RISK MANAGEMENT PROGRAM GUIDANCE FOR WASTEWATER TREATMENT PLANTS (40 CFR PART 68)
This document provides guidance to help owners and operators of wastewater treatment plants to determine if their processes are subject to chemical accident prevention regulation under section 112(r) of the Clean Air Act and 40 CFR part 68 and to comply with regulations. This document does not substitute for EPA’s regulations, nor is it a regulation itself. Thus, it cannot impose legally binding requirements on EPA, states, or the regulated community, and may not apply to a particular situation based upon circumstances. EPA may change this guidance in the future, as appropriate.
