth, hands-on course focusing on the technical ins and outs of electronic publishing using Acrobat Exchange, Acrobat Catalog, Acrobat Distiller, Acrobat Capture, and Acrobat Weblink. Students are encouraged to bring examples of documents common to their work, in both paper and electronic form.

Technical support, MIS staff, graphic artists, and anyone who wants to publish documents electronically using Adobe Acrobat will benefit from this training program.

Topics include authoring documents; supporting Acrobat applications; PDF document Web access; understanding fonts in-depth; Adobe Type Manager™; working with Acrobat Distiller; using Acrobat Capture and Capture Reviewer; going on-line with documents; image compression and downsampling; using PDF Writer; implementing security; using Acrobat Catalog and Acrobat Search; Acrobat and the Internet; CD-ROM publishing with Acrobat and PDF files; technical issues of hyperlinks; and using Acrobat plug-ins.

Course length: 2 days

Tuition: \$895

To receive a class schedule, call 800-336-4939, x154. ◀◀

▶ The Adobe Acrobat User Group Program provides user groups with all the software needed to begin communicating electronically with Acrobat. Qualified user groups receive Adobe Acrobat package (includes Acrobat software, plus Acrobat Distiller for Macintosh or Windows and Acrobat Reader for Macintosh, Windows, UNIX, and DOS environments).

Using Acrobat is an ideal way for user groups to electronically distribute newsletters, event calendars, meeting minutes, and announcements to their membership or share information with other user groups.

Livelink Search is based on the latest version of Open Text's powerful full-text indexing software—the same software that's behind the acclaimed Open Text Index of the World Wide Web. And with this new release, Livelink's search engine and index building capabilities are even faster than ever before.

Your organization can benefit from Livelink Search if:

- You want to publish information on the World Wide Web or on your intranet
- Your users are dispersed, but need to share information across sites and multiple platforms
- Your users need to find a specific needle in your information haystack
- Your organization needs to provide access to files in many different data formats (e.g., Word, Word Perfect®, PDF/Acrobat, HTML, SGML, etc.) as part of one searchable index

<http://www.pls.com>

Give your users the information they want every time they ask. They'll come back to you again and again when you deliver meaningful, relevant information. PLWeb helps you do that. Brought to you by Personal Library Software (PLS), PLWeb is the Internet publishing system that allows your users to find exactly what they're looking for, whether in Adobe PDF or other standard formats. PLWeb is scalable. That means its capacity automatically grows as your content expands. You get peak performance now and in years to come. And PLWeb is robust. It updates while your system is running, giving your users 24 hours a day, 7 days a week uninterrupted access to your content.

In addition to growth-edge technology, PLS provides the kind of support you expect only from your closest friends. PLWeb does whatever it takes to make sure you and your end users get exactly what you want. That's how PLWeb products were created, and that's why many of the world's most influential information providers continue to work with PLWeb year after year.

info@verity.com
<http://www.verity.com>

▶ SearchPDF for Web Servers enables users to search across PDF documents from the Internet or the corporate intranet. Organizations that have created full text indexes with Adobe Acrobat Catalog can now serve those indexes on a Web server enabling users of any Web browser to search for and view PDF documents; in addition, Netscape Navigator users will see search terms highlighted.

Up to now, PDF documents were typically accessed within the Acrobat desktop environment. SearchPDF for Web Servers allows access to PDF documents from Web browsers.

SearchPDF for Web Servers and Adobe Acrobat software support the Netscape plug-in architecture enabling search term highlighting and page-at-a-time viewing of PDF documents.

**Fulcrum Technologies, Inc.**

785 Carling Avenue

Ottawa, Ontario

Canada K1S 5H4

613-238-1761

613-238-7695 fax

<http://www.fulcrum.com>

Fulcrum Surfboard is Fulcrum's open and scalable search engine, customized for deployment on corporate intranets and on external Web sites. It combines Fulcrum's proven SearchServer indexing and retrieval engine with Internet access protocols so that Web browsers and other common Internet clients can be used to search effectively through corporate information repositories.

Surfboard supports the Adobe PDF document format in two ways—by converting PDF documents into HTML on-the-fly for previewing, and by providing access to the original PDF document file.

The Verity Topic Client introduces a powerful new retrieval client metaphor that combines document navigation, searching, and filtering in a single, easy-to-use interface.

With Verity's Topic Client, users can browse through, search, and filter information directly from the desktop. Paired with the Topic Enterprise Server, the Topic Client provides a complete client-server solution for accessing a variety of document formats from a variety of sources, including word processing documents, e-mail, Lotus Notes databases, and Adobe PDF files.

A user can establish intelligent agents, which then search for and retrieve specific information. For example, a user can program an agent to monitor news stories about a subject.

The Verity Topic Client integrates with operating environments such as Windows, Macintosh, and Motif.

For those who want to publish on the Internet but who fear the complexity and cost of Web server software, Netscape introduces FastTrack Server. FastTrack Server is an easy-to-use, entry-level Web server designed to let novices create and manage a Web site. It is a complete solution for creating and managing Web sites on the Internet or on intranets. Easily upgradable to Netscape Enterprise Server, FastTrack is an open platform for publishing traditional Internet documents as well as developing and deploying live network-centric and media-rich applications. Netscape FastTrack Server installs in minutes. Businesses and individuals can quickly establish a presence on the Internet and deploy intranet solutions. FastTrack includes the award-winning Netscape Navigator Gold for creating and editing rich documents.

Netscape Fast Track Server 2.0 supports byte range serving for page-at-a-time downloading of Adobe PDF files.

WebSite v1.1 is a 32-bit multi-threaded World Wide Web server that combines power and flexibility with ease of use. Its intuitive graphical interface and easy installation make it a natural for Windows NT and Windows 95 users. WebSite is for anyone who wants to publish information on the Web or on a corporate LAN running TCP/IP. WebSite's audience includes corporations, businesses, organizations, and individuals. The power and performance of the software, its intuitive graphical user interface, and the comprehensive, easy instructions in the user manual make WebSite a natural choice for a wide variety of users. WebSite 1.1 supports Adobe Acrobat software's quick page-at-a-time display of Portable Document Format (PDF) files.

▶ Discerning webmasters made WebSite™ the industry leader for Windows 95 and NT Web servers because of its revolutionary high performance and affordability. Now you can join these Web-savvy pros in their pursuit of the best in programmability, publishing power, and security by moving up to WebSite Professional. WebSite Pro brings you the latest innovations in Web server technology without any of the worry of being locked into one supplier's proprietary solution. The open systems logic of the Web is at the heart of WebSite Pro; it supports all of the major Web server programming, publishing, and security standards. WebSite Professional supports Adobe Acrobat software's quick page-at-a-time display of Portable Document Format (PDF) files, one of Adobe Acrobat software's most popular new features.

▶ This major upgrade to the leading Mac Web server will catapult Macintosh-based Web applications into a new realm when it ships by the end of October 1996.

As introduced in WebSTAR 1.3, WebSTAR 2.0 will support the WebSTAR Server API (WSAPI), otherwise known as “plug-ins.” WebSTAR plug-ins are an exciting technological advance over the traditional CGI interface and make WebSTAR an even more powerful and flexible platform for creating Web applications on the Macintosh.

In addition, WebSTAR 2.0 will serve PDF files one page at a time; users can randomly access any page within a PDF file.

▶ Netscape Navigator 3.0 has become the world's most popular computer application ever. Netscape attributes Navigator's unprecedented popularity to six key factors:

- Navigator is faster.
- Navigator is smaller.
- Navigator provides better security.
- Navigator is more than just a browser.
- Navigator is available for 16 platforms.
- Great sequels are coming soon.

Adobe Acrobat 3.0 supports the Netscape Navigator plug-in architecture, so you can view your PDF files directly in Netscape Navigator 3.0.

Adobe® Acrobat®, A Guide to Related Products and Services

Participation Form

A separate participation form must be submitted for each product or service.

Company Information, as it should appear in the guide:

Company Name

Company Address

City

State

Zip

Company Phone

Company Fax

WWW Address

E-Mail Address (for customer use)

Contact Information

Name

Phone Number

E-Mail Address

Product Information

Are you advertising a product, service, or both?

If your product or service is trademarked, what is the appropriate trademark attribution?

What section would you like to be placed in?

If other, please specify:

What Platforms does your product or service support?

What is the price of your product or service if applicable?

Is your Product or service available now?

If not, when will it be available? (month/year)

In the section below, provide a complete description of your Acrobat related product or service, as you would like it to appear in the guide. Must be 1-2 paragraphs, approximately 100-500 words (please do not go over):

A company logo must be submitted to Adobe for placement in the guide.

Requirements:

- **submit logo on diskette, Jaz disk or CD-ROM by mail or email to grobles@adobe.com**
- **preferably in Adobe Illustrator, EPS, TIFF or PICT format**
- **resolution: 300 dpi or higher**
- **size: 1 inch x 1 inch**
- **If your logo contains fonts, please either include them or save the font as an outline font (create font into outlined artwork).**

If you would like additional marketing materials linked from your entry (i.e., brochure, pamphlet, press release, white paper, etc.) include them with your logo.

Requirements:

- **PDF file**
- **3MB or less in size**
- **MUST be related to your entry in the guide and ready to go**
